PRODUCT SUITABILITY

WHO IS THE PRODUCT SUITABLE FOR?

- The fund is only suitable for investors who:
 - o have a basic knowledge of and no or limited experience of investing in funds;
 - o plan to hold their investment for a recommended holding period of at least 3 years;
 - o seek capital growth over the recommended holding period; and
 - o understand the risk of losing some or all of the capital invested

Please consult your financial adviser / intermediary to determine if the fund is suitable for you.

Further Information

Refer to “Investment objective and policy” in the Prospectus for further information on product suitability.

KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- You are investing in a sub-fund of an open-ended investment scheme established in Luxembourg as a société d'investissement à capital variable.
- The fund aims to provide an absolute positive return with low correlations to traditional asset classes over the medium to long term.

Refer to “Investment objective and other considerations” and “Distribution policy” in the Prospectus for further information on the features and distribution policy of the fund.

¹ The latest Prospectus and Product Highlights Sheet are available at www.fidelity.com.sg and from the Singapore Representative.

² Figures relate to share classes that have been inceptioned as at the stated date. For classes inceptioned for less than a year, figures are calculated from the relevant inception date and annualised.

Investment Strategy	
<ul style="list-style-type: none"> The fund uses a combination of diverse investment strategies in order to achieve its objective, include arbitrage, equity hedge, fixed income and macro strategies. The strategies will be primarily implemented by taking long and short exposure to a range of asset classes such as equities, corporate and government investment grade and below investment grade bonds, infrastructure, property, commodities, money market instruments and currencies from anywhere in the world, including emerging markets. These investments may be denominated in any currency. The fund may invest in the following assets according to the percentages indicated: <ul style="list-style-type: none"> China A and B Shares and listed onshore bonds (including urban investment bonds) (directly and/or indirectly): less than 30% (in aggregate) collateralised and securitised debt instruments: less than 20% eligible commodity exposure: up to 10% hybrids and contingent convertible (CoCo) bonds: less than 30%, with less than 20% in CoCos SPACs: less than 5%. The fund may also invest in China offshore bonds (including dim sum bonds). The fund's exposure to distressed securities is limited to 10% of its assets. The Investment Manager aims to outperform the benchmark. The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may use long or short positions. 	Refer to "Investment objective and other considerations" in the Prospectus for further information on the investment strategy.
Parties Involved	
WHO ARE YOU INVESTING WITH? <ul style="list-style-type: none"> The fund is a sub-fund of Fidelity Funds ("SICAV"). The Manager is FIL Investment Management (Luxembourg) S.A.. The Investment Manager is FIL Fund Management Limited, who may sub-delegate the investment management of the fund to one or more investment sub-managers (including any of their branches) within or outside of the FIL Group as stated in the Prospectus. The Depositary is Brown Brothers Harriman (Luxembourg) S.C.A.. The Singapore Representative is FIL Investment Management (Singapore) Limited. 	Refer to "Management and administration" in the Prospectus for further information on the roles and responsibilities of these entities and what happens if they become insolvent.
KEY RISKS	
WHAT ARE THE KEY RISKS OF THIS INVESTMENT? Investment involves risk. The value of the fund and its dividends (if any) may rise or fall. These risk factors, among others, may cause you to lose some or all of your investment (including your principal invested).	Refer to "Risk factors" in the Prospectus for further information on the risks of the fund.
Market and Credit Risks	
You are exposed to China risk. <ul style="list-style-type: none"> The legal rights of investors in mainland China are uncertain, government intervention is common and unpredictable, some major trading and custody systems are unproven, and investments are likely to have comparatively high volatility and greater liquidity and counterparty risks. You are exposed to credit risk. <ul style="list-style-type: none"> A bond or money market instrument could fall in price, and become more volatile and less liquid, if the credit quality of the issuer or the security declines. In extreme cases, a debt investment could go into default. You are exposed to emerging markets risk. <ul style="list-style-type: none"> Emerging markets are less established, and more volatile, than developed markets. They involve higher risks, particularly market, credit, illiquid security, legal, custody, valuation and currency risks. You are exposed to equities risk. <ul style="list-style-type: none"> Equities can lose value rapidly, and typically involve higher market risks than bonds or money market instruments. You are exposed to market risk. <ul style="list-style-type: none"> Prices and yields of securities can change frequently with significant volatility based on a wide variety of factors, such as political and economic news, government policy and climate patterns. 	
Liquidity Risks	
The fund is not listed and you can redeem only on Dealing Days. <ul style="list-style-type: none"> There is no secondary market for the fund. All redemption requests should be made to the Singapore Representative or the Manager. You are exposed to liquidity risk. <ul style="list-style-type: none"> A security could be hard to value or to sell at a desired time and price, affecting the fund's value and its ability to pay redemption proceeds. 	
Product-Specific Risks	
You are exposed to CoCo bonds risk. <ul style="list-style-type: none"> Contingent convertible securities are comparatively untested, more vulnerable to losses than equities, carry extension risk, can be highly volatile, and their issuers can cancel or modify scheduled income payments at will. 	

Product-Specific Risks
You are exposed to commodities risk.

- Commodities tend to be highly volatile, and may be disproportionately affected by political, economic, weather, trade, agricultural and terrorist-related events, and energy and transportation costs.

You are exposed to convertible securities risk.

- Convertible securities carry both equity risk and the credit and default risks typical of bonds.

You are exposed to counterparty and collateral risk.

- A counterparty could be unwilling or unable to meet its obligations to the fund. The value of collateral might not cover the full value of a transaction, or any fees or returns owed to the fund.

You are exposed to currency risk.

- Any changes in currency exchange rates could significantly reduce investment gains or income, or increase investment losses.

You are exposed to derivatives risk.

- The value of derivatives can be volatile. Small movements in an underlying asset's value can create large changes in the derivative's value and expose the fund to losses that could be greater than the cost of the derivative itself.

You are exposed to distressed securities risk.

- Distressed securities involve significant risk. They are highly volatile and may not yield an attractive return

You are exposed to hedging risk.

- Hedging may not work as intended and involves costs, which reduce investment performance.

You are exposed to high yield risk.

- High yield securities are speculative. Compared to investment grade bonds, such securities are more volatile, more sensitive to economic events, less liquid and carry greater default risk.

You are exposed to interest rate risk.

- When interest rates rise, bond values generally fall. This risk is greater the longer a bond investment's duration.

You are exposed to investment fund risk.

- Investing in a fund involves certain risks an investor would not face if investing in markets directly, such as large outflows, valuation error and investment limitations.

You are exposed to leverage risk.

- To the extent that the fund uses derivatives or securities lending to increase its net exposure to any market, rate, basket of securities or other financial reference source, fluctuations in the price of the reference source will be amplified.

You are exposed to operational risk.

- The fund could suffer losses due to errors, service disruptions or other failures, fraud, corruption, cyber crime, instability, terrorism or other irregular events.

You are exposed to real estate risk.

- Real estate investment trusts tend to have above-average volatility, and can be hurt by mortgage-related risks or by any factor that makes an area or individual property less valuable.

You are exposed to securitisation risk.

- Mortgage-backed and asset-backed securities and other types of collateralised debt security carry prepayment and extension risk and above-average liquidity risk.

You are exposed to short position risk.

- Taking a short position through derivatives creates losses when the underlying security's value rises. The use of short positions may increase the risk of both loss and volatility.

FEES & CHARGES
WHAT ARE THE FEES AND CHARGES OF THIS INVESTMENT?
Payable directly by you

- You will need to pay the following fees and charges. Subscriptions for shares through any financial adviser / intermediary may incur additional fees and charges.

Entry fee	o Class A shares: Up to 5.25% of NAV per share
Exit fee	o Currently NIL
Switching fee	o If you paid no entry fee on the shares being switched, you may be charged up to the full entry fee for the shares into which you are switching. If you paid an entry fee, you may be charged a switching fee of up to 1.00% of NAV per share.

Payable by the fund from invested proceeds on a per-annum basis

- The fund will pay the following fees and charges to the Investment Manager and other parties. Other fees and charges may be payable by the fund, as described in the Prospectus.

Management fee (MF) (a) Retained by Investment Manager (b) Paid to financial adviser (trailer fee) ³	o Class A shares: Up to 1.40% of NAV (a) 34% to 100% of MF (b) 0% to 66% of MF Maximum 2.00% of NAV for all classes.
Depositary fee (paid to the Depositary)	A range from 0.003% to 0.35% of the SICAV's net assets (excluding transaction charges and reasonable disbursements and out-of-pocket expenses)
Administration fee	Up to 0.35% of the net assets (excluding reasonable out-of-pocket expenses)

Refer to "Charges and expenses" in the Prospectus for further information on fees and charges.

³ Your financial adviser is required to disclose to you the amount of trailer fee it receives

VALUATIONS AND EXITING FROM THIS INVESTMENT

HOW OFTEN ARE VALUATIONS AVAILABLE?

Valuations are available on each Valuation Date. The last available NAV for each Business Day is published on Bloomberg, www.fundinfo.com and may also be posted on www.fidelity.com.sg.

HOW CAN YOU EXIT FROM THIS INVESTMENT AND WHAT ARE THE RISKS AND COSTS IN DOING SO?

- You can exit the fund at any time by writing to the Singapore Representative or the Manager, through the financial adviser / intermediary from whom you purchased shares in the fund. Currently, no exit fee will be applied.
- The fund does not offer a cancellation period. You may check with your financial adviser / intermediary on whether it offers a cancellation period and if it does so without incurring the entry fee.
- You will generally receive the redemption proceeds within 5 Business Days (or such later date from your financial adviser / intermediary) from the time the Singapore Representative or Manager receives your request to exit from the fund.
- Your redemption price is determined as follows:
 - If you submit the redemption order before 5pm on a Business Day, you will be paid a price based on the NAV at the close of that Business Day.
 - If you submit the redemption order after 5pm, you will be paid a price based on the NAV at the close of the next Business Day.

The redemption proceeds that you will receive will be the redemption price multiplied by the number of shares sold, less any charges. An example (assuming no exit fee) is as follows:

Redemption request 1,000 shares	×	Redemption price USD0.95	=	Gross redemption proceeds USD950.00
Gross redemption proceeds USD950.00	-	Exit fee USD0.00	=	Net redemption proceeds USD950.00

Refer to “Obtaining price information” and “Redemption or selling of shares” in the Prospectus for further information on valuation and exiting from the fund.

CONTACT INFORMATION

HOW DO YOU CONTACT US?

You can contact the Singapore Representative at 6511 2200 or sgenquiry@fil.com. For a list of intermediaries, visit www.fidelity.com.sg.

APPENDIX: GLOSSARY OF TERMS

“Business Day”: A day on which the banks in Singapore and Luxembourg are normally open for business.

“Launch Date”: This date refers to the date of the share class that was launched the earliest.

“Manager”: Referred to as the Management Company in the Prospectus.

“NAV”: Net asset value per share; the value of one share of a fund.

“PHS”: Product Highlights Sheet.

“Prospectus”: Singapore Prospectus of Fidelity Funds.

“SPAC”: Special purpose acquisition company; a SPAC generally invests its assets in government securities, money market fund securities and cash, which is returned to shareholders in the event that the assets are not used to complete an acquisition within a specified period of time. SPACs and similar entities are listed shell companies without an operating history or ongoing business, other than seeking acquisitions, therefore the value of their securities is dependent on the ability of the entity’s management to identify and complete an acquisition.

“Valuation Date”: Each weekday (any Monday to Friday inclusive) excluding 25 December (‘Christmas Day’) and 1 January (‘New Year’s Day’) as well as any other day which the Directors have determined, in the best interests of the shareholders, as non-Valuation Dates for specific funds. Non-Valuation Dates may for example be any day observed as a holiday on a stock exchange which is the principal market for a significant portion of the investments attributable to a fund, or any day which is a holiday elsewhere so as to impede the calculation of fair market value of the investments attributable to a given fund, which may also include any day immediately preceding such relevant market closure where the dealing cut-off time of the relevant fund occurs at a time when the relevant underlying main market is already closed to trading and the following days are a period of consecutive market closure days.
