Source: All fund data quoted are Allianz Global Investors/IDS GmbH/Morningstar, as at 31/03/2024, unless stated otherwise. Performance returns for periods over one year are annualised. Fund performance is calculated in the respective fund currency with net income and dividends reinvested. Investment returns are denominated in the respective base currency of the fund. SGD based investors are exposed to non-SGD foreign exchange fluctuations.

- 1) Source: Morningstar, as at 29/02/2024. Copyright © 2024 Morningstar Asia Limited ("Morningstar"). All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results.
- 2) "Offer-Bid" performance data takes into account up to 3.00% of the initial fee of the investment.
- 3) From 1 December 2016 to 31 August 2018, the Fund's benchmark calculation is based on JP Morgan Global GBI USD Return in USD. From 1 September 2018, the benchmark for the Fund had been removed due to change in investment strategy. The benchmark performance for the period 1 September 2018 to 28 November 2019 had therefore been treated as 0. From 29 November 2019 to 30 August 2020, the benchmark calculation for the fund is based on the US Dollar 3 months LIBOR. With effect from 31 August 2020, the benchmark calculation for the fund has been based on Secured Overnight Financing Rate (SOFR).
- 4) The information is provided for illustrative purposes only to demonstrate the Fund's investment strategy, it should not be considered a recommendation to purchase or sell any particular security or strategy or an investment advice. There is no assurance that any securities discussed herein will remain in the Fund at the time you receive this document. Past performance is not indicative of future results. While best efforts are used in compiling the information, Allianz Global Investors and its affiliated entities expressly assumes no warranty of any kind, actual or implied, for the accuracy, completeness and timeliness of the information.
- 5) Annualised Dividend Yield =  $[(1 + \text{Dividend Per Share} / \text{Ex-Dividend Date NAV})^{12} - 1] \times 100$ . The annualised dividend yield is calculated based on the latest dividend distribution with dividend reinvested, and may be higher or lower than the actual annual dividend yield. Positive distribution yield does not imply positive return. Dividend is not guaranteed. Historical dividend yield is not indicative of future dividend payouts.
- 6) The distribution amount per share = fixed distribution percentage  $\div$  12  $\times$  NAV per share on the last dealing day of the previous month.
- 7) Fixed distribution percentage per annum: The distribution amount may also be calculated according to the Fixed Percentage Policy. Such Distribution Shares intend to pay out variable amount per Share which will be based on a fixed percentage of the Net Asset Value per Share. The distribution amount is calculated based on a fixed percentage applied on the Net Asset Value of the respective Share Class at the end of the previous month (in case of monthly distributions), the previous financial quarter (in case of quarterly distributions) or the previous fiscal year (in case of annual distributions). While the percentage will be applied consistently, the distribution amount may vary from time to time due to movement in the Net Asset Value per Share. The fixed percentage for calculation of the distribution amount is determined prior to the first distribution of the relevant Share Class of the relevant Fund but can be subject to adjustment. Although the fixed distribution percentage is intended to be maintained, please note that the fixed distribution percentage may be subject to amendments under exceptional circumstances (including but not limited to, a drastic drop of NAV due to market crash, material market shifts or major crisis) after taking into account various factors, including but not limited to, the portfolio outlook of the relevant Fund, the risk analysis, the fixed distribution percentage and the NAV per Share of the relevant Share Class of the relevant Fund. Shareholders will be notified with one month prior notice in case of any change in the fixed distribution percentage. Share Classes which distribute income according to the Fixed Percentage Policy are named with the additional letter "F". Shareholders should note that a positive fixed distribution percentage does not imply a high or positive return, as the fixed distribution may be paid out of capital or effectively out of capital.
- 8) From 1 December 2016 to 30 August 2020, the benchmark for the Fund is based on the US Dollar 3 months LIBOR. With effect from 31 August 2020, the benchmark for the Fund has been based on Secured Overnight Financing Rate (SOFR).
- 9) The Fund size quoted includes all share classes of the Fund.
- 10) EU Sustainable Finance Disclosure Regulation. Information is accurate at time of publishing.
- 11) The All-in-Fee includes the expenses previously called management and administration fees.
- 12) Total Expense Ratio (TER): Total cost (except transaction costs) charged to the Fund during the last financial year expressed as a ratio of the Fund's average NAV. For share classes that have been incepted for less than one year as at close of the last financial year (please refer to the Inception Date in the Fund Details table), the TER will be annualised. For share classes incepted after the close of the last financial year, the TER will be reflected as N/A.

The information presented here is intended for general circulation and does not constitute a recommendation to anyone; it also has not taken into account the specific investment objectives, financial situation or particular needs of any particular person. Information herein is based on sources we believe to be accurate and reliable as at the date it was made. We reserve the right to revise any information herein at any time without notice. No offer or solicitation to buy or sell securities and no investment advice or recommendation is made herein. In making investment decisions, investors should not rely solely on this publication but should seek independent professional advice. However, if you choose not to seek professional advice, you should consider the suitability of the product for yourself. Past performance of the fund manager(s) and the fund is not indicative of future performance. Prices of units in the Fund and the income from them, if any, may fall as well as rise and cannot be guaranteed. Distribution payments of the Fund, where applicable, may at the sole discretion of the Manager, be made out of either income and/or net capital gains or capital of the Fund. As a result of the payment, the Fund's net asset value is expected to be immediately reduced. The dividend yields and payouts are not guaranteed and might change depending on the market conditions or at the Manager's discretion; past payout yields and payments do not represent future payout yields and payments. Investment involves risks including the possible loss of principal amount invested and risks associated with investment in emerging and less developed markets. The Fund may invest in financial derivative instruments and/or structured products and be subject to various risks (including counterparty, liquidity, credit and market risks etc.). Investing in fixed income instruments (if applicable) may expose investors to various risks, including but not limited to creditworthiness, interest rate, liquidity and restricted flexibility risks. Changes to the economic environment and market conditions may affect these risks, resulting in an adverse effect to the value of the investment. During periods of rising nominal interest rates, the values of fixed income instruments (including short positions with respect to fixed income instruments) are generally expected to decline. Conversely, during periods of declining interest rates, the values are generally expected to rise. Liquidity risk may possibly delay or prevent account withdrawals or redemptions. Past performance, or any prediction, projection or forecast, is not indicative of future performance. Investors should read the Prospectus obtainable from Allianz Global Investors Singapore Limited or any of its appointed distributors for further details including the risk factors, before investing. The duplication, publication, extraction, or transmission of the contents, irrespective of the form is not permitted, except for the case of explicit permission by Allianz Global Investors.
