KEY PRODUCT FEATURES	
<p>WHAT ARE YOU INVESTING IN?</p> <ul style="list-style-type: none"> You are investing in a unit trust constituted in Singapore that aims to provide a total return of capital growth and income over the medium to long term by investing in equity investments listed and traded on the Tokyo Stock Exchange. In respect of the SGD Hedged (Acc) Class Units, the USD (Acc) Class Units and the USD Hedged (Acc) Class Units, no distributions will be made for these Classes. In respect of all other Classes, the Manager's current distribution policy is to make monthly distributions of approximately 5% to 7% per annum for each Class. If the Investment Income is insufficient to fund a distribution for the Fund, the Manager may, after consulting the auditors of the Fund and with the approval of the Trustee, determine that such distributions should be paid from the capital of the Fund. Where distributions are paid out of capital, the NAV of the relevant Class will be reduced. The base currency of the Fund is JPY. 	<p>Refer to Para 5, 7.1, 7.3 and 9.2.6 of the Prospectus for further information on features of the product.</p>
Investment Strategy	
<ul style="list-style-type: none"> The Fund's investment focus is to invest in a diversified portfolio of dividend producing equity investments listed and traded on the Tokyo Stock Exchange that offer attractive and sustainable dividends from companies with relatively strong sustainable cash flows, stable growth and stable dividend payout. The Fund will be actively managed and may allocate up to 30% of its NAV to cash to manage any downside market fluctuations. At the Fund level, the Fund's exposure to the JPY will be unhedged. There is no target industry or sector. 	<p>Refer to Para 7.1 of the Prospectus for further information on the investment strategy of the Fund.</p>
Parties Involved	
<p>WHO ARE YOU INVESTING WITH?</p> <ul style="list-style-type: none"> The Manager is Nikko Asset Management Asia Limited. The Trustee is BNP Paribas Trust Services Singapore Limited. The custodian is BNP Paribas, acting through its Singapore branch. Nikko Asset Management Co., Ltd is the sub-manager of the Fund. 	<p>Refer to Para 2 to 4 of the Prospectus for further information on the role and responsibilities of these entities and what happens if they become insolvent.</p>
KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</p> <p>You should be aware that the price of Units can go down as well as up. The value of the product and its dividends or coupons may rise or fall. The following are key risk factors that may cause you to lose some or all of your investment:</p>	<p>Refer to Para 9, 11.6 and 14 of the Prospectus for further information on risks of the product.</p>
Market and Credit Risks	
<ul style="list-style-type: none"> You are exposed to market risk. The prices of the securities comprised in the portfolio of the Fund and the Units, and the income from them, may be influenced by political and economic conditions, changes in interest rates, the earnings of the corporations whose securities are comprised in the Fund's portfolio and the market's perception of such securities. You are exposed to the risk of investing in foreign securities. The investments of the Fund may be affected by political instability, exchange controls, changes in taxation, foreign investment policies and other restrictions and controls. The legal infrastructure and accounting, auditing and reporting standards in certain countries may not provide the same degree of investor 	

protection or information to investors as would generally apply in major securities markets. Foreign ownership restrictions in some markets may mean that corporate action entitlements may not always be secured or may be restricted.		
Liquidity Risks		
• The Fund is not listed and you can redeem only on Dealing Days.		
Product-Specific Risks		
<ul style="list-style-type: none">• You are exposed to country specific risk. The Fund invests predominantly in Japanese securities. It will be exposed to fluctuations in the Japanese economy, and the market, currency, political, social environment and other risks related specifically to Japan, which may affect the market price of the Fund's investments. Exposure to a single country also increases the potential volatility of the Fund as its investments would be less diversified as compared to having exposure to regional or global markets.• You are exposed to the risk associated with the investment strategy of the Fund. The value of the Units of each of the Hedged Classes depends not only on the exposure to and contribution from the equities portfolio held by the Fund but also the efficient use of financial derivative instruments ("FDIs"). The gains from the equities exposure may be offset from any losses from the forwards positions. Allocation to cash during rising market environment may also lead to a drag in performance.• You are exposed to income distribution risk. Sources of income for distribution to Holders include dividend and/or interest income and/or capital gains derived from the investments of the Fund. Such dividend and/or interest income may be adversely affected by events such as (but are not limited to) companies suffering unexpected losses or, having lower than expected dividends and adverse exchange rate fluctuations.• You are exposed to financial derivative risk. The Manager may invest in FDIs for the purpose of hedging the Fund's existing portfolio. FDIs involve risks different from, and in some cases, greater than, the risks presented by more traditional investments. Some of the risks associated with FDIs are market risk, management risk, credit risk, liquidity risk, moratorium risk, capital control risk, tax risk and leverage risk. The Fund may invest into underlying funds which use or invest in FDIs, and it is possible that the Fund's NAV may be subject to volatility due to the Fund's or the underlying funds' usage or investment in FDIs. <p>You should be aware that your investment in the Fund may be exposed to other risks of an exceptional nature from time to time.</p>
