The Fund is structured as an umbrella fund offering Shares in the Sub-Fund for investment.
- ▶ Investment Objective
The Sub-Fund aims to provide long term total return by investing in a portfolio of bonds denominated in or hedged into SGD.

INVESTMENT STRATEGY

The Sub-Fund invests in normal market conditions a minimum of 90% of its net assets in:

- Singapore Dollar denominated Investment Grade and Non-Investment Grade rated fixed income, unrated fixed income and other similar securities issued or guaranteed by governments, government agencies or supranational bodies or issued by companies.

Refer to section 3.2 “Sub-Funds details” of the Luxembourg Prospectus for details on the structure of the Sub-Fund.

¹ The Singapore Prospectus is accessible at <http://www.assetmanagement.hsbc.com/sg>.

² The expense ratios for Share Classes offered less than 1 year are computed on an annualised basis.

- Investment Grade and Non-Investment Grade rated fixed income, unrated fixed income and other similar securities which are denominated in non-SGD currencies and hedged to SGD. These securities will primarily be issued or guaranteed by governments, government agencies or supranational bodies in Asia or issued by companies which are domiciled in, based in, or carry out the larger part of their business in Asia.

The Sub-Fund may invest up to 30% of its net assets in Non-Investment Grade rated fixed income securities. The Sub-Fund may invest up to 10% of its net assets in Asset Backed Securities ("ABS") and Mortgage Backed Securities ("MBS"). The Sub-Fund may invest up to 10% of its net assets in convertible bonds (excluding contingent convertible securities). The Sub-Fund may invest up to 10% of its net assets in contingent convertible securities; however such investment is not expected to exceed 5%. The Sub-Fund may invest up to 10% of its net assets in units or shares of UCITS and/or other Eligible UCIs (including other sub-funds of HSBC Global Investment Funds).

The Sub-Fund may also invest in bank deposits, money market instruments or money market funds for treasury purposes.

The Sub-Fund may use financial derivative instruments for hedging purposes and efficient portfolio management purposes. The Sub-Fund may also use, but not extensively, financial derivative instruments for investment purposes.

The Sub-Fund can enter into Securities Lending transactions for up to 29% of its net assets, however, it is expected that this will not exceed 25%.

It is expected that the Sub-Fund's primary currency exposure will be to the SGD. The Sub-Fund may have exposure to non-SGD currencies, including developed market and Emerging Market currencies, which will be hedged into SGD.

The Sub-Fund is actively managed and is not constrained by a benchmark.

KEY RISKS

WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

- The value of the Sub-Fund's assets may rise or fall due to normal market fluctuations and investors may not get back all of their investment.

Refer to paragraph 6 "Risks" of the Singapore Prospectus and sections 1.4 "General Risk Considerations" and 3.3 "Sub-fund specific risk considerations" of the Luxembourg Prospectus for further information on risks of the product.

MARKET AND CREDIT RISKS

- You are exposed to Foreign Exchange Risk
The underlying assets of the Sub-Fund may be denominated in currencies other than the currency of the share class you have invested into. The value of your investment may rise or fall in line with movements in the relevant exchange rates.
- You are exposed to Interest Rate Risk
Bonds and other fixed income securities are more susceptible to fluctuation in interest rates and may fall in value if interest rates change. Generally, the prices of bonds and other fixed income securities rise when interest rates fall, whilst their prices fall when interest rates rise.

▶ You are exposed to Credit Risk

The Sub-Fund's exposure to bonds is subject to the credit risk of the issuers of the bonds. When the issuer of a bond defaults, the Sub-Fund may suffer a loss amounting to the value of such investment. Investment grade bonds may be subject to the risk of being downgraded to non-investment grade bonds. In the event of downgrading, the Sub-Fund's investment value in the relevant security may be adversely affected.

LIQUIDITY RISKS

- ▶ The Sub-Fund is not listed in Singapore and there is no secondary market for its Shares. You can only redeem your investment on a Dealing Day through the Sub-Fund.
- ▶ Investment of the Sub-Fund's assets in relatively illiquid investments may restrict the ability of the Sub-Fund to dispose of its investments at a price and time that it wishes to do so. This may result in a loss to the Sub-Fund.

PRODUCT-SPECIFIC RISKS

▶ You are exposed to Non-Investment Grade Debt Risk

The Sub-Fund may invest in fixed income securities that are rated below investment grade or unrated. Credit risk may be greater for investments in such securities as they may be subject to higher risk of default and greater price volatility.

Investment grade bonds may be subject to the risk of being downgraded to non-investment grade bonds. In the event of downgrading, the Sub-Fund's investment value in the relevant security may be adversely affected.

▶ You are exposed to Asset-Backed Securities (ABS) and Mortgage-Backed Securities (MBS) Risk

Investment in ABS and MBS entails additional risks pertaining to the underlying pool of assets (e.g. receivables) such as credit risk, interest rate risk, prepayment risk, counterparty risk and liquidity risk.

▶ You are exposed to Contingent Convertible Securities (CoCos) Risk

Contingent convertible securities are risky and highly complex instruments that are comparatively untested. Depending on their category, income payments may be cancelled, suspended or deferred by the issuer and they are more vulnerable to losses than equities. Investment in CoCos is subject to trigger level risk, conversion risk, valuation and write-down risk, coupon payments and coupon cancellation risk, capital structure inversion risk, call extension risk, subordinated instruments risk, and unknown risk. This may result in a loss to the Sub-Fund.

▶ You are exposed to Derivative Risk

Financial derivative instruments may be leveraged and their prices can be very volatile. Investment in these instruments may result in losses in excess of the original amount invested. If the issuers of the derivative instruments default, or such securities or their underlying assets cannot be realized, or perform badly, investors may suffer substantial or, in certain cases, total loss of their investments. Governmental regulation and supervision of transactions on the OTC markets is generally lesser than of transactions on organized exchanges. Thus, investing in OTC derivatives involves higher counterparty risk and liquidity risk.
