### KEY PRODUCT FEATURES

#### WHAT ARE YOU INVESTING IN?

- You are investing in a unit trust constituted in Singapore whose investment objective is to achieve long term capital growth through investing in companies with assets in, or revenues derived from Japan.
- There is currently no distribution policy for the Fund.

Refer to paragraph 6 of the Prospectus for further information on features of the product.

### Investment Strategy

- The Sub-Manager constructs the portfolio by investing into stocks with higher expected rates of return within each sector based on the information gap between the fair price calculated by its analysts' bottom-up approach and the market price of the stocks.
- The Sub-Manager combines a top-down approach with a bottom-up approach and decides on sector allocation by considering factors such as the macro-economic environment, structural changes to industries and/or anticipation of stock price movements, together with the circumstances of the individual companies that constitute each sector.
- The Fund may use or invest in FDIs for the purposes of hedging existing positions in a portfolio, efficient portfolio management or a combination of both purposes.
- Units are Excluded Investment Products. Accordingly, the Fund will not invest in any product or engage in any transaction which may cause the Units not to be regarded as Excluded Investment Products.
- The Fund is actively managed with reference to its benchmark (as set out in the Prospectus), which is used for performance comparison purposes. The benchmark is neither used as a constraint on how the Fund's portfolio is to be constructed nor set as a target for the Fund's performance to beat.

Refer to paragraph 6 of the Prospectus for further information on the investment strategy of the product.
