PRODUCT SUITABILITY

WHO IS THE PRODUCT SUITABLE FOR?

The Sub-Fund is only suitable for investors who:

- seek positive return while reducing the risk of capital losses over the medium term through exposure to global debt markets;
- understand the portfolio may have significant exposure to higher risk assets (such as high yield, emerging market debt and MBS/ABS) and are willing to accept those risks in search of potential higher returns; and
- are looking to use it as part of an investment portfolio and not as a complete investment plan.

The principal of the Sub-Fund may be at risk.

You should consult your financial advisor on the suitability of the Sub-Fund for you if you are in doubt.

Further Information

Refer to “Sub-Fund Descriptions – Income Opportunity Fund” of the Prospectus for further information on product suitability.

KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

You are investing in a sub-fund of the Fund, an open-ended investment company organised as a société anonyme under the laws of the Grand Duchy of Luxembourg and qualifying as a SICAV and a UCITS.

The Sub-Fund aims to achieve a return in excess of the benchmark by exploiting investment opportunities in, amongst others, the debt and currency markets, using derivatives where appropriate.

Refer to “Fund Business Operations”, “Share Classes and Costs” and “Sub-Fund Descriptions – Income Opportunity Fund” of the Prospectus for further information on features of the product.

¹ The Prospectus is available for collection from the Singapore Representative at 88 Market Street, 30th Floor, CapitaSpring, Singapore 048948 or any appointed Singapore distributor.

Investment Strategy

The Sub-Fund invests the majority of assets in a broad range of government and corporate debt securities from issuers anywhere in the world, including emerging markets.

The Sub-Fund is expected to invest between 10% and 30% of its assets in MBS and/or ABS of any credit quality, however, due to the unconstrained investment approach, the actual investment level may vary.

The Sub-Fund may also invest in other assets such as convertible securities, equities, ETFs and REITs. To a limited extent, the Sub-Fund may invest in distressed debt securities and securities in default.

There are no credit quality restrictions applicable to the investments.

The Sub-Fund may also invest in catastrophe bonds to a limited extent.

The Sub-Fund may hold up to 5% of its assets in contingent convertible bonds.

Refer to “Sub-Fund Descriptions – Income Opportunity Fund” of the Prospectus for further information on the investment strategy of the Sub-Fund.

Parties Involved

JPMorgan Investment Funds is the umbrella fund company of the Sub-Fund.

The Management Company is JPMorgan Asset Management (Europe) S.à r.l..

The Investment Manager is J.P. Morgan Investment Management Inc..

The Depository is J.P. Morgan SE – Luxembourg Branch.

Refer to “Fund Business Operations” – of the Prospectus for further information on the role and responsibilities of these entities and what happens if they become insolvent.

KEY RISKS

WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The Sub-Fund may have a higher volatility to its NAV due to its investment policy when compared to sub-funds investing in global markets, with broader investment policies and/or are a less volatile asset class.

Refer to “Risk Descriptions” and “Sub-Fund Descriptions – Income Opportunity Fund” of the Prospectus for further information on risks and other associated risks of the product.

Market and Credit Risks

YOU ARE EXPOSED TO MARKET AND CREDIT RISKS

Catastrophe bonds may lose part or all of their value if a trigger event occurs (such as a natural disaster or financial or economic failure).

Contingent convertible bonds are likely to be adversely impacted should specific trigger events occur. This may result in the bond converting to equity at a discount, the value being written down and/or coupon payments ceasing or being deferred.

Debt securities (bonds) including those issued or guaranteed by governments and their agencies carry credit risk and interest rate risk. The Sub-Fund is also exposed to risks associated with investing in Government debt, Investment grade debt, Below Investment grade debt, Unrated debt and Distressed debt.

Emerging markets may be subject to increased political, regulatory and economic instability, less developed custody and settlement practices, poor transparency, greater financial risks, higher volatility and lower liquidity than developed markets.

Equities – The value of equity securities may go down as well as up in response to the performance of individual companies and general market conditions sometimes rapidly or unpredictably.

MBS/ABS depend on the cash flows from a specified pool of financial assets and are subject to greater credit, liquidity, pre-payment and interest rate risk and may be more volatile and less liquid than other bonds.

REITs are subject to the risks associated with the ownership of real estate which may expose the Sub-Fund to increased liquidity risk, price volatility and losses due to changes in economic conditions and interest rates.

UCITS, UCIs and ETFs – Investment decisions in respect of the underlying funds are made independently of the Sub-Fund, therefore there can be no assurance that effective diversification of the Sub-Fund’s exposure will always be achieved. The price and movement of an ETF and/or closed-end fund designed to track an index may not track the underlying index and may result in a loss.

Credit – A bond will generally lose value if the issuer’s financial health deteriorates, or appears likely to. An issuer could go into default (become unwilling or unable to make payments on their bonds), which often will make the bond illiquid or worthless.

YOU ARE EXPOSED TO CURRENCY RISKS

Currency – Movements in currency exchange rates can adversely affect the return of your investment. Investing in a share class not denominated in SGD will expose you to additional currency risks.

Hedging – Any measures taken to offset specific risks could work imperfectly. Hedging may be used to mitigate currency, duration, market or credit risk. Hedging involves costs, which reduce investment performance.

Liquidity Risks

The Sub-Fund is not listed and you can redeem only on a Singapore Dealing Day.

If the total requests for redemptions and switches out of the Sub-Fund on any Valuation Day exceeds 10% of the total value of Shares in issue of the Sub-Fund, the Management Company reserves the right to defer any requests in excess of 10% until the next Valuation Day. On the next Valuation Day(s), deferred requests will be dealt with in priority to later requests.

Product Specific Risks

YOU ARE EXPOSED TO DERIVATIVES RISKS

The Sub-Fund may use derivatives to achieve its investment objective. The Sub-Fund may also, within its prescribed limits, invest in derivatives for hedging and Efficient Portfolio Management purposes.

The value of derivatives can be volatile because a small movement in the value of the underlying asset can cause a large movement in the value of the derivative, resulting in losses in excess of the amount invested by the Sub-Fund.
