<b>MARKET AND CREDIT RISKS</b>	
<b>The Sub-Fund may be exposed to Emerging Markets Risk</b> <ul style="list-style-type: none"> <li>The Sub-Fund may invest in Emerging Markets which tend to be more volatile than mature markets and its value could move sharply up or down. In some circumstances, the underlying investments may become less liquid which may constrain the Investment Managers’ ability to realise some or all of the portfolio. The registration and settlement arrangements in Emerging Markets may be less developed than in more mature markets so the operational risks of investing are higher. Political risks and adverse economic circumstances are more likely to arise.</li> </ul> <b>The Sub-Fund may be exposed to Frontier Markets Risk</b> <ul style="list-style-type: none"> <li>The Sub-Fund may also invest in Frontier Markets which involves similar risks, but to a greater extent since they tend to be even smaller, less developed, and less accessible than other Emerging Markets.</li> </ul> <b>The Sub-Fund may be exposed to smaller companies Risk</b> <ul style="list-style-type: none"> <li>The Sub-Fund invests in the shares of smaller companies which may be less liquid and more volatile than those of larger companies.</li> </ul>	
<b>LIQUIDITY RISKS</b>	
<ul style="list-style-type: none"> <li>The Sub-Fund is not listed and you can redeem only on a Singapore business day which is also a Dealing Day.</li> <li>The Company may refuse any redemption requests if all relevant documentation has not been submitted, if such redemption would result in non-compliance with the Minimum Holding requirement, or in any other circumstances agreed with the Sub-Fund and notified to you.</li> </ul>	
<b>PRODUCT-SPECIFIC RISKS</b>	
<b>The Sub-Fund may be exposed to Sub-Investment Grade Bonds Risk</b> <ul style="list-style-type: none"> <li>The Sub-Fund’s portfolio may have a significant position in sub-investment grade bonds, which means that there may be more risk to investor’s capital and income than from a fund investing in investment grade bonds.</li> </ul>	

**The Sub-Fund may be exposed to Equities Risk**

- The Sub-Fund's exposure to equities means that investors are exposed to stock market movements which may increase volatility in the Net Asset Value of the Sub-Fund.

**The Sub-Fund may be exposed to REITs Risk**

- The Sub-Fund may invest in REITs which themselves invest directly in real estate - under adverse market or economic conditions such assets may become less liquid or experience a drop in value.

**The Sub-Fund may be exposed to Financial Derivative Instruments Risk**

- The Sub-Fund may utilise financial derivative instruments for investment purposes in pursuing its investment objective (in addition to use for hedging purposes). Use of derivatives other than for hedging may result in leverage and may increase volatility in the Net Asset Value of the Sub-Fund. The Sub-Fund may have a higher volatility due to its investment policies or portfolio management techniques.

**The Sub-Fund may be exposed to Interest Rate Risk and Credit Risk**

- The Sub-Fund's underlying investments are subject to interest rate risk and credit risk. Interest rate fluctuations affect the capital value of investments. Where long-term interest rates rise, the capital value of bonds is likely to fall and vice versa. Credit risk reflects the ability of a bond issuer to meet its obligations. Where a bond market has a low number of buyers and/or a high number of sellers, it may be harder to sell particular bonds at an anticipated price and/or in a timely manner.

**The Sub-Fund may be exposed to ABS risk**

- The Sub-Fund may invest its assets in ABS including MBS. ABS and MBS assets may be highly illiquid and therefore prone to substantial price volatility.

**The Sub-Fund may be exposed to ESG Investment Risk**

- Applying ESG and sustainability criteria in the investment process may result in the exclusion of securities in which the Sub-Fund might otherwise invest. This may have a positive or negative impact on performance and may mean that the Sub-Fund's performance profile differs to that of funds which are managed against the same benchmark or invest in a similar universe of potential investments but without applying ESG or sustainability criteria. Furthermore, the lack of common or harmonised definitions and labels regarding ESG and sustainability criteria may result in different approaches by managers when integrating ESG and sustainability criteria into investment decisions.
