KEY PRODUCT FEATURES			
WHAT ARE YOU INVESTING IN? <ul style="list-style-type: none"> • You are investing in a collective investment scheme that is a sub-fund of the Luxembourg incorporated SICAV Columbia Threadneedle (Lux) I (formerly known as Threadneedle (Lux)), and which seeks to achieve capital appreciation which is directly and indirectly linked to commodity markets. • The distribution policies of the Share Classes are as follows: Share Classes whose denomination ends in a “P” or “C”: Dividend, if declared, will be distributed. Dividends may include an element of capital which will have an impact on capital appreciation. The payment of dividends will result in an immediate decrease in the net asset value per share regardless of whether or not they are paid out of capital. Other Share Classes: No dividend distribution. Income, if any, will be re-invested. 			Refer to “The SICAV”, “The Portfolios”, “Investment Objective, Focus and Approach”, and “Distribution Policy” of the Singapore Prospectus for further information on features of the product.
Investment Strategy			
<ul style="list-style-type: none"> • The Portfolio is actively managed and will invest in financial derivative instruments (including total return swaps) whose underlying instruments are diversified commodity indices or sub-indices composed of future contracts on physical commodities. • To create under and overweight positions relative to the reference portfolio in individual commodities and commodity sectors, the Portfolio intends to use a combination of long and short positions in diversified commodity indices. • The Portfolio will invest its collateral in Investment Grade government debt with maturities less than one year. • The Portfolio may also invest in exchange traded funds and securitised notes, certificates, Investment Grade government securities, Money Market Instruments, cash and/or other debt securities. • For the purposes of managing liquidity, the Portfolio may hold ancillary liquid assets (i.e. bank deposits at sight), and may also hold bank deposits, Money Market Instruments or money market funds for treasury purposes. In normal market conditions, investments in these assets or instruments will not exceed 10% of the Portfolio’s Net Asset Value. • The Portfolio is actively managed in reference to the Bloomberg Commodity Index. Deviations from the index, including guidance on the level of risk relative to the index, will be considered as part of the Sub-Advisor’s risk 			Refer to “Investment Objective, Focus and Approach” of the Singapore Prospectus for further information on the investment strategy.

¹ The Singapore Prospectus is available for collection during normal Singapore business hours from Singapore distributors for the Portfolio or accessible at www.columbiathreadneedle.sg.

<p>monitoring process.</p> <ul style="list-style-type: none"> • The Portfolio will use derivatives for investment purposes, and may use derivatives for hedging and efficient portfolio management. • Hedging between the currency of the Class and the base currency of the Portfolio will be carried out for Classes whose denomination ends in a "H" or "C". These Classes will be hedged, with the objective of minimising currency risk exposure. This activity may increase or decrease the return to investors in those Classes. 	
Parties Involved	
<p>WHO ARE YOU INVESTING WITH?</p> <ul style="list-style-type: none"> • The umbrella fund under which the Portfolio is constituted is Columbia Threadneedle (Lux) I (the "SICAV"). • The Management Company of the SICAV is Threadneedle Management Luxembourg S.A. • The Sub-Advisor of the Portfolio is Threadneedle Asset Management Limited. The Sub-Advisor may delegate the discretionary investment management of part of the assets of the Portfolio to one or more third parties within the Ameriprise Financial, Inc. group of companies (currently delegated to Columbia Management Investment Advisers, LLC). • The Depositary for the SICAV is Citibank Europe plc, Luxembourg Branch. 	<p>Refer to "The SICAV", "Management and Administration" and "Other Parties" of the Singapore Prospectus for further information on the role and responsibilities of these entities and what happens if they become insolvent.</p>
KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT</p> <p>The value of the product and its dividends or coupons (if any) may rise or fall. These risk factors may cause you to lose some or all of your investment:</p>	<p>Refer to "Risk Factors" of the Singapore Prospectus for further information on the risk of the product.</p>
Market and Credit Risks	
<ul style="list-style-type: none"> • General market risks. The value of investments may fall as well as rise and you may not get back the sum originally invested, especially if investments are not held for the long term. • Exchange rate risks. Where investments are made by the Portfolio in assets that are denominated in currencies other than USD (the base currency of the Portfolio), changes in exchange rates may affect the value of your investments. The Portfolio and share classes offered may not be denominated in SGD and you may therefore be exposed to additional exchange rate risks if your reference currency is SGD. 	
Liquidity Risks	
<ul style="list-style-type: none"> • The Portfolio is not listed in Singapore and you can redeem only on Valuation Dates (subject to the opening hours of the Singapore distributors). There is no secondary market for the Portfolio in Singapore. All redemption requests should be submitted in the manner set out in the Singapore Prospectus. • Your right to request for redemption may be suspended or deferred in certain circumstances. 	
Product-Specific Risks	
<ul style="list-style-type: none"> • Derivatives risks and leverage risks. Leverage amplifies the effect that a change in the price of an investment has on the Portfolio's value. As such, leverage can enhance returns to investors but can also increase losses. The use of derivatives by the Portfolio may increase the volatility of the Portfolio and may involve a small investment of cash relative to the magnitude of risk assumed. In addition, these techniques could result in a loss if the counterparty of the transaction does not perform as promised. If the Management Company or the Sub-Advisor judges market conditions incorrectly or employs a strategy that does not correlate well with the Portfolio's investments, these techniques could result in a loss. • The use of derivatives by the Portfolio for investment purposes may increase the risk profile of the Portfolio. • Risks of financial derivatives on indices or sub-indices. The Portfolio invests in financial derivatives on indices or sub-indices. There is no assurance that the underlying index or sub-index will continue to be calculated and published or will not be amended. Any change to such underlying index or sub-index may adversely affect the value of the relevant derivative held by the Portfolio. The Sub-Advisor will not actively manage the underlying components of such financial derivatives as the selection will be made in accordance with index composition rules and eligibility criteria (and not by reference to performance criteria or outlook). The value of the underlying indices or sub-indices and the techniques used to link the investment to them may vary over time and may increase or decrease by reference to factors including corporate actions, macro-economic factors and speculation. • Risks of commodity indices. Commodity indices in which the Portfolio invests are affected by the underlying commodity markets which may perform very differently to traditional securities markets. Prices of commodities may be affected by various factors such as supply and demand, government policies, political and economic events, weather and trade, etc. Fluctuations in the prices of commodities and level of the relevant indices may 	

<p>increase the volatility of the Portfolio. The Portfolio will gain exposure to commodity indices which derive their price from commodity futures. The price of these futures can be driven by speculators, and may therefore be extremely volatile. The Portfolio invests in commodity derivatives rather than physical commodities. Therefore, changes in the spot prices of the underlying commodities will not be exactly mirrored in the Portfolio price.</p> <ul style="list-style-type: none"> • Volatility risks. The Portfolio may exhibit significant price volatility. • Valuation risks. The Portfolio may invest in assets that are not readily realisable or may be hard to value. The value of these assets is a matter of the relevant valuation agent's policy and the true value may not be recognised until the asset is sold. • Counterparty risks. The fund may enter into financial transactions with selected counterparties. Any financial difficulties arising at these counterparties could significantly affect the availability and the value of fund assets. • Sustainability risks. The Portfolio is potentially exposed to environmental, social or governance events or conditions that, if occurring, could cause a material negative impact on the value of the Portfolio's investment.
