This Product Highlights Sheet is an important document.

- It highlights the key terms and risks of this investment product and complements the Prospectus¹.
- It is important to read the Prospectus before deciding whether to purchase units in the product. If you do not have a copy, please contact us to ask for one.
- You should not invest in the product if you do not understand it or are not comfortable with the accompanying risks.
- If you wish to purchase the product, you will need to make an application in the manner set out in the Prospectus.

abrdn Select Portfolio – abrdn Singapore Equity Fund (the "Fund")

 research process is focused on finding high quality companies at attractive valuations that can be held for the long term. In order to achieve its objective, the Fund will take positions whose weightings diverge from the benchmark or invest in securities which are not included in the benchmark. The investments of the Fund may deviate significantly from the components of and their respective weightings in the benchmark. Due to the active nature of the management process, the Fund's performance profile may deviate significantly from that of the benchmark over the longer term. The Fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "efficient portfolio management"). Derivative usage in the Fund is expected to be very limited. Where derivatives are used, this would mainly be in response to significant inflows into the Fund's existing allocations to company shares. 	
PARTIES INVOLVED	
 WHO ARE YOU INVESTING WITH? abrdn Select Portfolio is the umbrella unit trust of the Fund. The Manager of the Fund is abrdn Asia Limited. The Trustee of the Fund is Citicorp Trustee (Singapore) Limited. The Custodian of the Fund is Citibank, N.A., Singapore Branch. 	Refer to "Basic Information", "The Manager" and "The Trustee/Custodian" in Sections 1, 2 and 3 of the Prospectus for further information on the role and responsibilities of the entities and what happens if they become insolvent.
KEY RISKS	
WHAT ARE THE KEY RISKS OF THIS INVESTMENT? The value of the Fund may rise or fall. You may lose some or all of your investment depending on the performance of the underlying securities. Factors that may affect the performance of these securities include, without limitation, market risks, fluctuations in interest rates and foreign exchange rates, political instability, exchange controls, changes in taxation and foreign investment policies. Some of the key risks associated with the Fund are described below. Market Risks	Refer to "Risks" in Section 14, "Liquidity Risk Management" in Section 20 of the Prospectus for further information on risks of the product.
You are exposed to market risk.	
Prices of the securities owned by the Fund may rise or fall in response to changes in economic conditions, political conditions, interest rates, and market sentiment. These may cause the price of units of the Fund to go up or down.	
economic conditions, political conditions, interest rates, and market sentiment. These may cause the price of units of the Fund to go up or down. Liquidity Risks	
economic conditions, political conditions, interest rates, and market sentiment. These may cause the price of units of the Fund to go up or down. Liquidity Risks You are exposed to liquidity risk. The securities that the Fund owns may at times lack liquidity thereby affecting their value or ease of disposal. The manager may, subject to the trust deed, limit the total number of units which unit holders may dispose if the total number of units to be disposed on any dealing day exceeds 10%.
