- ▶ Are comfortable with the volatility and risks related to investing in fixed income securities and structured products with effective underlying currency exposure in RMB
- ▶ Understand that the principal of the Sub-Fund will be at risk

Refer to paragraph 3.1 “Investment Objectives, Focus and Approach” of the Singapore Prospectus and section 3.2 “Sub-Funds details” of the Luxembourg Prospectus for further information on product suitability.

KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- ▶ You are investing in a Sub-Fund of the HSBC Global Investment Funds (the “Fund”), an investment company (*Société d’Investissement à Capital Variable*) incorporated in the Grand Duchy of Luxembourg and qualifying as an Undertaking for Collective Investment in Transferable Securities (UCITS) complying with the provisions of Part I of the 2010 Law. The Fund is structured as an umbrella fund offering Shares in the Sub-Fund for investment.
- ▶ Investment Objective
The Sub-Fund aims to provide long term total return by investing in a portfolio of RMB fixed income securities.
- ▶ For Distribution Share Classes of a Sub-Fund (if made available for subscription), distributions out of capital (if any) will reduce the Net Asset Value of the relevant Share Class of the Sub-Fund.

Refer to paragraphs 1 and 3.1 “Investment Objectives, Focus and Approach” of the Singapore Prospectus and section 3.2 “Sub-Funds details” of the Luxembourg Prospectus for further information on features of the product.

INVESTMENT STRATEGY

The Sub-Fund invests primarily in RMB debt securities including:

- Offshore fixed income securities denominated in RMB and issued outside of the People’s Republic of China (“PRC”);
- Onshore fixed income securities denominated in RMB, issued within the PRC and traded on the China Interbank Bond Market (“CIBM”) or stock exchanges in the PRC.

Refer to section 3.2 “Sub-Funds details” of the Luxembourg Prospectus for details on the structure of the Sub-Fund.

¹ The Singapore Prospectus is accessible at <http://www.assetmanagement.hsbc.com/sg>.

² The expense ratios for Share Classes offered less than 1 year are computed on an annualised basis.

The Sub-Fund may achieve RMB exposure through investment in structured products (for example credit linked notes) with underlying currency exposure to the RMB outside of the PRC. The Sub-Fund may also invest in non-RMB denominated fixed income securities and achieve RMB exposure using financial derivative instruments.

The Sub-Fund will invest in Investment Grade and Non-Investment Grade rated, unrated fixed income and other similar securities (including, but not limited to, bonds, certificate of deposits and money market instruments) which are either issued or guaranteed by governments, government agencies and supranational bodies or by companies.

The Sub-Fund may invest in onshore fixed income securities traded on the CIBM (for example bonds issued by municipal and local governments, companies and policy banks and urban investment bonds). The Sub-Fund may invest in the CIBM either through Bond Connect and/or the CIBM Initiative. The Sub-Fund may invest up to 100% of its net assets in onshore fixed income securities issued or guaranteed by the PRC central government, quasi-central government organizations and central government agencies in the PRC and supranational bodies. For the purpose of the Sub-Fund, an onshore fixed income security is "unrated" if neither the security itself nor its issuer has a credit rating assigned by PRC local credit agencies or by independent rating agencies such as Fitch, Moody's and Standard & Poor's. The Sub-Fund will not invest more than 10% of its net assets in onshore fixed income securities which are rated below Investment Grade, i.e. rated BB+/Ba1 or below, as assigned by internationally recognised credit rating agencies, or rated AA or below by mainland China local credit rating agencies, or which are unrated.

The Sub-Fund may also invest in bank deposits, money market instruments or money market funds for treasury purposes.

The Sub-Fund may use financial derivative instruments for hedging purposes and efficient portfolio management purposes. The Sub-Fund may also use, but not extensively, financial derivative instruments for investment purposes.

The Sub-Fund can enter into Securities Lending transactions for up to 29% of its net assets, however, it is expected that this will not exceed 25%.

The Sub-Fund is actively managed and does not track a benchmark. The reference benchmark for Sub-Fund market comparison purposes is Offshore Renminbi Overnight Deposit Rate.

KEY RISKS

WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

- ▶ The value of the Sub-Fund's assets may rise or fall due to normal market fluctuations and investors may not get back all of their investment.

Refer to paragraph 6 "Risks" of the Singapore Prospectus and sections 1.4 "General Risk Considerations" and 3.3 "Sub-fund specific risk considerations" of the Luxembourg Prospectus for further information on risks of the product.

MARKET AND CREDIT RISKS

- ▶ **You are exposed to Foreign Exchange Risk**
Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- ▶ **You are exposed to Interest Rate Risk**
Bonds and other fixed income securities are more susceptible to fluctuation in interest rates and may fall in value if interest rates change.
- ▶ **You are exposed to Credit Risk**
A bond or money market security could lose value if the issuer's financial health deteriorates.

LIQUIDITY RISKS

- ▶ The Sub-Fund is not listed in Singapore and there is no secondary market for its Shares. You can only redeem your investment on a Dealing Day through the Sub-Fund.
- ▶ Investment of the Sub-Fund's assets in relatively illiquid investments may restrict the ability of the Sub-Fund to dispose of its investments at a price and time that it wishes to do so. This may result in a loss to the Sub-Fund.

PRODUCT-SPECIFIC RISKS

- ▶ **You are exposed to Non-Investment Grade Debt Risk**
Credit risk may be greater for Non-Investment Grade securities as they may be subject to a higher risk of default and greater price volatility.
Investment grade bonds may be subject to the risk of being downgraded to non-investment grade bonds. In the event of downgrading, the Sub-Fund's investment value in the relevant securities may be adversely affected.
- ▶ **You are exposed to RMB Currency and Exchange Risk**
Chinese Renminbi (RMB) is subject to a managed floating exchange rate based on market supply and demand with reference to a basket of currencies. Currently, the RMB is traded in two markets: one in Mainland China, and one outside Mainland China (primarily in Hong Kong). The RMB traded in Mainland China is not freely convertible and is subject to exchange controls and certain requirements by the government of Mainland China. The RMB traded outside Mainland China, on the other hand, is freely accessible to any person or entity for any purpose. Non-RMB based investors are exposed to foreign exchange risk and there is no guarantee that the value of RMB against the investors' Home Currency will not depreciate. Any depreciation of RMB could adversely affect the value of investor's investment in a Sub-Fund. Although offshore RMB (CNH) and onshore RMB (CNY) are the same currency, they trade at different rates. Any divergence between CNH and CNY may adversely impact investors.
- ▶ **You are exposed to Chinese Markets Risk**
Investing in emerging markets such as the PRC subjects the Sub-Fund to a higher level of market risk than investments in a developed country.
- ▶ **You are exposed to China Interbank Bond Market**
Investments in the CIBM are subject to these risks: market and liquidity risks, Chinese local credit rating risks, counterparty and settlement risk, operational risk, quasi-Government/local Government bond risk, urban investment bonds risk and regulatory risk.
- ▶ **You are exposed to Contingent Convertible Securities (CoCos) Risk**
Contingent convertible securities are risky and highly complex instruments that are comparatively untested. Depending on their category, income payments may be cancelled, suspended or deferred by the issuer and they are more vulnerable to losses than equities..
- ▶ **You are exposed to Derivative Risk**
Financial derivative instruments may be leveraged and their prices can be very volatile. Investment in these instruments may result in losses in excess of the original amount invested. If the issuers of the derivative instruments default, or such securities or their underlying assets cannot be realized, or perform badly, investors may suffer substantial or, in certain cases, total loss of their investments. Governmental regulation and supervision of transactions on the OTC markets is generally lesser than of transactions on organized exchanges.

Thus, investing in OTC derivatives involves higher counterparty risk and liquidity risk.
