Fund overview

Objective: To earn income and increase the value of the Shareholder's investment, while outperforming the Bloomberg Global High Yield Excl CMBS & EMG 2% Cap Index over the long term (5 years or more).

Investments: The Sub-Fund invests mainly in high yield bonds issued by corporations anywhere in the world, with an emphasis on North America and Europe. Specifically, at all times, the Sub-Fund invests at least two-thirds of total net assets (excluding ancillary liquid assets, eligible deposits, money market instruments and money market funds) in bonds that are rated below BBB- by Standard and Poor's or Baa3 by Moody's, or are unrated. The Sub-Fund does not invest in shares or other participation rights, or in convertible securities.

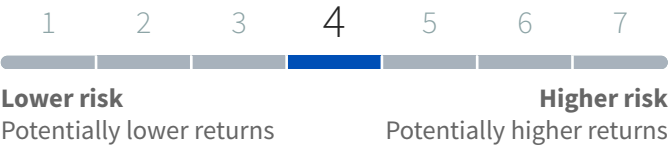

Strategy: The investment process includes consideration of environmental, social and governance (ESG) criteria. The Investment Manager will exclude direct investments in companies which manufacture products that seek to do harm when used as intended. The Investment Manager actively makes the investment selection decisions for the Fund.

Please note that this is a hedged share class, and due to interest rate differential and costs associated with performing the hedging activity, this share class will have a different outcome to the equivalent share class in the base currency. Risk measurement (As at 28th Feb 2024)

The indicator is based on historical data and may not be a reliable indication of the future risk profile. The category shown may change over time. The lowest category does not mean 'risk free'.

Cumulative performance (%) (last 5 years, if applicable)

Rolling annual net performance (%)

Past performance is not a guide to future performance.

Performance basis: Measured on a NAV-NAV and NAV-NAV (net of charges) basis. NAV-NAV is calculated on a single pricing basis gross of tax payable by the Fund, with income reinvested taking into account all charges which would have been payable upon re-investment. NAV-NAV (net of charges) additionally take into account any initial charges (using max. 5% as an illustration) and redemption fees (0%).

Sustainable Finance Disclosure

Sustainability Risk indicators are considered alongside a range of financial and non-financial research, with no specific limits imposed, therefore the Investment Manager retains discretion over which investments are selected. This product does not have a sustainable investment objective and the investment manager will consider the adverse impacts of an investment to the extent they are financially material. *For further information please refer to the prospectus and our website.*

Fund risks

Investment Risk

The value of an investment and any income from it can go down as well as up. Investors may not get back the original amount invested.

Credit and interest rate risk

Bond values are affected by changes in interest rates and the bond issuer's creditworthiness. Bonds that offer the potential for a higher income typically have a greater risk of default.

Derivatives Risk

Investments can be made in derivatives, which can be complex and highly volatile. Derivatives may not perform as expected, meaning significant losses may be incurred.

Investor in funds

Investments can be made in other funds; this could mean the overall charges are higher.

Illiquid Securities Risk

Some investments could be hard to value or to sell at a desired time, or at a price considered to be fair (especially in large quantities). As a result their prices can be volatile.

Sustainability Risk

The level of sustainability risk may fluctuate depending on which investment opportunities the Investment Manager identifies. This means that the fund is exposed to Sustainability Risk which may impact the value of investments over the long term.

Full information on risks applicable to the Fund are in the Prospectus and the Product Highlight Sheet (PHS).

Glossary

Annualised performance

An annualised total return is the geometric average amount of money earned by an investment each year over a given time period.

Volatility (%)

A measure of the fund's dispersion of returns. A higher volatility implies that a fund's return is spread over a larger range of values whilst a lower volatility implies that a fund's return is spread over a smaller range of values.

Distribution yield

This reflects the amount that is expected to be distributed over the next 12 months as a percentage of the share price of the fund on the date shown. It does not include the deduction of entry charges and is the gross return before tax on distributions. You may be subject to further tax on your distributions. The yield is not guaranteed.

Entry fee

A one-off charge may be taken from your money before it is invested. The charge is usually a percentage of the amount invested and is additional to the price paid for the units/shares. The entry charge is deducted from the investment before units/shares are bought and is also known as the "initial charge".

Exit charge

A one-off charge levied on redemption of units/shares before the proceeds of your investment are paid out. This is also known as a "redemption charge".

Ongoing charge

The ongoing charge figure represents the costs you can expect to pay annually based on last year's expenses. The ongoing charges figure is made up of various elements such as the fund management fee, professional fees, audit fees

and custody fees. Performance fees (if payable) are not included in this figure.

Performance fee

The percentage of any outperformance of the hurdle rate and/or benchmark that will be taken as a performance fee.

Tracking error (%)

A measure of how closely the fund follows its benchmark. A passive fund should have a tracking error close to zero, while an actively managed fund would normally have a higher tracking error.

NAV

NAV is typically an End Of Day valuation using close of market prices to value the individual securities with the portfolio or fund, rolling up to a total portfolio or fund level.

Underlying yield

This reflects the annualised income net of expenses of the fund as a percentage of the share price of the fund on the date shown. It does not include the deduction of entry charges and is the gross return before tax on distributions.

Time to Maturity

This shows the time remaining to maturity of the bonds held by the fund. Generally, the longer the duration of a holding is, the greater the price's sensitivity to any changes in interest rates.

Credit Rating

Independent ratings agencies assign different ratings to bonds depending on the bond issuers' financial strength and their outlook as well as their ability to pay interest on time and meet all of their liabilities. We use appropriate industry recognised ratings as detailed in source notes.

Modified duration

A calculation that expresses the measurable change in the value of a security in response to a change in interest rates.

Spread Duration

The Spread Duration measures the sensitivity of a security's price to changes in its Option Adjusted Spread (OAS) relative to the Treasury Curve.

Management Fee

The management fee is fixed rate charge to cover the costs of managing the investments of the fund. It accrues daily based on a percentage of the fund's net asset value and deducted from the fund's assets.
