## Schroder International Selection Fund Emerging Europe

A Accumulation EUR | Data as at 31.03.2024

### Fund objectives and investment policy

---

The Fund aims to provide capital growth by investing in equity and equity related securities of Central and Eastern European companies.

This fund may use financial derivative instruments as a part of the investment process. Derivatives carry a high degree of risk and should only be considered by sophisticated investors.

#### Special information

Due to the unprecedented geo-political situation caused by Russia's invasion of Ukraine and the resultant impact of sanctions and actions of governments and market counterparties on certain Russian issuers and assets, the calculation of the net asset value (NAV) and the issue and redemption of all share classes in the fund was suspended with effect from 25 February 2022 to 18 July 2022. Russian equities and equity related securities held by the fund as of 25 February 2022 were allocated on 18 July 2022 to two newly created share classes (X9 and Y9) within the fund. Shares in these new classes were issued on the same day to each shareholder in the fund on the basis of their percentage holding in the Fund on 25 February 2022. Following that allocation, the fund (through its share classes other than the two newly created classes) has no more exposure to Russian equities and equity related securities and will not make any further investments in Russian securities until further notice. This is consistent with the fund's target benchmark from which all Russian equities have been removed since 9 March 2022.

This fund does not have the objective of sustainable investment or binding environmental or social characteristics as defined by Regulation (EU) 2019/2088 on Sustainability-related Disclosures in the Financial Services Sector (the "SFDR"). Any references to the integration of sustainability considerations are made in relation to the processes of the investment manager or the Schroders Group and are not specific to the fund.

**Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall. Please note the Special Information section included above when reviewing the past performance of the fund.**

### Performance over 10 years (%)

**Past performance and any forecasts are not necessarily a guide to the future or likely performance.**

**The value of investments and income from them can go down as well as up and is not guaranteed.** The distributions are not guaranteed. Ordinarily, they will be reviewed annually. In the event of the Fund's income and realised gains being less than indicated distribution amount per unit per annum, distributions will be made from capital. Investors should be aware that the distributions may exceed the income and realised gains of the Fund at times and lead to a reduction of the amount originally invested, depending on the date of initial investment. Some performance differences between the fund and the benchmark may arise as the benchmark returns are not adjusted for non-dealing days of the fund. Where 'since inception' performance figures are stated, please note that the inception date is the same as the share class launch date under 'Fund Facts'.

### Benchmark and corporate action information

Please refer to the Special information section above.  
 Please note Russia was removed from the target benchmark with effect from 9 March 2022.  
 Effective 21.09.2023, the target benchmark MSCI Emerging Markets Europe 10/40 (Net TR) index has been removed and the new comparator benchmark, the MSCI EFM Europe + CIS (E+C) Index (Net TR) have been added. Benchmark names in this document may be abbreviated. Please refer to the funds' legal documents for the full benchmark name.

#### Benchmarks: (If applicable)

Some performance differences between the fund and the benchmark may arise because the fund performance is calculated at a different valuation point from the benchmark. The fund is not managed with reference to a benchmark. The comparator benchmark has been selected because the investment manager believes that the benchmark is a suitable comparison for performance purposes given the fund's investment objective and policy.
