Investment Objective

The fund aims to achieve capital growth over the long term. The fund invests at least 70% (and normally 75%) of its assets, in equities of companies that are headquartered or do most of their business in less developed countries of Asia that are considered as emerging markets. The fund may also invest in money market instruments on an ancillary basis. The fund invests at least 50% of its assets in securities of companies with favourable environmental, social and governance (ESG) characteristics. The fund will invest less than 30% of its assets (directly and/or indirectly) in China A and B Shares (in aggregate). The fund will invest less than 5% of its assets in SPACs. (For full details of the objective and other considerations please refer to the Prospectus)

Index

Market index: MSCI Emerging Markets Asia (N)
 Index is for comparative purpose only. The same index is used in the positioning tables on this factsheet.
 Index changed from MSCI Emerging Asia Composite Index to MSCI Emerging Asia Composite Index (Net) on 1 July 2011. The reason for the change is that a net index calculates performance net of withholding taxes which is more comparable with the calculation of the performance of the fund (also net of withholding taxes). With effect from 14 July 2022 the Index was changed to MSCI Emerging Markets Asia Index.

Definition of Terms

Annualised Volatility is a measure of how variable returns for a fund or comparative market index have been around their historical average. Two funds may produce the same return over a period. The fund whose monthly returns have varied less will have a lower annualised volatility and will be considered to have achieved its returns with less risk.

Beta is a measure of a fund's sensitivity to market movement (as represented by a market index). The beta of the market is 1.00 by definition. A beta of 1.10 shows that the fund could be expected to perform 10% better than the index in up markets and 10% worse in down markets, assuming all other factors remain constant. Conversely, a beta of 0.85 indicates that the fund could be expected to perform 15% worse than the market return during up markets and 15% better during down markets.

Sharpe Ratio is a measure of a fund's risk adjusted performance taking into account the return on a risk-free investment. The ratio allows an investor to assess whether the fund is generating adequate returns for the level of risk it is taking. The higher the ratio, the better the risk-adjusted performance has been. If the ratio is negative, the fund has returned less than the risk-free rate.

Active Money is the sum of the fund's overweight positions (including effective cash) when compared to the market index.

A position combines all equity investments (including derivatives) linked to an issuing company. Derivatives are included on an exposure basis so they reflect the equivalent underlying shares needed to generate the same return. Geographic and sector breakdown tables are calculated using the positions methodology.

FIL Investment Management (Singapore) Limited [FIMSL] (Co. Reg. No.: 199006300E) is a responsible entity for the fund in Singapore. Prospectus of the fund is available from FIMSL or its distributors upon request. Potential investors should read the prospectus before investing. All views expressed and references to specific securities are included for illustration only, and should not be construed as an offer or recommendation. This document is for information only and does not have regard to the specific investment objectives, financial situation and particular needs of the person who may receive it. Potential investor should seek advice from a financial adviser before investing. If that potential investor chooses not to seek advice from a financial adviser, he should consider whether the fund is suitable for him. Past performance of the fund is not indicative of the future performance. Prices can go up and down. The value of the shares of the fund and the income accruing to them may fall or rise. Investors investing in a fund denominated in a non-local currency should be aware of exchange rate risk. The fund is not available to US citizens, residents or greencard holders. This publication has not been reviewed by the Monetary Authority of Singapore. Fidelity, Fidelity International, and the Fidelity International logo and F symbol are trademarks of FIL Limited.

ESG Metrics

ESG refers to ‘environmental, social and governance’ criteria which are three central factors used in measuring the sustainability of an investment in securities of an issuer. By way of example, “environmental” may cover themes such as climate risks and natural resources scarcity, “social” may include labour issues and product liability risks such as data security and “governance” may encompass items such as business ethics and executive pay. The factsheet is a snapshot of the portfolio at the date indicated above. ESG ratings distribution may vary over time. Representation of this data is for informational purposes only. Please refer to the offering documents for details, including the investment objectives of the fund and risk factors associated with sustainable investing.

Sustainability Characteristics

	Fund	Index
MSCI ESG Fund Rating (AAA-CCC)**	A	N/R
Weighted Average Carbon Intensity (tCo2e/\$M Revenue)**	136.7	303.2
SFDR Classification	8	N/A

The calculations are not comprehensive. The metric says nothing about how the portfolio contributes to a low-carbon society. N/A will be displayed if there is no ESG data available for the fund/index or if the coverage of underlying securities is under 50%.

**ESG Fund rating based on holdings as at 31.12.23 with 83.2% security coverage.
Carbon intensity data based on holdings as at 30.04.24 with 93.9% security coverage.
*NR - Not rated

MSCI Ratings Distribution

Glossary

MSCI ESG Fund Rating: This shows the funds ESG rating based on the Quality Scores given to the fund by MSCI. This ranges from AAA, AA (Leader), A, BBB, BB (Average) to B, CCC (Laggard).

Weighted Average Carbon Intensity: Provides a snapshot of the fund’s exposure to carbon-intensive companies. Greenhouse gas emissions are based on portfolio weights, rather than ownership share, to allow for comparison across multiple asset classes. The smaller the value shows, the lower the greenhouse gas emissions.

SFDR Classification: Shows the classification given to each fund as part of the EU Sustainable Finance Disclosure Regulation (SFDR). Article 9 funds aim to achieve an ESG outcome and are products with ESG objectives. Article 8 funds focus on promoting ESG characteristics and this must be a primary focus of the product. Article 6 funds integrate sustainability risks into investment analysis and decision-making, without the funds promoting environmental or social characteristics or having sustainable investments as their objective.

MSCI ESG Ratings Distribution: This shows the percentage distribution of ESG ratings in the fund, based on the Net Asset Value of holdings excluding cash, liquidity funds, derivatives and Exchange Traded Funds.
