

JANUS HENDERSON HORIZON FUND – GLOBAL TECHNOLOGY LEADERS FUND

A2 USD ISIN LU0070992663

Investment objective

The Fund aims to provide capital growth over the long term. The Fund invests at least 90% of its assets in a concentrated portfolio of shares (equities) and equity-related securities of companies, of any size, which are technology-related or derive the main part of profits from technology, in any country.

<b>Maximum initial sales charge</b>	5.00
<b>Annual management charge (AMC)</b>	1.20
<b>Performance fee description</b>	10% of any returns that subject to a high water mark the share class achieves above the MSCI ACWI Information Technology Index + MSCI ACWI Communication Services Index
<b>Total expense ratio (TER)</b>	1.87

Fund charges will impact the value of your investment. In particular, the ongoing charges applicable to each fund will dilute investment performance, particularly over time. For further explanation of charges please visit our Fund Charges page at [www.janushenderson.com](http://www.janushenderson.com). Performance fees may be charged before the Fund's outperformance target is reached. Performance fees are charged separately as a way of rewarding the investment manager for superior returns or for outperforming specified targets. A Performance Fee is accrued where the NAV outperforms the relevant Hurdle NAV (subject to a High Water Mark). For further explanation of the performance fee calculation methodology please see the relevant prospectus, available at [www.janushenderson.com](http://www.janushenderson.com). Under some circumstances initial charges may apply. Please refer to the Prospectus for more details.

## Additional fund information

Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change. From 1 July 2020, the Fund's benchmark changed from MSCI AC World Information Technology Index to MSCI ACWI Information Technology Index + MSCI ACWI Communication Services Index. Past performance before 1 July 2020 is shown for the Fund's previous benchmark. In accordance to the UCITS Directive the fund will not invest more than 10% of its assets in shares of a single company. Positive distribution rate does not imply positive return. Intended dividend distribution and the derived yield of the Fund are not guaranteed and are subject to change without any prior notice. Past yields are not necessarily indicative of future or likely distribution. Please note: due to rounding the figures in the holdings breakdowns may not add up to 100%. The performance fee described on page 2 will be applicable if the fund achieves a return in excess of the High Water Mark and the MSCI ACWI Information Technology Index + MSCI ACWI Communication Services Index. Investors should refer to the prospectus for full details on performance fee where a performance fee is applicable. This is a Luxembourg SICAV Fund, regulated by the Commission de Surveillance du Secteur Financier (CSSF). Information relating to other currencies and fee structure can be found in the fund prospectus. Note that any differences among portfolio securities currencies, share class currencies and costs to be paid or represented in currencies other than your home currency will expose you to currency risk. Costs and returns may increase or decrease as a result of currency and exchange rate fluctuations. To obtain our prospectus and any additional information please visit our website on: [www.janushenderson.com](http://www.janushenderson.com). Investment into the fund will acquire units/shares of the fund itself and not the underlying assets owned by the fund. Cash balances and exposures are based on settled and unsettled trades as at the reporting date. Performance with sales charge source: Janus Henderson. Investors, calculated on a NAV to NAV basis, net of 5.00% initial charge, with gross income reinvested at NAV price. Note: The performance calculation is based on a maximum initial sales charge of 5.00%. The actual initial sales charge paid by the unitholder may be different based on the discount, if any, applied by distributors. As such, the performance return may differ based on the discount, if any, applied by distributors. Refer to the prospectus for more details on shares classes offered. All ongoing charges stated are as per latest published report and accounts. Where the ongoing charges exceed the target outperformance relative to the benchmark the return is likely to be below the benchmark return, even when the Fund's outperformance target (before the deduction of charges) has been achieved. For funds which charge performance fees, investors should note that the total expense ratio includes the performance fees crystallised for the preceding performance period.

### Fund specific risks

When the Fund, or a share/unit class, seeks to mitigate exchange rate movements of a currency relative to the base currency (hedge), the hedging strategy itself may positively or negatively impact the value of the Fund due to differences in short-term interest rates between the currencies. The Fund could lose money if a counterparty with which the Fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider. Shares/Units can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result. If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified. The Fund is focused towards particular industries or investment themes and may be heavily impacted by factors such as changes in government regulation, increased price competition, technological advancements and other adverse events. This Fund may have a particularly concentrated portfolio relative to its investment universe or other funds in its sector. An adverse event impacting even a small number of holdings could create significant volatility or losses for the Fund. The Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations. If the Fund holds assets in currencies other than the base currency of the Fund, or you invest in a share/unit class of a different currency to the Fund (unless hedged, i.e. mitigated by taking an offsetting position in a related security), the value of your investment may be impacted by changes in exchange rates. Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

### Source for fund ratings/awards

Overall Morningstar Rating™ is a measure of a fund's risk-adjusted return, relative to similar funds. Fund share classes are rated from 1 to 5 stars, with the best performers receiving 5 stars and the worst performers receiving a single star. Overall Morningstar Rating™ is shown for Janus Henderson share classes achieving a rating of 4 or 5. Ratings should not be taken as a recommendation. For more detailed information about Morningstar Ratings, including its methodology, please go to [www.global.morningstar.com/managerdisclosures](http://www.global.morningstar.com/managerdisclosures).

## Glossary

### Beta

Beta measures how a fund or security moves in relationship to the overall market. A market has a beta of 1. If the fund/security's beta is more than 1, it moves more than the market, while a beta lower than 1 means it moves to a lesser extent than the market. A negative beta could mean the fund/security moves in the opposite direction to the market.

### Historic Yield

The Historic Yield reflects distributions declared over the past 12 months as a percentage of the mid-market share price, as at the date shown.

### Price-to-book (P/B) ratio

A financial ratio used to value a company's shares. It is calculated by dividing a company's market value (share price) by the book value of its equity (value of the company's assets on its balance sheet). A P/B value <1 can indicate a potentially undervalued company or a declining business. The higher the P/B ratio, the higher the premium the market is willing to pay for the company above the book (balance sheet) value of its assets.

### Price-to-earnings (P/E) ratio

A popular ratio used to value a company's shares, compared to other stocks, or a benchmark index. It is calculated by dividing the current share price by its earnings per share.

### Sharpe ratio

This measures a portfolio's risk-adjusted performance. A high Sharpe ratio indicates a better risk-adjusted return. The ratio is designed to measure how far a portfolio's return can be attributed to fund manager skill as opposed to excessive risk taking.

### Standard deviation

A statistic that measures the variation or dispersion of a set of values/data. A low standard deviation shows the values tend to be close to the mean while a high standard deviation indicates the values are more spread out. In terms of valuing investments, standard deviation can provide a gauge of the historical volatility of an investment.

### Weighted average market cap

The average market capitalisation of a holding, weighted by the size of that position in a portfolio or index.
