<p>weightings diverge from the benchmark and may invest in securities which are not included in the benchmark. The investments of the Underlying Fund may deviate significantly from the components of and their respective weightings in the benchmark. Due to the active and sustainable nature of the management process, the Underlying Fund's performance profile may deviate significantly from that of the benchmark.</p> <ul style="list-style-type: none"> • The Underlying Fund promotes environmental or social characteristics but does not have a sustainable investment objective. The Underlying Fund contains high-quality companies that have been identified through the bottom-up equity research process which takes into consideration the sustainability of the business in its broadest sense and the company's ESG performance. A minimum of 90% of the Underlying Fund's assets are aligned with Environmental/Social characteristics. Investment in all equity and equity-related securities will follow abrdn's "All China Sustainable Equity Investment Approach". Through the application of this approach the Underlying Fund has an expected minimum of 20% in Sustainable Investments. Furthermore, the Underlying Fund targets an ESG rating that is equal to or better, and a meaningfully lower carbon intensity, than the benchmark. • This approach utilises abrdn's equity investment process, which enables portfolio managers to qualitatively identify and focus investment in sustainable leaders and improvers. Additionally, abrdn applies a set of company exclusions which are related to the United Nations Global Compact, Norges Bank Investment Management (NBIM), Weapons, Tobacco, Gambling, Thermal Coal, Oil & Gas and Electricity Generation. • The All China Sustainable Equity Investment Approach reduces the benchmark investable universe by a minimum of 20%. • The Underlying Fund may utilise financial derivative instruments for hedging and/or investment purposes, or to manage foreign exchange risks, subject to the conditions and within the limits laid down by applicable laws and regulations. The use of derivatives for hedging and/or investment purposes is expected to be very limited, mainly in those cases where there are significant inflows into the Underlying Fund so that cash can be invested while the Underlying Fund's investments in equity and equity related securities is maintained.

If the creditors of the QFII successfully assert that the securities and other assets in the nominee accounts are owned by the QFII and not the relevant Underlying Fund, the creditors of the QFII may seek payment from the assets of the relevant Underlying Fund, which could in turn affect the net asset value of the Fund.</p> <p>You are exposed to additional risks related to the Underlying Fund's investment in Chinese securities through the Shanghai-Hong Kong Stock Connect program. The Underlying Fund may invest in certain eligible China A-shares through the Shanghai-Hong Kong Stock Connect program, which is subject to other risks, including regulatory change, clearing and settlement risks, recalling of eligible stocks, quota limitations and also operational constraints, amongst other matters, which may result in increased risk.</p> <p>You are exposed to Variable Interest Entity ("VIE") risk.
