NOTES TO THE AUDITED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2023

1. SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies adopted by the Company are as follows:

Basis of Preparation of Financial Statements

The financial statements are prepared in accordance with Financial Reporting Standard ("FRS") 102: 'The financial reporting standard applicable in the UK and Republic of Ireland'. Accounting standards generally accepted in Ireland in preparing financial statements giving a true and fair view are those published by the Chartered Accountants Ireland and issued by the Financial Reporting Council ("FRC"). The financial statements are also prepared in accordance with Irish Statute comprising the Companies Act 2014 (as amended), the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended and the Central Bank (Supervision and Enforcement) Act 2013 (section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations").

The financial statements are prepared under the historical cost convention as modified by the revaluation of the financial assets and financial liabilities held at fair value through profit and loss. Valuation time is market close on the relevant dealing day. The dealing day is each business day or such other day as the Directors may determine and notify to the administrator and to the shareholders in advance. The Directors have made an assessment of the Company's ability to continue as a going concern and are satisfied that the Company has the resources to continue in business for the foreseeable future and at least 12 months from the date these financial statements were approved. Furthermore, the Directors are not aware of any material uncertainties that may cast significant doubt upon the Company's ability to continue as a going concern. Therefore, the financial statements are prepared on the going concern basis.

The format and certain wordings of the financial statements have been adapted from those contained in the Companies Act 2014 (as amended) and FRS 102 so that, in the opinion of the Directors, they more appropriately reflect the nature of the Company's business as an investment fund. The Company meets the criteria to avail of the exemption available to certain open-ended investment funds under FRS 102 not to prepare a cash flow statement.

The preparation of financial statements in conformity with FRS 102 requires the use of certain critical accounting estimates. It also requires the Board of Directors to exercise its judgement in the process of applying the Company's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements, such as taxation or going concern assumption are disclosed in the following notes. Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the year ended 31 December 2023 and 31 December 2022 is included in Note 12 and relates to the determination of fair value of financial instruments with significant unobservable inputs.

Financial Assets and Financial Liabilities at Fair Value through Profit or Loss

(i) Classification

The Company has chosen to apply the recognition and measurement provisions of International Financial Reporting Standard 9 "Financial Instruments" ("IFRS 9"), and the disclosure and presentation requirements of FRS 102 to account for all the financial instruments. In accordance with IFRS 9, on initial recognition, the Company classifies financial assets as measured at amortised cost or fair value through profit or loss. A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at fair value through profit or loss: (a) it is held within a business model whose objective is to hold assets to collect contractual cash flows; and (b) its contractual terms give rise on specified dates to cash flows that are SPPI (Solely payments of principal and interest). All other financial assets of the Portfolios are measured at fair value through profit or loss. The Company has classified its investments as financial assets or financial liabilities at fair value through profit or loss. All derivatives in a receivable position (positive fair value) are included in financial assets at fair value through profit or loss. All derivatives in a payable position (negative fair value) are included in financial liabilities at fair value through profit or loss.

Financial assets that are not at fair value through profit or loss include certain balances due from brokers and accounts receivable which are measured at amortised cost.

Financial liabilities that are not at fair value through profit and loss include certain balances due to brokers and accounts payable which are measured at amortised cost.

(ii) Initial Measurement

Purchases and sales of financial instruments are accounted for at trade date for financial statement purposes. Realised gains and losses on disposals of financial instruments are calculated using the first in first out method. Financial instruments categorised as financial assets at fair value through profit or loss are measured initially at fair value with transaction costs for such instruments being recognised directly in the Profit and Loss Account.

FOR THE YEAR ENDED 31 DECEMBER 2023

1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Financial Assets and Financial Liabilities at Fair Value through Profit or Loss (continued)

(iii) Subsequent Measurement

After initial measurement, the Company measures financial instruments classified as financial assets at fair value through profit or loss, at their fair values. Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction. The fair value of financial instruments is based on their official quoted market price on a recognised exchange or sourced from a reputable broker/counterparty in the case of non-exchange traded instruments, at the balance sheet date without any deduction for estimated future selling costs. In accordance with IFRS 9 the Company's securities and other assets are valued at the last traded price as at 31 December 2023 and 2022 to determine the Net Assets Attributable to Holders of Redeemable Participating Shares ("Net Assets").

However, the Directors may adjust the value of financial assets if it considers such adjustment is required to better reflect the fair value thereof. If a quoted official market price is not available on a recognised stock exchange or from a broker/counterparty, the probable realisation of value shall be calculated with care and in good faith in accordance with the Company's valuation policy. Such probable realisation values may be determined by the Administrator using valuation techniques, including use of recent arm's length market transactions, reference to the current fair value of another instrument that is substantially the same, discounted cash flow techniques, option pricing models or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions. For more details on valuation policies for all security types please refer to "Fair Value of Investments" section in Note 12. Subsequent changes in the fair value of financial instruments at fair value through the profit or loss are recognised in the Profit and Loss Account.

(iv) Derecognition of Financial Assets and Liabilities

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or when the financial assets are transferred and the transfer qualifies for derecognition in accordance with IFRS 9. The Company derecognises a financial liability when the obligation specified in the contract is discharged, cancelled or expires.

Real Estate Investment Trusts

Units or shares in real estate investment trusts will be valued, if listed or traded on a regulated market, at the last quoted trade price or the mid quotation or, if unavailable or unrepresentative, the latest available Net Asset Value ("NAV") as deemed relevant to the collective investment scheme.

Investment Funds

The fair value of any investment which is a unit of or participation in an investment fund is the latest available NAV of such unit or participation.

Term Loans

Certain Portfolios may invest in direct debt instruments which are interests in amounts owed by corporate, governmental, or other borrowers to lenders or lending syndicates. A Portfolio's investments in loans may be in the form of participations in loans or assignments of all or a portion of loans from third parties ("Bank Loan"). A Bank Loan is often administered by a bank or other financial institution (the "Lender") that acts as agent for all holders. The agent administers the terms of the loan, as specified in the loan agreement. When investing in a loan participation, a Portfolio has the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the loan agreement and only upon receipt by the lender of payments from the borrower. A Portfolio generally has no right to enforce compliance with the terms of the loan agreement with the borrower. As a result, a Portfolio may be subject to the credit risk of both the borrower and the lender that is selling the loan agreement. When a Portfolio purchases assignments from lenders it acquires direct rights against the borrower of the loan.

The Portfolio may have difficulty trading assignments and participations to third parties. There may be restrictions on transfers and only limited opportunities may exist to sell such securities in secondary markets. As a result, the Portfolio may be unable to sell assignments or participations at the desired time or may be able to sell only at a price less than fair value.

The Portfolio may enter into a loan agreement for a certain committed amount, however the full amount of this commitment may not be drawn down by the borrower. These unfunded commitments represent the remaining obligation of the Portfolio to the borrower. At any point in time, up to the maturity date of issue, the borrower may demand the unfunded portion. The fair value of these unfunded loan commitments is included in Balance Sheet under "Income receivable and other assets".

Participatory Notes

The Portfolios may invest in participatory notes. Participatory notes which are fully paid up and have a zero strike price, exhibit the identical risk and return characteristics as in the case where the Portfolio had acquired the underlying equity directly.

FOR THE YEAR ENDED 31 DECEMBER 2023

1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Asset Backed Securities and Mortgage Backed Securities

Inputs used to value asset backed securities and mortgage backed securities generally include models that consider a number of factors, which may include the following: prepayment speeds, cash flows, spread adjustments and other market information, which may include benchmark yields, reported trades, broker-dealer quotes, issuer spreads, benchmark securities, bids, offers, and reference data, such as market research publications, when available.

To Be Announced Securities

The Portfolios may enter into To Be Announced ("TBA") purchase commitments to purchase securities for a fixed unit price at a future date beyond customary settlement time. Although the unit price has been established, the principal value has not been finalised. The Portfolio holds and maintains until settlement date, cash or high grade debt obligations in an amount sufficient to meet the purchase price, or the Portfolio may enter into offsetting contracts for the forward sale of other securities that they own. Income on the securities will not be earned until settlement date. Unsettled TBA purchase commitments are valued at the current market price.

The Portfolios may enter into TBA sale commitments to hedge their portfolio positions or to sell mortgage backed securities they own under delayed delivery arrangements. Proceeds of TBA sales commitments are not received until the contractual settlement date. During the time a TBA sale commitment is outstanding, equivalent deliverable securities or an offsetting TBA purchase commitment deliverable on or before the sale commitment date, are held as "cover" for the transaction. Unsettled TBA sale commitments are valued at current market value, generally according to the procedures described previously in the accounting policies.

Contingent Convertible Securities

Contingent convertible securities ("CoCos") are a form of hybrid security that are intended to either convert into equity or have their principal written down upon the occurrence of certain triggers. The triggers are generally linked to regulatory capital thresholds or regulatory actions calling into question the issuer's continued viability as a going concern. The unique equity conversion or principal write-down features of CoCos are tailored to the issuer and its regulatory requirements. CoCos typically will be issued in the form of subordinated debt instruments in order to provide the appropriate regulatory capital treatment prior to a conversion. In addition, CoCos may have no stated maturity and may have fully discretionary coupons that can potentially be cancelled at the issuer's discretion or may be prohibited by the relevant regulatory authority from being paid in order to help the issuer absorb losses.

Forward Currency Contracts

A forward currency contract is an agreement between two parties to buy and sell a currency at a set price on a future date. The market value of a forward currency contract fluctuates with changes in forward currency exchange rates. Forward currency contracts are marked to market daily and the change in value is recorded by the Portfolio as an unrealised gain or loss. Realised gains or losses equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed are recorded upon delivery or receipt of the currency or, if a forward currency contract is offset by entering into another forward currency contract with the same broker, upon settlement of the net gain or loss.

Futures Contracts

Futures contracts may include certain options on exchange-traded futures contracts. Initial margin deposits are made upon entering into futures contracts and are generally made in cash and cash equivalents. The fair value of futures contracts is based upon their quoted daily settlement prices. Changes in the value of open futures contracts are recognised as unrealised gains or losses on futures contracts until the contracts are terminated, at which time realised gains and losses are recognised. Gains or losses on open futures contracts are shown in the Schedule of Investments of each relevant Portfolio and as appropriate, on the Balance Sheet as financial assets/financial liabilities at fair value through profit or loss.

Swap Contracts

A swap contract is a privately negotiated agreement between a Portfolio and a counterparty to exchange or swap the return generated by one instrument for the return generated by another instrument. Some swap contracts are net settled. When entering into an over-the-counter ("OTC") swap contract and during the term of the transaction, the Portfolio and/or the swap counterparty may post or receive cash or securities as collateral in accordance with the terms of the respective swap agreements to provide assets of value and recourse in the event of default or bankruptcy/insolvency. Certain clearinghouses currently offer clearing for limited types of swaps. In a cleared swap transaction, a Portfolio typically enters into the transaction with a financial institution counterparty that is then cleared through a central clearinghouse. Upon acceptance of a swap by a central clearinghouse, the original swap is extinguished and replaced with a swap with the clearinghouse, thereby reducing or eliminating the Portfolio's exposure to the credit risk of the original counterparty.

FOR THE YEAR ENDED 31 DECEMBER 2023

1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Swap Contracts (continued)

A Portfolio typically will be required to post specified levels of both initial and variation margin with the clearinghouse or at the instruction of the clearinghouse. The daily change in valuation is recorded as a receivable or payable for variation margin and settled in cash with the centrally clearing party.

Interest Rate/Inflation Swaps

A Portfolio may enter into interest rate or inflation swap contracts which are arrangements between two parties to exchange cash flows based on a notional principal amount, to manage a Portfolio's exposure to interest rates. Under the terms of both interest rate swaps and inflation swaps, a party agrees to pay the swap counterparty a fixed-rate payment in exchange for the other party paying the Fund a variable-rate payment. Interest rate swap and inflation swap contracts are marked-to-market daily based in some cases on quotations from counterparties and in other cases from pricing services and the change in value, if any is recorded as an unrealised gain or loss. Payments made or received are recorded as part of realised gains and losses. Some interest rate swaps can be considered as forward starting swaps. Accruals on forward starting swaps begin at a future date.

Credit Default Swaps

A credit default swap is a bilateral financial contract under which the protection buyer pays a fee, usually expressed in basis points per annum on the notional amount, in return for a payment by the protection seller contingent on the occurrence of a credit event, such as a bankruptcy, default, or restructuring, with respect to a referenced entity. The credit events and applicable settlement mechanism used to determine the contingent payment are negotiated between the counterparties at the time of trading.

Once the credit event has been declared, the protection buyer has the right to settle the contract. Settlement is usually physical, with the protection buyer having the right to deliver bonds of the reference entity up to the notional amount of the contract. In return, the protection buyer receives the par value of those obligations. Selling protection is the synthetic equivalent of buying a bond or alternative form of debt. Buying protection is the equivalent of synthetically shorting or hedging a bond or other credit exposure. Credit default swap agreements on credit indices involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a write-down, principal shortfall, interest shortfall or default of all or part of the reference entities comprising the credit index. A credit index is a list of a basket of credit instruments or exposures designed to be representative of some part of the credit market as a whole. Components of the indices may include, but are not limited to, investment grade securities, high yield securities, asset backed securities, emerging markets, and/or various credit ratings within each sector. Credit indices are traded using credit default swaps with standardised terms including a fixed spread and standard maturity dates. An index credit default swap references all the names in the index, and if there is a default, the credit event is settled based on that name's weight in the index. The composition of the indices change periodically, usually every six months, and for most indices, each name has an equal weight in the index.

The use of credit default swap contracts is restricted to the extent that the benefits to a Portfolio mirror that which could be obtained by direct investment in the underlying instruments and that the swaps do not expose a Portfolio to risks which it would not otherwise assume (other than the exposure to the credit default swap counterparty). The upfront payment received by a Portfolio, as protection seller, is recorded as a liability on the Portfolio's books. An upfront payment made by a Portfolio, as protection buyer, is recorded as an asset on the Portfolio's books. Payments received or paid by a Portfolio are recorded as realised gains or losses. Credit default swaps are valued using a pricing service provider. Where no pricing service provider is available, contracts may be marked-to-market daily based upon quotations received from counterparties or based upon calculations using valuation models and the change, if any, is recorded as an unrealised gain or loss. Payments received or paid as a result of a credit event or termination of the contract are recognised, net of a proportional amount of the upfront payment, as realised gains or losses.

Total Return Swaps

Total return swaps involve commitments to pay fixed or floating rate interest in exchange for a market-linked return based on a notional amount. To the extent the total return of the reference security or index underlying the total return swap exceeds or falls short of the offsetting interest rate obligation, a Portfolio will receive a payment or make a payment to the counterparty, respectively. Certain risks may arise when entering into total return swap transactions, including counterparty default, liquidity or unfavorable changes in the value of the underlying reference security or index. Cash settlement in and out of the swaps may occur at a reset date or any other date, at the discretion of the Portfolio and the counterparty, over the life of the agreement, and is generally determined based on limits and thresholds established as part of an agreement between the Portfolio and the counterparty. For basket swaps, the cash flows may be denominated in various foreign currencies based on the local currencies of the positions within the swaps.

Changes in valuations, if any, are recorded as unrealised gains or losses. Payments received or made are recorded as realised gains or losses. The Company discloses outstanding total return swap contracts at the year end in the Schedule of Investments. For the years ended 31 December 2023 and 31 December 2022, the fair value of total return swaps is disclosed in the Schedule of Investments and Balance Sheet as net unrealised gain or loss.

FOR THE YEAR ENDED 31 DECEMBER 2023

1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Swap Contracts (continued)*Volatility Swaps*

A volatility swap is an agreement between counterparties to exchange periodic payments based on the measured volatility of a reference security, index, currency or other reference investment over a specified time frame. One cash flow is typically based on the realised volatility of the reference investment as measured by changes in its price or level over the specified time period while the other cash flow is based on a specified rate representing expected volatility for the reference investment at the time the swap is executed, or the measured volatility of a different reference investment over the specified time period. The appreciation or depreciation on a volatility swap will typically depend on the magnitude of the reference investment's volatility, or size of the movements in its price, over the specified time period, rather than general directional increases or decreases in its price.

Volatility swaps are less standard in structure than other types of swaps and provide pure, or isolated, exposure to volatility risk of the specific underlying reference investment. Volatility swaps are typically used to speculate on future volatility levels, to trade the spread between realised and expected volatility, or to decrease the volatility exposure of investments held by the Portfolio.

Variance Swaps

Variance swap contracts involve an agreement by two parties to exchange cash flows based on the measured variance (or square of volatility) of a specified underlying asset. One party agrees to exchange a "fixed rate" or strike price payment for the "floating rate" or realised price variance on the underlying asset with respect to the notional amount. At inception, the strike price chosen is generally fixed at a level such that the fair value of the swap is zero. As a result, no money changes hands at the initiation of the contract. At the expiration date, the amount payable by one party to the other is the difference between the realised price variance of the underlying asset and the strike price multiplied by the notional amount. A receiver of the realised price variance would be entitled to receive a payment when the realised price variance of the underlying asset is greater than the strike price and would be obligated to make a payment when that variance is less than the strike price. A payer of the realised price variance would be obligated to make a payment when the realised price variance of the underlying asset is greater than the strike price and would be entitled to receive a payment when that variance is less than the strike price. This type of agreement is essentially a forward contract on the future realised price variance of the underlying asset.

Correlation Swaps

A Correlation Swap is a contract in which the option buyer receives the difference between the observed correlation and the strike correlation on a basket of assets, observed over a specified time interval. The correlation swap can be thought of as a forward contract on realised correlation. Its payoff is simply the difference between the realised correlation over the stated period and the strike times the notional of the contract. Due to the nature of the contract, as maturity approaches, the payoff is almost known since all the observations for calculating the correlation are almost known. Therefore, the model risk decreases as the contract moves toward maturity. For an outstanding contract, implied correlation needs to be computed for any future correlations that can be thought of as the market price of future correlation. The implied correlation or correlation mark can be backed out from observed correlation swap prices or from OTC dealer quotes.

Options

Option contracts may include certain options on exchange-traded futures contracts. When a Portfolio writes an option, an amount equal to the premium received by the Portfolio is recorded as a liability and the current fair value of the option written is subsequently adjusted by this amount. The premium on written call options exercised is added to the proceeds from the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on written put options exercised is subtracted from the cost of the securities, indices, derivatives or foreign currencies purchased. Premiums received from written options which expire are treated as realised gains. The premium on purchased put options exercised is subtracted from the proceeds of the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium paid on purchased call options exercised is added to the cost of the securities, indices, derivatives or foreign currency purchased. Premiums paid for the purchase of options which expire unexercised are treated as realised losses. Strike prices for Options on stock baskets are denominated in various foreign currencies based on the local currencies of the positions within the basket.

Swaptions

When a Portfolio writes a swaption, an amount equal to the premium received by the Portfolio is recorded as a liability and is subsequently adjusted to the current fair value of the swaption written. Premiums received from the written swaptions which expire unexercised are treated by the Portfolio on the expiration dates as realised gains. If a written call swaption is exercised, the premium is added to the proceeds from the sale of the underlying swap in determining the realised gain or loss. If a written put swaption is exercised, the premium reduces the cost basis of the swap purchased.

FOR THE YEAR ENDED 31 DECEMBER 2023

1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Options (continued)*Swaptions (continued)*

When a Portfolio purchases a swaption, an amount equal to the premium paid by the Portfolio is recorded as an asset and is subsequently adjusted to the current fair value of the swaption purchased. Premiums paid for the purchase of swaptions which expire unexercised are treated on the expiration date as realised losses. If a purchased payer swaption is exercised, the premium is subtracted from the proceeds of the underlying swap in determining whether the relevant Portfolio has realised a gain or a loss. If a purchased receiver swaption is exercised, the premium is added to the cost basis of the floating rate investment that has been swapped.

Repurchase and Reverse Repurchase Agreements

A Portfolio may enter into reverse repurchase agreements under which it acquires securities from a seller (for example, a bank or securities dealer) who agrees, at the time of sale, to repurchase the security at a mutually agreed upon date and price, thereby determining the yield to the Portfolio during the term of the reverse repurchase agreement. The resale price reflects the purchase price plus an agreed upon market rate of interest which is unrelated to the coupon rate or maturity of the purchased security. The Portfolio may also enter into repurchase agreements under which it sells a security and agrees to repurchase it at a mutually agreed upon date and price.

Contracts for Differences

Contracts for differences are valued based on the closing market price of the underlying security converted into the base currency of the contract for differences, less any financing charges attributable to each contract which are booked separately. The current market value is shown in the Balance Sheet. On entering a contract for differences, a Portfolio may be required to pledge an amount of cash and/or other assets to the broker which is equal to a certain percentage of the contract amount ('initial margin'). Subsequently, payments known as 'variation margins' are made or received by a Portfolio periodically, depending on the fluctuations in the value of the underlying security. During the period that the contract for differences is open, changes in the value of the contract are recognised as unrealised gains or losses and by marking to market at each valuation date in order to reflect the value of the underlying security. Realised gains or losses at the closure of the contract are equal to the difference between the value of the contract for differences at the time it was opened (including any financial charges) and the value at the time it was closed. Dividends (net of withholding taxes) attributable to open contracts for differences are deemed to be dividends receivable or payable at the end of the year.

Offsetting Financial Instruments

Financial assets and liabilities are offset and the net amount reported in the Balance Sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the assets and settle the liability simultaneously.

Cash and Cash Equivalents

Cash comprises current deposits with banks. Cash equivalents are short-term highly liquid investments that are readily convertible to known amounts of cash, are subject to an insignificant risk of changes in value, and are held to meet short-term cash commitments rather than for investment or other purposes. Cash and cash equivalent assets are valued at their face value with interest accrued, where applicable, to the valuation point on the relevant dealing day, unless in the opinion of the Directors (in consultation with the Manager and the Administrator) an adjustment should be made to reflect the true value thereof.

Company cash accounts

A number of Company cash accounts are being operated by the Administrator, on behalf of the Company pursuant to the Central Bank of Ireland Guidance paper entitled Umbrella Funds – Cash Accounts Holding Subscription, Redemption and Dividend Monies. These cash accounts, held with Brown Brothers Harriman Trustee Services (Ireland) Limited (the "Depository") for collection of unprocessed subscription monies received from investors, redemption monies payable to investors and/or other amounts due to investors for the Company are deemed assets of the Company. Any balances held on these cash accounts at the financial year end are reflected on the Aggregate Balance Sheets of the Company.

Due from/to brokers

Margin and collateral cash provided by the Portfolios to a counterparty in relation derivative financial instruments are recorded as Due from brokers in the Balance Sheet. Margin and collateral cash provided by the counterparty to a Portfolio in relation to derivative financial instruments are recorded as Due to brokers in the Balance Sheet. Margin cash is valued at fair value.

FOR THE YEAR ENDED 31 DECEMBER 2023

1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Foreign Currency Translation*Functional and Presentation Currency*

The functional and presentation currency of the Corporate Hybrid Bond, the Euro Bond Absolute Return, the Euro Bond, the European High Yield Bond, the European Sustainable Equity, the Macro Opportunities FX and the Ultra Short Term Euro Bond is EUR. The functional and presentation currency of the China A-Share Equity and the China Bond is CNY. The functional and presentation currency of the Japan Equity Engagement is JPY. The functional and presentation currency of all other Portfolios is US dollars. The base currency of the majority of net assets in the Company is US dollars and thus US dollars is deemed the most appropriate aggregate currency. For more details please refer to Note 15.

Transactions and Balances

Assets and liabilities, denominated in currencies other than the functional currency of the Portfolio are translated into the functional currency at the rate of exchange prevailing at the Balance Sheet date. Transactions in currencies other than the functional currency of the Portfolio are translated into the functional currency at the rate of exchange prevailing at the dates of the transactions. Gains and losses on foreign exchange transactions are recognised in the Profit and Loss Account in determining the result for the year.

Proceeds from subscriptions and amounts paid for redemptions of Redeemable Participating Shares in currencies other than the functional currency are translated into the functional currency at the rates prevailing on the dates of the transactions. The Balance Sheet is translated using exchange rates at the year end and the Profit and Loss Account and the Statement of Changes in Net Assets are translated at an average rate over the year.

Income and Expense Recognition

Dividend income is recognised in the Profit and Loss Account on the date upon which the relevant security is listed as "ex-dividend" to the extent that information thereof is reasonably available to the Portfolio. Dividend and interest income is shown gross of any non-recoverable withholding taxes, which are disclosed separately in the Profit and Loss Account and net of any tax credits. Bank deposit interest is accounted for on a cash basis with other income being accounted for on an accrual basis.

Interest income is recognised in the Profit and Loss Account for all debt instruments classified as financial assets at fair value through profit or loss on an accrual basis.

Realised Gains and Losses on Investments

Realised gains and losses on disposals of financial assets at fair value through profit or loss are calculated on a first in first out basis. The associated foreign exchange movement between the date of purchase and the date of sale on the disposal of financial assets at fair value through profit or loss is included in net gain/(loss) on financial assets at fair value through profit or loss. Investment transactions are accounted for on trade date, the date at which the Portfolio commits to purchase or sell the asset.

Taxation

Under current law and practice, the Company qualifies as an investment undertaking as defined in Section 739B (1) of the Taxes Consolidation Act, 1997 as amended. On that basis, it is not therefore chargeable to Irish tax on its relevant income or relevant gains. However, Irish tax can arise on the happening of a chargeable event in the Company.

A chargeable event includes any distribution payments to shareholders or any encashment, redemption, or transfer of shares and the holding of shares at the end of each eight year period beginning with the acquisition of such shares. No Irish tax will arise on the Company in respect of chargeable events in respect of:

- (i) a shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997 as amended, are held by the Company, and
- (ii) certain exempted Irish tax resident shareholders who have provided the Company with the necessary signed statutory declarations.

There were no chargeable events during the year under review.

Capital gains, dividends and interest received (if any, on investments made) by the Company may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its shareholders.

FOR THE YEAR ENDED 31 DECEMBER 2023

1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Taxation (continued)

The Finance Act, 2010 provides that the Revenue Commissioners may grant approval for investment funds marketed outside of Ireland to make payments to non-resident investors without deduction of Irish tax where no relevant declaration is in place, subject to meeting the “equivalent measures”. A Company wishing to receive approval must apply in writing to the Revenue Commissioners confirming compliance with the relevant conditions. As at 31 December 2023 and 2022 the Company had not applied for approval from the Revenue Commission.

The Company has reviewed the tax positions for the open tax years as of 31 December 2023 and 2022 and has determined that no provision for income tax and/or uncertain tax positions is required in the Company's financial statements.

Uncertainties exist with respect to the interpretation of complex tax regulations and changes in tax laws on foreign withholding tax. Given the wide range of international investments, differences arising between the actual investment income and assumptions made, or future changes to such assumptions, could necessitate future adjustments to tax expense already recorded.

The Company establishes provisions, based on reasonable estimates, for possible consequences of audits by the tax authorities of the respective countries in which it invests. The amounts of such provisions are based on various factors, such as experience of previous tax audits and differing interpretations of tax regulations by the taxable entity and the responsible tax authority. Such differences of interpretation may arise on a wide variety of issues depending on the conditions prevailing in the respective investment's domicile. As the Company assesses the probability for litigation and subsequent cash outflow with respect to taxes as remote, no contingent liability has been recognised for the years ended 31 December 2023 and 31 December 2022.

Redeemable Participating Shares

Redeemable Participating Shares are redeemable at the shareholder's option and are classified as financial liabilities. Any distributions on these shares are recognised in the Profit and Loss Account as Finance Costs. The Redeemable Participating Shares can be put back to the Portfolio on any dealing day for cash equal to a proportionate share of the Portfolio's NAV. The Redeemable Participating Shares are carried at the redemption amount that is payable at the balance sheet date if the shareholder exercised the right to put the shares back to the Portfolio.

Distribution Policy

The Directors have determined to accumulate all net investment income and net realised capital gains attributable to the Accumulating Classes and therefore do not intend to declare dividends in respect of shares in such classes.

Source of Distributions

Pursuant to the Articles, the Directors may declare dividends, in respect of any shares out of net income (including dividend and interest income) and/or the excess of realised and unrealised capital gains over realised and unrealised losses in respect of investments of the Company (collectively “Net Income”) and also out of capital. Dividends paid out of capital amount to a return or withdrawal of part of a shareholder's original investment or from any capital gains attributable to that original investment. Such dividends may result in an immediate decrease in the NAV of the relevant shares.

It is the current intention of the Directors, subject to any de minimis threshold, to declare and pay as a dividend at least 85% of the Net Income attributable to each of the Distributing Classes, other than (i) the (Weekly) Distributing Classes; (ii) the (Monthly) Distributing Classes; (iii) the (CG) Distributing Classes and (iv) such other Distributing Classes in a Portfolio which are specified in the relevant Supplement to pay dividends out of capital and Net Income. However, shareholders should note that the Directors may, in their discretion, decide not to make such declaration and payment in respect of a Distributing Class.

In respect of the (Weekly) Distributing Classes, the (Monthly) Distributing Classes and the (CG) Distributing Classes, the Directors intend to declare and pay a weekly, monthly or semi-annual dividend, respectively, attributable to the shares of each such class out of a combination of Net Income and capital, so that where Net Income during the relevant period is less than the amount declared, the balance will be paid of the capital represented by the relevant shares, which will enable the classes to distribute regular, set dividends. In the event that the Net Income attributable to the (Weekly) Distributing Classes, the (Monthly) Distributing Classes or the (CG) Distributing Classes exceeds the amount declared during the relevant period, the excess of Net Income over this amount will be retained in a distribution account in respect of the relevant shares and will form part of the dividend payable in respect of the succeeding distribution period. While the foregoing represents the Directors' current intention in respect of the declaration and payment of dividends in respect of the (Weekly) Distributing Classes, the (Monthly) Distributing Classes and the (CG) Distributing Classes, the Directors may in their discretion decide not to make such declaration and payment and there is no guarantee that any such dividends will be paid.

FOR THE YEAR ENDED 31 DECEMBER 2023

1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Distribution Policy (continued)

Frequency of Distributions

Under normal circumstances, the Directors intend that dividends in respect of:

- (a) each of the (Weekly) Distributing Classes in all Portfolios shall be declared and paid on or prior to the last business day of each week;
- (b) each of the (Monthly) Distributing Classes in all Portfolios shall be declared on or prior to the last business day of each month and paid within three business days thereafter;
- (c) each of the (CG) Distributing Classes in all Portfolios shall be declared on a semi-annual basis and paid within thirty business days;
- (d) each of the other Distributing Classes of the China Bond, the Euro Bond, the Euro Bond Absolute Return, the Global Equity Megatrends and the Ultra Short Term Euro Bond shall be declared on a quarterly basis and paid within thirty Business Days in relation to the Net Income of such Distributing Classes for the previous quarter;
- (e) each of the other Distributing Classes of the Climate Innovation, the CLO Income, the Commodities, the Corporate Hybrid Bond, the Developed Market FMP – 2027, the Emerging Market Debt - Hard Currency, the Emerging Market Debt - Local Currency, the Emerging Market Debt Blend, the Emerging Market Debt Sustainable Investment Grade Blend, the European High Yield Bond, the Event Driven, the Global Bond, the Global Diversified Income FMP – 2024, the Global Flexible Credit Income, the Global High Yield SDG Engagement, the Global Investment Grade Credit, the Global Opportunistic Bond, the Global Real Estate Securities, the High Yield Bond, the Short Duration Emerging Market Debt, the Short Duration High Yield SDG Engagement, the Strategic Income, the Sustainable Asia High Yield, the Sustainable Emerging Market Corporate Debt, the Sustainable Emerging Market Debt - Hard Currency, the Tactical Macro, the US Equity Index PutWrite and the US Real Estate Securities shall be declared on a quarterly basis and paid within thirty business days;
- (f) each of the other Distributing Classes of the US Long Short Equity shall be declared on a semi-annual basis and paid within thirty business days;
- (g) each of the other Distributing Classes of the Uncorrelated Strategies, the US Equity, the US Large Cap Value, the US Multi Cap Opportunities, the US Small Cap and the US Small Cap Intrinsic Value shall be declared on an annual basis and paid within thirty business days;
- (h) each of the other Distributing Classes of all other Portfolios shall be declared on an annual basis and paid within thirty business days in relation to the Net Income of the Distributing Classes for the calendar year ended the previous 31 December;
- (i) each of the (Monthly) Gross Income Distributing Classes in the Portfolios shall be declared on or prior to the last business day of each month and paid within three business days; and
- (j) each of the other (Gross) Income Distributing Classes in the Portfolios shall be declared on a quarterly basis and paid within thirty business days.

Subject to income being available for distribution, the Directors may also decide to declare and pay interim dividends in relation to any of the Distributing Classes. All Shares in issue in a Distributing Class on any date on which the Directors determine to declare a dividend in respect of such Distributing Class will be eligible for such dividend.

The Directors reserve the right to change the dividend policy of any class of shares at their discretion on prior notice to shareholders of the relevant class. Any dividend unclaimed after a period of six years from the date of its declaration of such dividend shall be forfeited and shall revert to the relevant Portfolio.

In line with the Central Bank of Ireland (the "CBI") Guidance paper entitled Umbrella Funds – Cash Accounts Holding Subscription, Redemption and Dividend Monies published in March 2016, one or more Company cash accounts are being operated by the Administrator, on behalf of the Company, in accordance with the requirements of the CBI. Such Company cash accounts are designed to hold unprocessed subscription monies received from investors, redemption monies payable to investors and/or other amounts due to investors. As at 31 December 2023, the amount held in these cash accounts was US\$ 331,887 (31 December 2022: US\$ 1,424,081). Any balances held on these cash accounts at the financial year end are reflected on the Aggregate Balance Sheets of the Company.

FOR THE YEAR ENDED 31 DECEMBER 2023

4. BANK OVERDRAFT

As at 31 December 2023 and 31 December 2022, all bank overdraft balances as disclosed in the Balance Sheet are held with Brown Brothers Harriman & Co.

5. SHARE CAPITAL

The authorised share capital of the Company is 500,000,040,000 shares of no par value divided into 40,000 Subscriber Shares of no par value and 500,000,000,000 Participating Shares of no par value. The Directors are empowered to issue up to 500,000,000,000 shares of no par value in the Company on such terms as they think fit.

The Company is an investment company with variable capital due to its ability to issue and redeem Shares on demand. The share capital of the Company is divided into different series of Shares with each series of Shares representing a separate investment portfolio of assets. The Portfolios manage capital in accordance with the UCITS Regulations and the investment objectives and policies applicable to such Portfolio as specified in this Prospectus and the relevant Supplement. The Portfolios are not subject to externally imposed capital requirements. While the Portfolios invest in transferable securities and other liquid financial assets, the Manager also employs an appropriate liquidity risk oversight process, which takes into account efficient portfolio management transactions employed by the Portfolios, in order that each Portfolio is able to comply with its stated redemption terms and conditions.

In order to mitigate potential liquidity risks, the Manager tailors its controls to different investment strategies, liquidity terms and historic client behaviour. As part of its risk oversight, the Manager may employ various liquidity tests, the results of which may lead to a variety of possible solutions, including adjusting asset composition, drawing on applicable overdraft or credit facilities or taking other appropriate actions that would maintain an acceptable level of liquidity. Any Portfolio specific arrangements will be reviewed by the Manager's risk function, portfolio managers of the relevant Portfolio, Chief Investment Officer of the Manager as well as the board of directors of the Manager and the Directors. The Manager's risk team stress-tests each Portfolio on a regular basis in the context of portfolio composition and current/potential market conditions. Stress scenarios are run at different hypothetical redemption levels and the ability of the Portfolios to meet redemption requests in an orderly fashion at these levels are evaluated. Should analysis reveal that any of the Portfolios have low liquidity coverage ratios, conversation and steps are taken by the Manager's risk team and the portfolio team to evaluate these risks and the best way to mitigate them. In addition, daily liquidity buffer reports are monitored to gauge the liquidity risk of each Portfolio. Furthermore, market liquidity factors are monitored in order to capture potential anomalies in market liquidity.

There were 2 Subscriber Shares in issue at 31 December 2023 and 31 December 2022. The Subscriber Shares entitle the holders to attend and vote at general meetings of the Company but do not entitle the holders to participate in the profits or assets of the Company except for a return of capital on a winding-up. The Participating Shares entitle the holders to attend and vote at general meetings of the Company and to participate in the profits and assets of the Company.

The Subscriber shareholders are as follows:

Shareholder Name	Nominal Shareholding
Matsack Nominees Limited	1
Neuberger Berman Europe Limited	1

The minimum subscriptions and redemption limits in respect of each Portfolio are contained in the Company's Prospectus.

The capital of the Portfolios is represented by the net assets attributable to holders of redeemable participating shares. The amount of net assets attributable to holders of redeemable participating shares can change significantly on a monthly basis, as the Portfolios are subject to monthly subscriptions and redemptions at the discretion of shareholders.

The Portfolios' objectives for managing capital are:

- To invest the capital in investments meeting the investment objectives, investment policies, risk exposure and expected return indicated in its Prospectus;
- To achieve returns while safeguarding capital by using the investment strategies indicated in its Prospectus;
- To maintain sufficient liquidity to meet the expenses of the Portfolios, and to meet withdrawal requests as they arise; and
- To maintain sufficient size to make the operation of the Portfolios cost-efficient.

6. MANAGEMENT, ADMINISTRATION, DISTRIBUTION AND DEPOSITARY FEES

In respect of each Class, the Manager shall be entitled to a fee in respect of the management services provided by it to each Portfolio (the "Management Fee"). The Manager is also entitled to a fee of 0.025% in respect of the administrative support services it provides to the Company.

The maximum annual fee which the Company will be charged in respect of a Portfolio is 2.5% of its NAV, however the current Management Fee payable in respect of each Portfolio shall be disclosed in the relevant Supplement. The current Management Fee rates for each class are set out below.

The Management Fee accrues daily and is payable monthly in arrears at the end of each calendar month. The Manager will pay any Sub-Investment Managers or investment advisers appointed in respect of a Portfolio out of its Management Fee, unless otherwise specified in the Supplement for the relevant Portfolio. The Manager is also entitled to recover from the Company all out-of-pocket expenses suffered or incurred by it (or its delegates) in the performance of its duties and shall pay any such expenses recovered to the appropriate service provider.

FOR THE YEAR ENDED 31 DECEMBER 2023

6. MANAGEMENT, ADMINISTRATION, DISTRIBUTION AND DEPOSITARY FEES (CONTINUED)

The Manager may waive all or part of its fees in order to cap the Portfolios' Total Expense Ratios ("TERs"). These fee waivers are voluntary and may be discontinued by the Manager at any time without prior notice. Fees voluntarily waived are not subject to recovery by the Manager. A breakdown of the Portfolios' TERs is provided in Appendix I.

The Company will pay Administration Fees which shall not exceed 0.20% per annum of the NAV of the relevant Portfolio. The Administration Fee shall comprise of a fee payable to the Administrator in respect of the administration services which it provides for each Portfolio and a fee payable to the Manager in respect of the administrative support services which it provides for each Portfolio and will accrue monthly and be payable monthly in arrears.

The Company pays/paid administration fees to the Administrator based on the value of month-end net assets of Uncorrelated Strategies and Uncorrelated Trading at the following rates:

Assets from US\$ 0 - US\$ 500 million	0.055%
Between US\$ 500 - US\$ 2,000 million	0.05%
Above US\$ 2,000 million	0.04%

The Company pays administration fees to the Administrator based on the value of month-end net assets of each of the remaining Portfolios administered by the Administrator at the following rates:

Assets from US\$ 0 - US\$ 25,000 million	0.008%
Above US\$ 25,000 million	0.005%

The above fees are subject to a minimum monthly fee of US\$ 4,000 per Portfolio and inclusive of four share classes per Portfolio. Any Portfolio which has in excess of four share classes will be charged a monthly fee of US\$ 150 per each additional share class.

In addition, the Administrator is entitled to a further fee in respect of transfer agency services provided to the Portfolios.

In respect of the B Shares, C Shares, E Shares, C1 Shares and C2 Shares in each Portfolio, the Manager and/or the relevant Distributor shall be entitled to a distribution fee at the annual rate of 1.00% of the NAV of the relevant Classes in respect of the distribution services provided to such Classes, which shall accrue daily and be payable monthly in arrears at the end of each calendar month. In respect of the M Shares in each Portfolio, the Manager and/or the relevant Distributor shall be entitled to a distribution fee at an annual rate expressed as a percentage of the NAV of the relevant Classes in respect of the distribution services provided to such Classes, which shall accrue daily and be payable monthly in arrears at the end of each calendar month. The rate of such distribution fee varies between Portfolios and is disclosed in the Supplement for each Portfolio. In respect of all other Classes, the Manager may pay the Distributor a fee (which shall be at normal commercial rates), in respect of its distribution services, which shall also be payable out of the Management Fee.

Non-Affiliated Sub-Adviser fees

The fees paid to the Non-Affiliated Sub-Advisers appointed by the Manager and/or the Sub-Investment Manager, with the exception of Green Court Capital Management Limited and the sub-advisers on Uncorrelated Strategies, will be paid out of the assets of the Portfolio. The aggregate fees paid to all advisers were between 0.65% and 1.50% of the NAV of the Portfolio. The aggregate adviser fee for the year ended 31 December 2023 was US\$ 1,145,544 (31 December 2022: US\$ 1,622,785).

Performance Fees

For the year ended 31 December 2023 a performance fee is being calculated on US Long Short Equity, Global High Yield SDG Engagement, Event Driven, Tactical Macro, Uncorrelated Strategies and Uncorrelated Trading.

Performance Fee paid to the Manager and a Sub-Investment Manager

The Manager and a Sub-Investment Manager may be entitled to receive a performance fee (the "Performance Fee") payable out of the Portfolio's assets in respect of each PF Class in the relevant Portfolio. The Depositary shall verify the calculation of the Performance Fee. The Directors may, with the consent of the Manager, reduce the Performance Fee payable by any Class of Shares. Performance fees are payable on realised and unrealised capital gains taking into account realised and unrealised losses at the end of the Calculation Period defined below for each applicable Portfolio. Consequently, performance fees may be paid on unrealised gains which may subsequently never be realised.

FOR THE YEAR ENDED 31 DECEMBER 2023

6. MANAGEMENT, ADMINISTRATION, DISTRIBUTION AND DEPOSITARY FEES (CONTINUED)**Performance Fees (continued)***Performance Fee paid to the Manager and a Sub-Investment Manager (continued)*

Shareholders should note that, as the Performance Fee is calculated at Class level and not at an individual Shareholder level, they may be charged a Performance Fee even where the NAV of their Shares has remained the same or dropped, for example, where Shareholders purchase or redeem Shares at points other than the start and end of the Calculation Period.

If the Management Agreement or a Sub-Investment Manager is terminated before the end of a Calculation Period in any year the performance fee in respect of the then current Calculation Period will be calculated and paid as though the date of termination were the end of the relevant Calculation Period.

The performance fee will be accrued in the NAV on each Dealing Day and will normally be payable to the Manager or a Sub-Investment Manager in arrears within 30 Business Days of the end of each Calculation Period. However, in the case of Shares redeemed during a Calculation Period, the accrued performance fee in respect of those Shares will be payable to the Manager or a Sub-Investment Manager within 30 Business Days of the date of redemption. Crystallised performance fees shall remain in the relevant Class (but shall not participate in subsequent gains and losses of the relevant Class) until paid to the Manager or a Sub-Investment Manager and shall not be used or made available to satisfy redemptions or pay any fees and expenses of the relevant Class.

The methodology used to calculate the Performance Fee for each applicable Portfolio is as follows:

US Long Short Equity

The Manager may be entitled to receive a performance fee payable out of the Portfolio's assets in respect of each PF Class in the Portfolio.

Definitions

Calculation Period	<p>The Calculation Period shall normally run from 1 January to 31 December in each year except that:</p> <ul style="list-style-type: none"> • in the case of the initial issue of Shares in each PF Class, the first Calculation Period will run from the date of issue to 31 December; • in the case of the termination of a PF Class, the Calculation Period will terminate on the date of the termination; and • in the case of the termination of the Management Agreement in any year, the Calculation Period will terminate on the date of the termination. <p>The first value used in determining the first Performance Fee for a PF Class shall be the Initial Offer Price.</p>
Crystallisation	<p>The point at which any Performance Fee becomes payable to the Manager. Crystallisation will occur either at the end of the Calculation Period or on a Dealing Day on which a Shareholder redeems or exchanges all or part of its Shareholding.</p>
High Water Mark	<p>The greater of: (i) the initial offer price per Share; and (ii) the NAV per share at the end of any previous Calculation Period in respect of which a Performance Fee was paid.</p>

Methodology

For each Calculation Period, a Performance Fee in respect of each PF Class in issue becomes due in the event that the NAV per share at the end of the Calculation Period exceeds the High Water Mark for that particular PF Class.

The Performance Fee will be calculated on each Dealing Day and will be equal to 15% of the amount by which the percentage growth in the NAV per share over the Calculation Period exceeds that of the High Water Mark. The Performance Fee will be accrued on each Dealing Day and will form part of the NAV per share for each PF Class where applicable. Any Performance Fee accrual on a Dealing Day will be superseded by any accrual made on the following Dealing Day up to the last Dealing Day of the Calculation Period.

In all cases the NAV per share used in the calculation of the Performance Fee is unswung, i.e. it does not include any adjustment for swing pricing.

No Performance Fee will be paid until the NAV per share exceeds the High Water Mark and such fee is only payable on the outperformance of the NAV per share over the Hurdle Rate as described above.

FOR THE YEAR ENDED 31 DECEMBER 2023

6. MANAGEMENT, ADMINISTRATION, DISTRIBUTION AND DEPOSITARY FEES (CONTINUED)

Performance Fees (continued)

Performance Fee paid to the Manager and a Sub-Investment Manager (continued)

US Long Short Equity (continued)

Methodology (continued)

Shareholders should note that, as the Performance Fee is calculated at Class level and not at an individual Shareholder level, they may be charged a Performance Fee even where the NAV of their shares has remained the same or dropped, for example, where Shareholders purchase or redeem Shares at points other than the start and end of the Calculation Period.

The Performance Fee will be accrued in the NAV on each Dealing Day and will normally be payable to the Manager in arrears within 30 Business Days of the end of each Calculation Period. However, in the case of Shares redeemed during a Calculation Period, the accrued performance fee in respect of those Shares will be payable to the Manager within 30 Business Days of the date of redemption.

Crystallised Performance Fees shall remain in the relevant PF Class (but shall not participate in subsequent gains and losses of the relevant Class) until paid to the Manager and shall not be used or made available to satisfy redemptions or pay any fees and expenses of the relevant PF Class.

The Depositary shall verify the calculation of the Performance Fee.

The Directors may, with the consent of the Manager, reduce the Performance Fee payable by any PF Class. Performance Fees are payable on realised and unrealised capital gains, which for the avoidance of doubt includes investment income, taking into account realised and unrealised losses at the end of the Calculation Period. Consequently, Performance Fees may be paid on unrealised gains which may subsequently never be realised.

For the year ended 31 December 2023, the Manager earned a performance fee of US\$ 284,324 (31 December 2022: US\$ Nil).

Global High Yield SDG Engagement

The Manager may be entitled to receive a performance fee payable out of the Portfolio's assets in respect of each PF Class in the Portfolio.

Definitions

Benchmark	ICE BofA Global High Yield Constrained Index in relevant class currency (as detailed below)
Calculation Period	<p>The Calculation Period shall normally run from 1 January to 31 December in each year except that:</p> <ul style="list-style-type: none"> in the case of the initial issue of Shares in each PF Class, the first Calculation Period will run from the date of issue to 31 December; in the case of the termination of a PF Class, the Calculation Period will terminate on the date of the termination; and in the case of the termination of the Management Agreement in any year, the Calculation Period will terminate on the date of the termination. <p>The first value used in determining the first Performance Fee for a PF Class shall be the Initial Offer Price.</p>
Crystallisation	The point at which any performance fee becomes payable to the Manager. Crystallisation will occur either at the end of the Calculation Period or on a Dealing Day on which a Shareholder redeems or converts all or part of its Shareholding.
Outperformance	The excess performance of the NAV per share over the performance of the Benchmark during the Calculation Period.

FOR THE YEAR ENDED 31 DECEMBER 2023

6. MANAGEMENT, ADMINISTRATION, DISTRIBUTION AND DEPOSITARY FEES (CONTINUED)

Performance Fees (continued)

Performance Fee paid to the Manager and a Sub-Investment Manager (continued)

Global High Yield SDG Engagement (continued)

Methodology

For each Calculation Period, a Performance Fee in respect of each PF Class in issue becomes due in respect of any Outperformance, i.e. the excess performance of the NAV per share over the performance of the Benchmark applicable to that particular PF Class during the Calculation Period. The Percentage Fee will be calculated on each Dealing Day and will be equal to 20% of the Outperformance applicable to that particular PF Class over the same period.

In all cases the NAV per share used in the calculation of the Performance Fee is unswung, i.e. it does not include any adjustment for swing pricing.

In the event that the performance of a PF Class over a Calculation Period is less than that of the Benchmark, no Performance Fee shall be payable in respect of that PF Class until such cumulative underperformance relative to its Benchmark has been recovered.

In the event that the PF Class has achieved Outperformance over a Calculation Period, a Performance Fee shall be payable in respect of that PF Class. Upon payment the Benchmark will be reset, this process ensures the NAV per share and the Benchmark start from the same place at the start of the calculation period. Accordingly for the next Calculation Period the commencing Benchmark value will equal the NAV in respect of the PF Class on which the Performance Fee was paid i.e. if the NAV were to equal 110 the commencing Benchmark Value would also equal 110.

Benchmark Indices

Classes	Index	Code
USD PF Classes	ICE BofA Global High Yield Constrained Index	HW0C select currency USD
EUR Hedged PF Classes	ICE BofA Global High Yield Constrained Index – EUR Hedged	HW0C select currency EUR
GBP Hedged PF Classes	ICE BofA Global High Yield Constrained Index – GBP Hedged	HW0C select currency GBP

Shareholders should note that, as the Performance Fee is payable on the outperformance over the Benchmark, they may be charged a Performance Fee where the NAV of their shares has declined but to a lesser extent than the Benchmark.

Shareholders should note that, as the Performance Fee is calculated at Class level and not at an individual Shareholder level, they may be charged a Performance Fee even where the NAV of their shares has remained the same or dropped, for example, where Shareholders purchase or redeem Shares at points other than the start and end of a Calculation Period.

The Performance Fee will be accrued in the NAV on each Dealing Day and will normally be payable to the Manager in arrears within 30 Business Days of the end of each Calculation Period. However, in the case of Shares redeemed during a Calculation Period, the accrued Performance Fee in respect of those Shares will be payable to the Manager within 30 Business Days of the date of redemption.

Crystallised Performance Fees shall remain in the relevant PF Class (but shall not participate in subsequent gains and losses of the relevant Class) until paid to the Manager and shall not be used or made available to satisfy redemptions or pay any fees and expenses of the relevant PF Class.

The Depositary shall verify the calculation of the Performance Fee.

The Directors may, with the consent of the Manager, reduce the Performance Fee payable by any PF Class. Performance Fees are payable on realised and unrealised capital gains, which for the avoidance of doubt includes investment income, taking into account realised and unrealised losses at the end of the Calculation Period. Consequently, Performance Fees may be paid on unrealised gains which may subsequently never be realised.

There were no performance fees paid to the Manager by the Portfolio for the year ended 31 December 2023 and 31 December 2022.

FOR THE YEAR ENDED 31 DECEMBER 2023

6. MANAGEMENT, ADMINISTRATION, DISTRIBUTION AND DEPOSITARY FEES (CONTINUED)

Performance Fees (continued)

Performance Fee paid to the Manager and a Sub-Investment Manager (continued)

Event Driven

The Manager may be entitled to receive a performance fee payable out of the Portfolio's assets in respect of each PF Class in the Portfolio. All Classes in the Portfolio are PF Classes.

Definitions

Calculation Period	<p>The Calculation Period shall normally run from 1 January to 31 December in each year except that:</p> <ul style="list-style-type: none"> • in the case of the initial issue of Shares in each PF Class, the first Calculation Period will run from the date of issue to 31 December; • in the case of the termination of a PF Class, the Calculation Period will terminate on the date of the termination; and • in the case of the termination of the Management Agreement in any year, the Calculation Period will terminate on the date of the termination. <p>The first value used in determining the first Performance Fee for a PF Class shall be the Initial Offer Price.</p>
Crystallisation	<p>The point at which any Performance Fee becomes payable to the Manager. Crystallisation will occur either at the end of the Calculation Period or on a Dealing Day on which a Shareholder redeems or exchanges all or part of its Shareholding.</p>
High Water Mark	<p>The greater of: (i) the initial offer price per Share; and (ii) the NAV per share at the end of any previous Calculation Period in respect of which a Performance Fee was paid.</p>

Methodology

For each Calculation Period, a Performance Fee in respect of each PF Class in issue becomes due in the event that the Net Asset Value per Share at the end of the Calculation Period exceeds the High Water Mark (net of all costs before the deduction of any accrued Performance Fee, provided that in doing so it is in the Shareholder's best interest) for that particular PF Class.

The Performance Fee will be calculated on each Dealing Day and will be equal to 20% of the amount by which the percentage growth in the Net Asset Value per Share over the Calculation Period exceeds that of the High Water Mark, with the exception of the I5 Classes, in respect of which the Performance Fee will be equal to 15% of the amount by which the percentage growth in the Net Asset Value per Share over the Calculation Period exceeds that of the High Water Mark.

The Performance Fee will be accrued on each Dealing Day and will form part of the Net Asset Value per Share for each PF Class where applicable. Any Performance Fee accrual on a Dealing Day will be superseded by any accrual made on the following Dealing Day up to the last Dealing Day of the Calculation Period.

In all cases the Net Asset Value per Share used in the calculation of the Performance Fee is unswung, i.e. it does not include any adjustment for swing pricing.

No Performance Fee will be paid until the Net Asset Value per Share exceeds the High Water Mark and such fee is only payable on the outperformance of the Net Asset Value per Share over the High Water Mark as described above.

Shareholders should note that, as the Performance Fee is calculated at Class level and not at an individual Shareholder level, they may be charged a Performance Fee even where the Net Asset Value of their Shares has remained the same or dropped, for example, where Shareholders purchase or redeem Shares at points other than the start and end of the Calculation Period.

FOR THE YEAR ENDED 31 DECEMBER 2023

6. MANAGEMENT, ADMINISTRATION, DISTRIBUTION AND DEPOSITARY FEES (CONTINUED)

Performance Fees (continued)

Performance Fee paid to the Manager and a Sub-Investment Manager (continued)

Event Driven (continued)

Methodology (continued)

The Performance Fee will be accrued in the Net Asset Value on each Dealing Day and will normally be payable to the Manager in arrears within 30 Business Days of the end of each Calculation Period. However, in the case of Shares redeemed during a Calculation Period, the accrued performance fee in respect of those Shares will be payable to the Manager within 30 Business Days of the date of redemption.

Crystallised Performance Fees shall remain in the relevant PF Class (but shall not participate in subsequent gains and losses of the relevant Class) until paid to the Manager and shall not be used or made available to satisfy redemptions or pay any fees and expenses of the relevant PF Class.

The Depositary shall verify the calculation of the Performance Fee and ensure that it is not open to the possibility of manipulation.

The Directors may, with the consent of the Manager, reduce the Performance Fee payable by any PF Class. Performance Fees are payable on realised and unrealised capital gains, which for the avoidance of doubt includes investment income, taking into account realised and unrealised losses at the end of the Calculation Period. Consequently, Performance Fees may be paid on unrealised gains which may subsequently never be realised.

For the year ended 31 December 2023, the Manager earned a performance fee of US\$ 1,269,230 (31 December 2022: US\$ 89,185).

Tactical Macro

The Sub-Investment Manager may be entitled to receive a performance fee payable out of the Portfolio's assets in respect of each PF Class in the Portfolio. All Classes in the Portfolio are PF Classes.

Definitions

Calculation Period	<p>The Calculation Period shall normally run from 1 January to 31 December in each year except that:</p> <ul style="list-style-type: none"> in the case of the initial issue of Shares in each Class, the first Calculation Period will run from the date of issue to 31 December of the following year; in the case of the termination of a Class, the Calculation Period will terminate on the date of the termination; and in the case of the termination of the Sub-Investment Manager, the Calculation Period will terminate on the date of the termination.
Crystallisation	The point at which any Performance Fee becomes payable to the Sub-Investment Manager. Crystallisation will occur (i) at the end of the Calculation Period; (ii) at the termination of the appointment of the Sub-Investment Manager; or (iii) on a Dealing Day on which a Shareholder redeems or exchanges all or part of its Shareholding.

GBP Hedged Classes	ICE BofA US Dollar 3-Month Deposit Offered Rate Constant Maturity Index (Total Return - GBP Hedged)
CHF Hedged Classes	ICE BofA US Dollar 3-Month Deposit Offered Rate Constant Maturity Index (Total Return - CHF Hedged)
JPY Hedged Classes	ICE BofA US Dollar 3-Month Deposit Offered Rate Constant Maturity Index (Total Return - JPY Hedged)

The Benchmark is a widely used benchmark for short-term interest rates, providing an indication of the average rates at which banks could obtain wholesale, unsecured funding for set periods in particular currencies.

For Classes denominated in currencies other than those provided for above, the Benchmark will be the ICE BofA US Dollar 3-Month Deposit Offered Rate Constant Maturity Index (Total Return, USD) hedged to the relevant class currency, as this better reflects an appropriate comparator for investors in those Classes.

Methodology

For each Calculation Period, a Performance Fee in respect of each Class in issue becomes due in respect of any Outperformance, i.e. the excess performance of the Net Asset Value per Share (net of all costs before the deduction of any accrued Performance Fee, provided that in doing so it is in the Shareholder's best interest) over the performance of the Benchmark applicable to that particular Class during the Calculation Period. The Performance Fee will be calculated on each Dealing Day and will be up to 20% of the Outperformance applicable to that particular Class over the same period.

In the event that the performance of a Class over a Calculation Period is less than that of the Benchmark, no Performance Fee shall be payable in respect of that Class until such cumulative underperformance relative to its Benchmark has been recovered.

In the event that the Class has achieved Outperformance over a Calculation Period, a Performance Fee shall be payable in respect of that Class. Upon payment the Benchmark will be reset, this process ensures the Net Asset Value per Share and the Benchmark start from the same place at the start of the calculation period. Accordingly for the next Calculation Period, the commencing Benchmark value will equal the Net Asset Value in respect of the Class on which the performance fee was paid i.e. if the Net Asset Value were to equal 110 at the end of a Calculation Period in which a Performance Fee was paid, the Benchmark value at the start of the following Calculation Period would also equal 110.

Shareholders should note that, as the Performance Fee is payable on the outperformance over the Benchmark, they may be charged a Performance Fee where the Net Asset Value of their Shares has declined but to a lesser extent than the Benchmark.

Shareholders should note that, as the Performance Fee is calculated at Class level and not at an individual Shareholder level and as no series accounting is applied in respect of the Performance Fee, they may be charged a Performance Fee even where the Net Asset Value of their Shares has remained the same or dropped, for example, where Shareholders purchase or redeem Shares at points other than the start and end of a Calculation Period.

The Performance Fee will be calculated and accrued daily as at each Valuation Point. The Performance Fee is calculated on the unswung Net Asset Value per Share, i.e. before any adjustment for swing pricing (for more information on "swing pricing" please see the "Determination of Net Asset Value – Adjustments of Valuations and Swing Pricing" section of the Prospectus).

The Performance Fee will normally be payable to the Sub-Investment Manager in arrears within 30 Business Days of 31 December each year. However, in the event of the Crystallisation of the Performance Fee during a Calculation Period, the accrued Performance Fee in respect of such amounts will be payable within 30 Business Days of the end of the calendar quarter during which the Crystallisation occurred.

Crystallised Performance Fees shall remain in the Portfolio until paid to the Sub-Investment Manager and shall not participate in subsequent gains and losses of the Portfolio. Crystallised Performance Fees shall not be used or made available to satisfy redemptions or pay any fees and expenses of the Portfolio or the Company (other than Performance Fees payable to the Sub-Investment Manager).

FOR THE YEAR ENDED 31 DECEMBER 2023

6. MANAGEMENT, ADMINISTRATION, DISTRIBUTION AND DEPOSITARY FEES (CONTINUED)**Performance Fees (continued)**

Performance Fee paid to the Manager and a Sub-Investment Manager (continued)

Tactical Macro (continued)Methodology (continued)

The Depositary shall verify the calculation of any Performance Fee and ensure that it is not open to the possibility of manipulation.

Performance Fees are payable on realised and unrealised capital gains, which for the avoidance of doubt includes investment income, taking into account realised and unrealised losses at the end of the Calculation Period. Consequently, Performance Fees may be paid on unrealised gains which may subsequently never be realised.

There were no performance fees paid to the Sub-Investment Manager by the Portfolio for the year ended 31 December 2023.

Uncorrelated Strategies

The Sub-Investment Manager may be entitled to receive a performance fee payable out of the Portfolio's assets in respect of each PF Class in the Portfolio. All Classes in the Portfolio are PF Classes.

Shareholders should note that, as the Performance Fee is calculated at Class level and not at an individual Shareholder level, they may be charged a Performance Fee even where the Net Asset Value of their Shares has remained the same or dropped, for example, where Shareholders purchase or redeem Shares at points other than the start and end of a Calculation Period.

The Performance Fee will be calculated and accrued daily as at each Valuation Point. The Performance Fee is calculated on the unswung Net Asset Value per Share, i.e. before any adjustment for swing pricing (for more information on "swing pricing" please see the "Determination of Net Asset Value – Adjustments of Valuations and Swing Pricing" section of the Prospectus).

The Performance Fee will normally be payable to the Sub-Investment Manager in arrears within 30 Business Days of 31 December each year. However, in the event of the Crystallisation of the Performance Fee during a Calculation Period, the accrued Performance Fee in respect of such amounts will be payable within 30 Business Days of the end of the calendar quarter during which the Crystallisation occurred.

Crystallised Performance Fees shall remain in the Portfolio until paid to the Sub-Investment Manager and shall not participate in subsequent gains and losses of the Portfolio. Crystallised Performance Fees shall not be used or made available to satisfy redemptions or pay any fees and expenses of the Portfolio or the Company (other than Performance Fees payable to the Sub-Investment Manager).

The Depositary shall verify the calculation of any Performance Fee and ensure that it is not open to the possibility of manipulation.

Performance Fees are payable on realised and unrealised capital gains, which for the avoidance of doubt includes investment income, taking into account realised and unrealised losses at the end of the Calculation Period. Consequently, Performance Fees may be paid on unrealised gains which may subsequently never be realised.

There were no performance fees paid to the Sub-Investment Manager by the Portfolio for the year ended 31 December 2023 (31 December 2022: US\$ 1,351).

* Portfolio liquidated on 24 May 2023.

Depositary Fee

The Company pays the Depositary a fee in respect of trustee services for each Portfolio which shall not exceed 0.02% per annum of the NAV of the relevant Portfolio and which accrues monthly and is payable monthly in arrears. The Depositary is also entitled to reimbursement by the Company out of the assets of the Portfolio for safekeeping fees, transaction charges and reasonable out-of-pocket expenses ("Custody fees") incurred for the benefit of the Portfolio including the fees (which will not exceed normal commercial rates) and reasonable out-of-pocket expenses of any sub-custodian appointed by the Depositary.

FOR THE YEAR ENDED 31 DECEMBER 2023

7. DIRECTORS' FEES AND EXPENSES

The Directors are entitled to a fee as remuneration for their services at a rate to be determined from time to time by the Directors provided that the amount of remuneration payable to any Director in any one year in respect of the Company shall not exceed €75,000 (or €85,000, in the case of the chairperson of the Company) or such other amount as the Directors may from time to time determine. The Directors, and any alternate Directors, are also entitled to be paid all travelling, hotel and other expenses properly incurred by them in attending Directors or Shareholders meetings or any other meetings in connection with the business of the Company. All Pay As You Earn ("PAYE") paid on Directors Fees is included within total expenses. None of the Directors entered into a service contract with the Company nor is any such contract proposed and none of the Directors is an executive of the Company. The Directors who are also employees of Neuberger Berman Europe Limited will receive a nil fee for their services as directors of the Company.

The aggregate emoluments of the Directors (including expenses) for the year ended 31 December 2023 were US\$ 234,165 in total (31 December 2022: US\$ 259,448) of which US\$ 19,272 was outstanding at the year end (31 December 2022: US\$ 60,237).

As at 31 December 2023, Ms. Michelle Green and Mr. Alex Duncan were Directors and employees of Neuberger Berman Europe Limited ("NBEL"), the Sub-Investment Manager and Distributor of the Company. Until 15 February 2023, Ms. Michelle Green was also a Director of Neuberger Berman Asset Management Ireland Limited ("NBAMIL"), the Manager of the Company. Ms. Gráinne Alexander is also Director of NBAMIL. Ms. Michelle Green and Mr. Alex Duncan voluntarily agreed to waive their entitlement to a fee in relation to their duties as Directors for the year ended 31 December 2023 (31 December 2022: same).

Directors' Fees are reported gross of Income Tax and no Benefit in Kind was earned by the Directors.

8. AUDITORS' REMUNERATION

Ernst & Young, Chartered Accountants remuneration (inclusive of expenses and value added tax ("VAT")) for work carried out for the Company in respect of the financial year is as follows:

		31 December 2023	31 December 2022
		US\$	US\$
Statutory audit fee:	- Ernst & Young (Ireland):	481,925	482,682
Other non-audit fees:	- Ernst & Young (Austria):	130,939	141,982
	- Ernst & Young (Switzerland):	130,000	126,681

9. OTHER FEES AND EXPENSES

Transaction costs are the costs incurred in the acquisition, issue or disposal of financial assets and liabilities. Transaction costs include fees and commissions paid to brokers and dealers, levies by regulatory agencies and securities exchanges, and transfer taxes and duties. Transaction costs do not include debt premiums or discounts, financing costs or internal administrative or holding costs. These costs are accounted for as they are incurred and are recognised as an expense for financial reporting purposes in the Profit and Loss Account.

The Company and the Portfolios also pay certain other costs, charges, fees and expenses incurred in its operation. These may include without limitation; fees and expenses incurred in relation to banking and brokerage in respect of the purchase and sale of Portfolio securities, taxes, insurance, the costs and expenses of maintaining its books of account and of preparing, printing, publishing and distributing (in such languages as may be necessary) prospectuses, supplements, annual and semi-annual reports and other documents or information to current and prospective shareholders (including the costs of electronic transmission techniques to distribute such documents or information), the expense of publishing price and yield information, in relevant media, the costs and expenses of obtaining authorisations or registrations of the Company or of any shares with the regulatory authorities in various jurisdictions, including any levy applied by the Central Bank of Ireland, the cost of listing and maintaining a listing of shares on any stock exchange, marketing and promotional expenses, the cost of convening and holding Directors and Shareholders meetings, the costs of exercising voting rights attached to the Company's investment in the best interest of the Shareholders, professional fees and expenses for legal, auditing and other consulting services, any and all expenses arising in respect of the termination or liquidation of the Company and such other costs and expenses (including non-recurring and extraordinary costs and expenses) as may arise from time to time and which have been approved by the Directors as necessary or appropriate for the continued operation of the Company or of any Portfolio. In connection with the registration of the Company or the shares for sale in certain jurisdictions, the Company pays the fees and expenses of paying agents, information agents and/or correspondent banks, such payments being made at normal commercial rates.

The Manager will directly pay for all research which it consumes, regardless of where the research originates. Sub-Investment Managers that are located outside the EU, which do not send any research that they receive into the EU, may charge research expenses to the relevant Portfolio through the provision of an annual research budget for each Portfolio. Research budget accruals for Uncorrelated Strategies and Uncorrelated Trading for the year ended 31 December 2023 were US\$ 4,979,140 and US\$ 50,854 (31 December 2022: US\$ 4,954,833 and US\$ 223,050), respectively.

For financial reporting purposes, organisation expenses are expensed to the Profit and Loss Account as they are incurred. For the purpose of calculating the NAV per share for shareholder dealing, organisation expenses are being amortised over the first two financial years of the lifetime of the Portfolio.

FOR THE YEAR ENDED 31 DECEMBER 2023

10. RELATED PARTY TRANSACTIONS

Under FRS 102 "Related Party Transactions", parties are related if any one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions.

Ms. Michelle Green and Mr. Alex Duncan are Directors of the Company and also Directors and employees of NBEL, the Sub-Investment Manager and Distributor of the Company. Until 15 February 2023, Ms. Michelle Green was also a Director of NBAMIL, the Manager of the Company. Ms. Gráinne Alexander is also Director of NBAMIL. Fees earned by NBEL and NBAMIL during the years ended 31 December 2023 and 31 December 2022 are shown in the table below. Please refer to Note 7 for details of Directors' Fees paid during the years ended 31 December 2023 and 31 December 2022.

Management, Administration and Performance Fees*	31 December 2023 US\$	31 December 2022 US\$

FOR THE YEAR ENDED 31 DECEMBER 2023

12. FINANCIAL INSTRUMENT DISCLOSURES

In pursuing its investment objectives the Company invests in transferable securities with the aim of spreading risk. Investments in equities and fixed income securities expose the Company to varying risks including market, liquidity and credit/counterparty risks. A description of the specific risks and the policies for managing these risks are included below. In addition, consequences of political, social, economic, diplomatic changes, or public health condition may have disruptive effects on market prices or fair valuations of foreign investments. Fair value is determined in accordance with the methodology outlined in the Statement of Significant Accounting Policies. The Schedules of Investments of the Portfolios at the year-end are representative of the type of investments held during the year.

Market Risk

Market risk embodies the potential for both losses and gains and includes price risk, interest rate risk and foreign currency risk.

All security investments present a risk of loss of capital. The Manager and Sub-Investment Managers moderate this risk through a careful selection of securities and other financial instruments within specified limits. The Company's overall market positions are monitored on a daily basis by the Portfolio's Manager and are reviewed on a quarterly basis by the Board of Directors. The Company's equity and debt securities and trading derivative financial instruments are susceptible to market price risk arising from uncertainties about future prices of the instruments.

(a) Price Risk

Price risk is the risk that the fair values of securities decrease as a result of changes in the levels of the indices and the values of individual securities. The trading price risk exposure arises from the Company's investment portfolios.

The majority of the Company's investments are listed on recognised exchanges or traded on regulated markets as per the Prospectus. As at 31 December 2023 and 31 December 2022, a 10% increase in security prices would have increased the Net Assets and the Changes in Net Assets of each Portfolio as outlined in the table below. An equal change in the opposite direction would have decreased the Net Assets by an equal but opposite amount.

FOR THE YEAR ENDED 31 DECEMBER 2023

12. FINANCIAL INSTRUMENT DISCLOSURES (CONTINUED)

(a) Price Risk (continued)

Other price risk is the risk that the value of the instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or currency risk), whether caused by factors specific to an individual instrument, its issuer or all factors affecting all instruments traded in the market. As the majority of the Company's financial instruments are carried at fair value with fair value changes recognised in the Profit and Loss Account changes in market conditions will directly affect Net Gain/(Loss) on Financial Assets and Liabilities at Fair Value through Profit or Loss.

Price risk is managed by the Manager by investing in a diversified range of securities in different markets.

The tables below summarise the relevant Portfolio's overall exposure to price risk.

12. FINANCIAL INSTRUMENT DISCLOSURES (CONTINUED)

(b) Foreign Currency Risk

The Net Asset Value per share of a Portfolio will be computed in the base currency of the relevant Portfolio, whereas the investments held for the account of that Portfolio may be acquired in other currencies. The base currency value of the investments of a Portfolio designated in another currency may rise and fall due to exchange rate fluctuations in respect of the relevant currencies. Adverse movements in currency exchange rates can result in a decrease in return and a loss of capital. Positions are monitored on a daily basis and hedging strategies are used to ensure positions are maintained within established limits.

At 31 December 2023 and 31 December 2022, had the base currency of the relevant Portfolio strengthened by 5% in relation to all currencies, with all other variables held constant, Net Assets and the Change in Net Assets per the Profit and Loss Account would have (decreased) increased as outlined in the table below.

Portfolio	Currency	31 December 2023	% of Net Assets	31 December 2022	% of Net Assets

¹ Portfolio launched during the prior reporting year.

² Portfolio launched during the current reporting year and thus no comparative period presented.

* Portfolio liquidated during the current or prior reporting year.

A 5% weakening of the base currency of the relevant Portfolio against the above currencies would have resulted in an equal but opposite effect on the above financial statement amounts to the amounts shown above, on the basis that all other variables remain constant. The foreign currency risk exposure has been calculated on the Net Assets of the Portfolio that are denominated in a currency which is not the base currency of the relevant Portfolio. The Manager deems 5% to be a reasonable rate for foreign currency shift.

FOR THE YEAR ENDED 31 DECEMBER 2023

12. FINANCIAL INSTRUMENT DISCLOSURES (CONTINUED)

(c) Interest Rate Risk

The Portfolios may hold investments in fixed interest bearing securities. Any change to the interest rate for particular securities may result in income either increasing or decreasing. Prices of securities held will be impacted by domestic rates of interest. The Portfolio's performance therefore will depend in part on its ability to anticipate and respond to such fluctuations in market interest rates. The Managers and Sub-Investment Managers manage this risk by way of duration and yield curve analysis to establish and monitor duration positioning and yield curve structure.

The Company has fifty-three Portfolios as at the year ended 31 December 2023. Of the Portfolios, twenty-one are Portfolios where the majority of the assets and liabilities of the Portfolio is invested in equity securities and are non-interest bearing. As a result, these Portfolios are not subject to significant amounts of risk due to fluctuations in the prevailing level of market interest rates.

At year end, the Portfolios set out in the table below invested primarily in fixed income and floating rate instruments and are therefore exposed to the effects of fluctuations in the prevailing level of market interest rates on their respective financial position and cash flows.

Based on the Portfolios' compositions as at 31 December 2023 and 31 December 2022, had interest rates fallen by 0.50% with all other variables held constant, it is estimated that Net Assets and the Change in Net Assets per the Profit and Loss Account would have increased by approximately the values outlined in the table below. A 0.50% rise in rates would have resulted in an equal but opposite effect.

Portfolio	Currency	31 December 2023	% of Net Assets	31 December 2022	% of Net Assets

¹Portfolio launched during the prior reporting year.² Portfolio launched during the current reporting year and thus no comparative period presented.

(d) Credit/Counterparty Risk

Credit risk is the risk that an issuer or counterparty will be unable to meet a commitment that it has entered into with the Company. It is the Company's policy to enter into financial instruments with a diversity of creditworthy counterparties. Therefore, the Company does not expect to incur material credit losses on its financial instruments. The Manager performs assessments of the credit quality of trading counterparties used by the Company. This assessment includes, at minimum, an initial and annual credit review based on financial and/or third-party ratings data. Counterparties used for forwards and other OTC derivatives are subject to heightened monitoring, which includes in-depth credit reviews considering third-party ratings and/or factors such as capital adequacy, asset quality, management quality, earnings, and liquidity. The Manager also follows news regarding the financial sector to monitor industry trends as well as events that may directly impact specific counterparties.

The Company's maximum exposure to credit risk (not taking into account the value of any collateral or other security held) in the event that counterparties fail to perform their obligations as at 31 December 2023 and 31 December 2022 in relation to each class of recognised financial assets, other than derivatives, is the carrying amount of those assets as indicated in the Balance Sheet.

Transactions involving derivative financial instruments are usually with counterparties with whom the Portfolio has signed master netting agreements. Master netting agreements provide for the net settlement of contracts with the same counterparty in the event of default. The credit risk associated with derivative financial assets subject to a master netting arrangement is eliminated only to the extent that financial liabilities due to the same counterparty will be settled after the assets are realised. Risk is also managed by collateral being immediately available to the Company without recourse to counterparty in the event of default of counterparty.

Cash held via accounts opened on the books of Brown Brothers Harriman & Co. ("BBH") are obligations of BBH while cash held in accounts opened directly on the books of a third party cash correspondent bank, sub-custodian or a broker (collectively, "agency accounts") are obligations of the agent. Cash held via agency cash accounts are liabilities of the agent, creating a debtor/creditor relationship directly between the agent and the Company. Accordingly, while BBH is responsible for exercising reasonable care in the administration of such agency cash accounts where it has appointed the agent (i.e., in the case of cash correspondent banks and sub-custodians), it is not liable for their repayment in the event the agent, by reason of its bankruptcy, insolvency or otherwise, fails to make repayment. As at 31 December 2023, all cash and bank balances held on overnight deposit were with third party institutions, as outlined in Note 3. Cash and Cash Equivalents, that have a long term credit rating which is investment grade as issued by Standard & Poor's (31 December 2022: same). BBH has a long term credit rating of A+ (31 December 2022: A+) as issued by Fitch.

The Depositary must ensure that there is legal separation of non-cash assets held in custody, that such assets are held on a fiduciary basis, and that appropriate internal control systems are maintained such that records clearly identify the nature and amount of all assets under custody. As Depositary, Brown Brothers Harriman Trustee Services (Ireland) Limited ("BBHTS") must ensure the ownership of each asset and the location of documents of title for each asset.

FOR THE YEAR ENDED 31 DECEMBER 2023

12. FINANCIAL INSTRUMENT DISCLOSURES (CONTINUED)

(d) Credit/Counterparty Risk (continued)

The key risk for the Company remains Credit Risk i.e. that the Manager buys a loan or bond of a particular issuer and it does not perform as expected and either defaults on a payment or experiences a significant drop in the secondary market value.

To mitigate this risk, the Manager carries out independent due diligence on each borrower, and has a focus on stable, performing credits that evidence strong track records through previous economic cycles. Additionally, the size of an issuer is also considered and the Manager continues to favour the larger issuers in the market, defined by having debt issuance greater than \$500m. These issuers tend to have broader syndicates, which can aid liquidity in the secondary market. As well as screening out the smaller issuers the Manager also excludes highly cyclical industries and companies with limited earning visibility from its Investment Process.

Once a particular investment has been made, the Manager monitors it. A range of relevant data is reviewed on an ongoing basis for each investment, including, but not limited to, key financial drivers, commodity prices, stock prices, regulatory developments, financial results, press releases and management commentary to identify any indicators of credit deterioration.

To manage this risk further, the Board ensures that the Manager operates in accordance with the investment limits and restrictions policy determined by the Board. The Directors monitor the implementation and results of the investment process with the Manager at each Board meeting and monitor risk factors in respect of each Portfolio.

The securities that BBH holds in custody include equities, fixed income securities, participatory notes, asset backed securities and REITS. All securities that BBH holds in custody (as global sub-custodian for and on behalf of BBHTS for further benefit of its underlying clients) are segregated from BBH's own assets, whether they are held in BBH's vault, in segregated accounts on the books of their sub-custodians, or in an account maintained at a central securities depository. BBH maintains segregated accounts per client on its own books as well as on the books of the sub-custodian in the local market, where this is possible. As Depositary, BBHTS must also ensure non-cash assets are held on a fiduciary basis through BBH's network of global sub-custodians.

BBH's sub-custodians are required by contract with BBH and generally by operation of law to segregate the securities of custody clients from the general banking assets of the sub-custodian.

BBH performs both initial and ongoing due diligence reviews on the sub-custodians within its global custody network through its Network Management Group. Such reviews include an assessment of service level standards, management expertise, market information, custody operations, reporting and technology capabilities at the sub-custodian, as well as reviews in relation to their reputation and standing in the market and their ongoing commitment to providing custody services.

Service level agreements are put in place with each sub-custodian, as well as the usual contractual arrangements, and these are reviewed on a regular basis through service review meetings, including on-site due diligence meetings.

Regular financial analysis of all sub-custodians is carried out by BBH's Risk and Credit Group and is focused on the sub-custodian bank's capital adequacy, asset quality, earnings, liquidity and credit ratings as key indicators, amongst others. These reviews form part of BBH's routine assessment of a sub-custodian's financial strength and standing.

The Manager monitors the Company's risk in accordance with UCITS guidelines and reports to the Board of Directors on a periodic basis.

The Company invests in debt instruments that may receive a credit rating from a well-known rating agency. The credit ratings in the tables below are calculated as a percentage of fixed income securities, where there is a significant proportion of that Portfolio held as fixed income. A debt instrument is considered Investment Grade by Standard & Poor's and Fitch if its credit rating is BBB- or higher and by Moody's if its credit rating is Baa3 or higher. As at 31 December 2023 and 31 December 2022 the exposures by credit rating for each applicable Portfolio were as follows:

China Bond

Investments:	31 December 2023 CNY	31 December 2022 CNY

FOR THE YEAR ENDED 31 DECEMBER 2023

12. FINANCIAL INSTRUMENT DISCLOSURES (CONTINUED)**(e) Liquidity Risk**

The main liquidity risks of the Company are associated with the need to satisfy Shareholders' requests for redemptions. The Company is exposed to daily cash redemptions of Redeemable Participating Shares. Redeemable Participating Shares are redeemed on demand at the holder's option based on the relevant Portfolio's Net Asset Value per Share at the time of redemption. This risk is mitigated by the Company primarily investing in securities listed or traded on the recognised markets in OECD member states and other countries thus assets comprise principally of realisable securities, which can be readily sold. Additionally, if there are any collateral arrangements in place with a counterparty, this will limit the extent to which liabilities may be extended to the Company. Moreover, as outlined in Note 19, a committed liquidity facility is available to the Company.

Financial Liabilities

The maturity grouping is based on the remaining period from the end of the reporting period to the contractual maturity date. When the counterparty has a choice of when the amount is paid, the liability is allocated to the earliest on which the Company can be required to pay.

As at 31 December 2023 and 31 December 2022, the vast majority of liabilities of all Portfolios were payable in one month. Please refer to Schedules for Investments for details of maturity dates of derivative financial liabilities. Liabilities other than derivative financial liabilities are due within one month.

(f) LIBOR Replacement Risk

Many financial instruments use or may use a floating rate based on London Interbank Offered Rate ("LIBOR"), the offered rate at which major international banks can obtain wholesale, unsecured funding. LIBOR may be a significant factor in determining the Fund's payment obligations under a derivative investment, the cost of financing to the Fund or an investment's value or return to the Fund, and may be used in other ways that affect the Fund's investment performance. The United Kingdom's Financial Conduct Authority announced a phase out of the LIBOR. Although many LIBOR rates were phased out, a selection of widely used USD LIBOR rates will continue to be published through June 2023 in order to assist with the transition. The Portfolios may be exposed to financial instruments tied to LIBOR to determine payment obligations, financing terms, hedging strategies or investment value. The transition process away from LIBOR might lead to increased volatility and illiquidity in markets for, and reduce the effectiveness of new hedges placed against, instruments whose terms currently include LIBOR.

(g) Fair Value of Investments

FRS 102 Section 11.27 on "Fair Value: Disclosure" requires disclosure relating to the fair value hierarchy in which fair value measurements are categorised for assets and liabilities. The disclosures are based on a three-level fair value hierarchy for the inputs used in valuation techniques to measure fair value.

The Company has classified fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1 – Unadjusted quoted prices in active markets that are accessible at the measurement date for identical unrestricted assets or liabilities;

Level 2 – Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices);

Level 3 – Inputs for the asset or liability that are not based on observable market data (unobservable inputs). Pricing inputs are unobservable for the investment and include situations where there is little, if any market activity for the instrument. The inputs into the determination of fair value require significant management judgement or estimation. As observable prices are not available for these securities, the Portfolios would have used valuation techniques to derive the fair value if applicable.

FOR THE YEAR ENDED 31 DECEMBER 2023

12. FINANCIAL INSTRUMENT DISCLOSURES (CONTINUED)

(g) Fair Value of Investments (continued)

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. For example, if a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measure is a Level 3 measurement.

Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement in considering the factors specific to the asset or liability.

Determining what constitutes observable inputs requires significant judgment by the Manager. The Manager considers observable inputs to be market data that is readily available, supported by market transactions, not proprietary, regularly distributed, transparent, verifiable, reliable, based on consensus, and provided by independent sources actively involved in the relevant market.

The value of the Portfolios' investments in equity securities, exchange-traded funds, warrants, exchange-traded options purchased and written, for which market quotations are available, is generally determined by obtaining valuations from independent pricing services based on the latest sale price quoted on a principal exchange or market for that security (Level 1 inputs). Securities traded primarily on the NASDAQ Stock Market are normally valued at the NASDAQ Official Closing Price ("NOCP") provided by NASDAQ each business day. The NOCP is the most recently reported price as of 4:00:02 p.m., Eastern Time, unless that price is outside the range of the "inside" bid and asked prices (i.e., the bid and asked prices that dealers quote to each other when trading for their own accounts); in that case, NASDAQ will adjust the price to equal the inside bid or asked price, whichever is closer. Because of delays in reporting trades, the NOCP may not be based on the price of the last trade to occur before the market closes. If there is no sale of a security on a particular day, the independent pricing services may value the security based on market quotations.

The value of participatory notes is determined by obtaining valuations from independent pricing services based on the underlying equity security and applicable exchange rate (Level 1 inputs).

The value of the Portfolios' investments in debt securities is determined primarily by obtaining valuations from independent pricing services based on available mid quotations, or if quotations are not available, by methods which include various considerations based on security type (generally Level 2 inputs). If there is more than one quote security available, security is classified as Level 2. In addition to the consideration of yields or prices of securities of comparable quality, coupon, maturity and type, indications as to values from dealers, and general market conditions, the following is a description of other Level 2 inputs and related valuation techniques used by independent pricing services to value certain types of debt securities held by the Portfolios:

Corporate Bonds. Inputs used to value corporate debt securities generally include relevant credit information, observed market movements, sector news, US Treasury yield curve or relevant benchmark curve, and other market information, which may include benchmark yield curves, reported trades, broker-dealer quotes, issuer spreads, comparable securities, and reference data, such as market research publications, when available ("Other Market Information").

Convertible Bonds. Inputs used to value convertible bonds (including CoCos) generally include underlying stock data, conversion premiums, listed bond and preferred stock prices and Other Market Information, which may include benchmark curves, trade execution data, and sensitivity analysis, when available.

U.S. Treasury Obligations. Inputs used to value U.S. Treasury securities generally include quotes from several inter-dealer brokers and Other Market Information.

U.S. Government Agency Securities. Inputs used to value U.S. Government Agency securities generally include obtaining benchmark quotes and Other Market Information.

Asset-Backed Securities and Mortgage-Backed Securities. Inputs used to value asset-backed securities and mortgage-backed securities generally include models that consider a number of factors, which may include the following: prepayment speeds, cash flows, spread adjustments and Other Market Information.

High Yield Securities. Inputs used to value high yield securities generally include a number of observations of equity and credit default swap curves related to the issuer and Other Market Information.

FOR THE YEAR ENDED 31 DECEMBER 2023

12. FINANCIAL INSTRUMENT DISCLOSURES (CONTINUED)

(g) Fair Value of Investments (continued)

Emerging Markets Debt and Foreign Government Securities. Inputs used to value emerging markets debt and foreign government securities generally include dealer quotes, bond market activity, discounted cash flow models, and other relevant information such as credit spreads, benchmark curves and Other Market Information.

Collateralised Loan Obligations (CLOs). The value of collateralised loan obligations is primarily determined by cash flow data, relevant loan pricing data and market color, and research from market participants and trading desks (Level 2 or 3 inputs).

The value of term loans is determined primarily by obtaining valuations from independent pricing services based on broker quotes (generally Level 2 or Level 3 inputs depending on the number of quotes available).

The value of futures contracts is determined by obtaining valuations from independent pricing services at the settlement price at the market close (Level 1 inputs).

The value of forward foreign currency contracts is determined by obtaining valuations from independent pricing services based on actual traded currency rates on independent pricing services' networks, along with other traded and quoted currency rates provided to the pricing services by leading market participants (Level 2 inputs).

The value of credit default swaps is determined by obtaining valuations from independent pricing services using a model that considers a number of factors, which may include default probabilities, credit curves, recovery rates and cash flows (Level 2 inputs).

The value of inflation swaps is determined primarily by obtaining valuations from independent pricing services based on references to the underlying inflation rates including forward inflation expectation rate and the respective interbank offered forward rate to produce the daily price. The present value is calculated based off of expected cash flows based on swap parameters along with reference to the underlying forward inflation curve and reference rate (Level 2 inputs).

The value of interest rate swaps is determined primarily by obtaining valuations from independent pricing services based on references to the underlying rates including the local overnight index swap rate and the respective interbank offered forward rate to produce the daily price. The present value is calculated based off of expected cash flows based on swap parameters along with reference to the underlying yield curve and reference rate (Level 2 inputs).

The value of total return swaps is determined by obtaining valuations from independent pricing services using the underlying asset and stated benchmark interest rate (Level 2 inputs).

The value of cross currency swaps is determined by obtaining valuations from independent pricing services based on present value of expected cash flows based on swap parameters along with reference to the underlying yield curve and reference rate (Level 2 inputs).

The value of volatility swaps is determined primarily by obtaining valuations from independent pricing services and is based on a predetermined volatility level versus the actual amount of volatility realised over a period data of the reference asset (Level 2 inputs).

The value of variance swaps is determined primarily by obtaining valuations from independent pricing services and is based on the historical realised and expected future variance (or fair variance) of the reference asset (Level 2 inputs).

The value of correlation swaps is determined primarily by obtaining valuations from independent pricing services and is based on the difference in the realised correlation and a fixed correlation value (Level 2 inputs).

The value of contracts for difference ("CFD") is determined primarily by obtaining valuations from independent pricing services, which are based on references to the underlying asset and the stated reference rate (Level 2 inputs). The value of swaptions is determined by obtaining valuations from independent pricing services or counterparty pricing source (Level 2 inputs).

FOR THE YEAR ENDED 31 DECEMBER 2023

12. FINANCIAL INSTRUMENT DISCLOSURES (CONTINUED)

(g) Fair Value of Investments (continued)

Option contracts that are traded over-the-counter are generally valued on the basis of quotations provided by broker dealers or prices provided by independent pricing services who use a series of techniques including simulated pricing models and/or curve fitting (bootstrapping), which aids in determining the present value of the contracts. The pricing models use inputs that are observed from actively quoted markets such as issuer details, indices, spreads, interest rates, yield curves, credit curves, volatility surfaces, and exchange rates (Level 2 inputs).

Certificates of deposit are valued at amortized cost (Level 2 inputs).

Reverse repurchase agreements are evaluated at par, by pricing services (Level 2 inputs).

The Manager has developed a process to periodically review information provided by independent pricing services for all types of securities.

Investments in non-exchange traded investment companies are valued using the respective fund's daily calculated net asset value ("NAV") per share (Level 2 inputs), when available.

If a valuation is not available from an independent pricing service, or if the Manager has reason to believe that the valuation received does not represent the amount a Portfolio might reasonably expect to receive on a current sale in an orderly transaction, the Manager seeks to obtain quotations from brokers or dealers (generally considered Level 2 or Level 3 inputs depending on the number of quotes available). If such quotations are not available, the security is valued using methods the Board of Directors has approved in the good-faith belief that the resulting valuation will reflect the fair value of the security.

Inputs and assumptions considered in determining the fair value of a security based on Level 2 or Level 3 inputs may include, but are not limited to, the type of the security; the initial cost of the security; the existence of any contractual restrictions on the security's disposition; the price and extent of public trading in similar securities of the issuer or of comparable companies; quotations or evaluated prices from broker-dealers and/or pricing services; information obtained from the issuer and/or analysts; an analysis of the company's or issuer's financial statements; an evaluation of the inputs that influence the issuer and the market(s) in which the security is purchased and sold.

The value of the Portfolios' investments in foreign securities is generally determined using the same valuation methods and inputs as other Portfolio investments, as discussed above. Foreign security prices expressed in local currency values are normally translated from the local currency into US dollars using the exchange rates as of 4:00 p.m., Eastern Time on days the New York Stock Exchange ("NYSE") is open for business. The Board of Directors has approved the use of ICE Data Pricing & Reference Data LLC ("ICE") to assist in determining the fair value of foreign equity securities when changes in the value of a certain index suggest that the closing prices on the foreign exchanges may no longer represent the amount that a Portfolio could expect to receive for those securities or on days when foreign markets are closed and US markets are open. In each of these events, ICE will provide adjusted prices for certain foreign equity securities using a statistical analysis of historical correlations of multiple factors (Level 2 inputs). The Board of Directors has also approved the use of ICE to evaluate the prices of foreign debt securities as of the time as of which a Portfolio's share price is calculated. ICE utilizes benchmark spread and yield curves and evaluates available market activity from the local close to the time as of which a Portfolio's share price is calculated (Level 2 inputs) to assist in determining prices for certain foreign debt securities.

In the case of both foreign equity and foreign debt securities, in the absence of precise information about the market values of these foreign securities as of the time as of which a Portfolio's share price is calculated, the Board of Directors has determined on the basis of available data that prices adjusted or evaluated in this way are likely to be closer to the prices a Portfolio could realise on a current sale than are the prices of those securities established at the close of the foreign markets in which the securities primarily trade.

Fair value prices are necessarily estimates, and there is no assurance that such a price will be at or close to the price at which the security is next quoted or next trades.

A notional currency adjustment of US\$ 111,001,114 (31 December 2022: US\$ (304,151,197)) arose from the translation of the opening Net Assets, the Profit and Loss Accounts and the Statements of Changes in Net Assets Attributable to Redeemable Participating Shares. The method of translation has no effect on the value of the net assets attributable to the individual Portfolios.

16. SOFT COMMISSIONS ARRANGEMENTS

The Manager and connected persons have entered into soft commission arrangements with brokers in respect of research products in limited instances, subject to its receiving best execution to support the investment decision process.

The types of research received includes all standard forms of research, including but not limited to current and historical data concerning particular companies, industries and the financial economy as a whole, as well as information and opportunities, risks and trends, and analysis involving special situations. The Manager considers these arrangements are to the benefit of the Portfolios and has satisfied itself that it obtains best execution on behalf of the Portfolios.

17. SEGREGATED LIABILITY

The Company has multiple Portfolios and further Portfolios may be created in the future. With the approval of the Company's Shareholders, by way of a special resolution passed on 3 November 2006, the Company adopted segregated liability between its Portfolios. As at that date, each Portfolio bears its own liabilities and none of the Company, any of the service providers appointed to the Company, the Directors, any receiver, examiner, liquidator nor will any other person have access to the assets of a Portfolio in satisfaction of a liability of any other Portfolio.

18. EFFICIENT PORTFOLIO MANAGEMENT

The Company may employ investment techniques and instruments relating to transferable securities and/or other financial instruments including financial derivative instruments under the conditions and within the limits laid down by the Central Bank, provided that such instruments are used for efficient portfolio management purposes (i.e. hedging, reducing risks or cost, or increasing capital or income returns) or investment purposes. Techniques and instruments utilised may only be used in accordance with the investment objectives of the relevant Portfolio.

FOR THE YEAR ENDED 31 DECEMBER 2023**18. EFFICIENT PORTFOLIO MANAGEMENT (CONTINUED)**

At the discretion of the Manager or the Sub-Investment Manager, each Portfolio may enter into securities lending transactions ("Securities Lending Agreements"), subject to the conditions and limits set out in the Central Bank UCITS Regulations, in respect of each of the types of assets in which the Portfolio may invest, as described in the "Instruments/Asset Classes" section of the relevant Supplement for the Portfolio. Any such securities lending transactions may be used for efficient portfolio management purposes.

Securities Lending Agreements are transactions through which a Portfolio lends its securities to another party, the borrower, which is contractually obliged to return equivalent securities at the end of an agreed period. While securities are on loan, the borrower pays the Portfolio (i) a loan fee and (ii) any income from the securities.

The Company received, for each Portfolio that participated in Securities Lending Agreements, collateral that is at least equivalent to 102% of the value of the lent securities. Portfolios might only enter into Securities Lending Agreements under which (i) they are entitled at all times to request the return of the securities lent or to terminate any securities lending transactions and (ii) the transactions do not jeopardise the management of the Portfolio's assets in accordance with its investment policy. Unless otherwise specified in the relevant Supplement, the maximum proportion of a Portfolio's Net Asset Value that can be subject to Securities Lending Agreements is 50% and the expected proportion of a Portfolio's Net Asset Value that will be subject to Securities Lending Agreements is 0-10%.

The Company has appointed Brown Brothers Harriman & Co. (the "Lending Agent") to carry out the Securities Lending Agreements, notably the selection of counterparties, subject to the Company's pre-approval, and the management of the collateral. Portfolios entered into Securities Lending Agreements received all revenue generated from the Securities Lending Agreements, net of direct and indirect operational costs, which represented 90% of the total revenue generated. The remaining 10% was paid to the Lending Agent in consideration of the direct and indirect operational costs of the provision of its services and the guaranty that it provided. The Company left Securities Lending Program in July 2022, securities lending income earned by the Portfolios during the relevant period is disclosed separately in the Profit and Loss Account.

As of 31 December 2023 and 31 December 2022, the Company did not engage in any securities lending.

During the year ended 31 December 2023, Corporate Hybrid Bond, Emerging Market Debt Blend and Short Duration Emerging Market Debt engaged in repurchase trading and reverse repurchase trading. Total interest income arising from repurchase agreements and reverse repurchase agreements for the year ended 31 December 2023 were US\$ 1,613 and US\$ 38,355, respectively. Total interest expense arising from repurchase agreements and reverse repurchase agreements for the year ended 31 December 2023 were US\$ 2,677 and US\$ 175,821, respectively. Direct and indirect costs associated with efficient portfolio management techniques are not readily identifiable.

During the year ended 31 December 2022, Corporate Hybrid Bond, Emerging Market Debt - Hard Currency, Emerging Market Debt Blend, High Yield Bond and Short Duration Emerging Market Debt engaged in reverse repurchase trading. Total interest income arising from reverse repurchase agreements for the year ended 31 December 2022 was US\$ 140,059. Total interest expense arising from reverse repurchase agreements for the year ended 31 December 2022 was US\$ 6,300. Direct and indirect costs associated with efficient portfolio management techniques are not readily identifiable.

19. LOAN FACILITY

At the board meeting dated 20 June 2016, arrangements have been made with The Bank of Tokyo Mitsubishi UFJ Ltd, together with a syndicate of other banks (collectively the "Lenders") to make available a committed liquidity facility, up to a maximum amount of US\$ 500,000,000 (the "Facility"), to the Company in respect of the Portfolios from the date of the execution of a credit agreement with the Bank and the proceeds of the Facility could only be used for temporary or emergency liquidity needs of the Portfolios. The Facility, in the amount of US\$ 850,000,000, was renewed on 28 September 2023 for the period of 364 days for all Portfolios. The cost of the commitment fee has changed accordingly.

There were no loans outstanding under the Facility at 31 December 2023 and 31 December 2022. During the year ended 31 December 2023 and 31 December 2022, none of the Portfolios utilised the loan facility.

20. UNFUNDED LOAN COMMITMENTS

As of 31 December 2023 and 31 December 2022, the Company had no unfunded loan commitments.

FOR THE YEAR ENDED 31 DECEMBER 2023**21. SIGNIFICANT EVENTS DURING THE YEAR**

Economic and financial market uncertainties remain elevated, driven by higher sustained inflation and tightening monetary policy as Central Banks have increased base rates, along with the tightening of credit conditions as illustrated with recent events in the banking sector. These market conditions are contributing to additional volatility and fluctuation in market variables including but not limited to interest rates, foreign exchange, equity prices, commodity prices, widening credit spreads, implied volatilities and asset correlations. Management are actively monitoring events and any exposure to elevated risk sectors.

A new Multi Strategy Supplement to the Prospectus was noted by the Central Bank on 3 January 2023 covering the change in Performance Fee calculation methodology on Neuberger Berman Uncorrelated Strategies Fund.

A new Sustainable Asia High Yield Supplement to the Prospectus was noted by the Central Bank on 3 January 2023.

A new Fixed Income Supplement to the Prospectus was noted by the Central Bank on 7 February 2023.

Neuberger Berman Uncorrelated Trading Fund liquidated on 24 May 2023.

Neuberger Berman Global High Yield Sustainable Action Fund liquidated on 16 June 2023.

Neuberger Berman Tactical Macro Fund launched on 30 June 2023.

Tom Finlay retired as a Director of the Company on 30 June 2023.

With effect from 1 July 2023 Naomi Daly replaced Tom Finlay as chairperson.

Neuberger Berman Multi-Asset Income Fund liquidated on 6 July 2023.

Neuberger Berman Developed Market FMP – 2027 launched on 31 July 2023.

Neuberger Berman Climate Innovation Fund launched on 1 August 2023.

A new version of the Company's Prospectus and new Supplements to the Prospectus covering changes on all Portfolios were noted by the Central Bank on 2 August 2023. The Supplements to the Prospectus additional updates cover changes on Neuberger Berman China Equity Fund, Neuberger Berman Sustainable Emerging Market Debt – Hard Currency Fund, Neuberger Berman Ultra Short Term Euro Bond Fund, Neuberger Berman Global Flexible Credit Income Fund, Neuberger Berman Corporate Hybrid Bond Fund, Neuberger Berman European High Yield Bond Fund, Neuberger Berman Global High Yield SDG Engagement Fund, Neuberger Berman Next Generation Space Economy Fund, Neuberger Berman InnovAsia 5G Fund, Neuberger Berman Global Equity Megatrends Fund, Neuberger Berman Systematic Global Sustainable Value Fund, Neuberger Berman Global Real Estate Securities Fund, Neuberger Berman US Real Estate Securities Fund, Neuberger Berman Sustainable Asia High Yield Fund and Neuberger Berman Uncorrelated Strategies Fund.

With effect from 2 August 2023, Neuberger Berman Systematic Global Sustainable Value Fund changed its name to Neuberger Berman Global Sustainable Value Fund.

On the recommendation of the Manager and in accordance with the terms of the Prospectus and the provisions of the Articles, the Board approved a 7 September 2023 termination date for the Neuberger Berman Emerging Markets Select Equity Fund.

With effect from 2 October 2023, Neuberger Berman Asian Debt - Hard Currency Fund changed its name to Neuberger Berman Responsible Asian Debt – Hard Currency Fund.

With effect from 5 October 2023, Alcova Asset Management LLP ceased acting as a Non-Affiliated Sub-Adviser of the Company.

With effect from 22 November 2023, G10 Capital Limited was appointed as a Non-Affiliated Sub-Advisers of the Company.

With effect from 23 November 2023, Cipher Capital LP was appointed as a Non-Affiliated Sub-Advisers of the Company.

A new version of the Company's Prospectus and new Supplements to the Prospectus covering changes on all Portfolios were noted by the Central Bank on 6 December 2023. The Supplements to the Prospectus updates cover automatic conversion of Shares in the category B, C2 and E Classes into Shares in the corresponding A Class, at no additional cost to holders of such Shares, upon the expiry of four years (category B Classes), two years (category C2 Classes) and three years (category E Classes) from the date of the initial subscription into the relevant B, C2 or E Class.

With effect from 6 December 2023, Neuberger Berman Euro Opportunistic Bond Fund changed its name to Neuberger Berman Euro Bond Fund.

With effect from 15 December 2023, Sandbar Asset Management LLP ceased acting as a Non-Affiliated Sub-Adviser of the Company.

FOR THE YEAR ENDED 31 DECEMBER 2023

21. SIGNIFICANT EVENTS DURING THE YEAR (CONTINUED)

Neuberger Berman Fund Management (China) Limited replaced Neuberger Berman Investment Management (Shanghai) Limited as an investment advisor to Neuberger Berman Emerging Market Debt - Local Currency Fund, Neuberger Berman Emerging Market Debt Blend Fund and Neuberger Berman China Bond Fund.

Other than the above, there have been no significant events affecting the Company during the year.

22. SIGNIFICANT EVENTS SINCE THE YEAR END

With effect from 1 February 2024, Neuberger Berman Global Equity Megatrends Fund management fee was reduced from 0.85% to 0.80% on EUR I Accumulating Class and USD I Accumulating Class, from 1.70% to 1.60% on EUR M Accumulating Unhedged Class, SGD A Accumulating Class, USD A Accumulating Class, USD C1 Accumulating Class, USD M Accumulating Class and from 0.81% to 0.76% on GBP P Accumulating Unhedged Class.

Neuberger Berman Macro Opportunities FX Fund liquidated on 8 February 2024.

⁺ Calculated based on the average number of shares outstanding during the period.

⁺⁺ Ratios are net of expense waiver, where applicable. The net expense ratio includes both operational and non-operational expenses and any adjustments required to comply with appropriate accounting standards.

Where applicable, ratios have been annualised.

* Share class launched during the current reporting year.

¹ Portfolio launched during the current reporting year and thus no comparative period presented.

² Portfolio launched during the prior reporting year.

FOR THE YEAR ENDED 31 DECEMBER 2023

25. DERIVATIVE CONTRACTS

The Manager of the Company is an affiliate of Neuberger Berman Group LLC, who is a registered investment adviser with the SEC in the United States. The information included here represents US GAAP equivalent disclosures that are provided in order to enable the Manager to avail of certain exemptions available to it under the SEC Custody Rule.

The Portfolios may transact in a variety of derivative instruments including swaptions, forward currency contracts, futures contracts, contracts for differences, reverse repurchase agreements, equity, index and currency options contracts, interest rate, credit default, cross currency, inflation and total return swap contracts.

Typically derivatives serve as components of the Portfolios' investment strategy and are utilised primarily to structure and hedge investments, to enhance performance and reduce risk to the Portfolios (the Company does not designate any derivative as a hedging instrument for hedge accounting purposes).

The Company uses financial derivative instruments to economically hedge its risks associated primarily with interest rate and foreign currency fluctuations. Derivatives may also be used for trading purposes where the Manager believes this would be more effective than investing directly in the underlying financial instruments.

Derivatives often reflect, at their inception only a mutual exchange of promises with little or no transfer of tangible consideration. However, these instruments frequently involve a high degree of leverage and are very volatile. A relatively small movement in the underlying of a derivative contract may have a significant impact on the profit or loss of the Company.

The Manager closely monitors the Portfolios' exposure under derivatives as part of the overall management of the Portfolios.

The Fair Value of these derivative instruments is included in the Balance Sheet with changes in Fair Value included in Net gain/(loss) on Financial Assets and Liabilities at Fair Value through Profit and Loss Account.

The Portfolios hold forward currency contracts some of which are specific to hedged share classes. Currency rate fluctuations that impact these forwards will only affect the net assets in the respective class and not the Portfolio as a whole. Refer to the Schedules of Investments for further information on class level forward currency contracts.

The notionals summarised in the table below are as at 31 December 2023 and 31 December 2022 and are indicative of the volume of derivative activity for the year/period. The notionals are not indicative of market risk or credit risk.

* Portfolio liquidated during the current or prior reporting year.

¹ Portfolio launched during the prior reporting year.

² Portfolio launched during the current reporting year and thus no comparative period presented.

FOR THE YEAR ENDED 31 DECEMBER 2023**25. DERIVATIVE CONTRACTS (CONTINUED)****Credit-Risk-Related Contingent Features**

The Portfolios' derivative contracts are subject to International Swaps and Derivatives Association ("ISDA") Master Agreements which contain certain covenants and other provisions that may require the Company to post additional collateral on derivatives or terminate these agreements if the Company fails to maintain sufficient asset coverage for its contracts or its Net Assets decline by stated percentages or amounts. The Portfolios entered into credit default swaps as part of its investment strategies, to hedge against unfavourable changes in the value of investments and to protect against adverse movements in interest rates or credit performance with counterparties. The maximum potential amount the Portfolios could be required to pay as a seller of credit protection if a credit event occurs as at 31 December 2023 was US\$ 127,047,007 (31 December 2022: US\$ 120,546,104). The aggregate fair value of all credit default swaps as at 31 December 2023 was US\$ (3,082,098) (31 December 2022: US\$ (4,166,005)). There were no other derivative instruments with credit-risk-related contingent features held by the Company at 31 December 2023 and 31 December 2022.

26. OFFSETTING FINANCIAL INSTRUMENTS

The Manager of the Company is an affiliate of Neuberger Berman Group LLC, who is a registered investment adviser with the SEC in the United States. The information included here represents US GAAP equivalent disclosures that are provided in order to enable the Manager to avail of certain exemptions available to it under the SEC Custody Rule.

Financial assets and liabilities are offset and the net amount reported in the Balance Sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

For financial reporting purposes, the Company does not offset derivative assets and derivative liabilities in the Balance Sheet. The following tables present the Company's OTC derivative and securities lending assets and liabilities by counterparty, net of amounts available for offset under a master netting agreement and net of the related collateral received by the Company for assets and pledged by the Company for liabilities as at 31 December 2023 and 31 December 2022.

31 December 2022

No OTC derivative and securities lending assets and liabilities available for offset.

(a) Collateral received (or pledged) is limited to an amount not to exceed 100% of the net amount of assets (or liabilities) in the tables presented above, for each respective counterparty.

(b) A Net Amount greater than zero represents amounts subject to loss as of 31 December 2023, in the event of a counterparty failure. A Net Amount less than zero represents amounts under collateralised to each counterparty as of 31 December 2023.

¹ Portfolio launched during the current reporting year and thus no comparative period presented.

² Portfolio launched during the prior reporting year.

FOR THE YEAR ENDED 31 DECEMBER 2023**27. CLOSED FUNDS**

In addition to the funds detailed in this report, there are a number of terminated sub-funds that have not yet been de-authorised.

A complete list of these funds is provided below. At the year ended 31 December 2023, one of these sub-funds, Lehman Brothers Commodity Plus Fund, held US\$1.93m (31 December 2022: US\$1.84m) in an account with the Depositary pending resolution of a disputed derivative transaction.

- Lehman Brothers Global Value Fund
- Lehman Brothers USA Value Fund
- Lehman Brothers European Value Fund
- Lehman Brothers Global Bond Fund
- Lehman Brothers Commodity Plus Fund
- Lehman Brothers Alpha Select 2 Fund
- Lehman Brothers Alpha Select 4 Fund

Appendix III

INFORMATION ON GLOBAL EXPOSURE (UNAUDITED)

Measurement of Market Risk and Leverage using the Commitment Approach and VaR

The Portfolios will seek to limit the market risk and leverage created through the use of derivatives by using either the commitment approach or by using a sophisticated risk measurement technique known as value-at-risk ("VaR"). The 5G Connectivity, China A-Share Equity, China Equity, Climate Innovation, CLO Income, Corporate Hybrid Bond, Developed Market FMP – 2027, Emerging Markets Equity, European High Yield Bond, European Sustainable Equity, Global Diversified Income FMP – 2024, Global Equity Megatrends, Global High Yield SDG Engagement, Global Investment Grade Credit, Global Real Estate Securities, Global Sustainable Equity, Global Sustainable Value, High Yield Bond, InnovAsia 5G, Japan Equity Engagement, Next Generation Mobility, Next Generation Space Economy, Short Duration Emerging Market Debt, Short Duration High Yield SDG Engagement, US Equity, US Large Cap Value, US Multi Cap Opportunities, US Real Estate Securities, US Small Cap and US Small Cap Intrinsic Value use the commitment approach. The commitment approach calculates leverage by measuring the market value of the underlying exposures of derivatives relative to the relevant Portfolio's NAV but such leverage will not exceed the Portfolio's NAV at any time.

A Portfolio may use an "absolute" VaR model where the measurement of VaR is relative to the NAV of the Portfolio or the Portfolio may use a relative VaR model where the measurement of VaR is relative to a derivatives free comparable benchmark or equivalent portfolio. The model used by certain Portfolios is noted in the column "Market Risk" in the table included below. The VaR methodology used is subject to several limitations. First, VaR is based on a model of stock price returns which uses risk factors. To the extent that there are missing risk factors, mis-specified risk factors, or risk factors which are not predictive, the VaR may not be indicative of future risk. Also, the returns to various risk factors are not directly observable in the market and must be estimated using statistical techniques. To the extent that these estimates may be imprecise, the VaR may not be indicative of future risk. In addition, the covariance between the risk factors is estimated over a particular historical time period. To the extent that the future time period may be different from the historical time period, the VaR may not be indicative of future risk. For these reasons, VaR may be more useful as a relative measure of risk among Portfolios, rather than as an absolute measure of risk.

A number of calculation standards are employed for the Portfolios using the VaR model. However, these calculation standards are dealt with in more detail in the risk management process of the Portfolio and may change from time to time at the discretion of the Manager and in accordance with the requirements of the Central Bank.

The table below detail the maximum, minimum and average usage of regulatory limit calculated during the year ended 31 December 2023 for each Portfolio using VaR:

Portfolio	Market Risk	Observed VaR at 31 December 2023	Maximum usage of Regulatory Limit*	Minimum usage of Regulatory Limit*	Average usage of Regulatory Limit*
China Bond	Absolute VaR	1.09%	9.0%	5.5%	7.8%
Commodities	Relative VaR	99.3%	58.5%	47.8%	52.8%
Emerging Market Debt - Hard Currency	Relative VaR	113.4%	65.3%	56.6%	60.7%
Emerging Market Debt - Local Currency	Relative VaR	111.7%	59.3%	52.1%	57.0%
Emerging Market Debt Blend	Relative VaR	114.3%	60.6%	53.0%	57.5%
Emerging Market Debt Sustainable Investment Grade Blend	Relative VaR	100.9%	78.4%	47.9%	51.9%
Euro Bond	Relative VaR	89.0%	57.9%	44.5%	52.9%
Euro Bond Absolute Return	Absolute VaR	1.77%	13.2%	7.9%	11.7%
Event Driven	Absolute VaR	5.00%	41.9%	17.4%	26.1%
Global Bond	Relative VaR	102.0%	56.0%	49.1%	51.5%
Global Flexible Credit Income	Absolute VaR	3.14%	27.3%	14.9%	19.0%
Global Opportunistic Bond	Absolute VaR	4.00%	24.5%	18.7%	21.4%
Macro Opportunities FX	Absolute VaR	4.08%	34.3%	5.7%	15.3%
Responsible Asian Debt - Hard Currency	Relative VaR	105.4%	63.4%	50.0%	57.4%
Strategic Income	Absolute VaR	3.07%	24.8%	15.3%	20.8%
Sustainable Asia High Yield	Relative VaR	82.5%	58.2%	40.5%	52.4%
Sustainable Emerging Market Corporate Debt	Relative VaR	106.2%	58.2%	53.1%	56.0%
Sustainable Emerging Market Debt - Hard Currency	Relative VaR	107.6%	60.1%	53.1%	57.0%

Appendix III (Continued)

INFORMATION ON GLOBAL EXPOSURE (UNAUDITED) (CONTINUED)

Portfolio (continued)	Market Risk	Observed VaR at 31 December 2023	Maximum usage of Regulatory Limit*	Minimum usage of Regulatory Limit*	Average usage of Regulatory Limit*
Tactical Macro	Absolute VaR	0.64%	20.6%	1.7%	7.6%
Ultra Short Term Euro Bond	Absolute VaR	0.81%	11.0%	4.1%	7.7%
Uncorrelated Strategies	Absolute VaR	1.04%	33.2%	4.7%	12.9%
US Equity Index PutWrite	Absolute VaR	5.75%	71.5%	12.8%	32.7%
US Long Short Equity	Absolute VaR	5.28%	32.1%	21.3%	25.6%

Regulatory Limit for Absolute VaR is 20% for the 1M 99% VAR. For Relative VaR it is 2 the benchmark VaR.

Depending on market conditions, the Portfolios may employ leverage from time to time. In this context, "leverage" is calculated, in accordance with the requirements of the Central Bank, as the sum of the notionals of the derivatives used. The disclosed level of leverage is not intended to be an additional risk exposure limit for the Portfolios. Furthermore, it is not intended that the leverage level by itself be indicative of the risk profile of the Portfolios. The table below details the level of leverage employed during the year ended 31 December 2023 and is calculated as the sum of the absolute value of the notionals of the derivatives used and expressed as a percentage of the Net Asset Value:

Portfolio	31 December 2023
China Bond	183%
Commodities	200%
Emerging Market Debt - Hard Currency	267%
Emerging Market Debt - Local Currency	296%
Emerging Market Debt Blend	255%
Emerging Market Debt Sustainable Investment Grade Blend	353%
Euro Bond	153%
Euro Bond Absolute Return	205%

Ultra Short Term Euro Bond	137%
Uncorrelated Strategies	685%
US Equity Index PutWrite	145%
US Long Short Equity	164%

Appendix IV

SECURITIES FINANCING TRANSACTION REGULATION (UNAUDITED)

Securities Financing Transaction Regulation ("SFTR") introduces reporting requirements for securities financing transactions ("SFTs") and total return swaps.

A Securities Financing Transaction (SFT) is defined as per Article 3(11) of the SFTR as:

- a repurchase/reverse repurchase agreement
- securities or commodities lending and securities or commodities borrowing
- a buy-sell back transaction or sell-buy back transaction, or
- a margin lending transaction

As at 31 December 2023 the following Portfolios held total return swaps as type of instrument under the scope of the SFTR:

CLO Income
Commodities
European High Yield Bond
Event Driven
Global Flexible Credit Income
High Yield Bond
Strategic Income
Uncorrelated Strategies
US Long Short Equity

CLO Income

Global Data:

The amount of assets across total return swaps as at 31 December 2023 was as follows:

Type of Assets	Amount US\$	Proportion of NAV (%)
Total Return Swaps – Assets	48,732	0.03

Data on Reuse of Collateral:

Cash collateral is received into the custody account for the Portfolio and therefore is not tracked specifically to determine if it is re-used. Therefore any cash collateral re-used cannot be reasonably verified.

Appendix IV (Continued)

SECURITIES FINANCING TRANSACTION REGULATION (UNAUDITED) (CONTINUED)

CLO Income (continued)

Concentration Data:

The Portfolio did not receive any securities as collateral for the total return swaps as at 31 December 2023.

The counterparties across all total return swaps as at 31 December 2023 were as follows:

Counterparty	Amount US\$
Goldman Sachs International	48,732

Safekeeping of Collateral Received:

As at 31 December 2023 there was no collateral received or held with the Depositary.

Aggregate Transaction Data:

As at 31 December 2023 there was no collateral positions (including cash) pledged/(received) across all total return swaps.

The maturity tenor of total return swaps positions as at 31 December 2023 was 1 month to 3 months.

Safekeeping of Collateral Granted:

There was no collateral held in segregated, pooled or other accounts as at 31 December 2023.

Return/Costs:

For total return swaps transactions costs, if applicable, are not separately identifiable. For these investments, transaction costs are included in the purchase and sales price and are part of the gross investment performance of each Portfolio. Returns are identified as the realised gains/losses and change in unrealised gains/losses on the swap contracts during the reporting period.

Appendix IV (Continued)

SECURITIES FINANCING TRANSACTION REGULATION (UNAUDITED) (CONTINUED)

Commodities

Global Data:

The amount of assets across total return swaps as at 31 December 2023 was as follows:

Type of Asset	Amount US\$	Proportion of NAV (%)
Total Return Swaps – Assets	0	0.00
Total Return Swaps – Liabilities	0	0.00

Data on Reuse of Collateral:

Cash collateral is received into the custody account for the Portfolio and therefore is not tracked specifically to determine if it is re-used. Therefore any cash collateral re-used cannot be reasonably verified.

Concentration Data:

The Portfolio did not receive any securities as collateral for the total return swaps as at 31 December 2023.

The counterparties across all total return swaps as at 31 December 2023 were as follows:

Counterparty	Amount US\$
Goldman Sachs International	0

Safekeeping of Collateral Received:

As at 31 December 2023 all collateral received is held at the Depositary, Brown Brothers Harriman Trustee Services (Ireland) Limited.

Appendix IV (Continued)

SECURITIES FINANCING TRANSACTION REGULATION (UNAUDITED) (CONTINUED)

Commodities (continued)

Aggregate Transaction Data:

The aggregate transaction data for collateral positions (including cash) pledged/(received) across all total return swaps as at 31 December 2023 was as follows:

	Type of collateral	Amount US\$*	Quality**	Maturity tenor (collateral)***	Currency of collateral	Country of counterparty establishment****	Settlement and clearing
Total Return Swap							
Goldman Sachs International	Cash Collateral	7,330,000	N/A	N/A	USD	United Kingdom	OTC

* Cash collaterals may cover a combination of swaps instruments, as such a portion of the collaterals relates to swap agreements not in scope of the SFTR.

** There is no credit rating for cash assets or liabilities. Cash denominated in USD is deemed to be at highest quality due to its high liquid nature.

*** Split to be provided by 7 maturity buckets (< 1 day, 1 day to 1 week, 1 week to 1 month, 1 month to 3 months, 3 months to 1 year, > 1 year, open maturity). Cash collateral has no maturity tenor.

**** Country corresponds with the address of our actual counterparty.

The maturity tenor of total return swaps positions as at 31 December 2023 was 1 month to 3 months.

Safekeeping of Collateral Granted:

The proportion of collateral held in segregated, pooled or other accounts as at 31 December 2023 was as follows:

	%
Segregated Accounts	0%
Pooled Accounts	0%
Other	100%
	100%

Return/Costs:

For total return swaps transactions costs, if applicable, are not separately identifiable. For these investments, transaction costs are included in the purchase and sales price and are part of the gross investment performance of each Portfolio. Returns are identified as the realised gains/losses and change in unrealised gains/losses on the swap contracts during the reporting period.

US Long Short Equity

Global Data:

The amount of assets across total return swaps as at 31 December 2023 was as follows:

Type of Asset	Amount US\$	Proportion of NAV (%)
Total Return Swaps – Liabilities	4,635,993	2.36

Data on Reuse of Collateral:

Cash collateral is received into the custody account for the Portfolio and therefore is not tracked specifically to determine if it is re-used. Therefore any cash collateral re-used cannot be reasonably verified.

Concentration Data:

The Portfolio did not receive any securities as collateral for the total return swaps as at 31 December 2023.

The counterparties across all total return swaps as at 31 December 2023 were as follows:

Counterparty	Amount US\$
Goldman Sachs International	2,434,032
JPMorgan Chase Bank	2,201,961

Safekeeping of Collateral Received:

As at 31 December 2023 all collateral received is held at the Depositary, Brown Brothers Harriman Trustee Services (Ireland) Limited.

Appendix IV (Continued)

SECURITIES FINANCING TRANSACTION REGULATION (UNAUDITED) (CONTINUED)

US Long Short Equity (continued)

Aggregate Transaction Data:

The aggregate transaction data for collateral positions (including cash) pledged/(received) across all total return swaps as at 31 December 2023 was as follows:

	Type of collateral	Amount US\$*	Quality**	Maturity tenor (collateral)***	Currency of collateral	Country of counterparty establishment****	Settlement and clearing
Total Return Swap							
Goldman Sachs International	Cash Collateral	7,530,000	N/A	N/A	USD	United Kingdom	OTC
JP Morgan Chase Bank	Cash Collateral	7,620,000	N/A	N/A	USD	United States	OTC

* Cash collaterals may cover a combination of swaps instruments, as such a portion of the collaterals relates to swap agreements not in scope of the SFTR.

** There is no credit rating for cash assets or liabilities. Cash denominated in USD is deemed to be at highest quality due to its high liquid nature.

*** Split to be provided by 7 maturity buckets (< 1 day, 1 day to 1 week, 1 week to 1 month, 1 month to 3 months, 3 months to 1 year, > 1 year, open maturity). Cash collateral has no maturity tenor.

**** Country corresponds with the address of our actual counterparty.

The maturity tenor of total return swaps positions as at 31 December 2023 was as follows:

	Amount US\$						
Maturity	< 1 day	1 day to 1 week	1 week to 1 month	1 month to 3 months	3 months to 1 year	> 1 year	open maturity
Total Return Swaps - Liabilities	-	-	-	2,348,409	2,102,134	185,450	-

Safekeeping of Collateral Granted:

The proportion of collateral held in segregated, pooled or other accounts as at 31 December 2023 was as follows:

	%
Segregated Accounts	0%
Pooled Accounts	0%
Other	100%
	100%

Appendix IV (Continued)

SECURITIES FINANCING TRANSACTION REGULATION (UNAUDITED) (CONTINUED)

US Long Short Equity (continued)

Return/Costs:

For total return swaps transactions costs, if applicable, are not separately identifiable. For these investments, transaction costs are included in the purchase and sales price and are part of the gross investment performance of each Portfolio. Returns are identified as the realised gains/losses and change in unrealised gains/losses on the swap contracts during the reporting period.

As at 31 December 2023 and 31 December 2022 none of the Portfolios was engaged into securities lending transactions.

Appendix V

REMUNERATION DISCLOSURE (UNAUDITED)

The European Union Directive 2014/91/EU (known as the “UCITS V Directive”) came into effect on 18 March 2016. The Company has adopted a remuneration policy in order to meet the requirements of the UCITS V Directive and ESMA’s Guidelines on Sound Remuneration Policies under the UCITS V Directive in a way and to the extent that is appropriate to the Company’s size, internal organisation and the nature, scope and complexity of its activities.

The Company’s remuneration policy applies to staff whose professional activities have a material impact on the risk profile of the Company.

As at 31 December 2023, the Company did not have any employees and the Company’s remuneration policy applied only to the Company’s board of directors who manage and control the Company. Please refer to Note 7 for details of Directors’ remuneration.

The Directors appointed NBAMIL as the Manager to provide the day to day management of the business affairs of the Company. NBAMIL has adopted a remuneration policy in accordance with UCITS V Directive. Please refer to Note 10 for details of fees earned by NBAMIL during the years ended 31 December 2023 and 31 December 2022.

Appendix VI

GLOSSARY OF INDICES (UNAUDITED)

Bloomberg Commodity Index

The index is a rolling index composed of exchange-traded futures contracts on physical commodities. The index relies primarily on liquidity data of futures contracts, along with US dollar-adjusted production data, in determining the relative quantities of included commodities. The index is designed to be a highly liquid and diversified benchmark for commodities investments. The version of the index that is calculated on a total return basis reflects the returns on a fully collateralised investment in the underlying commodity futures contracts, combined with the returns on cash collateral invested in US Treasury Bills.

Bloomberg Euro Aggregate Bond Index (Total Return, Hedged, EUR)

The index includes fixed-rate, investment-grade euro denominated bonds. Inclusion is based on the currency of the issue, and not the domicile of the issuer. The principal sectors in the index are the Treasury, corporate, government-related and securitised.

Bloomberg Global Aggregate Corporate Index (Total Return, Hedged, USD)

The index is a flagship measure of global investment grade, fixed-rate corporate debt. This multicurrency benchmark includes bonds from developed and emerging markets issuers within the industrial, utility and financial sectors. The index is a component of the Global Aggregate and Multiverse Indices.

Bloomberg Global Aggregate Index (Total Return, Hedged, USD)

The index measures global investment grade debt from twenty-four different local currency markets and includes fixed-rate treasury, government-related, corporate and securitised bonds from both developed and emerging markets issuers. The index is largely comprised of three major regional aggregate components: the Bloomberg US Aggregate Bond Index, the Bloomberg Pan-European Aggregate Bond Index, and the Bloomberg Asian-Pacific Aggregate Index. In addition to securities from these three indices, the index also includes investment grade Eurodollar, Euro-Yen, Canadian, and 144A index-eligible securities not already in these three indices. The index is fully hedged back to USD.

Bloomberg Global Aggregate Index (Total Return, Unhedged, USD)

The index measures global investment grade debt from twenty-four different local currency markets and includes fixed-rate treasury, government-related, corporate and securitised bonds from both developed and emerging markets issuers. The index is largely comprised of three major regional aggregate components: the Bloomberg US Aggregate Bond Index, the Bloomberg Pan-European Aggregate Bond Index, and the Bloomberg Asian-Pacific Aggregate Index. In addition to securities from these three indices, the index also includes investment grade Eurodollar, Euro-Yen, Canadian, and 144A index-eligible securities not already in these three indices.

Bloomberg US Aggregate Bond Index (Total Return, USD)

The index measures the investment grade, US dollar-denominated, fixed-rate, taxable bond market and includes Treasuries, government-related and corporate securities, mortgage-backed securities (agency fixed-rate and hybrid adjustable rate mortgage pass-throughs), asset-backed securities, and commercial mortgage-backed securities (agency and nonagency). The index is a broad-based benchmark that measures the investment grade, US dollar denominated, fixed-rate taxable bond market. This includes Treasuries, government-related and corporate securities, mortgage-backed securities, asset-backed securities and collateralised mortgage-backed securities.

Appendix VI (Continued)

GLOSSARY OF INDICES (UNAUDITED) (CONTINUED)

Cboe S&P 500 PutWrite Index

The index tracks the value of a passive investment strategy which consists of overlaying S&P 500 (SPX) short put options over a money market account invested in one- and three-months Treasury bills. The SPX puts are struck at-the-money and are sold on a monthly basis.

Cboe S&P 500 One-Week PutWrite Index

The index tracks the performance of a hypothetical strategy that sells an at-the-money (ATM) S&P 500 Index (SPX) put option on a weekly basis. The maturity of the written SPX put option is one week to expiry. The written SPX put option is collateralised by a money market account invested in one-month Treasury bills. The index rolls on a weekly basis, typically every Friday.

FTSE Chinese Government and Policy Bank Bond 0-1 Year Select Index (Total Return, CNY)

The index measures the performance of CNY denominated, fixed-rate book entry government bonds as well as policy bank bonds issued in Mainland China. The following instruments are excluded: savings bonds, special government bonds, central bank bills, private placements and callable and putable bonds.

FTSE EPRA Nareit Developed Real Estate Index (Total Return, Net of Tax, USD)

The index is a free float-adjusted, market capitalisation-weighted index that is designed to measure the performance of listed real estate companies and real estate investment trusts (REITs) in developed markets. Net total return indices reinvest dividends after the deduction of withholding taxes, using (for international indexes) a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties.

FTSE Nareit All Equity REITs Index (Total Return, Net of Tax, USD)

The index is a free-float adjusted, market capitalisation-weighted index that tracks the performance of all tax-qualified equity real estate investment trusts (REITs) that are listed on the New York Stock Exchange or NASDAQ. Equity REITs include all tax-qualified REITs with more than 50 percent of total assets in qualifying real estate assets other than mortgages secured by real property.

HFRX Equity Hedge Index (Total Return, USD)

The index is designed to be representative of equity hedge fund strategies which maintain positions both long and short in primarily equity and equity derivative securities. Equity Hedge managers would typically maintain at least 50%, and may in some cases be substantially entirely invested in equities, both long and short.

ICE BofA European Currency Non-Financial High Yield 3% Constrained Index (Total Return, EUR)

The index measures the performance of non-financial below-investment grade corporate debt denominated in Euro and GBP, publicly issued in the eurobond, sterling domestic or euro domestic markets and caps exposure to any issuer at 3%. The index contains all non-Financial securities in the ICE BofA European Currency High Yield Index but caps issuer exposure at 3%.

ICE BofA Global High Yield Constrained Index (Total Return, Hedged, USD)

The index tracks the performance of USD, CAD, GBP and EUR-denominated below investment grade corporate debt publicly issued in the major domestic or Eurobond markets and limits exposure to each issuer included in the index to a maximum of 2% of the index. The index contains all securities in the ICE BofA Global High Yield Index but caps issuer exposure at 2%.

ICE BofA Global Hybrid Non-Financial 5% Constrained Custom Index (Total Return, Hedged, Euro)

The index tracks the performance of investment grade non-financial hybrid corporate debt publicly issued in major domestic and Eurobond markets and each issuer is capped at 5% maximum weight.

ICE BofA US Dollar 1-Month Deposit Offered Rate Constant Maturity Index (Total Return, USD)

The index is a widely used benchmark for short-term interest rates, providing an indication of the average rates at which banks could obtain wholesale, unsecured funding for set periods in particular currencies.

Appendix VI (Continued)

GLOSSARY OF INDICES (UNAUDITED) (CONTINUED)

ICE BofA US Dollar 3-Month Deposit Offered Rate Constant Maturity Index (Total Return, USD)

The index tracks the performance of a synthetic asset paying SOFR to a stated maturity. The index is based on the assumed purchase at par of a synthetic instrument having exactly its stated maturity and with a coupon equal to that day's fixing rate. That issue is assumed to be sold the following business day (priced at a yield equal to the current day fixing rate) and rolled into a new instrument.

ICE BofA US High Yield Constrained Index (Total Return, USD)

The index tracks the performance of US dollar-denominated below investment grade corporate debt publicly issued in the US domestic market. In addition to meeting other criteria, qualifying securities must have a below investment grade rating (based on an average of Moody's, S&P and Fitch ratings), and have risk exposure to countries that are members of the G10 FX, Western Europe or territories of the US and Western Europe. Securities in legal default are excluded from the index. Index constituents are capitalisation-weighted, provided the total allocation to an individual issuer does not exceed 2%.

ICE BofA 0-1 Year AAA Euro Government Index (Total Return, EUR)

The index is a subset of ICE BofA All Maturity Euro Government Index including all securities with a remaining term to final maturity less than 1 year and rated AAA. The index tracks the performance of EUR denominated sovereign debt publicly issued by Euro member countries in either the eurobond market or the issuer's own domestic market. Qualifying countries must be Euro members, have an investment grade foreign currency long-term sovereign debt rating (based on an average of Moody's, S&P and Fitch), and must have at least one readily available, transparent price source for their securities. To be considered for inclusion a country must be a Euro member as of the first of the month.

ICE BofA 3-Month US Treasury Bill Index (Total Return, USD)

The index is comprised of a single US Treasury Bill issue purchased at the beginning of each month and held for a full month. At the end of the month that issue is sold and rolled into a newly selected which has a maturity date closest to, but not beyond, three months from the rebalance date.

JP Morgan Asia Credit Index (JACI) (Total Return, USD)

The index tracks the total return performance for actively traded USD denominated debt instruments in the Asia region (excluding Japan). JACI is a market cap-weighted index comprising sovereign, quasi-sovereign and corporate bonds and it is partitioned by country, sector and credit rating.

JP Morgan ESG Asia Credit High Yield Index (Total Return, USD) (JESG JACI)

The index tracks the total return performance for actively traded below investment grade rated USD denominated debt instruments in the Asia region (excluding Japan) which meet certain ESG criteria.

JP Morgan Corporate Emerging Markets Bond Index (CEMBI) Diversified Index (Total Return, USD)

The index tracks the performance of US dollar-denominated corporate emerging market bonds, including emerging market countries from Asia, Europe, Latin America and the Middle East/Africa. The Diversified version of the index is market capitalisation-weighted and limits the weights of those index countries with larger corporate debt stocks by including only specified portions of those countries' eligible current face amounts of debt outstanding. Effective March 31, 2022, Russia and Belarus were excluded from the JP Morgan fixed income indices. The index market value for all Russian and Belarus debt was set to zero, reflecting a total return loss due to market disruption.

Appendix VI (Continued)

GLOSSARY OF INDICES (UNAUDITED) (CONTINUED)

JP Morgan Emerging Markets Bond Index (EMBI) - Global Diversified (Total Return, USD)

The index tracks the performance of US dollar-denominated debt instruments issued by emerging market sovereign and quasi-sovereign entities (Brady bonds, loans and Eurobonds), including emerging market countries from Asia, Europe, Latin America and the Middle East/Africa. The Global version of the index captures a broad, comprehensive universe of emerging market issues. The diversified version of the index is market capitalisation-weighted and limits the weights of those index countries with larger debt stocks by including only specified portions of those countries' eligible current face amounts of debt outstanding. Effective March 31, 2022, Russia and Belarus were excluded from the JP Morgan fixed income indices. The index market value for all Russian and Belarus debt was set to zero, reflecting a total return loss due to market disruption.

JP Morgan ESG CEMBI Broad Diversified (Total Return, USD)

The index tracks liquid, USD denominated emerging market fixed and floating-rate debt instruments issued by corporates. The index applies an ESG scoring and screening methodology to tilt toward issuers ranked higher on ESG criteria and green bond issues, and to underweight and remove issuers that rank lower.

JP Morgan ESG Emerging Markets Bond Index (EMBI) Global Diversified Index (Total Return, USD)

The index tracks the performance of liquid, US dollar-denominated fixed and floating-rate debt instruments issued by emerging market sovereign and quasi-sovereign entities (Brady bonds, loans and Eurobonds) with at least 2.5 years until maturity. The index applies an ESG scoring and screening methodology to tilt toward issuers ranked higher on ESG criteria and green bond issues, and to underweight and remove issuers that rank lower.

JP Morgan Government Bond Index (GBI) Emerging Markets - Global Diversified (Total Return, Unhedged, USD)

The index tracks the performance of local currency denominated bonds issued by emerging market governments, including emerging market countries from Asia, Europe, Latin America and the Middle East/Africa. The Global version of the index includes only countries that are accessible by most of the international investor base, while countries with explicit capital controls are excluded. The Diversified version of the index is market capitalisation-weighted, with a maximum weight to a country capped at 10%. Effective March 31, 2022, Russia and Belarus were excluded from the JP Morgan fixed income indices. The index market value for all Russian and Belarus debt was set to zero, reflecting a total return loss due to market disruption.

MSCI All Country World Index (ACWI) (Total Return, Net of Tax, USD)

The index is a free float-adjusted, market capitalisation-weighted index that is designed to measure the equity market performance of developed and emerging markets. The index consists of 47 country indexes comprising 23 developed and 24 emerging market country indexes. The developed market country indexes included are: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the United Kingdom and the United States. The emerging market country indexes included are: Brazil, Chile, China, Colombia, Czech Republic, Egypt, Greece, Hungary, India, Indonesia, Korea, Kuwait, Malaysia, Mexico, Peru, the Philippines, Poland, Qatar, Saudi Arabia, South Africa, Taiwan, Thailand, Turkey, and the UAE. China A shares are included starting from June 1, 2018 and are partially represented at 20% of their free float-adjusted market capitalisation as of November 2019. Net total return indexes reinvest dividends after the deduction of withholding taxes, using (for international indexes) a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties. Effective after the close on March 9, 2022, MSCI reclassified MSCI Russia Indexes from Emerging Markets to Standalone Markets status. At that time, all Russian securities were removed from this index at a final price of 0.00001, including both locally traded Russian equity constituents and Russian ADRs/GDRs constituents.

Appendix VI (Continued)

GLOSSARY OF INDICES (UNAUDITED) (CONTINUED)

MSCI All Country World (ACWI) Value Index (Total Return, Net of Tax, USD)

The index is a free float-adjusted market capitalisation weighted index that is designed to represent performance of large- and mid-cap stocks exhibiting overall value style characteristics across 23 developed and 24 emerging markets. The value investment style characteristics for this index are defined using three variables: book value to price, 12-month forward earnings to price and dividend yield.

MSCI China A Onshore Index (Total Return, Net, CNY)

The index is a capitalisation weighted index, which can vary in its number of constituent stocks and is designed to measure performance of the broad economy of the PRC through changes in the aggregate market value of the largest stocks representing all major industries.

MSCI China All Shares Index (Total Return, USD)

The index is a free float-adjusted, market capitalisation weighted index that is designed to measure the equity market performance of China share classes listed in Hong Kong, Shanghai, Shenzhen and outside of China. It covers the integrated MSCI China equity universe comprising A-shares, B-shares, H-shares, Red chips, P-chips and foreign listings listed outside China or Hong Kong (e.g. ADRs). A-shares are incorporated in China and trade on the Shanghai and Shenzhen exchanges; they are quoted in local renminbi and entail foreign investment regulations (QFII). B-shares are incorporated in China, and trade on the Shanghai and Shenzhen exchanges; they are quoted in foreign currencies (Shanghai USD, Shenzhen HKD) and are open to foreign investors. H-shares are incorporated in China and trade on the Hong Kong exchange and other foreign exchanges. Red chips and P-chips are incorporated outside of China and trade on the Hong Kong exchange. Red chips are usually controlled by the state or a province or municipality. P-chips are non state-owned Chinese companies incorporated outside the mainland and traded in Hong Kong. Net total return indexes reinvest dividends after the deduction of withholding taxes, using (for international indexes) a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties.

MSCI Emerging Markets Index (Total Return, Net of Tax, USD)

The index is a free float-adjusted market capitalisation-weighted index that is designed to measure the equity market performance of emerging markets. The index consists of the following 24 emerging market country indexes: Brazil, Chile, China, Colombia, Czech Republic, Egypt, Greece, Hungary, India, Indonesia, Korea, Kuwait, Malaysia, Mexico, Peru, the Philippines, Poland, Qatar, Saudi Arabia, South Africa, Taiwan, Thailand, Turkey, and the UAE. China A shares are included starting from 1 June 2018 and are partially represented at 20% of their free float-adjusted market capitalisation as of November 2019. Effective after the close on March 9, 2022, MSCI reclassified MSCI Russia Indexes from Emerging Markets to Standalone Markets status. At that time, all Russian securities were removed from this index at a final price of 0.00001, including both locally traded Russian equity constituents and Russian ADRs/GDRs constituents. Net total return indexes reinvest dividends after the deduction of withholding taxes, using (for international indexes) a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties.

MSCI Europe Index (Total Return, Net of Tax, EUR)

The index is a free float-adjusted market capitalisation weighted index that is designed to measure the equity market performance of developed markets in Europe.

Appendix VI (Continued)

GLOSSARY OF INDICES (UNAUDITED) (CONTINUED)

MSCI Japan Small Cap Net Index (Total Return, JPY)	The index is designed to measure the performance of the small capitalisation segment of the Japanese market.
MSCI World Index (Total Return, Net of Tax, USD)	The index is a free float-adjusted market capitalisation weighted index that is designed to measure the equity market performance of developed markets.
Russell 1000 Value Index (Total Return, Net of Tax, USD)	The index is a float-adjusted, market capitalisation-weighted index that measures the performance of the large-cap value segment of the US equity market. It includes those Russell 1000 Index companies with lower price-to-book ratios and lower forecasted growth rates. The index is rebalanced annually in June.
Russell 2000 Index (Total Return, Net of Tax, USD)	The index is a float-adjusted, market capitalisation-weighted index that measures the performance of the small-cap segment of the US equity market. It includes approximately 2,000 of the smallest securities in the Russell 3000 Index (which measures the performance of the 3,000 largest US public companies based on total market capitalisation). The index is rebalanced annually in June.
Russell 2000 Value Index (Total Return, Net of Tax, USD)	The index is a float-adjusted, market capitalisation-weighted index that measures the performance of the small-cap value segment of the US equity market. It includes those Russell 2000 Index companies with lower price-to-book ratios and lower forecasted growth rates. The index is rebalanced annually in June.
S&P 500 Index (Total Return, Net of Tax, USD)	The index is a float-adjusted, market capitalisation-weighted index that focuses on the large-cap segment of the US equity market, and includes a significant portion of the total value of the market.
Weighted average of 2/3 JP Morgan EMBI Global Diversified Investment Grade Index (Total Return, USD) and 1/3 of JP Morgan GBI EM Global Diversified Investment Grade 15% Cap Index (Total Return, Unhedged, USD)	The blended index is composed of the weighted average of 2/3 JP Morgan EMBI Global Diversified Investment Grade Index (Total return, USD) (described previously) and 1/3 of JP Morgan GBI-EM Global Diversified Index Investment Grade 15% Cap Index (USD unhedged total return) (described previously), and is rebalanced monthly.
50% JP Morgan GBI Emerging Markets Global Diversified Index (Total Return, Unhedged, USD), 25% JP Morgan EMBI Global Diversified Index (Total Return, USD), and 25% JP Morgan CEMBI Diversified Index (Total Return, USD)	The blended index is composed of 50% JP Morgan GBI Emerging Markets Global Diversified, 25% JP Morgan EMBI Global Diversified, and 25% JP Morgan CEMBI Diversified (all described previously) and is rebalanced monthly. Effective March 31, 2022, Russia and Belarus were excluded from the JP Morgan fixed income indices. The index market value for all Russian and Belarus debt was set to zero, reflecting a total return loss due to market disruption.
50% Cboe S&P 500 One-Week PutWrite Index / 50% Cboe S&P 500 PutWrite Index	The blended index is composed of 50% Cboe S&P 500 One-Week PutWrite Index (described previously), 50% Cboe S&P 500 PutWrite Index (described previously).

SUSTAINABLE FINANCE DISCLOSURE REGULATION (UNAUDITED)

The following Portfolios have been categorised as an Article 6 Portfolio for the purposes of Sustainable Finance Disclosure Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability related disclosures in the financial services sector ("SFDR"): Neuberger Berman CLO Income Fund (CLO Bond Portfolio), Neuberger Berman US Equity Index Putwrite Fund, Neuberger Berman Macro Opportunities FX Fund, Neuberger Berman Tactical Macro Fund (Liquid Alternatives Portfolios), Neuberger Berman US Small Cap Intrinsic Value Fund (US Equity Portfolios), Neuberger Berman China Equity Fund (China Portfolios), Neuberger Berman Uncorrelated Strategies Fund, Neuberger Berman Uncorrelated Trading Fund (Multi Strategy Portfolios), Neuberger Berman Commodities Fund (Quantitative and Multi Asset Portfolios) and Neuberger Berman Event Driven Fund (Global Equity Portfolios).

For the purpose of the Taxonomy Regulation, it should be noted that the investments underlying the Article 6 Portfolios do not take into account the EU criteria for environmentally sustainable economic activities.

The following Portfolios have been classified as an Article 8 Portfolio for the purposes of SFDR: Neuberger Berman High Yield Bond Fund, Neuberger Berman Short Duration High Yield SDG Engagement Fund, Neuberger Berman European High Yield Bond Fund, Neuberger Berman Global High Yield SDG Engagement Fund, Neuberger Berman Global High Yield Sustainable Action Fund (High Yield Bond Portfolios), Neuberger Berman Emerging Market Debt – Local Currency Fund, Neuberger Berman Emerging Market Debt – Hard Currency Fund, Neuberger Berman Sustainable Emerging Market Corporate Debt Fund, Neuberger Berman Short Duration Emerging Market Debt Fund, Neuberger Berman Emerging Market Debt Blend Fund, Neuberger Berman Emerging Market Debt Sustainable Investment Grade Blend Fund, Neuberger Berman Responsible Asian Debt – Hard Currency Fund, Neuberger Berman Sustainable Asia High Yield Fund (Emerging Market Debt Portfolios), Neuberger Berman China Bond Fund (China Bond Portfolios), Neuberger Berman Global Bond Fund, Neuberger Berman Strategic Income Fund, Neuberger Berman Corporate Hybrid Bond Fund, Neuberger Berman Global Opportunistic Bond Fund, Neuberger Berman Global Flexible Credit Income Fund, Neuberger Berman Global Investment Grade Credit Fund (Fixed Income Portfolios), Neuberger Berman Global Diversified Income FMP – 2024, Neuberger Berman Developed Market FMP - 2027 (Fixed Maturity Portfolios), Neuberger Berman Euro Bond Absolute Return Fund, Neuberger Berman Ultra Short Term Euro Bond Fund, Neuberger Berman Euro Bond Fund (Euro Fixed Income Portfolios), Neuberger Berman Multi-Asset Income Fund, Neuberger Berman Global Sustainable Value Fund (Quantitative and Multi Asset Portfolios), Neuberger Berman US Long Short Equity Fund (Liquid Alternatives Portfolios), Neuberger Berman US Equity Fund, Neuberger Berman US Small Cap Fund, Neuberger Berman US Multi Cap Opportunities Fund, Neuberger Berman US Large Cap Value Fund (US Equity Portfolios), Neuberger Berman Emerging Markets Equity Fund, Neuberger Berman Emerging Markets Select Equity Fund, Neuberger Berman Japan Equity Engagement Fund (Global Equity Portfolios), Neuberger Berman US Real Estate Securities Fund, Neuberger Berman Global Real Estate Securities Fund (Real Estate Portfolios), Neuberger Berman China A-Share Equity Fund (China Portfolios), Neuberger Berman 5G Connectivity Fund, Neuberger Berman Global Equity Megatrends Fund, Neuberger Berman InnovAsia 5G Fund, Neuberger Berman Next Generation Mobility Fund, Neuberger Berman Metaverse Fund, Neuberger Berman Next Generation Space Economy Fund, Neuberger Berman Climate Innovation Fund (Thematic Equity Portfolios), Neuberger Berman Global Sustainable Equity Fund and Neuberger Berman European Sustainable Equity Fund (Sustainable Equity Portfolios) (the "Article 8 Portfolios"). Information about the environmental and social characteristics of the Article 8 Portfolios, with the exception of unlaunched funds, is available in the Appendix below. We will not provide further disclosure of the Neuberger Berman Metaverse Fund as it has not launched.

The Neuberger Berman Sustainable Emerging Market Debt – Hard Currency Fund (Emerging Market Debt Portfolios) has been categorised as an Article 9 Portfolio for the purposes of SFDR (the "Article 9 Portfolio").

In accordance with the requirements of Article 11 of SFDR, information in respect of each Article 8 Portfolio and the Article 9 Portfolio has been included in this Appendix. Unless otherwise defined in this Appendix, capitalised terms used shall have the meaning ascribed to them in the Prospectus.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Neuberger Berman 5G Connectivity Fund (the “Portfolio”)

Legal entity identifier: 549300H0HOXG52ES7840

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<div><div><div></div><div></div><div></div></div> Yes</div>	<div><div><div></div><div></div><div></div></div> No</div>
<div><div><div></div> It made sustainable investments with an environmental objective: ____%</div><div><div><div></div> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</div><div><div></div> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</div></div></div>	<div><div><div></div> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 56.8%* of sustainable investments</div><div><div><div></div> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</div><div><div></div> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</div><div><div></div> with a social objective</div></div></div>
<div><div><div></div> It made sustainable investments with a social objective: ____%</div></div>	<div><div><div></div> It promoted E/S characteristics, but did not make any sustainable investments</div></div>

*Please refer to the "What was the proportion of sustainability-related investments?" question below for further detail in respect of the Portfolio's asset allocation (including its exposure to sustainable investments).

The most recent SFDR Pre-Contractual Template of the Portfolio can be found [here](#).

This SFDR Periodic Report template reports on the 2023 calendar year (the “Reference Period”). Unless otherwise stated in the relevant disclosure, all Reference Period data has been calculated based on the average of the four calendar quarter ends.

This SFDR Periodic Report template reports on several quantitative ESG data metrics. To assist the reader in their review and assessment of such ESG data metrics, we have disclosed the Portfolio's data coverage for these ESG data metrics. The intention is that disclosure of the data coverage (of the ESG metrics during the Reference Period) will allow the reader to interpret the ESG data metrics' ability to represent the Portfolio with any limitations to such data coverage in mind.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and social characteristics were promoted by the Portfolio:

- **Environmental Characteristics:** air quality; biodiversity & land use; energy management; environmental risk exposure; fuel economy; greenhouse gas (“**GHG**”) emissions; opportunities in clean technologies; toxic emissions & waste; water management; packaging lifecycle management; materials sourcing; and product lifecycle management.
- **Social Characteristics:** access to finance; access to healthcare; community relations; data privacy & security; employee incentives & risk taking; health & nutrition; health & safety; human capital development; labour management; product safety & integrity; supply chain labour standards; workforce diversity & inclusion; pricing transparency; and responsible marketing.

Performance in relation to these environmental and social characteristics was measured through the NB ESG Quotient, and is reported, in aggregate, below.

While the sustainable investments held by the Portfolio had either a social or an environmental objective, such sustainable investments do not qualify as environmentally sustainable investments (or Taxonomy aligned investments) as defined under the EU Taxonomy.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

As part of the investment process, the Sub-Investment Manager considered a variety of sustainability indicators to measure the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators are listed below:

1. The NB ESG Quotient:

The proprietary Neuberger Berman ESG rating system (the “**NB ESG Quotient**”), is built around the concept of sector specific ESG risk and opportunity, and produced an overall ESG rating for companies by assessing them against certain ESG metrics.

Foundational to the NB ESG Quotient is the proprietary Neuberger Berman (“**NB**”) materiality matrix, which focuses on the ESG characteristics that were considered to be the most likely to be the material drivers of ESG risk and opportunity for each sector. Each sector criteria is constructed using third-party and internally derived ESG data and supplemented with internal qualitative analysis, leveraging the Portfolio’s analyst team’s significant sector expertise. The NB materiality matrix enabled the Sub-Investment Manager to derive the NB ESG Quotient rating, to compare sectors and companies relative to their environmental and social characteristics.

The NB ESG Quotient assigned weightings to environmental, social and governance characteristics for each sector to derive the NB ESG Quotient rating for companies. While the NB ESG Quotient rating of companies was considered as part of the investment process, there is no minimum NB ESG Quotient rating to be attained by a company prior to investment. Pursuant to this, the Sub-Investment Manager engaged with companies with a poor NB ESG Quotient or third-party rating with the aim to seek improvement in the underlying environmental and social characteristics (which made up the NB ESG Quotient) over time.

The Reference Period data was calculated by averaging the data of the four calendar quarter ends.

Reference Period	Rating	Range	Combined Coverage
NB ESG Quotient	ES: B G: 2.5	ES: A-D G: 1-4	96%
Third-Party Data	6.8	0-10	

With regards to the NB ESG Quotient rating, for environmental and social (“ES”) ratings, A – D quartiles are used, where A is the highest rating (top quartile), and D is the lowest rating (bottom quartile). For governance (“G”) ratings, 1 – 4 quartiles are used where 1 is the highest rating, and 4 is the lowest rating. This Portfolio does not have a minimum NB ESG Quotient rating to be attained by a company prior to investment.

The average NB ESG Quotient rating is a weighted average that reflects the ESG characteristics that were considered to be the most material drivers of ESG risk and opportunity for each company held in the Portfolio. It is not an ESG assessment or rating of the overall Portfolio and its promotion of environmental and social characteristics but rather an assessment of the material ESG risks and opportunities the Portfolio had exposure to.

Third-party data was also used to measure the resilience of the Portfolio's aggregate holdings to long-term, financially material, ESG risks. The third-party data ratings range from 0-10, with 0 being the lowest rating and 10 being the highest rating.

Assessment and management of material ESG risks and opportunities is an essential element of the Portfolio's promotion of environmental and social characteristics.

2. Climate Value-at-Risk:

Over the Reference Period, Climate Value-at-Risk (“CVaR”) measured the exposure to transition and physical climate risks and opportunities for companies. CVaR is a scenario analysis tool evaluating economic risks and opportunities under various degree scenarios (i.e., the amount of warming targeted) and potential regulatory environments in varying countries.

CVaR is a type of scenario analysis which is defined as the present value of aggregated future policy risk costs, technology opportunity profits, and extreme weather event costs and profits, expressed as a percentage of a security's or portfolio's market value (i.e. potential gain or loss) according to the warming scenario targeted.

By calculating the financial risks and opportunities from climate change per security and per scenario, CVaR provides a framework that helps quantify and understand these risks and opportunities. The CVaR metric provides insight into the climate-stressed valuation of assets based on specific degree scenarios, providing an assessment on how much a security may stand to lose or gain from the impact of climate change.

For the Reference Period, CVaR projected that a warming climate scenario could result in a loss of 6.1% in the valuation of assets under assessment. The Reference Period data has been calculated based on the average of the four calendar quarter ends.

This analysis is intended as a broad overview of the investment team's style and investment process.

On a holistic basis, the results were evaluated by the Sub-Investment Manager's portfolio managers and analysts. The scenario analysis served as a starting point for

further bottom-up analysis and identifying potential climate-related risks to address through company engagement.

Due to data limitations, CVaR was not applied across all companies held by the Portfolio and was instead limited to the companies for which the Sub-Investment Manager had sufficient and reliable data. The Portfolio had a CVaR coverage of 96% and this is an average of the CVaR coverage across the four calendar quarter ends.

The analysis from CVaR is reviewed at least once a year.

3. ESG exclusion policies:

To ensure that the environmental or social characteristics promoted by the Portfolio were attained, the Portfolio did not invest in companies whose activities had been identified as breaching, or were not consistent with, the Neuberger Berman Controversial Weapons Policy; the Neuberger Berman Thermal Coal Involvement Policy; the Neuberger Berman Sustainable Exclusion Policy; and the Neuberger Berman Enhanced Sustainable Exclusion Policy. In addition to the application of the Neuberger Berman Thermal Coal Involvement Policy, the Sub-Investment Manager prohibited the initiation of new investment positions in companies that (i) derived more than 25% of their revenue from thermal coal mining; or (ii) were expanding new thermal coal power generation. Furthermore, investments held by the Portfolio did not invest in companies whose activities had been identified as breaching, or were not consistent with, the Neuberger Berman Global Standards Policy which excluded identified violators of (i) the United Nations Global Compact Principles (“**UNGC Principles**”), (ii) the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct (“**OECD Guidelines**”), (iii) the United Nations Guiding Principles on Business and Human Rights (“**UNGPs**”) and (iv) the International Labour Standards (“**ILO Standards**”).

When applying ESG exclusions to the Portfolio, the Sub-Investment Manager used third-party data to identify companies in breach of the ESG exclusions listed above. Where possible, the Sub-Investment Manager sought to overlay this third-party data with qualitative expertise from their research analysts to establish a current and holistic picture of the company. The Sub-Investment Manager discussed and debated the differences between the violators identified by the third-party data and those identified as a result of their research, which drew upon data from the NB ESG Quotient and direct engagements with the company.

● ...and compared to previous periods?

For the 2022 reference period, the quantitative data disclosed (for the sustainability indicators) was calculated as at 31 December 2022, being the only quarter end in the reference period that followed the entry into force of the SFDR RTS (which included the publication of the SFDR pre-contractual disclosures templates).

The below sustainability indicators’ quantitative data for the Reference Period was calculated by averaging the four calendar quarter ends.

1. NB ESG Quotient

	NB ESG Quotient Rating	Third-Party Data Rating	Combined Coverage
Range	ES: A-D G: 1-4	0-10	0-100%

2022 reference period	ES: B G: 2.7	6.5	100%
2023 reference period	ES: B G: 2.5	6.8	96%

Year-on-year, the NB ESG Quotient ES rating has remained unchanged.

Year-on-year, the NB ESG Quotient G rating has improved. This is due to improvements in individual companies held in the Portfolio and due to trading activity.

Year-on-year, the third-party data rating has improved. This is due to improvements in individual companies held in the Portfolio and due to trading activity as well as potential changes to, or differences in, the company's third-party rating by the provider.

2. CVaR

	CVaR	Coverage
2022 reference period	-2.6%	97%
2023 reference period	-6.1%	96%

Year-on-year, the CVaR projection has moved due to changes associated with companies held and trading activity within the Portfolio.

3. Exclusions

Consistent with the previous calendar year, there were no breaches (of the above listed ESG exclusions) during the Reference Period.

	Total number of breaches
2022 reference period	0
2023 reference period	0

● *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

While the Portfolio promoted environmental and social characteristics, this Portfolio did not have a sustainable investment objective. However, the Portfolio held sustainable investments which promoted the environmental & social characteristics listed above.

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to NB's sustainable investment framework. This framework included an assessment as to (i) whether the investment contributes to an environmental and/or social objective; (ii) whether the investment causes significant harm to those objectives as described below; and (iii) an assessment of a company's overall good governance rating to determine whether the company passes a good governance assessment.

Under this sustainable investment framework, the Sub-Investment Manager utilised multiple datapoints that measured the alignment of a company's economic activity with environmental or social characteristics.

The Sub-Investment Manager screened companies for controversies, significant harm and violations of minimum safeguards. If the companies passed this screen, the Sub-Investment

Manager then proceeded to measure the companies' environmental or social economic contribution.

The Sub-Investment Manager measured this in two ways:

- Revenue alignment to the EU taxonomy (if any); and
- Revenue alignment to the Sustainable Development Goals ("SDGs").

Consideration of revenue alignment with the SDGs was limited by the availability of adequate, reliable and verifiable data coverage. To mitigate instances of poor data coverage, the Sub-Investment Manager utilised third-party data and proxy data along with internal research and qualitative analysis as part of NB's sustainable investment framework.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Sub-Investment Manager applied its sustainable investment framework, which aims to identify and exclude investments that cause significant harm to environmental or social objectives. To determine whether an investment caused significant harm, the Sub-Investment Manager considered significant harm with reference to certain principal adverse impact indicators and violations of minimum safeguards.

The Sub-Investment Manager took into account the principal adverse impacts indicators (the "**PAIs**") outlined in the below table when determining whether the sustainable investments that the Portfolio made did not cause significant harm to any environmental or social sustainable investment objective:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAIs	
Theme	Adverse sustainability indicator
<i>Greenhouse gas emissions</i>	PAI 1- GHG emissions PAI 2 - Carbon footprint PAI 3 - GHG intensity of investee companies PAI 4 - Exposure to companies active in the fossil fuel sector PAI 5 - Share of non-renewable energy consumption and production PAI 6 - Energy consumption intensity per high impact climate sector
<i>Biodiversity</i>	PAI 7 - Activities negatively affecting biodiversity-sensitive areas
<i>Water</i>	PAI 8 - Emissions to water
<i>Waste</i>	PAI 9 - Hazardous waste and radioactive waste ratio

<i>Social and employee matters</i>	<p>PAI 10 - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises</p> <p>PAI 11 - Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises</p> <p>PAI 12 - Unadjusted gender pay gap</p> <p>PAI 13 - Board gender diversity</p> <p>PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)</p>
------------------------------------	--

Consideration of the PAIs was limited by the availability (in the Sub-Investment Manager's subjective view) of adequate, reliable and verifiable data coverage. The Sub-Investment Manager utilised third-party data and proxy data along with internal research to consider the PAIs.

The Sub-Investment Manager also considered violations of minimum safeguards. The Sub-Investment Manager did not invest in companies whose activities had been identified as breaching, or were not consistent with, the OECD Guidelines, UNGC Principles, ILO Standards and UNGPs, captured through the Neuberger Berman Global Standards Policy.

The combination of all of these factors generated a quantitative validation for "sustainability" which was used to ensure the sustainable investments that the Portfolio made, did not cause significant harm to any environmental or social sustainable objective.

— — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

Consideration of the PAIs by the Sub-Investment Manager, when determining whether the sustainable investments that the Portfolio made did not cause significant harm to any environmental or social sustainable investment objective of the Portfolio's sustainable investments, was through a combination of:

- Monitoring companies which fell below the quantitative and qualitative tolerance thresholds set for each PAI by the Sub-Investment Manager;
- Stewardship and/or setting engagement objectives with companies which fell below the quantitative and qualitative tolerance thresholds set for a PAI by the Sub-Investment Manager; and
- Application of the ESG exclusion policies referenced above, which included consideration of several of the PAIs.

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The Sub-Investment Manager did not invest in companies whose activities had been identified as breaching, or were not consistent with, the OECD Guidelines, UNGC Principles, ILO Standards and UNGPs, captured through the Neuberger Berman Global Standards Policy.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

N/A - The Portfolio did not commit to holding Taxonomy-aligned investments.

How did this financial product consider principal adverse impacts on sustainability factors?

A selection of the principal adverse impact indicators were considered directly (e.g. through the ESG exclusion policies listed above) and/or indirectly (e.g. as part of the Sub-Investment Manager's assessment of companies) throughout the Reference Period.

The Sub-Investment Manager considered PAIs with respect to the Portfolio in two ways:

1. All PAIs were taken into account when determining whether sustainable investments that the Portfolio made did not cause significant harm to any environmental or social sustainable investment objective as explained in “*How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*” above.
2. The Sub-Investment Manager considered the principal adverse impacts outlined in the below table on sustainability factors (the “**Product Level PAIs**”):

Product Level PAIs	
Theme	Adverse sustainability indicator
<i>Greenhouse gas emissions</i>	PAI 1 - GHG emissions PAI 2 - Carbon footprint PAI 3 - GHG intensity of investee companies PAI 4 - Exposure to companies active in the fossil fuel sector
<i>Social and employee matters</i>	PAI 10 - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises PAI 13 - Board gender diversity PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Consideration of the Product Level PAIs was limited by the availability (in the Sub-Investment Manager's subjective view) of adequate, reliable and verifiable data coverage. The Sub-Investment Manager utilised third-party data and proxy data along with internal research to consider the Product Level PAIs.

Consideration of the Product Level PAIs by the Sub-Investment Manager was through a combination of:

- Monitoring the Portfolio, in particular where it fell below the quantitative and qualitative tolerance thresholds set for each Product Level PAI by the Sub-Investment Manager;
- Stewardship and/or setting engagement objectives where the Portfolio fell below the quantitative and qualitative tolerance thresholds set for a Product Level PAI by the Sub-Investment Manager; and
- Application of the ESG exclusion policies referenced above, which included consideration of several of the Product Level PAIs.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2023 - 31 December 2023

The Sub-Investment Manager has used the EU statistical classification of economic activities ("**NACE**") economic sector breakdown to identify the economic sectors of the Portfolio's top 15 investments.

As the list below is based on an average calculated across the four calendar quarter ends of the Reference Period, this may differ from the top investments of the Portfolio calculated as at 31 December 2023 in the "Schedule of Investments" section of the financial statements.

Largest investments		Sector	% Assets	Country
ADVANCED DEVICES INC	MICRO	C - Manufacturing	4%	United States
NVIDIA CORP		C - Manufacturing	4%	United States
SERVICENOW INC		J - Information and Communication	4%	United States
T MOBILE US INC		J - Information and Communication	3%	United States
MICROSOFT CORP		J - Information and Communication	3%	United States
TAIWAN SEMICONDUCTOR MANUFACTURING		C - Manufacturing	3%	Taiwan (Republic of China)
PALO ALTO NETWORKS INC		J - Information and Communication	3%	United States
HUBSPOT INC		J - Information and Communication	3%	United States
ARISTA NETWORKS INC		C - Manufacturing	3%	United States
ORACLE CORP		J - Information and Communication	3%	United States
AMAZON COM INC		G - Wholesale and Retail trade; Repair of Motor Vehicles and Motorcycles	3%	United States
ASM INTERNATIONAL NV		C - Manufacturing	3%	Netherlands
DEXCOM INC		C - Manufacturing	2%	United States
META PLATFORMS INC CLASS A		J - Information and Communication	2%	United States
BROADCOM INC		C - Manufacturing	2%	United States

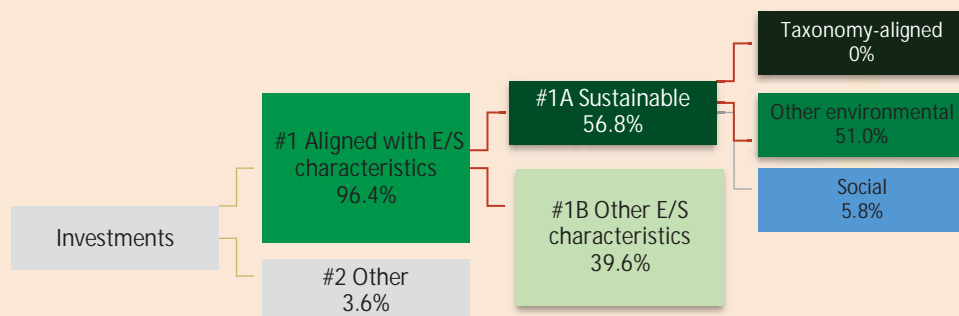

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

- The Portfolio aims to hold a minimum of 80% investments that are aligned with the environmental or social characteristics promoted by the Portfolio. During the Reference Period, the Portfolio held 96.4% investments that were aligned with the environmental or social characteristics promoted by the Portfolio.
- The Portfolio commits to holding at least 10% sustainable investments. During the Reference Period, the Portfolio held 56.8% sustainable investments.
- The Portfolio aims to hold a maximum of 20% investments that are not aligned with the environmental or social characteristics promoted by the Portfolio and are not sustainable investments, and which fall into the “Other” section of the Portfolio. During the Reference Period, the Portfolio held 3.6% “Other” investments.

The Sub-Investment Manager calculated the proportion of investments aligned with the environmental and/or social characteristics promoted by the Portfolio by reference to the proportion of companies in the Portfolio: i) that held either an NB ESG Quotient rating or a third-party equivalent ESG rating that was used as part of the portfolio construction and investment management process of the Portfolio; and/or ii) with whom the Sub-Investment Manager had engaged directly. This calculation was based on a mark-to-market assessment of the Portfolio and may be based on incomplete or inaccurate company or third-party data. The Reference Period data was calculated by averaging the data of the four calendar quarter ends.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made?*

The Reference Period data was calculated by averaging the data of the four calendar quarter ends.

Economic Sector – NACE	% Assets
C - Manufacturing	61.1%
G - Wholesale and retail trade; repair of motor vehicles and motorcycles	4.7%
J - Information and communication	33.2%
N - Administrative and support service activities	1.0%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The analysis and disclosure requirements introduced by the EU Taxonomy are very detailed and compliance with them requires the availability of multiple, specific data points in respect of each investment which the Portfolio made. The Sub-Investment Manager cannot confirm that the Portfolio invested in any investments that qualified as environmentally sustainable for the purposes of the EU Taxonomy. Disclosures and reporting on Taxonomy alignment will develop as the EU framework evolves and data is made available by companies. The Sub-Investment Manager will keep the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy under active review as data availability and quality improves.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- ☐ Yes:
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● *What was the share of investments made in transitional and enabling activities?*

N/A – the Portfolio did not commit to holding Taxonomy-aligned investments.

● *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

N/A – the Portfolio did not commit to holding Taxonomy-aligned investments in this or the previous reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Portfolio held 51.0% sustainable investments with an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

The Portfolio held 5.8% socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” included the remaining investments of the Portfolio (including but not limited to any derivatives or any security collateralized by a pool of similar assets or receivables listed in the Supplement for the Portfolio) which were neither aligned with the environmental or social characteristics, nor qualified as sustainable investments.

The “Other” section in the Portfolio was held for a number of reasons that the Sub-Investment Manager felt was beneficial to the Portfolio, such as, but not limited to, achieving risk management, and/or to ensure adequate liquidity, hedging and collateral cover.

As noted above, the Portfolio was invested in compliance with ESG exclusion policies, on a continuous basis. This ensured that investments made by the Portfolio sought to align with international environmental and social safeguards such as the UNGC Principles, the UNGPs, the OECD Guidelines and the ILO Standards.

The Sub-Investment Manager believes that these policies prevented investment in companies that most egregiously violated environmental and/or social minimum standards and ensured that the Portfolio could successfully promote its environmental and social characteristics.

The above steps ensured that robust environmental and social safeguards were in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio was managed in-line with the investment objective and the following actions were taken:

I. Integrating proprietary ESG analysis:

The Sub-Investment Manager applied a high standard of due diligence in the selection and ongoing monitoring of investments made by the Portfolio to ensure the integration of Sustainability Risks (as defined in the SFDR) and ESG. The Sub-Investment Manager views ESG integration as the practice of incorporating material ESG risks and considerations (as a binding element) into the investment decision-making process. ESG integration sits alongside other financial considerations and should enrich the Sub-Investment Manager's investment teams' analysis of companies by providing a toolkit for identifying material ESG risks and opportunities that inform investment decisions. The Sub-Investment Manager believes that material ESG factors are an important driver of long-term investment returns from both an opportunity and a risk-mitigation perspective. Hence, the Sub-Investment Manager's ESG integration approach considers ESG opportunities as well as Sustainability Risks.

Before making investments, the investment team conducted due diligence that it deemed reasonable and appropriate based on the facts and circumstances applicable to each investment. The investment team assessed the investment's alignment with the environmental and social characteristics promoted by the Portfolio using (as appropriate) the NB ESG Quotient and exclusionary screens (to identify potential non-compliance with the above listed ESG exclusions). The due diligence was supported by third-party data sources.

The third-party or NB ESG Quotient rating for companies was utilised to help to better identify risks and opportunities in the overall assessment of a company, noting that the Portfolio focused investment in companies that offer exposure to the development and enhancement of mobile internet and 5G connectivity.

By integrating the investment team's proprietary ESG analysis (the NB ESG Quotient) into the overall thematic and company view, there was a direct link between their analysis of the Portfolio's environmental and social characteristics and the portfolio construction activities.

II. Engagement:

The Sub-Investment Manager engaged with companies through a robust ESG engagement program. They sought to prioritise constructive engagements and sought to engage on topics (including ESG topics) they determined to be financially material for the relevant company. The Sub-Investment Manager viewed this engagement with companies, as an important part of its investment process. Progress on engagement was tracked centrally in the Sub-Investment Manager's engagement tracker.

III. ESG sectoral exclusion policies:

To ensure that the environmental and social characteristics promoted by the Portfolio were attained, the Portfolio applied the ESG exclusion policies referenced above, which placed limitations on the investable universe.

How did this financial product perform compared to the reference benchmark?

N/A – The Portfolio has not designated a reference benchmark.

- *How does the reference benchmark differ from a broad market index?*
N/A
- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*
N/A
- *How did this financial product perform compared with the reference benchmark?*
N/A
- *How did this financial product perform compared with the broad market index?*
N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Neuberger Berman China A-Share Equity Fund (the “Portfolio”)

Legal entity identifier: 54930037QMZTCH4D7291

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input type="checkbox"/> Yes 	<input checked="" type="checkbox"/> No
<div><input type="checkbox"/> It made sustainable investments with an environmental objective: ____%</div> <div><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</div> <div><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</div> <div><input type="checkbox"/> It made sustainable investments with a social objective: ____%</div>	<div><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments</div> <div><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</div> <div><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</div> <div><input type="checkbox"/> with a social objective</div> <div><input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</div>

The most recent SFDR Pre-Contractual Template of the Portfolio can be found [here](#).

This SFDR Periodic Report template reports on the 2023 calendar year (the “**Reference Period**”). Unless otherwise stated in the relevant disclosure, all Reference Period data has been calculated based on the average of the four calendar quarter ends.

This SFDR Periodic Report template reports on several quantitative ESG data metrics. To assist the reader in their review and assessment of such ESG data metrics, we have disclosed the Portfolio’s data coverage for these ESG data metrics. The intention is that disclosure of the data coverage (of the ESG metrics during the Reference Period) will allow the reader to interpret the ESG data metrics’ ability to represent the Portfolio with any limitations to such data coverage in mind.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and social characteristics were promoted by the Portfolio:

- **Environmental Characteristics:** air quality; energy management; environmental policies; greenhouse gas (“GHG”) emissions; opportunities in clean technologies; toxic emissions & waste; water management; packaging lifecycle management; materials sourcing; and product lifecycle management.
- **Social Characteristics:** access to finance; access to healthcare; cyber security system and training; quality management; health & working conditions & employee Incidents; human capital development; labour management; and pricing transparency.

Performance in relation to these environmental and social characteristics was measured through the NB ESG Quotient, and is reported, in aggregate, below.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

As part of the investment process, the Sub-Investment Manager considered a variety of sustainability indicators to measure the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators are listed below:

1. The NB ESG Quotient:

The proprietary Neuberger Berman ESG rating system (the “**NB ESG Quotient**”), is built around the concept of sector specific ESG risk and opportunity, and produced an overall ESG rating for companies by assessing them against certain ESG metrics.

Foundational to the NB ESG Quotient is the proprietary Neuberger Berman (“**NB**”) materiality matrix, which focuses on the ESG characteristics that are considered to be the most likely to be the material drivers of ESG risk for each sector. The Sub-Investment Manager leveraged the NB materiality matrix and local insight of the China market to customize the material ESG characteristics for China A-shares. When considering China A-shares, the Sub-Investment Manager evaluated the long-term ESG characteristics and value drivers for China's industries and the companies that operated in them.

The NB ESG Quotient assigned weightings to environmental, social and governance characteristics for each sector to derive the NB ESG Quotient rating for companies. While the NB ESG Quotient rating of companies was considered as part of the investment process, there is no minimum NB ESG Quotient rating to be attained by a company prior to investment. Companies with a favourable and/or an improving NB ESG Quotient rating had a higher chance of being included in the Portfolio. Companies with a poor NB ESG Quotient rating, especially where a poor NB ESG Quotient rating is not being addressed by a company, were more likely to be removed from the investment universe or were divested from the Portfolio. In addition, the Sub-Investment Manager sought to prioritise constructive engagements with companies that had a poor NB ESG Quotient rating, in order to assess whether concerns were being addressed adequately.

The methodology and range for the Portfolio's NB ESG Quotient (which focuses specifically on the Chinese market) was updated, during the Reference Period. This is part of the Sub-Investment Manager's ongoing efforts to increase data coverage and reliability.

The below disclosed data for the NB ESG Quotient, combined coverage and third-party rating were calculated by averaging the data of the four calendar quarter ends of the Reference Period.

The updated NB ESG Quotient uses a rating between CCC and AAA, where CCC is lowest rating and AAA is the highest rating. This Portfolio does not have a minimum NB ESG Quotient rating to be attained by a company prior to investment.

Reference Period	Rating	Range	Combined Coverage
NB ESG Quotient	AAA	CCC-AAA	96%
Third-Party Data	4.2	0-10	

The average NB ESG Quotient rating is a weighted average that reflects the ESG characteristics that were considered to be the most material drivers of ESG risk and opportunity for each company held in the Portfolio. It is not an ESG assessment or rating of the overall Portfolio and its promotion of environmental and social characteristics but rather an assessment of the material ESG risks and opportunities the Portfolio had exposure to.

Third-party data was also used to measure the resilience of the Portfolio's aggregate holdings to long-term, financially material, ESG risks. The third-party data ratings range from 0-10, with 0 being the lowest rating and 10 being the highest rating.

Assessment and management of material ESG risks and opportunities is an essential element of the Portfolio's promotion of environmental and social characteristics.

2. Climate Value-at-Risk:

Over the Reference Period, Climate Value-at-Risk ("CVaR") measured the exposure to transition and physical climate risks and opportunities for companies. CVaR is a scenario analysis tool evaluating economic risks and opportunities under various degree scenarios (i.e., the amount of warming targeted) and potential regulatory environments in varying countries.

CVaR is a type of scenario analysis which is defined as the present value of aggregated future policy risk costs, technology opportunity profits, and extreme weather event costs and profits, expressed as a percentage of a security or portfolio's market value (i.e. potential gain or loss) according to the warming scenario targeted.

By calculating the financial risks and opportunities from climate change per security and per scenario, CVaR provides a framework that helps quantify and understand these risks and opportunities. The CVaR metric provides insight into the climate-stressed valuation of assets based on specific degree scenarios, providing an assessment on how much a security may stand to lose or gain from the impact of climate change.

For the Reference Period, CVaR projected that a warming climate scenario could result in a loss of 33.1% in the valuation of assets under assessment. The Reference Period data has been calculated based on the average of the four calendar quarter ends.

This analysis is intended as a broad overview of the investment team's style and investment process.

On a holistic basis, the results were evaluated by the Sub-Investment Manager's portfolio managers and analysts. The scenario analysis served as a starting point for further bottom-up analysis and identifying potential climate-related risks to address through company engagement.

Due to data limitations, CVaR was not applied across all companies held by the Portfolio and was instead limited to the companies for which the Sub-Investment Manager has sufficient and reliable data. The Portfolio had a CVaR coverage of 91%, this is an average of the four calendar quarter ends.

The analysis from CVaR is reviewed at least once a year.

3. ESG exclusion policies:

To ensure that the environmental or social characteristics promoted by the Portfolio were attained, the Portfolio did not invest in companies whose activities had been identified as breaching, or were not consistent with, the Neuberger Berman Controversial Weapons Policy, the Neuberger Berman Thermal Coal Involvement Policy and the Neuberger Berman Sustainable Exclusion Policy. In addition to the application of the Neuberger Berman Thermal Coal Involvement Policy, the Sub-Investment Manager prohibited the initiation of new investment positions in companies that (i) derived more than 25% of their revenue from thermal coal mining; or (ii) were expanding new thermal coal power generation. Furthermore, investments held by the Portfolio did not invest in companies whose activities had been identified as breaching, or were not consistent with, the Neuberger Berman Global Standards Policy which excluded identified violators of (i) the United Nations Global Compact Principles ("**UNGC Principles**"), (ii) the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct ("**OECD Guidelines**"), (iii) the United Nations Guiding Principles on Business and Human Rights ("**UNGPs**") and (iv) the International Labour Standards ("**ILO Standards**").

When applying ESG exclusions to the Portfolio, the Sub-Investment Manager used third-party data to identify companies in breach of the ESG exclusions listed above. Where possible, the Sub-Investment Manager sought to overlay this third-party data with qualitative expertise from their research analysts to establish a current and holistic picture of the company. The Sub-Investment Manager discussed and debated the differences between the violators identified by the third-party data and those identified as a result of their research, which drew upon data from the NB ESG Quotient and direct engagements with the company.

● ...and compared to previous periods?

1. NB ESG Quotient

	NB ESG Quotient	Third-Party Data	Combined Coverage
2022 reference period Range	CCC-AA	0-10	0-100%
2023 reference period Range	CCC-AAA	0-10	0-100%
2022 reference period	BBB	4.0	92%
2023 reference period	AAA	4.2	96%

As previously mentioned, the methodology and range for the Portfolio's NB ESG Quotient (which focuses specifically on the Chinese market) was updated during the Reference Period. This should be borne in mind when attempting to compare the Reference Period data with the data of the 2022 reference period.

Year-on-year, the third-party data rating has improved. This is due to improvements in: data coverage for individual companies held in the Portfolio, individual issuers held in the Portfolio and due to trading activity as well as potential changes to, or differences in, the company's third-party rating by the provider.

Year-on-year, the combined coverage of the NB ESG Quotient and the third-party rating has improved. This is due to changes to the NB ESG Quotient's methodology and improvements in data coverage for individual companies held in the Portfolio and due to trading activity.

2. CVaR

	CVaR	Coverage
2022 reference period	-23.7%	94%
2023 reference period	-33.1%	91%

Year-on-year, the CVaR projected loss has increased due to changes associated with companies held and trading activity within the Portfolio. As previously noted, the scenario analysis can serve as a starting point for further bottom-up analysis and identifying potential climate-related risks to address through company engagement.

3. Exclusions

Consistent with the previous calendar year, there were no breaches during the Reference Period.

	Total number of breaches
2022 reference period	0
2023 reference period	0

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A – the Portfolio did not commit to holding sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A – the Portfolio did not commit to holding sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio did not commit to holding sustainable investments, however, the Sub-Investment Manager did not invest in companies whose activities had been identified as breaching, or were not consistent with, the OECD Guidelines, UNGC Principles, ILO Standards and UNGPs, captured through the Neuberger Berman Global Standards Policy.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

N/A – the Portfolio did not commit to holding Taxonomy-aligned investments.

How did this financial product consider principal adverse impacts on sustainability factors?

A selection of the principal adverse impact indicators were considered directly (e.g. through the ESG exclusion policies listed above) and/or indirectly (e.g. as part of the Sub-Investment Manager's assessment of issuers) throughout the Reference Period.

The Sub-Investment Manager considered the principal adverse impacts outlined in the below table on sustainability factors (the "**Product Level PAIs**"):

Product Level PAIs	
Theme	Adverse sustainability indicator
<i>Greenhouse gas emissions</i>	PAI 1 - GHG emissions PAI 2 - Carbon footprint PAI 3 - GHG intensity of investee companies PAI 4 - Exposure to companies active in the fossil fuel sector
<i>Social and employee matters</i>	PAI 10 - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises PAI 13 - Board gender diversity PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Consideration of the Product Level PAIs was limited by the availability (in the Sub-Investment Manager's subjective view) of adequate, reliable and verifiable data coverage. The Sub-Investment Manager utilised third-party data and proxy data along with internal research to consider the Product Level PAIs.

Consideration of the Product Level PAIs by the Sub-Investment Manager was through a combination of:

- Monitoring the Portfolio, in particular where it fell below the quantitative and qualitative tolerance thresholds set for each Product Level PAI by the Sub-Investment Manager;
- Stewardship and/or setting engagement objectives where the Portfolio fell below the quantitative and qualitative tolerance thresholds set for a Product Level PAI by the Sub-Investment Manager; and
- Application of the ESG exclusion policies referenced above, which included consideration of several of the Product Level PAIs.

What were the top investments of this financial product?

The Sub-Investment Manager has used the EU statistical classification of economic activities (“NACE”) economic sector breakdown to identify the economic sectors of the Portfolio’s top 15 investments.

As the list below is based on an average calculated across the four calendar quarter ends of the Reference Period, this may differ from the top investments of the Portfolio calculated as at 31 December 2023 in the “Schedule of Investments” section of the financial statements.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2023 – 31 December 2023

Largest investments	Sector	% Assets	Country
KWEICHOW MOUTAI LTD A	C - Manufacturing	8.0%	China
MIDEA GROUP LTD A	C - Manufacturing	4.1%	China
WULIANGYE YIBIN LTD A	C - Manufacturing	3.9%	China
SHENZHEN MINDRAY BIO-MEDICAL ELECT	C - Manufacturing	3.8%	China

SANY HEAVY INDUSTRY LTD A	C - Manufacturing	2.4%	China
NARI TECHNOLOGY LTD A	J - Information and Communication	2.3%	China
CHINA CONSTRUCTION BANK CORP A	K - Financial and insurance activities	2.2%	China
TENCENT HOLDINGS LTD	J - Information and Communication	2.1%	China
TSINGTAO BREWERY LTD A	C - Manufacturing	2.0%	China

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

- The Portfolio aims to hold a minimum of 80% investments that were aligned with the environmental or social characteristics promoted by the Portfolio. During the Reference Period, the Portfolio held 94.0% investments that were aligned with the environmental or social characteristics promoted by the Portfolio.
- The Portfolio aims to hold a maximum of 20% investments that were not aligned with the environmental or social characteristics promoted by the Portfolio and are not sustainable investments, and which fall into the “Other” section of the Portfolio. During the Reference Period, the Portfolio held 6.0% “Other” investments.

The Sub-Investment Manager calculated the proportion of investments aligned with the environmental and/or social characteristics promoted by the Portfolio by reference to the proportion of companies in the Portfolio: i) that held either an NB ESG Quotient rating or a third-party equivalent ESG rating that was used as part of the portfolio construction and investment management process of the Portfolio; and/or ii) with whom the Sub-Investment Manager had engaged directly. This calculation was based on a mark-to-market assessment of the Portfolio and may be based on incomplete or inaccurate company or third-party data. The Reference Period data was calculated by averaging the data of the four calendar quarter ends.

● *In which economic sectors were the investments made?*

The Reference Period data was calculated by averaging the data of the four calendar quarter ends.

Economic Sector – NACE	% Assets
C - Manufacturing	67.8%
D - Electricity, gas, steam and air conditioning supply	1.7%
F - Construction	2.8%
G - Wholesale and retail trade; repair of motor vehicles and motorcycles	4.3%
H - Transporting and storage	0.3%
J - Information and communication	5.6%
K - Financial and insurance activities	14.5%

M - Professional, scientific and technical activities
Q - Human health and social work activities

1.6%
1.5%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

- **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The analysis and disclosure requirements introduced by the EU Taxonomy are very detailed and compliance with them requires the availability of multiple, specific data points in respect of each investment which the Portfolio made. The Sub-Investment Manager cannot confirm that the Portfolio invested in any investments that qualified as environmentally sustainable for the purposes of the EU Taxonomy. Disclosures and reporting on Taxonomy alignment will develop as the EU framework evolves and data is made available by companies. The Sub-Investment Manager will keep the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy under active review as data availability and quality improves.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A – the Portfolio did not commit to holding Taxonomy-aligned investments.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A – the Portfolio did not commit to holding Taxonomy-aligned investments in this or the previous reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A – the Portfolio did not commit to holding sustainable investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A – the Portfolio did not commit to holding sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” included the remaining investments of the Portfolio (including but not limited to any derivatives or any security collateralized by a pool of similar assets or receivables listed in the Supplement for the Portfolio) which were neither aligned with the environmental or social characteristics, nor qualified as sustainable investments.

The “Other” section in the Portfolio was held for a number of reasons that the Sub-Investment Manager felt was beneficial to the Portfolio, such as, but not limited to, achieving risk management, and/or to ensure adequate liquidity, hedging and collateral cover.

As noted above, the Portfolio was invested in compliance with ESG exclusion policies, on a continuous basis. This ensured that investments made by the Portfolio sought to align with international environmental and social safeguards such as the UNGC Principles, the UNGPs, the OECD Guidelines and the ILO Standards.

The Sub-Investment Manager believes that these policies prevented investment in companies that most egregiously violated environmental and/or social minimum standards and ensured that the Portfolio could successfully promote its environmental and social characteristics.

The above steps ensured that robust environmental and social safeguards were in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio was managed in-line with the investment objective and the following actions were taken:

I. Integrating proprietary ESG analysis:

The Sub-Investment Manager applied a high standard of due diligence in the selection and ongoing monitoring of investments made by the Portfolio to ensure the integration of Sustainability Risks (as defined in the SFDR) and ESG. The Sub-Investment Manager views ESG integration as the practice of incorporating material ESG risks and considerations (as a binding element) into the investment decision-making process. ESG integration sits alongside other financial considerations and should enrich the Sub-Investment Manager's investment teams' analysis of companies by providing a toolkit for identifying material ESG risks and opportunities that inform investment decisions. The Sub-Investment Manager believes that material ESG factors are an important driver of long-term investment returns from both an opportunity and a risk-mitigation perspective. Hence, the Sub-Investment Manager's ESG integration approach considers ESG opportunities as well as Sustainability Risks.

Before making investments, the investment team conducted due diligence that it deemed reasonable and appropriate based on the facts and circumstances applicable to each investment. The investment team assessed the investment's alignment with the environmental and social characteristics promoted by the Portfolio using (as appropriate) the NB ESG Quotient and exclusionary screens (to identify potential non-compliance with the above listed ESG exclusions). The due diligence was supported by third-party data sources.

The NB ESG Quotient rating for companies was utilised to help to better identify risks and opportunities in the overall assessment. By integrating the investment team's proprietary local insight of the China market and ESG analysis (the NB ESG Quotient) into the overall company view, there was a direct link between their analysis of the Portfolio's environmental and social characteristics and the portfolio construction activities

II. Engagement:

The Sub-Investment Manager engaged with companies through a robust ESG engagement program. They sought to prioritise constructive engagements and sought to engage on topics (including ESG topics) they determined to be financially material for the relevant company. The Sub-Investment Manager viewed this engagement with companies, as an important part of its investment process.

In order to maintain and enhance company relationships, and to ensure companies followed their ESG trajectory, the Sub-Investment Manager kept an active dialogue with companies, regardless of whether or not they had high impact controversies or a poor NB ESG Quotient rating. Progress on engagement was tracked centrally in the Sub-Investment Manager's engagement tracker.

III. ESG sectoral exclusion policies:

To ensure that the environmental and social characteristics promoted by the Portfolio were attained, the Portfolio applied the ESG exclusion policies referenced above, which placed limitations on the investable universe.

How did this financial product perform compared to the reference benchmark?

N/A – The Portfolio has not designated a reference benchmark.

- *How does the reference benchmark differ from a broad market index?*
N/A
- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*
N/A
- *How did this financial product perform compared with the reference benchmark?*
N/A
- *How did this financial product perform compared with the broad market index?*
N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Neuberger Berman China Bond Fund (the “Portfolio”)

The most recent SFDR Pre-Contractual Template of the Portfolio can be found [here](#).

This SFDR Periodic Report template reports on the 2023 calendar year (the “Reference Period”). Unless otherwise stated in the relevant disclosure, all Reference Period data has been calculated based on the average of the four calendar quarter ends.

This SFDR Periodic Report template reports on several quantitative ESG data metrics. To assist the reader in their review and assessment of such ESG data metrics, we have disclosed the Portfolio’s data coverage for these ESG data metrics. The intention is that disclosure of the data coverage (of the ESG metrics during the Reference Period) will allow the reader to interpret the ESG data metrics’ ability to represent the Portfolio with any limitations to such data coverage in mind.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and social characteristics were promoted by the Portfolio for corporate issuers:

- **Environmental Characteristics:** biodiversity and land usage; carbon emissions; opportunities in clean technologies; water stress; toxic emissions & waste; financing environmental impact; product carbon footprint; environmental policy; environmental management system; greenhouse gas (“GHG”) reduction programme; green procurement policy; and non-GHG air emissions programmes.
- **Social Characteristics:** health & safety; human capital development; labour management; privacy & data security; product safety & quality; financial products safety; discrimination policy; community involvement programmes; diversity programmes; and human rights policy.

Performance in relation to these environmental and social characteristics was measured through the NB ESG Quotient, and is reported, in aggregate, below.

How did the sustainability indicators perform?

As part of the investment process, the Manager and the Sub-Investment Manager considered a variety of sustainability indicators to measure the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators are listed below:

1. The NB ESG Quotient:

The proprietary Neuberger Berman ESG rating system (the “NB ESG Quotient”), is built around the concept of sector specific ESG risk and opportunity, and produced an overall ESG rating for issuers by assessing them against certain ESG metrics.

The NB ESG Quotient assigned weightings to environmental, social and governance characteristics for each sector to derive the NB ESG Quotient rating for issuers. While the NB ESG Quotient rating of issuers was considered as part of the investment process, there was no minimum NB ESG Quotient rating to be attained by an issuer prior to investment. The Manager and the Sub-Investment Manager used the NB ESG Quotient to promote the environmental and social characteristics listed by prioritising investment in securities issued by issuers with a relatively favourable and/or an improving NB ESG Quotient rating. Pursuant to this, the Manager and the Sub-Investment Manager limited exposure to issuers with the poorest NB ESG Quotient rating unless there was a reasonable expectation that the NB ESG Quotient rating would improve over time. The Reference Period data was calculated by averaging the data of the four calendar quarter ends.

Reference Period	Rating	Range	Combined Coverage
NB ESG Quotient	54	1-100	69%
Third-Party Data	4.2	0-10	

With regards to the NB ESG Quotient rating, a rating between 1 – 100 is used where 1 is the lowest rating and 100 is the highest rating. This Portfolio does not have a minimum NB ESG Quotient rating to be attained by an issuer prior to investment.

The average NB ESG Quotient rating is a weighted average that reflects the ESG characteristics that were considered to be the most material drivers of ESG risk and opportunity for each issuer held in the Portfolio. It is not an ESG assessment or rating of the overall Portfolio and its promotion of environmental and social characteristics, but rather an assessment of the material ESG risks and opportunities the Portfolio had exposure to.

Sustainability

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Third-party data was also used to measure the resilience of the Portfolio's aggregate holdings to long-term, financially material, ESG risks. The third-party data ratings range from 0-10, with 0 being the lowest rating and 10 being the highest rating.

Assessment and management of material ESG risks and opportunities is an essential element of the Portfolio's promotion of environmental and social characteristics.

2. ESG exclusion policies:

To ensure that the environmental or social characteristics promoted by the Portfolio were attained, the Portfolio did not invest in securities issued by issuers whose activities had been identified as breaching, or were not consistent with, the Neuberger Berman Controversial Weapons Policy and the Neuberger Berman Thermal Coal Involvement Policy. The Portfolio is phasing out its exposure to thermal coal and prohibited investment in securities issued by issuers that derived more than 10% of revenue from thermal coal mining or were expanding new thermal coal power generation, as determined by internal screens. The Portfolio also prohibited investments in issuers in the power generation industry that used thermal coal as an energy source for more than 95% of their installed power generation capacity, were expanding into new thermal coal power generation, or whose expansionary capital expenditure budgets did not include a minimum threshold for non-coal investments, as determined by internal screens. The Portfolio did not invest in securities issued by issuers whose activities had been identified as breaching, or were not consistent with, the Neuberger Berman Global Standards Policy which excluded identified violators of (i) the United Nations Global Compact Principles ("**UNGC Principles**"), (ii) the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct ("**OECD Guidelines**"), (iii) the United Nations Guiding Principles on Business and Human Rights ("**UNGPs**") and (iv) the International Labour Standards ("**ILO Standards**"). In addition, the Portfolio excluded securities issued by issuers which were involved in direct child labour, in the tobacco industry, as well as certain issuers with significant exposure to oil sands.

When applying ESG exclusions to the Portfolio, the Manager and the Sub-Investment Manager used third-party data to identify issuers in breach of the ESG exclusions listed above. Where possible, the Manager and the Sub-Investment Manager sought to overlay this third-party data with qualitative expertise from their research analysts to establish a current and holistic picture of the issuer. The Manager and the Sub-Investment Manager discussed and debated the differences between the violators identified by the third-party data and those identified as a result of their research, which drew upon data from the NB ESG Quotient and direct engagements with the issuer.

● ...and compared to previous periods?

For the 2022 reference period, the quantitative data disclosed (for the sustainability indicators) was calculated as at 31 December 2022, being the only quarter end in the reference period that followed the entry into force of the SFDR RTS (which included the publication of the Portfolio's SFDR pre-contractual disclosure template).

The below sustainability indicators' quantitative data for the Reference Period was calculated by averaging the four calendar quarter ends.

1. NB ESG Quotient

	NB ESG Quotient Rating	Third-Party Data Rating	Combined Coverage
Range	1-100	0-10	0%-100%
2022 reference period	50	4.4	67%
2023 reference period	54	4.2	69%

Year-on-year, the NB ESG Quotient rating has improved and the third-party data rating has declined. This may be due to a deterioration in individual issuers according to the third-party data provider, or due to differences in the issuer's third-party rating by the provider.

2. Exclusions

Consistent with the previous calendar year, there were no breaches (of the above listed ESG exclusions) during the Reference Period.

	Total number of breaches
2022 reference period	0
2023 reference period	0

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A - the Portfolio did not commit to holding sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A - the Portfolio did not commit to holding sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A - the Portfolio did not commit to holding sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio did not commit to holding sustainable investments, however the Manager and the Sub-Investment Manager did not invest in issuers whose activities had been identified as breaching, or were not consistent with, the OECD Guidelines, UNGC Principles, ILO Standards and UNGPs, captured through the Neuberger Berman Global Standards Policy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

N/A – the Portfolio did not commit to holding Taxonomy-aligned investments.

How did this financial product consider principal adverse impacts on sustainability factors?

A selection of the principal adverse impact indicators were considered directly (e.g. through the ESG exclusion policies listed above) and/or indirectly (e.g. as part of the Manager's and the Sub-Investment Manager's assessment of issuers) throughout the Reference Period.

The Manager and the Sub-Investment Manager considered the principal adverse impacts outlined in the below table on sustainability factors (the “**Product Level PAIs**”):

Product Level PAIs	
Theme	Adverse sustainability indicator
Greenhouse gas emissions	PAI 1 - GHG emissions PAI 2 - Carbon footprint PAI 3 - GHG intensity of investee companies PAI 4 - Exposure to companies active in the fossil fuel sector
Social and employee matters	PAI 10 - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises PAI 13 - Board gender diversity PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Consideration of the Product Level PAIs was limited by the availability (in the Manager's and the Sub-Investment Manager's subjective view) of adequate, reliable and verifiable data coverage. The Manager and the Sub-Investment Manager utilised third-party data and proxy data along with internal research to consider the Product Level PAIs.

Consideration of the Product Level PAIs by the Manager and the Sub-Investment Manager was through a combination of:

- Monitoring the Portfolio, in particular where it fell below the quantitative and qualitative tolerance thresholds set for each Product Level PAI by the Manager and the Sub-Investment Manager;
- Stewardship and/or setting engagement objectives where the Portfolio fell below the quantitative and qualitative tolerance thresholds set for a Product Level PAI; and
- Application of the ESG exclusion policies referenced above, which included consideration of several of the Product Level PAIs.

What were the top investments of this financial product?

The Manager and the Sub-Investment Manager have used the EU statistical classification of economic activities ("NACE") economic sector breakdown to identify the economic sectors of the Portfolio's top 15 investments.

As the list below is based on an average calculated across the four calendar quarter ends of the Reference Period, this may differ from the top investments of the Portfolio calculated as at 31 December 2023 in the "Schedule of Investments" section of the financial statements.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2023 - 31 December 2023

Largest investments				Sector	% Assets	Country
CHINA PEOPLES REPUBLIC OF (GOVERNMENT)				O - Public administration and defence; compulsory social security*	5.5%	China
BRIGHT FOOD (GROUP) CO LTD				C - Manufacturing	4.4%	China
CHINA PEOPLES REPUBLIC OF (GOVERNMENT)				O - Public administration and defence; compulsory social security*	4.4%	China
GUANGZHOU YUEXIU HOLDING LTD MTN				F - Construction	4.4%	China
CHINA SOUTHERN POWER GRID CO LTD MTN				D - Electricity, gas, steam, and air conditioning supply	4.4%	China
SHENZHEN METRO GROUP CO LTD				H - Transporting and storage	3.3%	China
CENTRAL HUIJIN INVESTMENT LTD MTN				K - Financial and insurance activities	3.3%	China
CHINA RESOURCES CO LTD MTN				G - Wholesale and Retail trade; Repair of Motor Vehicles and Motorcycles	3.3%	China
BOC AVIATION (USA) CORPORATION MTN RegS				N - Administrative and support service activities	3.0%	Singapore
GUANGZHOU METRO INVESTMENT FINANCE MTN RegS				K - Financial and insurance activities	2.8%	China
AGRICULTURAL BANK OF CHINA LTD RegS				K - Financial and insurance activities	2.2%	China
BANK OF CHINA LTD RegS				K - Financial and insurance activities	2.2%	China
CHINA POST GROUP				K - Financial and insurance activities	2.2%	China
CHINA PEOPLES REPUBLIC OF (GOVERNMENT)				O - Public administration and defence; compulsory social security*	2.2%	China
CENTRAL HUIJIN INVESTMENT LTD MTN				K - Financial and insurance activities	2.2%	China

*O - Public administration and defence; compulsory social security is classified by Barclays Industry as either: Sovereign, Treasury, Foreign Local Government, Supranational, Foreign Agencies.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

- The Portfolio aims to hold a minimum of 80% investments that are aligned with the environmental or social characteristics promoted by the Portfolio. During the Reference Period, the Portfolio held 97.1% investments that were aligned with the environmental or social characteristics promoted by the Portfolio.
- The Portfolio aims to hold a maximum of 20% investments that are not aligned with the environmental or social characteristics promoted by the Portfolio and are not sustainable investments, and which fall into the “Other” section of the Portfolio. During the Reference Period, the Portfolio held 2.9% “Other” investments.

The Manager and the Sub-Investment Manager calculated the proportion of investments aligned with the environmental and/or social characteristics promoted by the Portfolio by reference to the proportion of issuers in the Portfolio: i) that held either an NB ESG Quotient rating or a third-party equivalent ESG rating that was used as part of the portfolio construction and investment management process of the Portfolio; and/or ii) with whom the Manager and the Sub-Investment Manager had engaged directly. This calculation was based on a mark-to-market assessment of the Portfolio and may be based on incomplete or inaccurate issuer or third-party data. The Reference Period data was calculated by averaging the data of the four calendar quarter ends.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

The Reference Period data was calculated by averaging the data of the four calendar quarter ends.

Economic Sector – NACE	% Assets
C - Manufacturing	13.6%
D - Electricity, gas, steam and air conditioning supply	8.2%
F - Construction	6.6%
G - Wholesale and retail trade; repair of motor vehicles and motorcycles	4.2%
H - Transporting and storage	4.7%
I - Accommodation and food service activities	0.4%
J - Information and communication	1.7%
K - Financial and insurance activities	37.7%
N - Administrative and support service activities	4.9%
O - Public administration and defence; compulsory social security*	17.4%
R - Arts, entertainment and recreation	0.2%
None	0.3%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

- **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The analysis and disclosure requirements introduced by the EU Taxonomy are very detailed and compliance with them requires the availability of multiple, specific data points in respect of each investment which the Portfolio made. The Manager and the Sub-Investment Manager cannot confirm that the Portfolio invested in any investments that qualified as environmentally sustainable for the purposes of the EU Taxonomy. Disclosures and reporting on Taxonomy alignment will develop as the EU framework evolves and data is made available by issuers. The Manager and the Sub-Investment Manager will keep the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy under active review as data availability and quality improves.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- ☐ Yes:
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A – the Portfolio did not commit to holding Taxonomy-aligned investments.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A – the Portfolio did not commit to holding Taxonomy-aligned investments in this or the previous reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A – the Portfolio did not commit to holding sustainable investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A – the Portfolio did not commit to holding sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” included the remaining investments of the Portfolio (including but not limited to any derivatives or any security collateralized by a pool of similar assets or receivables listed in the Supplement for the Portfolio) which were neither aligned with the environmental or social characteristics, nor qualified as sustainable investments.

The “Other” section in the Portfolio was held for a number of reasons that the Manager and the Sub-Investment Manager felt was beneficial to the Portfolio, such as, but not limited to, achieving risk management, and/or to ensure adequate liquidity, hedging and collateral cover.

As noted above, the Portfolio was invested in compliance with ESG exclusion policies, on a continuous basis. This ensured that investments made by the Portfolio sought to align with international environmental and social safeguards such as the UNGC Principles, the UNGPs, the OECD Guidelines and the ILO Standards.

The Manager and the Sub-Investment Manager believe that these policies prevented investment in issuers that most egregiously violated environmental and/or social minimum standards and ensured that the Portfolio could successfully promote its environmental and social characteristics.

The above steps ensured that robust environmental and social safeguards were in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio was managed in-line with the investment objective and the following actions were taken:

I. Integrating proprietary ESG analysis:

The Manager and the Sub-Investment Manager applied a high standard of due diligence in the selection and ongoing monitoring of investments made by the Portfolio to ensure the integration of Sustainability Risks (as defined in the SFDR) and ESG. The Manager and the Sub-Investment Manager view ESG integration as the practice of incorporating material ESG risks and considerations (as a binding element) into the investment decision-making process. ESG integration sits alongside other financial considerations and should enrich the Manager and the Sub-Investment Manager's investment teams' analysis of issuers by providing a toolkit for identifying material ESG risks and opportunities that inform investment decisions. The Manager and the Sub-Investment Manager believe that material ESG factors are an important driver of long-term investment returns from both an opportunity and a risk-mitigation perspective. Hence, the Manager and the Sub-Investment Manager's ESG integration approach considers ESG opportunities as well as Sustainability Risks.

Before making investments, the investment team conducted due diligence that it deemed reasonable and appropriate based on the facts and circumstances applicable to each investment. The investment team assessed the investment's alignment with the environmental and social characteristics promoted by the Portfolio using (as appropriate) the NB ESG Quotient and exclusionary screens (to identify potential non-compliance with the above listed ESG exclusions). The due diligence was supported by third-party data sources.

The NB ESG Quotient rating for issuers was utilised to help to better identify risks and opportunities in the overall credit and value assessment. The NB ESG Quotient was a key component of the internal credit ratings and helped to identify business risks (including ESG risks), which would cause deterioration in an issuer's credit profile. Internal credit ratings can be notched up or down based on the NB ESG Quotient rating, and this was monitored by the Manager and the Sub-Investment Manager as an important component of the investment process for the Portfolio. By integrating the investment team's proprietary ESG analysis (the NB ESG Quotient) into their internal credit ratings, there was a direct link between their analysis of the Portfolio's environmental and social characteristics and the Portfolio's portfolio construction activities.

II. Engagement:

The Manager and the Sub-Investment Manager engaged with issuers through a robust ESG engagement program. They sought to prioritise constructive engagements and sought to engage on topics (including ESG topics) they determined to be financially material for the relevant issuer. The Manager and the Sub-Investment Manager viewed this engagement with issuers, as an important part of its investment process. Progress on engagement was tracked centrally in the Manager and the Sub-Investment Manager's engagement tracker.

III. ESG sectoral exclusion policies:

To ensure that the environmental and social characteristics promoted by the Portfolio were attained, the Portfolio applied the ESG exclusion policies referenced above, which placed limitations on the investable universe.

How did this financial product perform compared to the reference benchmark?

N/A – The Portfolio has not designated a reference benchmark.

- *How does the reference benchmark differ from a broad market index?*
N/A
- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*
N/A
- *How did this financial product perform compared with the reference benchmark?*
N/A
- *How did this financial product perform compared with the broad market index?*
N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Neuberger Berman Climate Innovation Fund (the “Portfolio”)

Legal entity identifier: 5493000I8IKJFVXLQ109

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<div><div><div></div><div></div><div></div></div> Yes</div>	<div><div><div></div><div></div><div></div></div> No</div>
<div><div><div></div> It made sustainable investments with an environmental objective: ____%</div><div><div><div></div> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</div><div><div><div></div> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</div></div></div></div>	<div><div><div></div> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 82.6%* of sustainable investments</div><div><div><div></div> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</div><div><div><div></div> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</div><div><div><div></div> with a social objective</div></div></div></div></div>

*Please refer to the "What was the proportion of sustainability-related investments?" question below for further detail in respect of the Portfolio's asset allocation (including its exposure to sustainable investments).

The most recent SFDR Pre-Contractual Template of the Portfolio can be found [here](#).

The Portfolio launched on 1 August 2023 and this periodic report template has therefore been prepared based on the average of the third and fourth quarter ends of 2023 (the “Reference Period”).

This SFDR Periodic Report template reports on several quantitative ESG data metrics. To assist the reader in their review and assessment of such ESG data metrics, we have disclosed the Portfolio's data coverage for these ESG data metrics. The intention is that disclosure of the data coverage (of the ESG metrics during the Reference Period) will allow the reader to interpret the ESG data metrics' ability to represent the Portfolio with any limitations to such data coverage in mind.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and social characteristics were promoted by the Portfolio:

Environmental Characteristics: air quality; biodiversity & land use; energy management; environmental risk exposure; fuel economy; greenhouse gas (“GHG”) emissions; opportunities in clean technologies; toxic emissions & waste; water management; packaging lifecycle management; materials sourcing; and product lifecycle management.

In aiming to align the Portfolio with a net-zero goal, the Sub-Investment Manager intends to have at least 90% of the Portfolio's Net Asset Value invested in companies with Science-Based Target initiative (“SBTi”)¹ validated targets (or equivalent as assessed by Neuberger Berman's net-zero sector alignment methodology, which conforms with the IIGCC target setting guidance²) by 2030 and to reach 100% of the Portfolio's Net Asset Value by 2050. Additionally, the Portfolio must reduce its carbon footprint across scope 1, 2, and material scope 3 GHG emissions³, by a minimum of 30% by 2030 relative to a 2019 baseline and a subsequent decline to net zero by 2050. The 2019 baseline may be subject to re-calculation as data quality and disclosure expands over time, particularly with respect to scope 3 emissions. There is no annual reduction target, instead the reduction target focuses on the 2030 interim target and the 2050 net zero goal.

Social Characteristics: access to finance; access to healthcare; community relations; data privacy & security; employee incentives & risk taking; health & nutrition; health & safety; human capital development; labour management; product safety & integrity; supply chain labour standards; workforce diversity & inclusion; pricing transparency; and responsible marketing.

Performance in relation to these environmental and social characteristics was measured through the NB ESG Quotient, and is reported, in aggregate, below.

While the sustainable investments held by the Portfolio had either a social or an environmental objective, such sustainable investments do not qualify as environmentally sustainable investments (or Taxonomy aligned investments) as defined under the EU Taxonomy.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

As part of the investment process, the Sub-Investment Manager considered a variety of sustainability indicators to measure the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators are listed below:

1. The NB ESG Quotient:

The proprietary Neuberger Berman ESG rating system (the “NB ESG Quotient”), is built around the concept of sector specific ESG risk and opportunity, and produced an overall ESG rating for companies by assessing them against certain ESG metrics.

Foundational to the NB ESG Quotient is the proprietary Neuberger Berman (“NB”) materiality matrix, which focuses on the ESG characteristics that were considered to be the most likely to be the material drivers of ESG risk and opportunity for each sector. Each sector criteria is constructed using third-party and internally derived ESG data and supplemented with internal qualitative analysis, leveraging the Portfolio's analyst team's significant sector expertise. The NB materiality matrix enabled the Sub-

¹ The SBTi is a partnership between CDP, the United Nations Global Compact, World Resources Institute and the World Wide Fund for Nature which enables companies to set science-based emissions reduction targets.

² The IIGCC created the Net Zero Investment Framework to assist asset owners and asset managers to develop net zero investment strategies or to fulfil the requirements of net zero commitments. The IIGCC's target setting guidance is a component of the Net Zero Investment Framework.

³ Scope 1 emissions: are direct emissions from an issuer's owned or controlled sources (such as emissions created directly by the issuer's business processes or from vehicles owned by the issuer). Scope 2 emissions: are indirect emissions from the generation of electricity, steam, heating and cooling consumed by the issuer. Scope 3 emissions: are all other indirect emissions that occur in an issuer's value chain (such as emissions from products or services consumed by the issuer, disposal of its waste, employee commuting, distribution and transport of its products or its investments).

Investment Manager to derive the NB ESG Quotient rating, to compare sectors and companies relative to their environmental and social characteristics.

The NB ESG Quotient assigned weightings to environmental, social and governance characteristics for each sector to derive the NB ESG Quotient rating for companies. While the NB ESG Quotient rating of companies was considered as part of the investment process, there is no minimum NB ESG Quotient rating to be attained by a company prior to investment. Pursuant to this, the Sub-Investment Manager engaged with companies with a poor NB ESG Quotient or third-party rating with the aim to seek improvement in the underlying environmental and social characteristics (which made up the NB ESG Quotient) over time.

The Reference Period data was calculated by averaging the data of the third and fourth calendar quarter ends.

Reference Period	Rating	Range	Combined Coverage
NB ESG Quotient	ES:B G: 2.7	ES: A-D G: 1-4	96%
Third-Party Rating Data	6.8	0-10	

With regards to the NB ESG Quotient rating, for environmental and social (“ES”) ratings, A – D quartiles are used, where A is the highest rating (top quartile) and D is the lowest rating (bottom quartile). For governance (“G”) ratings, 1 – 4 quartiles are used where 1 is the highest rating and 4 is the lowest rating. This Portfolio does not have a minimum NB ESG Quotient rating to be attained by a company prior to investment.

The average NB ESG Quotient rating is a weighted average that reflects the ESG characteristics that were considered to be the most material drivers of ESG risk and opportunity for each company held in the Portfolio. It is not an ESG assessment or rating of the overall Portfolio and its promotion of environmental and social characteristics but rather an assessment of the material ESG risks and opportunities the Portfolio had exposure to.

Third-party data was also used to measure the resilience of the Portfolio's aggregate holdings to long-term, financially material, ESG risks. The third-party data ratings range from 0-10, with 0 being the lowest rating and 10 being the highest rating.

Assessment and management of material ESG risks and opportunities is an essential element of the Portfolio's promotion of environmental and social characteristics.

2. Climate Value-at-Risk:

Over the Reference Period, Climate Value-at-Risk (“CVaR”) measured the exposure to transition and physical climate risks and opportunities for companies. CVaR is a scenario analysis tool evaluating economic risks and opportunities under various degree scenarios (i.e., the amount of warming targeted) and potential regulatory environments in varying countries.

CVaR is a type of scenario analysis which is defined as the present value of aggregated future policy risk costs, technology opportunity profits, and extreme weather event costs and profits, expressed as a percentage of a security's or portfolio's market value (i.e. potential gain or loss) according to the warming scenario targeted.

By calculating the financial risks and opportunities from climate change per security and per scenario, CVaR provides a framework that helps quantify and understand these risks and opportunities. The CVaR metric provides insight into the climate-stressed valuation of assets based on specific degree scenarios, providing an

assessment on how much a security may stand to lose or gain from the impact of climate change.

For the Reference Period, CVaR projected that a warming climate scenario could result in a loss of 9.5% in the valuation of assets under assessment. The Reference Period data has been calculated based on the average of the third and fourth calendar quarter ends.

This analysis is intended as a broad overview of the investment team's style and investment process.

On a holistic basis, the results were evaluated by the Sub-Investment Manager's portfolio managers and analysts. The scenario analysis served as a starting point for further bottom-up analysis and identifying potential climate-related risks to address through company engagement.

Due to data limitations, CVaR was not applied across all companies held by the Portfolio and was instead limited to the companies for which the Sub-Investment Manager had sufficient and reliable data. The Portfolio had a CVaR coverage of 96% and is an average of the CVaR coverage across the third and fourth calendar quarter ends.

The analysis from CVaR is reviewed at least once a year.

3. ESG exclusion policies:

To ensure that the environmental or social characteristics promoted by the Portfolio were attained, the Portfolio did not invest in companies whose activities had been identified as breaching, or were not consistent with, the Neuberger Berman Controversial Weapons Policy; the Neuberger Berman Thermal Coal Involvement Policy; the Neuberger Berman Sustainable Exclusion Policy; and the Neuberger Berman Enhanced Sustainable Exclusion Policy. In addition to the application of the Neuberger Berman Thermal Coal Involvement Policy, the Sub-Investment Manager prohibited the initiation of new investment positions in companies that (i) derived more than 25% of their revenue from thermal coal mining; or (ii) were expanding new thermal coal power generation. Furthermore, investments held by the Portfolio did not invest in companies whose activities had been identified as breaching, or were not consistent with, the Neuberger Berman Global Standards Policy which excluded identified violators of (i) the United Nations Global Compact Principles ("**UNGC Principles**"), (ii) the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct ("**OECD Guidelines**"), (iii) the United Nations Guiding Principles on Business and Human Rights ("**UNGPs**") and (iv) the International Labour Standards ("**ILO Standards**").

When applying ESG exclusions to the Portfolio, the Sub-Investment Manager used third-party data to identify companies in breach of the ESG exclusions listed above. Where possible, the Sub-Investment Manager sought to overlay this third-party data with qualitative expertise from their research analysts to establish a current and holistic picture of the company. The Sub-Investment Manager discussed and debated the differences between the violators identified by the third-party data and those identified as a result of their research, which drew upon data from the NB ESG Quotient and direct engagements with the company.

...and compared to previous periods?

N/A – this is the first reference period.

● *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

While the Portfolio promoted environmental and social characteristics, this Portfolio did not have a sustainable investment objective. However, the Portfolio held sustainable investments which promoted the environmental & social characteristics listed above.

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to NB's sustainable investment framework. This framework included an assessment as to (i) whether the investment contributes to an environmental and/or social objective; (ii) whether the investment causes significant harm to those objectives as described below; and (iii) an assessment of a company's overall good governance rating to determine whether the company passes a good governance assessment.

Under this sustainable investment framework, the Sub-Investment Manager utilised multiple datapoints that measured the alignment of a company's economic activity with environmental or social characteristics.

The Sub-Investment Manager screened companies for controversies, significant harm and violations of minimum safeguards. If the companies passed this screen, the Sub-Investment Manager then proceeded to measure the companies' environmental or social economic contribution.

The Sub-Investment Manager measured this in two ways:

- Revenue alignment to the EU taxonomy (if any); and
- Revenue alignment to the Sustainable Development Goals ("**SDGs**").

Consideration of revenue alignment with the SDGs was limited by the availability of adequate, reliable and verifiable data coverage. To mitigate instances of poor data coverage, the Sub-Investment Manager utilised third-party data and proxy data along with internal research and qualitative analysis as part of NB's sustainable investment framework.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Sub-Investment Manager applied its sustainable investment framework, which aims to identify and exclude investments that cause significant harm to environmental or social objectives. To determine whether an investment caused significant harm, the Sub-Investment Manager considered significant harm with reference to certain principal adverse impact indicators and violations of minimum safeguards.

The Sub-Investment Manager took into account the principal adverse impacts indicators (the "**PAIs**") outlined in the below table when determining whether the sustainable investments that the Portfolio made did not cause significant harm to any environmental or social sustainable investment objective:

PAIs	
Theme	Adverse sustainability indicator
<i>Greenhouse gas emissions</i>	PAI 1- GHG emissions PAI 2 - Carbon footprint PAI 3 - GHG intensity of investee companies PAI 4 - Exposure to companies active in the fossil fuel sector PAI 5 - Share of non-renewable energy consumption and production PAI 6 - Energy consumption intensity per high impact climate sector
<i>Biodiversity</i>	PAI 7 - Activities negatively affecting biodiversity-sensitive areas
<i>Water</i>	PAI 8 - Emissions to water
<i>Waste</i>	PAI 9 - Hazardous waste and radioactive waste ratio
<i>Social and employee matters</i>	PAI 10 - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises PAI 11 - Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises PAI 12 - Unadjusted gender pay gap PAI 13 - Board gender diversity PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Consideration of the PAIs was limited by the availability (in the Sub-Investment Manager's subjective view) of adequate, reliable and verifiable data coverage. The Sub-Investment Manager utilised third-party data and proxy data along with internal research to consider the PAIs.

The Sub-Investment Manager also considered violations of minimum safeguards. The Sub-Investment Manager did not invest in companies whose activities had been identified as

breaching, or were not consistent with, the OECD Guidelines, UNGC Principles, ILO Standards and UNGPs, captured through the Neuberger Berman Global Standards Policy.

The combination of all of these factors generated a quantitative validation for “sustainability” which was used to ensure the sustainable investments that the Portfolio made, did not cause significant harm to any environmental or social sustainable objective.

— — —
How were the indicators for adverse impacts on sustainability factors taken into account?

Consideration of the PAIs by the Sub-Investment Manager, when determining whether the sustainable investments that the Portfolio made did not cause significant harm to any environmental or social sustainable investment objective of the Portfolio's sustainable investments, was through a combination of:

- Monitoring companies which fell below the quantitative and qualitative tolerance thresholds set for each PAI by the Sub-Investment Manager;
- Stewardship and/or setting engagement objectives with companies which fell below the quantitative and qualitative tolerance thresholds set for a PAI by the Sub-Investment Manager; and
- Application of the ESG exclusion policies referenced above, which included consideration of several of the PAIs.

— — —
Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Investment Manager did not invest in companies whose activities had been identified as breaching, or were not consistent with, the OECD Guidelines, UNGC Principles, ILO Standards and UNGPs, captured through the Neuberger Berman Global Standards Policy.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

N/A – The Portfolio did not commit to holding Taxonomy-aligned investments.

How did this financial product consider principal adverse impacts on sustainability factors?

A selection of the principal adverse impact indicators were considered directly (e.g. through the ESG exclusion policies listed above) and/or indirectly (e.g. as part of the Sub-Investment Manager's assessment of companies) throughout the Reference Period.

The Sub-Investment Manager considered PAIs with respect to the Portfolio in two ways:

1. All PAIs were taken into account when determining whether sustainable investments that the Portfolio made did not cause significant harm to any environmental or social sustainable investment objective as explained in *"How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"* above.
2. The Sub-Investment Manager considered the principal adverse impacts outlined in the below table on sustainability factors (the **"Product Level PAIs"**):

Product Level PAIs	
Theme	Adverse sustainability indicator
Greenhouse gas emissions	PAI 1 - GHG emissions PAI 2 - Carbon footprint PAI 3 - GHG intensity of investee companies PAI 4 - Exposure to companies active in the fossil fuel sector
Social and employee matters	PAI 10 - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises PAI 13 - Board gender diversity PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Consideration of the Product Level PAIs was limited by the availability (in the Sub-Investment Manager's subjective view) of adequate, reliable and verifiable data coverage. The Sub-Investment Manager utilised third-party data and proxy data along with internal research to consider the Product Level PAIs.

Consideration of the Product Level PAIs by the Sub-Investment Manager was through a combination of:

- Monitoring the Portfolio, in particular where it fell below the quantitative and qualitative tolerance thresholds set for each Product Level PAI by the Sub-Investment Manager;
- Stewardship and/or setting engagement objectives where the Portfolio fell below the quantitative and qualitative tolerance thresholds set for a Product Level PAI by the Sub-Investment Manager; and

- Application of the ESG exclusion policies referenced above, which included consideration of several of the Product Level PAIs.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2023 - 31 December 2023

The Sub-Investment Manager has used the EU statistical classification of economic activities ("**NACE**") economic sector breakdown to identify the economic sectors of the Portfolio's top 15 investments.

As the list below is based on an average calculated across the third and fourth calendar quarter ends of the Reference Period, this may differ from the top investments of the Portfolio calculated as at 31 December 2023 in the "Schedule of Investments" section of the financial statements.

Largest investments	Sector	% Assets	Country
NVENT ELECTRIC PLC	C - Manufacturing	6.10%	United States
GFL ENVIRONMENTAL SUBORDINATE VOTI	E - Water supply; sewerage; waste management and remediation activities	5.97%	Canada
PROCORE TECHNOLOGIES INC	J - Information and Communication	5.61%	United States
QUANTA SERVICES INC	F - Construction	5.29%	United States
HOWMET AEROSPACE INC	C - Manufacturing	5.27%	United States
TRANE TECHNOLOGIES PLC	C - Manufacturing	4.16%	United States
DSM FIRMENICH AG	C - Manufacturing	3.69%	Switzerland
INGERSOLL RAND INC	C - Manufacturing	3.60%	United States
STELLANTIS NV	C - Manufacturing	3.38%	United States
HITACHI LTD	J - Information and Communication	3.11%	Japan
BUREAU VERITAS SA	M - Professional, scientific and technical activities	3.00%	France
GREEN PLAINS INC	C - Manufacturing	2.77%	United States
BYD LTD H	C - Manufacturing	2.57%	China
XYLEM INC	C - Manufacturing	2.38%	United States
IBERDROLA SA	D - Electricity, gas, steam, and air conditioning supply	2.32%	Spain

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

- The Portfolio aims to hold a minimum of 80% investments that are aligned with the environmental or social characteristics promoted by the Portfolio. During the Reference Period, the Portfolio held 96.2% investments that were aligned with the environmental or social characteristics promoted by the Portfolio.
- The Portfolio commits to holding at least 50% sustainable investments. During the Reference Period, the Portfolio held 82.6% sustainable investments.
- The Portfolio aims to hold a maximum of 20% investments that are not aligned with the environmental or social characteristics promoted by the Portfolio and are not sustainable

investments, and which fall into the “Other” section of the Portfolio. During the Reference Period, the Portfolio held 3.8% “Other” investments.

The Sub-Investment Manager calculated the proportion of investments aligned with the environmental and/or social characteristics promoted by the Portfolio by reference to the proportion of companies in the Portfolio: i) that held either an NB ESG Quotient rating or a third-party equivalent ESG rating that was used as part of the portfolio construction and investment management process of the Portfolio; and/or ii) with whom the Sub-Investment Manager had engaged directly. This calculation was based on a mark-to-market assessment of the Portfolio and may be based on incomplete or inaccurate company or third-party data. The Reference Period data was calculated by averaging the data of the third and fourth calendar quarter ends.

In which economic sectors were the investments made?

The Reference Period data was calculated by averaging the data of the third and fourth calendar quarter ends.

Economic Sector – NACE	% Assets
C - Manufacturing	64.4%
D - Electricity, gas, steam and air conditioning supply	2.4%
E - Water supply; sewerage; waste management and remediation activities	7.5%
F - Construction	5.8%
G - Wholesale and retail trade; repair of motor vehicles and motorcycles	2.0%
H - Transporting and storage	1.8%
J - Information and communication	12.9%
M - Professional, scientific and technical activities	3.1%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

- **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The analysis and disclosure requirements introduced by the EU Taxonomy are very detailed and compliance with them requires the availability of multiple, specific data points in respect of each investment which the Portfolio made. The Sub-Investment Manager cannot confirm that the Portfolio invested in any investments that qualified as environmentally sustainable for the purposes of the EU Taxonomy. Disclosures and reporting on Taxonomy alignment will develop as the EU framework evolves and data is made available by companies. The Sub-Investment Manager will keep the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy under active review as data availability and quality improves.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁴?

- ☐ Yes:
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

⁴ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A – the Portfolio did not commit to holding Taxonomy-aligned investments.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A – the Portfolio did not commit to holding Taxonomy-aligned investments in this or the previous reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Portfolio held 60.5% sustainable investments with an environmental objective not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The Portfolio held 22.1% socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” included the remaining investments of the Portfolio (including but not limited to any derivatives or any security collateralized by a pool of similar assets or receivables listed in the Supplement for the Portfolio) which were neither aligned with the environmental or social characteristics, nor qualified as sustainable investments.

The “Other” section in the Portfolio was held for a number of reasons that the Sub-Investment Manager felt was beneficial to the Portfolio, such as, but not limited to, achieving risk management, and/or to ensure adequate liquidity, hedging and collateral cover.

As noted above, the Portfolio was invested in compliance with ESG exclusion policies, on a continuous basis. This ensured that investments made by the Portfolio sought to align with international environmental and social safeguards such as the UNGC Principles, the UNGPs, the OECD Guidelines and the ILO Standards.

The Sub-Investment Manager believes that these policies prevented investment in companies that most egregiously violate environmental and/or social minimum standards and ensured that the Portfolio could successfully promote its environmental and social characteristics.

The above steps ensured that robust environmental and social safeguards were in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio was managed in-line with the investment objective and the following actions were taken:

I. Integrating proprietary ESG analysis:

The Sub-Investment Manager applied a high standard of due diligence in the selection and ongoing monitoring of investments made by the Portfolio to ensure the integration of Sustainability Risks (as defined in the SFDR) and ESG. The Sub-Investment Manager views ESG integration as the practice of incorporating material ESG risks and considerations (as a binding element) into the investment decision-making process. ESG integration sits alongside other financial considerations and should enrich the Sub-Investment Manager's investment teams' analysis of companies by providing a toolkit for identifying material ESG risks and opportunities that inform investment decisions. The Sub-Investment Manager believes that material ESG factors are an important driver of long-term investment returns from both an opportunity and a risk-mitigation perspective. Hence, the Sub-Investment Manager's ESG integration approach considers ESG opportunities as well as Sustainability Risks.

Before making investments, the investment team conducted due diligence that it deemed reasonable and appropriate based on the facts and circumstances applicable to each investment. The investment team assessed the investment's alignment with the environmental and social characteristics promoted by the Portfolio using (as appropriate) the NB ESG Quotient and exclusionary screens (to identify potential non-compliance with the above listed ESG exclusions). The due diligence was supported by third-party data sources.

The third-party or NB ESG Quotient rating for companies was utilised to help to better identify risks and opportunities in the overall assessment of a company, noting that the Portfolio focused investment in companies that are involved in or derive benefit from climate innovation related technologies and/or activities.

The Sub-Investment Manager used the NB ESG Quotient and an assessment of thematic purity to identify companies which operate within the long-term trend of Climate Innovation. Holdings with thematic purity are defined as those with at least 50% of incremental earnings/revenue growth or capex aligned with Climate Innovation related activities.

By integrating the investment team's proprietary ESG analysis (the NB ESG Quotient) into the overall thematic and company view, there was a direct link between their analysis of the Portfolio's environmental and social characteristics and the portfolio construction activities.

II. Engagement:

The Sub-Investment Manager engaged with companies through a robust ESG engagement program. They sought to prioritise constructive engagements and sought to engage on topics (including ESG topics) they determined to be financially material for the relevant company. The Sub-Investment Manager viewed this engagement with companies, as an important part of its investment process. Progress on engagement was tracked centrally in the Sub-Investment Manager's engagement tracker.

III. ESG sectoral exclusion policies:

To ensure that the environmental and social characteristics promoted by the Portfolio were attained, the Portfolio applied the ESG exclusion policies referenced above, which placed limitations on the investable universe.

How did this financial product perform compared to the reference benchmark?

N/A – The Portfolio has not designated a reference benchmark.

- *How does the reference benchmark differ from a broad market index?*
N/A
- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*
N/A
- *How did this financial product perform compared with the reference benchmark?*
N/A
- *How did this financial product perform compared with the broad market index?*
N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Neuberger Berman Corporate Hybrid Bond Fund (the “Portfolio”)

Legal entity identifier: 549300TMYI9EFR4Q1G47

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<div>● ● <input type="checkbox"/> Yes</div>	<div>● ● <input checked="" type="checkbox"/> No</div>
<div><input type="checkbox"/> It made sustainable investments with an environmental objective: ____%</div> <div><div><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</div><div><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</div></div> <div><input type="checkbox"/> It made sustainable investments with a social objective: ____%</div>	<div><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 36.2%* of sustainable investments**</div> <div><div><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</div><div><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</div><div><input checked="" type="checkbox"/> with a social objective</div></div> <div><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</div>

*The Portfolio introduced a minimum sustainable investment commitment of 10% as of 2 August 2023. The sustainable investment disclosure in this periodic report template has therefore been prepared based on the average of the third and fourth quarter ends of 2023 (as the only quarter ends following the introduction of the sustainable investment commitment). The sustainable investment figures are not included in the Asset Allocation chart due to the inconsistent reference periods.

**Please refer to the "What was the proportion of sustainability-related investments"? question below for further detail in respect of the Portfolio's asset allocation (including its exposure to sustainable investments).

This SFDR Periodic Report template reports on the 2023 calendar year (the “**Reference Period**”). Unless otherwise stated in the relevant disclosure, all Reference Period data has been calculated based on the average of the four calendar quarter ends.

This SFDR Periodic Report template reports on several quantitative ESG data metrics. To assist the reader in their review and assessment of such ESG data metrics, we have disclosed the Portfolio’s data coverage for these ESG data metrics. The intention is that disclosure of the data coverage (of the ESG metrics during the Reference Period) will allow the reader to interpret the ESG data metrics’ ability to represent the Portfolio with any limitations to such data coverage in mind.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and social characteristics were promoted by the Portfolio:

- **Environmental Characteristics:** biodiversity & responsible land usage; carbon footprint reduction; environmental management; greenhouse gas (“**GHG**”) emissions; opportunities in clean technologies; opportunities in green building; opportunities in renewable energy; responsible raw material sourcing; responsible & transparent underwriting; toxic emissions & waste; waste management; and water management.
- **Social Characteristics:** access to finance; access to medicines; affordability & fair pricing; business ethics & transparency of government relations; chemical safety; community relations; controversial sourcing; corporate behaviour; drug safety & side effects management; ethical marketing & practices; health & nutrition; health & safety; human capital development; labour management; data privacy & security; product safety & quality; and litigation & related controversy.

Performance in relation to these environmental and social characteristics was measured through the NB ESG Quotient, and is reported, in aggregate, below.

While the sustainable investments held by the Portfolio had either a social or an environmental objective, such sustainable investments do not qualify as environmentally sustainable investments (or Taxonomy aligned investments) as defined under the EU Taxonomy.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

As part of the investment process, the Sub-Investment Manager considered a variety of sustainability indicators to measure the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators are listed below:

1. The NB ESG Quotient:

The proprietary Neuberger Berman ESG rating system (the “**NB ESG Quotient**”), is built around the concept of sector specific ESG risk and opportunity, and produced an overall ESG rating for issuers by assessing them against certain ESG metrics.

Foundational to the NB ESG Quotient is the proprietary Neuberger Berman (“**NB**”) materiality matrix, which focuses on the ESG characteristics that were considered to be the most likely to be the material drivers of ESG risk and opportunity for each sector. Each sector criteria is constructed using third-party and internally derived ESG data and supplemented with internal qualitative analysis, leveraging the Portfolio’s analyst team’s significant sector expertise. The NB materiality matrix enabled the Sub-Investment Manager to derive the NB ESG Quotient rating, to compare sectors and issuers relative to their environmental and social characteristics.

The NB ESG Quotient assigned weightings to environmental, social and governance characteristics for each sector to derive the NB ESG Quotient rating for issuers. While the NB ESG Quotient rating of issuers was considered as part of the investment

process, there was no minimum NB ESG Quotient rating to be attained by an issuer prior to investment. Pursuant to this, the Sub-Investment Manager engaged with issuers with a poor NB ESG Quotient with the aim of seeking improvement in the underlying environmental and social characteristics (which make up the NB ESG Quotient) over time.

Reference Period	Rating	Range	Combined Coverage
NB ESG Quotient	59	1-100	100%
Third-Party Data	7.3	0-10	

The Reference Period data was calculated by averaging the data of the four calendar quarter ends. With regards to the NB ESG Quotient rating, a rating between 1 – 100 is used where 1 is the lowest rating and 100 is the highest rating. This Portfolio does not have a minimum NB ESG Quotient rating to be attained by an issuer prior to investment.

The average NB ESG Quotient rating is a weighted average that reflects the ESG characteristics that were considered to be the most material drivers of ESG risk and opportunity for each issuer held in the Portfolio. It is not an ESG assessment or rating of the overall Portfolio and its promotion of environmental and social characteristics, but rather an assessment of the material ESG risks and opportunities the Portfolio had exposure to.

Third-party data was also used to measure the resilience of the Portfolio's aggregate holdings to long-term, financially material, ESG risks.. The third-party data ratings range from 0-10, with 0 being the lowest rating and 10 being the highest rating.

Assessment and management of material ESG risks and opportunities is an essential element of the Portfolio's promotion of environmental and social characteristics.

2. Climate Value-at-Risk:

Over the Reference Period, Climate Value-at-Risk ("CVaR") measured the exposure to transition and physical climate risks and opportunities for corporate issuers. CVaR is a scenario analysis tool evaluating economic risks and opportunities under various degree scenarios (i.e., the amount of warming targeted) and potential regulatory environments in varying countries.

CVaR is a type of scenario analysis which is defined as the present value of aggregated future policy risk costs, technology opportunity profits, and extreme weather event costs and profits, expressed as a percentage of an issue's or portfolio's market value (i.e. potential gain or loss) according to the warming scenario targeted.

By calculating the financial risks and opportunities from climate change per issue and per scenario, CVaR provides a framework that helps quantify and understand these risks and opportunities. The CVaR metric provides insight into the climate-stressed valuation of assets based on specific degree scenarios, providing an assessment on how much an issue may stand to lose or gain from the impact of climate change.

For the Reference Period, CVaR projected that a warming climate scenario could result in a loss of 5.4% in the valuation of assets under assessment. The Reference Period data has been calculated based on the average of the four calendar quarter ends.

This analysis is intended as a broad overview of the investment team's style and investment process.

On a holistic basis, the results were evaluated by the Sub-Investment Manager's portfolio managers and analysts. The scenario analysis served as a starting point for further bottom-up analysis and identifying potential climate-related risks to address through issuer engagement.

Due to data limitations, CVaR was not applied across all issuers held by the Portfolio and was instead limited to the issuers for which the Sub-Investment Manager had sufficient and reliable data. The Portfolio had a CVaR coverage of 56% and this is an average of the four calendar quarter ends.

The analysis from CVaR is reviewed at least once a year.

3. ESG exclusion policies:

To ensure that the environmental or social characteristics promoted by the Portfolio were attained, the Portfolio did not invest in securities issued by issuers whose activities had been identified as breaching, or were not consistent with, the Neuberger Berman Controversial Weapons Policy and the Neuberger Berman Thermal Coal Involvement Policy. In addition to the application of the Neuberger Berman Thermal Coal Involvement Policy, the Sub-Investment Manager prohibited the initiation of new investment positions in securities issued by issuers that (i) derived more than 25% of their revenue from thermal coal mining; or (ii) were expanding new thermal coal power generation. From 6 December 2023 onwards, the Sub-Investment Manager also prohibited the purchase of securities of companies involved in tobacco production such as, cigars, cigarettes, e-cigarettes, smokeless tobacco, dissolvable and chewing tobacco. This also included companies that grew or processed raw tobacco leaves. Furthermore, investments held by the Portfolio did not invest in securities issued by issuers whose activities had been identified as breaching, or were not consistent with, the Neuberger Berman Global Standards Policy which excluded identified violators of (i) the United Nations Global Compact Principles ("**UNGC Principles**"), (ii) the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct ("**OECD Guidelines**"), (iii) the United Nations Guiding Principles on Business and Human Rights ("**UNGPs**") and (iv) the International Labour Standards ("**ILO Standards**").

When applying ESG exclusions to the Portfolio, the Sub-Investment Manager used third-party data to identify issuers in breach of the ESG exclusions listed above. Where possible, the Sub-Investment Manager sought to overlay this third-party data with qualitative expertise from their research analysts to establish a current and holistic picture of the issuer. The Sub-Investment Manager discussed and debated the differences between the violators identified by the third-party data and those identified as a result of their research, which drew upon data from the NB ESG Quotient and direct engagements with the issuer.

● *...and compared to previous periods?*

For the 2022 reference period, the quantitative data disclosed (for the sustainability indicators) was calculated as at 31 December 2022, being the only quarter end in the reference period that followed the entry into force of the SFDR RTS (which included the publication of the Portfolio's SFDR pre-contractual template).

The below sustainability indicators' quantitative data for the Reference Period was calculated by averaging the four calendar quarter ends.

1. NB ESG Quotient

	NB ESG Quotient Rating	Third-Party Data Rating	Combined Coverage
Range	1-100	0-10	0-100%
2022 reference period	58	6.9	96%
2023 reference period	59	7.3	100%

Year-on-year, the NB ESG Quotient rating has improved. This is due to improvements in individual issuers held in the Portfolio and due to trading activity.

Year-on-year, the third-party data rating has improved. This is due to improvements in individual issuers held in the Portfolio and due to trading activity as well as potential changes to, or differences in, the issuer third-party rating by the provider.

2. CVaR

	CVaR	Coverage
2022 reference period	-5.2%	41%
2023 reference period	-5.4%	56%

Year-on-year, the CVaR projection has moved due to improvements in data coverage for individual corporate issuers held in the Portfolio, and changes associated with corporate issuers held and trading activity within the Portfolio.

Year-on-year, CVaR Portfolio coverage has improved. This is due to improvements in data coverage for individual corporate issuers held in the Portfolio and due to trading activity.

3. Exclusions

Consistent with the previous calendar year, there were no breaches (of the above listed ESG exclusions) during the Reference Period.

	Total number of breaches
2022 reference period	0
2023 reference period	0

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the Portfolio promoted environmental and social characteristics, this Portfolio did not have a sustainable investment objective during the reference period. From 2 August 2023 onwards, the Portfolio committed to holding a minimum threshold of 10% sustainable

investments. The sustainable investments promoted the environmental and social characteristics listed above.

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to NB's sustainable investment framework. This framework included an assessment as to (i) whether the investment contributes to an environmental and/or social objective, (ii) whether the investment causes significant harm to those objectives (as described below), and (iii) an assessment of an issuers' overall good governance rating to determine whether the issuer passes a good governance assessment.

Under this sustainable investment framework, the Sub-Investment Manager utilised multiple datapoints that measured the alignment of an issuer's economic activity with environmental or social characteristics.

The Sub-Investment Manager screened issuers for controversies, significant harm and violations of minimum safeguards. If the issuers passed this screen, the Sub-Investment Manager then proceeded to measure the issuers' environmental or social economic contribution.

The Sub-Investment Manager measured this in two ways:

- Revenue alignment to the EU taxonomy (if any); and
- Revenue alignment to the Sustainable Development Goals ("SDGs")

Consideration of revenue alignment with the SDGs was limited by the availability of adequate, reliable and verifiable data coverage. To mitigate instances of poor data coverage, the Sub-Investment Manager utilised third-party data and proxy data along with internal research and qualitative analysis as part of NB's sustainable investment framework.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

From 2 August 2023 onwards, the Sub-Investment Manager applied its sustainable investment framework, which aims to identify and exclude investments that cause significant harm to environmental or social objectives. To determine whether an investment caused significant harm, the Sub-Investment Manager considered significant harm with reference to certain principal adverse impact indicators and violations of minimum safeguards.

The Sub-Investment Manager took into account the principal adverse impacts indicators (the "PAIs") outlined in the below table when determining whether the sustainable investments that the Portfolio made did not cause significant harm to any environmental or social sustainable investment objective:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAIs	
Theme	Adverse sustainability indicator
<i>Greenhouse gas emissions</i>	PAI 1 - GHG emissions PAI 2 - Carbon footprint PAI 3 - GHG intensity of investee companies PAI 4 - Exposure to companies active in the fossil fuel sector PAI 5 - Share of non-renewable energy consumption and production PAI 6 - Energy consumption intensity per high impact climate sector
<i>Biodiversity</i>	PAI 7 - Activities negatively affecting biodiversity-sensitive areas
<i>Water</i>	PAI 8 - Emissions to water
<i>Waste</i>	PAI 9 - Hazardous waste and radioactive waste ratio
<i>Social and employee matters</i>	PAI 10 - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises PAI 11 - Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises PAI 12 - Unadjusted gender pay gap PAI 13 - Board gender diversity PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Consideration of the PAIs was limited by the availability (in the Sub-Investment Manager's subjective view) of adequate, reliable and verifiable data coverage. The Sub-Investment Manager utilised third-party data and proxy data along with internal research to consider the PAIs.

The Sub-Investment Manager also considered violations of minimum safeguards and did not invest in issuers whose activities had been identified as breaching, or were not consistent with, the OECD Guidelines, UNGC Principles, ILO Standards and UNGPs, captured through the Neuberger Berman Global Standards Policy.

The combination of all of these factors generated a quantitative validation for "sustainability" which was used to ensure the sustainable investments that the Portfolio made, did not cause significant harm to any environmental or social sustainable objective.

— — —

How were the indicators for adverse impacts on sustainability factors taken into account?

Consideration of the PAIs by the Sub-Investment Manager, when determining whether the sustainable investments that the Portfolio made did not cause significant harm to any environmental or social sustainable investment objective of the Portfolio's sustainable investments, was through a combination of:

- Monitoring issuers which fell below the quantitative and qualitative tolerance thresholds set for each PAI by the Sub-Investment Manager;
- Stewardship and/or setting engagement objectives with issuers which fell below the quantitative and qualitative tolerance thresholds set for a PAI by the Sub-Investment Manager; and
- Application of the ESG exclusion policies referenced above, which included consideration of several of the PAIs.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Investment Manager did not invest in issuers whose activities had been identified as breaching, or were not consistent with, the OECD Guidelines, UNGC Principles, ILO Standards and UNGPs, captured through the Neuberger Berman Global Standards Policy.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

N/A - The Portfolio did not commit to holding Taxonomy-aligned investments.

How did this financial product consider principal adverse impacts on sustainability factors?

A selection of the principal adverse impact indicators were considered directly (e.g. through the ESG exclusion policies listed above) and/or indirectly (e.g. as part of the Sub-Investment Manager's assessment of issuers) throughout the Reference Period.

The Sub-Investment Manager considered PAIs with respect to the Portfolio in two ways:

1. All PAIs were taken into account when determining whether sustainable investments that the Portfolio made did not cause significant harm to any environmental or social sustainable investment objective as explained in *"How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"* above.
2. The Sub-Investment Manager considered the principal adverse impacts outlined in the below table on sustainability factors (the **"Product Level PAIs"**):

Product Level PAIs	
Theme	Adverse sustainability indicator
<i>Greenhouse gas emissions</i>	PAI 1 - GHG emissions PAI 2 - Carbon footprint PAI 3 - GHG intensity of investee companies PAI 4 - Exposure to companies active in the fossil fuel sector
<i>Social and employee matters</i>	PAI 10 - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises PAI 13 - Board gender diversity PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Consideration of the Product Level PAIs was limited by the availability (in the Sub-Investment Manager's subjective view) of adequate, reliable and verifiable data coverage. The Sub-Investment Manager utilised third-party data and proxy data along with internal research to consider the Product Level PAIs.

Consideration of the Product Level PAIs by the Sub-Investment Manager was through a combination of:

- Monitoring the Portfolio, in particular where it fell below the quantitative and qualitative tolerance thresholds set for each Product Level PAI by the Sub-Investment Manager;
- Stewardship and/or setting engagement objectives where the Portfolio fell below the quantitative and qualitative tolerance thresholds set for a Product Level PAI by the Sub-Investment Manager; and
- Application of the ESG exclusion policies referenced above, which included consideration of several of the Product Level PAIs.

What were the top investments of this financial product?

The Sub-Investment Manager has used the EU statistical classification of economic activities ("**NACE**") economic sector breakdown to identify the economic sectors of the Portfolio's top 15 investments.

As the list below is based on an average calculated across the four calendar quarter ends of the Reference Period, this may differ from the top investments of the Portfolio calculated as at 31 December 2023 in the "Schedule of Investments" section of the financial statements.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2023 - 31 December 2023

Largest investments	Sector	% Assets	Country
NGG FINANCE PLC RegS	K - Financial and insurance activities	7.1%	United Kingdom
ELECTRICITE DE FRANCE SA MTN RegS	D - Electricity, gas, steam, and air conditioning supply	4.9%	France
SOUTHERN ELECTRIC GENERATING CO	D - Electricity, gas, steam, and air conditioning supply	4.6%	United States
VODAFONE GROUP PLC \$60NC6 MTN RegS	J - Information and Communication	4.3%	United Kingdom
CENTRICA PLC RegS	D - Electricity, gas, steam, and air conditioning supply	4.0%	United Kingdom
ENBRIDGE INC	H - Transportation and storage	3.3%	Canada
ENBW ENERGIE BADEN WUERTTEMBER NC7 RegS	D - Electricity, gas, steam, and air conditioning supply	2.7%	Germany
VEOLIA ENVIRONNEMENT SA NC5.5 RegS	E - Water supply; sewerage; waste management and remediation activities	2.5%	France
BAYER AG RegS		2.4%	Germany
BP CAPITAL MARKETS PLC RegS	K - Financial and insurance activities	2.3%	United Kingdom
FIRMENICH INTERNATIONAL SA RegS	C - Manufacturing	2.3%	Switzerland
AUSNET SERVICES HOLDINGS PTY LTD RegS	D - Electricity, gas, steam, and air conditioning supply	2.3%	Australia
BRITISH TELECOMMUNICATIONS PLC RegS	J - Information and Communication	2.2%	United Kingdom
VOLKSWAGEN INTERNATIONAL FINANCE N RegS	K - Financial and insurance activities	2.1%	Germany
ELIA GROUP SA RegS	D - Electricity, gas, steam, and air conditioning supply	1.9%	Belgium

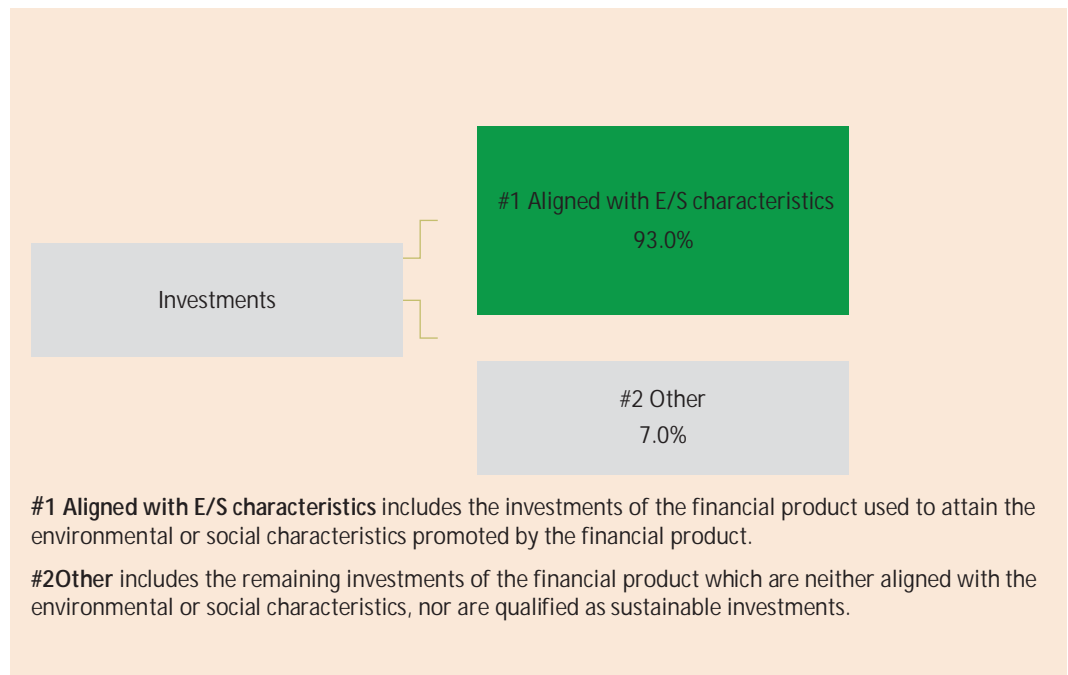

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

- The Portfolio aims to hold a minimum of 80% investments that are aligned with the environmental or social characteristics promoted by the Portfolio. During the Reference Period, the Portfolio held 93.0% investments that were aligned with the environmental or social characteristics promoted by the Portfolio.
- The Portfolio introduced a minimum sustainable investment commitment of 10% as of 2 August 2023. The sustainable investment disclosure in this periodic report has therefore been prepared based on the average of the third and fourth quarter ends of 2023 (as the only quarters following the introduction of the sustainable investment commitment). The Portfolio held 36.2% sustainable investments.
- The Portfolio aims to hold a maximum of 20% investments that are not aligned with the environmental or social characteristics promoted by the Portfolio and are not sustainable investments, and which fall into the “Other” section of the Portfolio. During the Reference Period, the Portfolio held 7.0% “Other” investments.

The Sub-Investment Manager calculated the proportion of investments aligned with the environmental and/or social characteristics promoted by the Portfolio by reference to the proportion of issuers in the Portfolio: i) that held either an NB ESG Quotient rating or a third-party equivalent ESG rating that was used as part of the portfolio construction and investment management process of the Portfolio; and/or ii) with whom the Sub-Investment Manager had engaged directly. This calculation was based on a mark-to-market assessment of the Portfolio and may be based on incomplete or inaccurate issuer or third-party data. The Reference Period for the below data is an average of the four 2023 quarter ends with the exception of the sustainable investment commitment, which for this reference period only was prepared based on the Portfolio’s holdings as of the third and fourth quarter ends of 2023.

The Sustainable Investment percentage as of an average of the third and fourth quarter ends of 2023 is 36.2%, which contained 35.7% sustainable investments with an environmental objective not aligned with the EU Taxonomy and 0.5% socially sustainable investments. The Portfolio did not commit to holding Taxonomy-aligned investments.

In which economic sectors were the investments made?

The Reference Period for the below data is an average of the four calendar quarter ends.

Economic Sector – NACE	% Assets
B - Mining and quarrying	0.0%
C - Manufacturing	14.2%
D - Electricity, gas, steam and air conditioning supply	36.1%
E - Water supply; sewerage; waste management and remediation activities	5.5%
G - Wholesale and retail trade; repair of motor vehicles and motorcycles	0.0%
H - Transporting and storage	3.8%
I - Accommodation and food service activities	0.0%
J - Information and communication	14.8%
K - Financial and insurance activities	22.5%
L - Real estate activities	3.0%
M - Professional, scientific and technical activities	0.0%
N - Administrative and support service activities	0.0%
O - Public administration and defence; compulsory social security*	0.0%
Q - Human health and social work activities	0.0%
U - Activities of extraterritorial organisations and bodies	0.0%
None	0.0%

O - Public administration and defence; compulsory social security is classified by Barclays Industry as either: Sovereign, Treasury, Foreign Local Government, Supranational, Foreign Agencies

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The analysis and disclosure requirements introduced by the EU Taxonomy are very detailed and compliance with them requires the availability of multiple, specific data points in respect of each investment which the Portfolio made. The Sub-Investment Manager cannot confirm that the Portfolio invested in any investments that qualified as environmentally sustainable for the purposes of the EU Taxonomy. Disclosures and reporting on Taxonomy alignment will develop as the EU framework evolves and data is made available by issuers. The Sub-Investment Manager will keep the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy under active review as data availability and quality improves.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

- **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A – the Portfolio did not commit to holding Taxonomy-aligned investments.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A – the Portfolio did not commit to holding Taxonomy-aligned investments in this or the previous reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Portfolio introduced a minimum sustainable investment commitment of 10% as of 2 August 2023. The sustainable investment disclosure in this periodic report template has therefore been prepared based on the average of the third and fourth quarter ends of 2023 (as the only quarter ends following the introduction of the sustainable investment commitment). The Portfolio held 35.7% sustainable investments with an environmental objective not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The Portfolio introduced a minimum sustainable investment commitment of 10% as of 2 August 2023. The sustainable investment disclosure in this periodic report template has therefore been prepared based on the average of the third and fourth quarter ends of 2023 (as the only quarter ends following the introduction of the sustainable investment commitment). The Portfolio held 0.5% socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” included the remaining investments of the Portfolio (including but not limited to any derivatives or any security collateralized by a pool of similar assets or receivables listed in the Supplement for the Portfolio) which were neither aligned with the environmental or social characteristics, nor qualified as sustainable investments.

The “Other” section in the Portfolio was held for a number of reasons that the Sub-Investment Manager felt was beneficial to the Portfolio, such as, but not limited to, achieving risk management, and/or to ensure adequate liquidity, hedging and collateral cover.

As noted above, the Portfolio was invested in compliance with ESG exclusion policies, on a continuous basis. This ensured that investments made by the Portfolio sought to align with international environmental and social safeguards such as the UNGC Principles, the UNGPs, the OECD Guidelines and the ILO Standards.

The Sub-Investment Manager believes that these policies prevented investment in issuers that most egregiously violated environmental and/or social minimum standards and ensured that the Portfolio could successfully promote its environmental and social characteristics.

The above steps ensured that robust environmental and social safeguards were in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio was managed in-line with the investment objective and the following actions were taken:

I. Integrating proprietary ESG analysis:

The Sub-Investment Manager applied a high standard of due diligence in the selection and ongoing monitoring of investments made by the Portfolio to ensure the integration of Sustainability Risks (as defined in the SFDR) and ESG. The Sub-Investment Manager views ESG integration as the practice of incorporating material ESG risks and considerations (as a binding element) into the investment decision-making process. ESG integration sits alongside other financial considerations and should enrich the Sub-Investment Manager's investment teams' analysis of companies by providing a toolkit for identifying material ESG risks and opportunities that inform investment decisions. The Sub-Investment Manager believes that material ESG factors are an important driver of long-term investment returns from both an opportunity and a risk-mitigation perspective. Hence, the Sub-Investment Manager's ESG integration approach considers ESG opportunities as well as Sustainability Risks.

Before making investments, the investment team conducted due diligence that it deemed reasonable and appropriate based on the facts and circumstances applicable to each investment. The investment team assessed the investment's alignment with the environmental and social characteristics promoted by the Portfolio using (as appropriate) the NB ESG Quotient and exclusionary screens (to identify potential non-compliance with the above listed ESG exclusions). The due diligence was supported by third-party data sources.

The NB ESG Quotient rating for issuers was utilised to help to better identify risks and opportunities in the overall credit and value assessment. The NB ESG Quotient was a key component of the internal credit ratings and helped to identify business risks (including ESG risks), which would cause deterioration in an issuer's credit profile. Internal credit ratings can be notched up or down based on the NB ESG Quotient rating, and this was monitored by the Sub-Investment Manager as an important component of the investment process for the Portfolio.

By integrating the investment team's proprietary ESG analysis (the NB ESG Quotient) into their internal credit ratings, there was a direct link between their analysis of the Portfolio's environmental and social characteristics and the Portfolio's portfolio construction activities.

II. Engagement:

The Sub-Investment Manager engaged with issuers through a robust ESG engagement program. They sought to prioritise constructive engagements and sought to engage on topics (including ESG topics) they determined to be financially material for the relevant issuer. The Sub-Investment Manager viewed this engagement with issuers, as an important part of its investment process. Progress on engagement was tracked centrally in the Sub-Investment Manager's engagement tracker.

III. ESG sectoral exclusion policies:

To ensure that the environmental and social characteristics promoted by the Portfolio were attained, the Portfolio applied the ESG exclusion policies referenced above, which placed limitations on the investable universe.

How did this financial product perform compared to the reference benchmark?

N/A – The Portfolio has not designated a reference benchmark.

- *How does the reference benchmark differ from a broad market index?*
N/A
- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*
N/A
- *How did this financial product perform compared with the reference benchmark?*
N/A
- *How did this financial product perform compared with the broad market index?*
N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Neuberger Berman Developed Market FMP – 2027 (the “Portfolio”)

Legal entity identifier: 549300GF7EOMWXAHXG64

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<div><div><div></div><div></div><div></div></div> Yes</div>	<div><div><div></div><div></div><div></div></div> No</div>

The most recent SFDR Pre-Contractual Template of the Portfolio can be found [here](#).

The Portfolio launched on 31 July 2023 and this periodic report template has therefore been prepared based on the average of the third and fourth quarter ends of 2023 (the “Reference Period”).

This SFDR Periodic Report template reports on several quantitative ESG data metrics. To assist the reader in their review and assessment of such ESG data metrics, we also have disclosed the Portfolio’s data coverage for these ESG data metrics. The intention is that disclosure of the data coverage (of the ESG metrics during the Reference Period) will allow the reader to interpret the ESG data metrics’ ability to represent the Portfolio with any limitations to such data coverage in mind.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Given the Portfolio's investment objective, investment term and maturity date of 31 July 2027 (the "**Maturity Date**"), the Portfolio's turnover was limited. Therefore, while the Portfolio will promote environmental and social characteristics throughout its lifetime, the promotion of environmental and social characteristics was focused on the portfolio construction phase.

The following environmental and social characteristics were promoted by the Portfolio:

- **Environmental Characteristics:** biodiversity & responsible land usage; carbon footprint reduction; environmental management; greenhouse gas ("**GHG**") emissions; opportunities in clean technologies; opportunities in green building; opportunities in renewable energy; responsible raw material sourcing; responsible & transparent underwriting; toxic emissions & waste; waste management; and water management.
- **Social Characteristics:** access to finance; access to medicines; affordability & fair pricing; business ethics & transparency of government relations; chemical safety; community relations; controversial sourcing; corporate behaviour; drug safety & side effects management; ethical marketing & practices; health & nutrition; health & safety; human capital development; labour management; data privacy & security; product safety & quality; and litigation & related controversy.

Performance in relation to these environmental and social characteristics was measured through the NB ESG Quotient, and is reported, in aggregate, below.

How did the sustainability indicators perform?

As part of the investment process, the Sub-Investment Manager considered a variety of sustainability indicators to measure the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators are listed below:

1. The NB ESG Quotient:

The proprietary Neuberger Berman ESG rating system (the "**NB ESG Quotient**"), is built around the concept of sector specific ESG risk and opportunity, and produced an overall ESG rating for issuers by assessing them against certain ESG metrics.

Foundational to the NB ESG Quotient is the proprietary Neuberger Berman ("**NB**") materiality matrix, which focuses on the ESG characteristics that were considered to be the most likely to be the material drivers of ESG risk and opportunity for each sector. Each sector criteria is constructed using third-party and internally derived ESG data and supplemented with internal qualitative analysis, leveraging the Portfolio's analyst team's significant sector expertise. The NB materiality matrix enabled the Sub-Investment Manager to derive the NB ESG Quotient rating, to compare sectors and issuers relative to their environmental and social characteristics.

The NB ESG Quotient assigned weightings to environmental, social and governance characteristics for each sector to derive the NB ESG Quotient rating for issuers. While the NB ESG Quotient rating of issuers was considered as part of the investment process, there was no minimum NB ESG Quotient rating to be attained by an issuer prior to investment. Issuers with a favourable and/or an improving NB ESG Quotient rating had a higher chance of being included in the Portfolio. Issuers with a poor NB ESG Quotient rating, especially where a poor NB ESG Quotient rating is not being addressed by an issuer, were more likely to be removed from the investment universe or were divested from the Portfolio. In addition, the Sub-Investment Manager sought to prioritise constructive engagements with issuers that had a poor NB ESG Quotient rating, in order to assess whether concerns were being addressed adequately.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Reference Period	Rating	Range	Combined Coverage
NB ESG Quotient	60	1-100	100%
Third-Party Data	6.4	0-10	

The Reference Period data was calculated by averaging the data of the four calendar quarter ends. With regards to the NB ESG Quotient rating, a rating between 1 – 100 is used where 1 is the lowest rating and 100 is the highest rating. This Portfolio does not have a minimum NB ESG Quotient rating to be attained by an issuer prior to investment.

The average NB ESG Quotient rating is a weighted average that reflects the ESG characteristics that were considered to be the most material drivers of ESG risk and opportunity for each issuer held in the Portfolio. It is not an ESG assessment or rating of the overall Portfolio and its promotion of environmental and social characteristics, but rather an assessment of the material ESG risks and opportunities the Portfolio had exposure to.

Third-party data was also used to measure the resilience of the Portfolio's aggregate holdings to long-term, financially material, ESG risks. The third-party data ratings range from 0-10, with 0 being the lowest rating and 10 being the highest rating.

Assessment and management of material ESG risks and opportunities is an essential element of the Portfolio's promotion of environmental and social characteristics.

2. Climate Value-at-Risk:

Over the Reference Period, Climate Value-at-Risk (“**CVaR**”) measured the exposure to transition and physical climate risks and opportunities for corporate issuers. CVaR is a scenario analysis tool evaluating economic risks and opportunities under various degree scenarios (i.e., the amount of warming targeted) and potential regulatory environments in varying countries.

CVaR is a type of scenario analysis which is defined as the present value of aggregated future policy risk costs, technology opportunity profits, and extreme weather event costs and profits, expressed as a percentage of an issue's or portfolio's market value (i.e. potential gain or loss) according to the warming scenario targeted.

By calculating the financial risks and opportunities from climate change per issue and per scenario, CVaR provides a framework that helps quantify and understand these risks and opportunities. The CVaR metric provides insight into the climate-stressed valuation of assets based on specific degree scenarios, providing an assessment on how much an issue may stand to lose or gain from the impact of climate change.

For the Reference Period, CVaR projected that a warming climate scenario could result in a depreciation of 10.1% in the valuation of assets under assessment. The Reference Period data was calculated by averaging the data of the four calendar quarter ends.

This analysis is intended as a broad overview of the investment team's style and investment process.

On a holistic basis, the results were evaluated by the Sub-Investment Manager's portfolio managers and analysts. The scenario analysis served as a starting point for further bottom-up analysis and identifying potential climate-related risks to address through issuer engagement.

Due to data limitations, CVaR was not applied across all issuers held by the Portfolio and was instead limited to the issuers for which the Sub-Investment Manager had

sufficient and reliable data. The Portfolio had a CVaR coverage of 83% and this is an average of the CVaR coverage across four calendar quarter ends.

The analysis from CVaR is reviewed at least once a year.

3. ESG exclusion policies:

To ensure that the environmental or social characteristics promoted by the Portfolio were attained, the Portfolio did not invest in securities issued by issuers whose activities had been identified as breaching, or were not consistent with, the Neuberger Berman Controversial Weapons Policy and the Neuberger Berman Thermal Coal Involvement Policy. In addition to the application of the Neuberger Berman Thermal Coal Involvement Policy, the Sub-Investment Manager prohibited the initiation of new investment positions in securities issued by issuers that (i) derived more than 25% of their revenue from thermal coal mining; or (ii) were expanding new thermal coal power generation. Furthermore, investments held by the Portfolio did not invest in securities issued by issuers whose activities had been identified as breaching, or were not consistent with, the Neuberger Berman Global Standards Policy which excluded identified violators of (i) the United Nations Global Compact Principles ("**UNGC Principles**"), (ii) the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct ("**OECD Guidelines**"), (iii) the United Nations Guiding Principles on Business and Human Rights ("**UNGPs**") and (iv) the International Labour Standards ("**ILO Standards**").

When applying ESG exclusions to the Portfolio, the Sub-Investment Manager used third-party data to identify issuers in breach of the ESG exclusions listed above. Where possible, the Sub-Investment Manager sought to overlay this third-party data with qualitative expertise from their research analysts to establish a current and holistic picture of the issuer. The Sub-Investment Manager discussed and debated the differences between the violators identified by the third-party data and those identified as a result of their research, which drew upon data from the NB ESG Quotient and direct engagements with the issuer.

Given the Portfolio sought to provide a yield over a specific term, which ends on the Maturity Date, the Portfolio's turnover was limited.

● *...and compared to previous periods?*

N/A – this is the first reference period.

● *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

N/A – the Portfolio did not commit to holding sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A – the Portfolio did not commit to holding sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A – the Portfolio did not commit to holding sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio did not commit to holding sustainable investments, however, the Sub-Investment Manager did not invest in issuers whose activities had been identified as breaching, or were not consistent with, the OECD Guidelines, UNGC Principles, ILO Standards and UNGPs, captured through the Neuberger Berman Global Standards Policy.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

N/A - The Portfolio did not commit to holding Taxonomy-aligned investments.

How did this financial product consider principal adverse impacts on sustainability factors?

A selection of the principal adverse impact indicators were considered directly (e.g. through the ESG exclusion policies listed above) and/or indirectly (e.g. as part of the Sub-Investment Manager's assessment of issuers) throughout the Reference Period.

The Sub-Investment Manager considered the principal adverse impacts outlined in the below table on sustainability factors (the “**Product Level PAIs**”):

Product Level PAIs	
Theme	Adverse sustainability indicator
<i>Greenhouse gas emissions</i>	PAI 1 - GHG emissions PAI 2 - Carbon footprint PAI 3 - GHG intensity of investee companies PAI 4 - Exposure to companies active in the fossil fuel sector
<i>Social and employee matters</i>	PAI 10 - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises PAI 13 - Board gender diversity PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Consideration of the Product Level PAIs was limited by the availability (in the Sub-Investment Manager's subjective view) of adequate, reliable and verifiable data coverage. The Sub-Investment Manager utilised third-party data and proxy data along with internal research to consider the Product Level PAIs.

Consideration of the Product Level PAIs by the Sub-Investment Manager was through a combination of:

- Monitoring the Portfolio, in particular where it fell below the quantitative and qualitative tolerance thresholds set for each Product Level PAI by the Sub-Investment Manager;
- Stewardship and/or setting engagement objectives where the Portfolio fell below the quantitative and qualitative tolerance thresholds set for a Product Level PAI by the Sub-Investment Manager; and
- Application of the ESG exclusion policies referenced above, which included consideration of several of the Product Level PAIs.

What were the top investments of this financial product?

The Sub-Investment Manager has used the EU statistical classification of economic activities (“NACE”) economic sector breakdown to identify the economic sectors of the Portfolio’s top 15 investments.

As the list below is based on an average calculated across the four calendar quarter ends of the Reference Period, this may differ from the top investments of the Portfolio calculated as at 31 December 2023 in the “Schedule of Investments” section of the financial statements.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2023 - 31 December 2023

Largest investments	Sector	% Assets	Country
FORD MOTOR CREDIT COMPANY LLC	K - Financial and insurance activities	2.5%	United States
AIR LEASE CORPORATION	N - Administrative and support service activities	2.4%	United States
SANTANDER UK GROUP HOLDINGS PLC	K - Financial and insurance activities	2.4%	United Kingdom
AERCAP IRELAND CAPITAL DAC / AERCA	K - Financial and insurance activities	2.4%	Ireland
LLOYDS BANKING GROUP PLC	K - Financial and insurance activities	2.4%	United Kingdom
MORGAN STANLEY MTN	K - Financial and insurance activities	2.3%	United States
HSBC HOLDINGS PLC	K - Financial and insurance activities	2.3%	United Kingdom
GENERAL MOTORS FINANCIAL CO INC	K - Financial and insurance activities	2.3%	United States
PRIME SECURITY SERVICES BORROWER L RegS	N - Administrative and support service activities	2.3%	United States
BPCE SA MTN 144A	K - Financial and insurance activities	2.2%	France
CAPITAL ONE FINANCIAL CORPORATION	K - Financial and insurance activities	2.2%	United States
MICRON TECHNOLOGY INC	C - Manufacturing	2.2%	United States
IMPERIAL BRANDS FINANCE PLC 144A	K - Financial and insurance activities	2.2%	United Kingdom
BNP PARIBAS 144A	K - Financial and insurance activities	2.1%	France
STELLANTIS FINANCE US INC 144A	C - Manufacturing	2.0%	United States

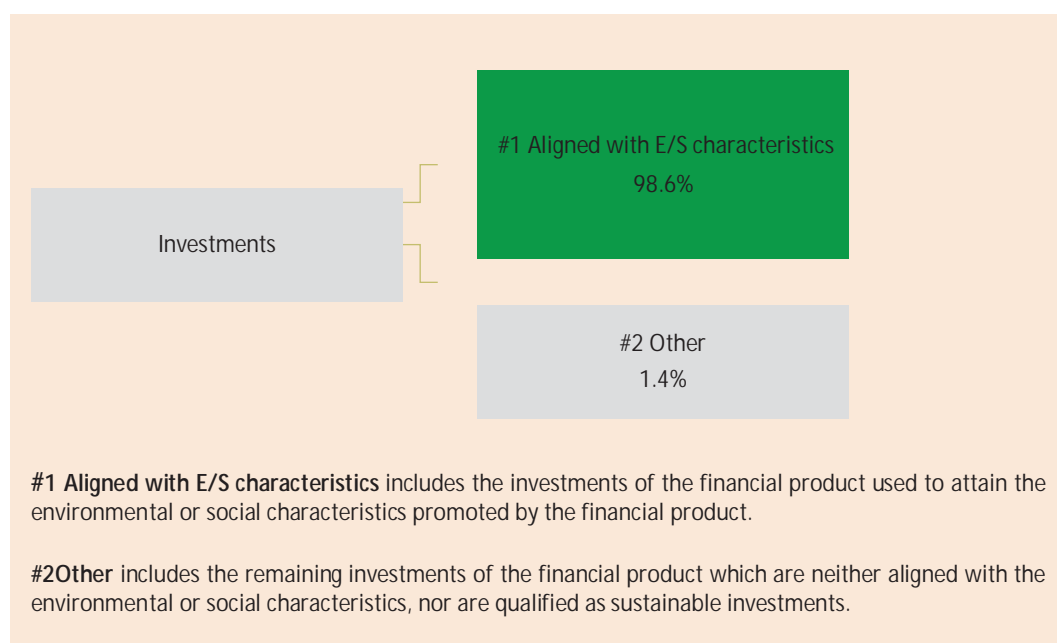

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

- The Portfolio aims to hold a minimum of 80% investments that are aligned with the environmental or social characteristics promoted by the Portfolio. During the Reference Period, the Portfolio held 98.6% investments that were aligned with the environmental or social characteristics promoted by the Portfolio.
- The Portfolio aims to hold a maximum of 20% investments that are not aligned with the environmental or social characteristics promoted by the Portfolio and are not sustainable investments, and which fall into the “Other” section of the Portfolio. During the Reference Period, the Portfolio held 1.4% “Other” investments.

The Sub-Investment Manager calculated the proportion of investments aligned with the environmental and/or social characteristics promoted by the Portfolio by reference to the proportion of issuers in the Portfolio: i) that held either an NB ESG Quotient rating or a third-party equivalent ESG rating that was used as part of the portfolio construction and investment management process of the Portfolio; and/or ii) with whom the Sub-Investment Manager had engaged directly. This calculation was based on a mark-to-market assessment of the Portfolio and may rely on incomplete or inaccurate issuer or third-party data. The Reference Period data was calculated by averaging the data of the four calendar quarter ends.

● *In which economic sectors were the investments made?*

The Reference Period data was calculated by averaging the data of the four calendar quarter ends.

Economic Sector – NACE	% Assets
B - Mining and quarrying	3.1%
C - Manufacturing	15.6%
D - Electricity, gas, steam and air conditioning supply	4.5%
G - Wholesale and retail trade; repair of motor vehicles and motorcycles	0.3%
H - Transporting and storage	11.0%
J - Information and communication	10.2%
K - Financial and insurance activities	43.0%
L - Real estate activities	2.1%
N - Administrative and support service activities	7.1%
Q - Human health and social work activities	2.0%
R - Arts, entertainment, and recreation	1.2%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

- **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The analysis and disclosure requirements introduced by the EU Taxonomy are very detailed and compliance with them requires the availability of multiple, specific data points in respect of each investment which the Portfolio made. The Sub-Investment Manager cannot confirm that the Portfolio invested in any investments that qualified as environmentally sustainable for the purposes of the EU Taxonomy. Disclosures and reporting on Taxonomy alignment will develop as the EU framework evolves and data is made available by issuers. The Sub-Investment Manager will keep the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy under active review as data availability and quality improves.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

N/A – the Portfolio did not commit to holding Taxonomy-aligned investments.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

N/A – the Portfolio did not commit to holding Taxonomy-aligned investments in this or the previous reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A – the Portfolio did not commit to holding sustainable investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A – the Portfolio did not commit to holding sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” included the remaining investments of the Portfolio (including but not limited to any derivatives or any security collateralized by a pool of similar assets or receivables listed in the Supplement for the Portfolio) which were neither aligned with the environmental or social characteristics, nor qualified as sustainable investments.

The “Other” section in the Portfolio was held for a number of reasons that the Sub-Investment Manager felt was beneficial to the Portfolio, such as, but not limited to, achieving risk management, and/or to ensure adequate liquidity, hedging and collateral cover.

As noted above, the Portfolio was invested in compliance with ESG exclusion policies, on a continuous basis. This ensured that investments made by the Portfolio sought to align with international environmental and social safeguards such as the UNGC Principles, the UNGPs, the OECD Guidelines and the ILO Standards.

The Sub-Investment Manager believes that these policies prevented investment in issuers that most egregiously violated environmental and/or social minimum standards and ensured that the Portfolio could successfully promote its environmental and social characteristics.

The above steps ensured that robust environmental and social safeguards were in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Given the Portfolio's investment objective, investment term and Maturity Date, while the Portfolio promotes environmental and social characteristics throughout its lifetime, the promotion of environmental and social characteristics was focused on the portfolio construction phase as the intention of the Sub-Investment Manager was to maintain low turnover.

The Portfolio was managed in-line with the investment objective and the following actions were taken:

I. Integrating proprietary ESG analysis:

The Sub-Investment Manager applied a high standard of due diligence in the selection and ongoing monitoring of investments made by the Portfolio to ensure the integration of Sustainability Risks (as defined in the SFDR) and ESG. The Sub-Investment Manager views ESG integration as the practice of incorporating material ESG risks and considerations (as a binding element) into the investment decision-making process. ESG integration sits alongside other financial considerations and should enrich the Sub-Investment Manager's investment teams' analysis of issuers by providing a toolkit for identifying material ESG risks and opportunities that inform investment decisions. The Sub-Investment Manager believes that material ESG factors are an important driver of long-term investment returns from both an opportunity and a risk-mitigation perspective. Hence, the Sub-Investment Manager's ESG integration approach considers ESG opportunities as well as Sustainability Risks.

Before making investments, the investment team conducted due diligence that it deemed reasonable and appropriate based on the facts and circumstances applicable to each investment. The investment team assessed the investment's alignment with the environmental and social characteristics promoted by the Portfolio using (as appropriate) the NB ESG Quotient and exclusionary screens (to identify potential non-compliance with the above listed ESG exclusions). The due diligence was supported by third-party data sources.

The NB ESG Quotient rating for issuers was utilised to help to better identify risks and opportunities in the overall credit and value assessment. The NB ESG Quotient was a key component of the internal credit ratings and helped to identify business risks (including ESG risks), which would cause deterioration in an issuer's credit profile. Internal credit ratings can be notched up or down based on the NB ESG Quotient rating, and this was monitored by the Sub-Investment Manager as an important component of the investment process for the Portfolio.

By integrating the investment team's proprietary ESG analysis (the NB ESG Quotient) into their internal credit ratings, there was a direct link between their analysis of the Portfolio's environmental and social characteristics and the portfolio construction activities.

II. Engagement:

The Sub-Investment Manager engaged with issuers through a robust ESG engagement program. They sought to prioritise constructive engagements and sought to engage on topics (including ESG topics) they determined to be financially material for the relevant issuer. The Sub-Investment Manager viewed this engagement with issuers, as an important part of its investment process as it allowed the Sub-Investment Manager to ensure that its initial assessment of the issuer (at the point of inception) remained accurate and informed the issuer's ongoing NB ESG Quotient rating. Progress on engagement was tracked centrally in the Sub-Investment Manager's engagement tracker.

III. ESG sectoral exclusion policies:

To ensure that the environmental and social characteristics promoted by the Portfolio were attained, the Portfolio applied the ESG exclusion policies referenced above, which placed limitations on the investable universe.

How did this financial product perform compared to the reference benchmark?

N/A – The Portfolio does not use a benchmark.

- *How does the reference benchmark differ from a broad market index?*
N/A
- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*
N/A
- *How did this financial product perform compared with the reference benchmark?*
N/A
- *How did this financial product perform compared with the broad market index?*
N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Neuberger Berman Emerging Market Debt – Hard Currency Fund (the “Portfolio”)

Legal entity identifier: 549300M7KHGG3BTZ3979

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<div><div><div></div><div></div><div></div></div> Yes</div>	<div><div><div></div><div></div><div></div></div> No</div>

The most recent SFDR Pre-Contractual Template of the Portfolio can be found [here](#).

This SFDR Periodic Report template reports on the 2023 calendar year (the “Reference Period”). Unless otherwise stated in the relevant disclosure, all Reference Period data has been calculated based on the average of the four calendar quarter ends.

This SFDR Periodic Report template reports on several quantitative ESG data metrics. To assist the reader in their review and assessment of such ESG data metrics, we have disclosed the Portfolio’s data coverage for these ESG data metrics. The intention is that disclosure of the data coverage (of the ESG metrics during the Reference Period) will allow the reader to interpret the ESG data metrics’ ability to represent the Portfolio with any limitations to such data coverage in mind.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and social characteristics were promoted by the Portfolio for sovereign issuers:

- **Environmental Characteristics:** sovereign energy efficiency; climate change adaptation; deforestation; greenhouse gas (“GHG”) emissions; air and household pollution; and unsafe sanitation.
- **Social Characteristics:** progress towards UN Sustainable Development Goals (“SDGs”); health and education levels; regulatory quality; political stability and freedoms; gender equality; and research and development.

The following environmental and social characteristics were promoted by the Portfolio for corporate issuers:

- **Environmental Characteristics:** biodiversity and land usage; carbon emissions; opportunities in clean technologies; water stress; toxic emissions & waste; financing environmental impact; product carbon footprint; environmental policy; environmental management system; GHG reduction programme; green procurement policy; and non-GHG air emissions programmes.
- **Social Characteristics:** health & safety; human capital development; labour management; privacy & data security; product safety & quality; financial products safety; discrimination policy; community involvement programmes; diversity programmes and human rights policy.

Performance in relation to these environmental and social characteristics was measured through the NB ESG Quotient, and is reported, in aggregate, below.

How did the sustainability indicators perform?

As part of the investment process, the Manager and the Sub-Investment Manager considered a variety of sustainability indicators to measure the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators are listed below:

1. The NB ESG Quotient:

The proprietary Neuberger Berman ESG rating system (the “NB ESG Quotient”), is built around the concept of sector specific ESG risk and opportunity, and produced an overall ESG rating for issuers by assessing them against certain ESG metrics.

The NB ESG Quotient assigned weightings to environmental, social and governance characteristics for each sector to derive the NB ESG Quotient rating for issuers. While the NB ESG Quotient rating of issuers was considered as part of the investment process, there was no minimum NB ESG Quotient rating to be attained by an issuer prior to investment. The Manager and the Sub-Investment Manager used the NB ESG Quotient to promote the environmental and social characteristics listed by prioritising investment in securities issued by issuers with a relatively favourable and/or an improving NB ESG Quotient rating. Pursuant to this, the Manager and the Sub-Investment Manager limited exposure to issuers with the poorest NB ESG Quotient rating unless there was a reasonable expectation that the NB ESG Quotient rating would improve over time.

The Reference Period data was calculated by averaging the data of the four calendar quarter ends.

Reference Period	Rating	Range	Combined Coverage
NB ESG Quotient	52	1-100	97%
Third-Party Data	3.9	0-10	

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With regards to the NB ESG Quotient rating, a rating between 1 – 100 is used where 1 is the lowest rating and 100 is the highest rating. This Portfolio does not have a minimum NB ESG Quotient rating to be attained by an issuer prior to investment.

The average NB ESG Quotient rating is a weighted average that reflects the ESG characteristics that were considered to be the most material drivers of ESG risk and opportunity for each issuer held in the Portfolio. It is not an ESG assessment or rating of the overall Portfolio and its promotion of environmental and social characteristics, but rather an assessment of the material ESG risks and opportunities the Portfolio had exposure to.

Third-party data was also used to measure the resilience of the Portfolio's aggregate holdings to long-term, financially material, ESG risks. The third-party data ratings range from 0-10, with 0 being the lowest rating and 10 being the highest rating.

Assessment and management of material ESG risks and opportunities is an essential element of the Portfolio's promotion of environmental and social characteristics.

2. ESG exclusion policies:

To ensure that the environmental or social characteristics promoted by the Portfolio were attained, the Portfolio did not invest in securities issued by issuers whose activities had been identified as breaching, or were not consistent with, the Neuberger Berman Controversial Weapons Policy and the Neuberger Berman Thermal Coal Involvement Policy. The Portfolio is phasing out its exposure to thermal coal and prohibited investment in securities issued by issuers that derived more than 10% of revenue from thermal coal mining or were expanding new thermal coal power generation, as determined by internal screens. The Portfolio also prohibited investments in issuers in the power generation industry that used thermal coal as an energy source for more than 95% of their installed power generation capacity, were expanding into new thermal coal power generation, or whose expansionary capital expenditure budgets did not include a minimum threshold for non-coal investments, as determined by internal screens. The investments held by the Portfolio did not invest in securities issued by issuers whose activities had been identified as breaching, or were not consistent with, the Neuberger Berman Global Standards Policy which excluded identified violators of (i) the United Nations Global Compact Principles ("**UNGC Principles**"), (ii) the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct ("**OECD Guidelines**"), (iii) the United Nations Guiding Principles on Business and Human Rights ("**UNGPs**") and (iv) the International Labour Standards ("**ILO Standards**"). In addition, the Portfolio excluded securities issued by issuers which derived 5% or more of revenues from the manufacture of tobacco products. Issuers which were involved in direct child labour and issuers that derived more than 10% of revenue from oil sands extraction were also excluded.

When applying ESG exclusions to the Portfolio, the Manager and the Sub-Investment Manager used third-party data to identify issuers in breach of the ESG exclusions listed above. Where possible, the Manager and the Sub-Investment Manager sought to overlay this third-party data with qualitative expertise from their research analysts to establish a current and holistic picture of the issuer. The Manager and the Sub-Investment Manager discussed and debated the differences between the violators identified by the third-party data and those identified as a result of their research, which drew upon data from the NB ESG Quotient and direct engagements with the issuer.

...and compared to previous periods?

For the 2022 reference period, the quantitative data disclosed (for the sustainability indicators) was calculated as at 31 December 2022, being the only quarter end in the reference period that followed the entry into force of the SFDR RTS (which included the publication of the Portfolio's SFDR pre-contractual disclosure template).

The below sustainability indicators' quantitative data for the Reference Period was calculated by averaging the four calendar quarter ends.

1. NB ESG Quotient

	NB ESG Quotient Rating	Third-Party Data Rating	Combined Coverage
Range	1-100	0-10	0%-100%
2022 reference period	51	3.8	96%
2023 reference period	52	3.9	97%

Year-on-year, the NB ESG Quotient rating has improved. This is due to improvements in individual issuers held in the Portfolio and due to trading activity.

Year-on-year, the third-party data rating has improved. This is due to improvements in individual issuers held in the Portfolio and due to trading activity as well as potential changes to, or differences in, the issuer's third-party rating by the provider.

2. Exclusions

Consistent with the previous calendar year, there were no breaches (of the above listed ESG exclusions) during the Reference Period.

	Total number of breaches
2022 reference period	0
2023 reference period	0

- *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

N/A - the Portfolio did not commit to holding sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A - the Portfolio did not commit to holding sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A - the Portfolio did not commit to holding sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio did not commit to holding sustainable investments, however the Manager and the Sub-Investment Manager did not invest in issuers whose activities had been identified as breaching, or were not consistent with, the OECD Guidelines, UNGC Principles, ILO Standards and UNGPs, captured through the Neuberger Berman Global Standards Policy.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

N/A – the Portfolio did not commit to holding Taxonomy-aligned investments.

How did this financial product consider principal adverse impacts on sustainability factors?

A selection of the principal adverse impact indicators were considered directly (e.g. through the ESG exclusion policies listed above) and/or indirectly (e.g. as part of the Manager's and the Sub-Investment Manager's assessment of issuers) throughout the Reference Period.

The Manager and the Sub-Investment Manager considered the principal adverse impacts outlined in Part 1 of the below table for corporate issuers (the “**Corporate Issuer PAIs**”) and considered the principal adverse impacts outlined in Part 2 of the below table for sovereign issuers (the “**Sovereign PAIs**”) on sustainability factors (together the “**Product Level PAIs**”):

Part 1 – Corporate Issuer PAIs	
Theme	Adverse sustainability indicator
<i>Greenhouse gas emissions</i>	PAI 1 - GHG emissions PAI 2 - Carbon footprint PAI 3 - GHG intensity of investee companies PAI 4 - Exposure to companies active in the fossil fuel sector
<i>Social and employee matters</i>	PAI 10 - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises PAI 13 - Board gender diversity PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
Part 2 – Sovereign PAIs	
<i>Environmental</i>	PAI 15 - GHG intensity
<i>Social</i>	PAI 16 - Investee countries subject to social violations

Consideration of the Product Level PAIs was limited by the availability (in the Manager's and the Sub-Investment Manager's subjective view) of adequate, reliable and verifiable data coverage. The Manager and the Sub-Investment Manager utilised third party data and proxy data along with internal research to consider the Product Level PAIs.

Consideration of the Product Level PAIs by the Manager and the Sub-Investment Manager was through a combination of:

- Monitoring the Portfolio, in particular where it fell below the quantitative and qualitative tolerance thresholds set for each Product Level PAI by the Manager and the Sub-Investment Manager;
- Stewardship and/or setting engagement objectives where the Portfolio fell below the quantitative and qualitative tolerance thresholds set for a Product Level PAI; and
- Application of the ESG exclusion policies referenced above, which included consideration of several of the Product Level PAIs.

What were the top investments of this financial product?

The Manager and the Sub-Investment Manager have used the EU statistical classification of economic activities ("**NACE**") economic sector breakdown to identify the economic sectors of the Portfolio's top 15 investments.

As the list below is based on an average calculated across the four calendar quarter ends of the Reference Period, this may differ from the top investments of the Portfolio calculated as at 31 December 2023 in the "Schedule of Investments" section of the financial statements.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2023 - 31 December 2023

Largest investments	Sector	% Assets	Country
SOUTHERN GAS CORRIDOR CJSC RegS	H - Transporting and storage	2.2%	Azerbaijan
ARGENTINA REPUBLIC OF GOVERNMENT	O - Public administration and defence; compulsory social security*	2.0%	Argentina
PETROLEOS MEXICANOS	B - Mining and quarrying	1.7%	Mexico
MEXICO (UNITED MEXICAN STATES)	O - Public administration and defence; compulsory social security*	1.6%	Mexico
EL SALVADOR REPUBLIC OF (GOVERNMENT) RegS	O - Public administration and defence; compulsory social security*	1.4%	El Salvador
OMAN GOVERNMENT BOND MTN RegS	O - Public administration and defence; compulsory social security*	1.4%	Oman
ANGOLA GOVERNMENT BOND RegS	O - Public administration and defence; compulsory social security*	1.3%	Angola
ECUADOR REPUBLIC OF (GOVERNMENT) RegS	O - Public administration and defence; compulsory social security*	1.3%	Ecuador
DOMINICAN REPUBLIC (GOVERNMENT) RegS	O - Public administration and defence; compulsory social security*	1.3%	Dominican Republic
COTE D'IVOIRE REPUBLIC OF RegS	O - Public administration and defence; compulsory social security*	1.2%	Cote D'Ivoire
NK KAZMUNAYGAZ AO RegS	B - Mining and quarrying	1.2%	Kazakhstan
SERBIA (REPUBLIC OF) RegS	O - Public administration and defence; compulsory social security*	1.2%	Serbia, Republic of
QATAR GOVERNMENT BOND RegS	O - Public administration and defence; compulsory social security*	1.2%	Qatar
ROMANIA (REPUBLIC OF) RegS	O - Public administration and defence; compulsory social security*	1.2%	Romania
STATE OIL CO OF THE AZERBAIJAN REP RegS	B - Mining and quarrying	1.2%	Azerbaijan

*O - Public administration and defence; compulsory social security is classified by Barclays Industry as either: Sovereign, Treasury, Foreign Local Government, Supranational, Foreign Agencies

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

- The Portfolio aims to hold a minimum of 80% investments that are aligned with the environmental or social characteristics promoted by the Portfolio. During the Reference Period, the Portfolio held 97.9% investments that were aligned with the environmental or social characteristics promoted by the Portfolio.
- The Portfolio aims to hold a maximum of 20% investments that are not aligned with the environmental or social characteristics promoted by the Portfolio and are not sustainable investments, and which fall into the “Other” section of the Portfolio. During the Reference Period, the Portfolio held 2.1% “Other” investments.

The Manager and the Sub-Investment Manager calculated the proportion of investments aligned with the environmental and/or social characteristics promoted by the Portfolio by reference to the proportion of issuers in the Portfolio: i) that held either an NB ESG Quotient rating or a third-party equivalent ESG rating that was used as part of the portfolio construction and investment management process of the Portfolio; and/or ii) with whom the Manager and/or the Sub-Investment Manager had engaged directly. This calculation was based on a mark-to-market assessment of the Portfolio and may be based on incomplete or inaccurate issuer or third-party data. The Reference Period data was calculated by averaging the data of the four calendar quarter ends.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

The Reference Period data was calculated by averaging the data of the four calendar quarter ends.

Economic Sector – NACE	% Assets
B - Mining and quarrying	8.9%
C - Manufacturing	2.9%
D - Electricity, gas, steam and air conditioning supply	3.4%
E - Water supply; sewerage; waste management and remediation activities	0.0%
F - Construction	0.1%
G - Wholesale and retail trade; repair of motor vehicles and motorcycles	1.2%
H - Transporting and storage	3.0%
I - Accommodation and food service activities	0.0%
J - Information and communication	0.3%
K - Financial and insurance activities	11.4%
L - Real estate activities	0.3%
N - Administrative and support service activities	0.1%
O - Public administration and defence; compulsory social security*	65.1%
R - Arts, entertainment and recreation	0.0%
U - Activities of extraterritorial organisations and bodies	1.5%
None	1.7%

*O - Public administration and defence; compulsory social security is classified by Barclays Industry as either: Sovereign, Treasury, Foreign Local Government, Supranational, Foreign Agencies

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The analysis and disclosure requirements introduced by the EU Taxonomy are very detailed and compliance with them requires the availability of multiple, specific data points in respect of each investment which the Portfolio made. The Manager and the Sub-Investment Manager cannot confirm that the Portfolio invested in any investments that qualified as environmentally sustainable for the purposes of the EU Taxonomy. Disclosures and reporting on Taxonomy alignment will develop as the EU framework evolves and data is made available by issuers. The Manager and the Sub-Investment Manager will keep the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy under active review as data availability and quality improves.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- ☐ Yes:
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

- **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A – the Portfolio did not commit to holding Taxonomy-aligned investments.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A – the Portfolio did not commit to holding Taxonomy-aligned investments in this or the previous reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A – the Portfolio did not commit to holding sustainable investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A – the Portfolio did not commit to holding sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” included the remaining investments of the Portfolio (including but not limited to any derivatives or any security collateralized by a pool of similar assets or receivables listed in the Supplement for the Portfolio) which were neither aligned with the environmental or social characteristics, nor qualified as sustainable investments.

The “Other” section in the Portfolio was held for a number of reasons that the Manager and the Sub-Investment Manager felt was beneficial to the Portfolio, such as, but not limited to, achieving risk management, and/or to ensure adequate liquidity, hedging and collateral cover.

As noted above, the Portfolio was invested in compliance with ESG exclusion policies, on a continuous basis. This ensured that investments made by the Portfolio sought to align with international environmental and social safeguards such as the UNGC Principles, the UNGPs, the OECD Guidelines and the ILO Standards.

The Manager and the Sub-Investment Manager believe that these policies prevented investment in issuers that most egregiously violated environmental and/or social minimum standards and ensured that the Portfolio could successfully promote its environmental and social characteristics.

The above steps ensured that robust environmental and social safeguards were in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio was managed in-line with the investment objective and the following actions were taken:

I. Integrating proprietary ESG analysis:

The Manager and the Sub-Investment Manager applied a high standard of due diligence in the selection and ongoing monitoring of investments made by the Portfolio to ensure the integration of Sustainability Risks (as defined in the SFDR) and ESG. The Manager and the Sub-Investment Manager view ESG integration as the practice of incorporating material ESG risks and considerations (as a binding element) into the investment decision-making process. ESG integration sits alongside other financial considerations and should enrich the Manager and the Sub-Investment Manager's investment teams' analysis of issuers by providing a toolkit for identifying material ESG risks and opportunities that inform investment decisions. The Manager and the Sub-Investment Manager believe that material ESG factors are an important driver of long-term investment returns from both an opportunity and a risk-mitigation perspective. Hence, the Manager and the Sub-Investment Manager's ESG integration approach considers ESG opportunities as well as Sustainability Risks.

Before making investments, the investment team conducted due diligence that it deemed reasonable and appropriate based on the facts and circumstances applicable to each investment. The investment team assessed the investment's alignment with the environmental and social characteristics promoted by the Portfolio using (as appropriate) the NB ESG Quotient and exclusionary screens (to identify potential non-compliance with the above listed ESG exclusions). The due diligence was supported by third-party data sources.

The NB ESG Quotient rating for issuers was utilised to help to better identify risks and opportunities in the overall credit and value assessment. The NB ESG Quotient was a key component of the internal credit ratings and helped to identify business risks (including ESG risks), which would cause deterioration in an issuer's credit profile. Internal credit ratings can be notched up or down based on the NB ESG Quotient rating, and this was monitored by the Manager and the Sub-Investment Manager as an important component of the investment process for the Portfolio.

By integrating the investment team's proprietary ESG analysis (the NB ESG Quotient) into their internal credit ratings, there was a direct link between their analysis of the Portfolio's environmental and social characteristics and the portfolio construction activities.

II. Engagement:

The Manager and the Sub-Investment Manager engaged with issuers through a robust ESG engagement program. They sought to prioritise constructive engagements and sought to engage on topics (including ESG topics) they determined to be financially material for the relevant issuer. The Manager and the Sub-Investment Manager viewed this engagement with issuers, as an important part of its investment process. Progress on engagement was tracked centrally in the Manager and the Sub-Investment Manager's engagement tracker.

III. ESG sectoral exclusion policies:

To ensure that the environmental and social characteristics promoted by the Portfolio were attained, the Portfolio applied the ESG exclusion policies referenced above, which placed limitations on the investable universe.

How did this financial product perform compared to the reference benchmark?

N/A – The Portfolio has not designated a reference benchmark..

- *How does the reference benchmark differ from a broad market index?*
N/A
- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*
N/A
- *How did this financial product perform compared with the reference benchmark?*
N/A
- *How did this financial product perform compared with the broad market index?*
N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Neuberger Berman Emerging Market Debt – Local Currency Fund (the “Portfolio”)

Legal entity identifier: 549300VLRPBFFXL0DB81

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The most recent SFDR Pre-Contractual Template of the Portfolio can be found [here](#).

This SFDR Periodic Report template reports on the 2023 calendar year (the “Reference Period”). Unless otherwise stated in the relevant disclosure, all Reference Period data has been calculated based on the average of the four calendar quarter ends.

This SFDR Periodic Report template reports on several quantitative ESG data metrics. To assist the reader in their review and assessment of such ESG data metrics, we have disclosed the Portfolio’s data coverage for these ESG data metrics. The intention is that disclosure of the data coverage (of the ESG metrics during the Reference Period) will allow the reader to interpret the ESG data metrics’ ability to represent the Portfolio with any limitations to such data coverage in mind.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and social characteristics were promoted by the Portfolio for sovereign issuers:

- **Environmental Characteristics:** sovereign energy efficiency; climate change adaptation; deforestation; greenhouse gas ("GHG") emissions; air and household pollution; and unsafe sanitation.
- **Social Characteristics:** progress towards UN Sustainable Development Goals ("SDGs"); health and education levels; regulatory quality; political stability and freedoms; gender equality; and research and development.

The following environmental and social characteristics were promoted by the Portfolio for corporate issuers:

- **Environmental Characteristics:** biodiversity and land usage; carbon emissions; opportunities in clean technologies; water stress; toxic emissions & waste; financing environmental impact; product carbon footprint; environmental policy; environmental management system; GHG reduction programme; green procurement policy; and non-GHG air emissions programmes.
- **Social Characteristics:** health & safety; human capital development; labour management; privacy & data security; product safety & quality; financial products safety; discrimination policy; community involvement programmes; diversity programmes and human rights policy.

Performance in relation to these environmental and social characteristics was measured through the NB ESG Quotient, and is reported, in aggregate, below.

How did the sustainability indicators perform?

As part of the investment process, the Manager and the Sub-Investment Manager considered a variety of sustainability indicators to measure the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators are listed below:

1. The NB ESG Quotient:

The proprietary Neuberger Berman ESG rating system (the "**NB ESG Quotient**"), is built around the concept of sector specific ESG risk and opportunity, and produced an overall ESG rating for issuers by assessing them against certain ESG metrics.

The NB ESG Quotient assigned weightings to environmental, social and governance characteristics for each sector to derive the NB ESG Quotient rating for issuers. While the NB ESG Quotient rating of issuers was considered as part of the investment process, there was no minimum NB ESG Quotient rating to be attained by an issuer prior to investment. The Manager and the Sub-Investment Manager used the NB ESG Quotient to promote the environmental and social characteristics listed by prioritising investment in securities issued by issuers with a relatively favourable and/or an improving NB ESG Quotient rating. Pursuant to this, the Manager and the Sub-Investment Manager limited exposure to issuers with the poorest NB ESG Quotient rating unless there was a reasonable expectation that the NB ESG Quotient rating would improve over time.

The Reference Period data was calculated by averaging the data of the four calendar quarter ends.

Reference Period	Rating	Range	Combined Coverage
NB ESG Quotient	55	1-100	97%
Third-Party Data	4.8	0-10	

Sustainability

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With regards to the NB ESG Quotient rating, a rating between 1 – 100 is used where 1 is the lowest rating and 100 is the highest rating. This Portfolio does not have a minimum NB ESG Quotient rating to be attained by an issuer prior to investment.

The average NB ESG Quotient rating is a weighted average that reflects the ESG characteristics that were considered to be the most material drivers of ESG risk and opportunity for each issuer held in the Portfolio. It is not an ESG assessment or rating of the overall Portfolio and its promotion of environmental and social characteristics, but rather an assessment of the material ESG risks and opportunities the Portfolio had exposure to.

Third-party data was also used to measure the resilience of the Portfolio's aggregate holdings to long-term, financially material, ESG risks. The third-party data ratings range from 0-10, with 0 being the lowest rating and 10 being the highest rating.

Assessment and management of material ESG risks and opportunities is an essential element of the Portfolio's promotion of environmental and social characteristics.

2. ESG exclusion policies:

To ensure that the environmental or social characteristics promoted by the Portfolio were attained, the Portfolio did not invest in securities issued by issuers whose activities had been identified as breaching, or were not consistent with, the Neuberger Berman Controversial Weapons Policy and the Neuberger Berman Thermal Coal Involvement Policy. The Portfolio is phasing out its exposure to thermal coal and prohibited investment in securities issued by issuers that derived more than 10% of revenue from thermal coal mining or were expanding new thermal coal power generation, as determined by internal screens. The Portfolio also prohibited investments in issuers in the power generation industry that used thermal coal as an energy source for more than 95% of their installed power generation capacity, were expanding into new thermal coal power generation, or whose expansionary capital expenditure budgets did not include a minimum threshold for non-coal investments, as determined by internal screens. The investments held by the Portfolio did not invest in securities issued by issuers whose activities had been identified as breaching, or were not consistent with, the Neuberger Berman Global Standards Policy which excluded identified violators of (i) the United Nations Global Compact Principles ("**UNGC Principles**"), (ii) the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct ("**OECD Guidelines**"), (iii) the United Nations Guiding Principles on Business and Human Rights ("**UNGPs**") and (iv) the International Labour Standards ("**ILO Standards**"). In addition, the Portfolio excluded securities issued by issuers which derived 5% or more of revenues from the manufacture of tobacco products. Issuers which were involved in direct child labour and issuers that derived more than 10% of revenue from oil sands extraction were also excluded.

When applying ESG exclusions to the Portfolio, the Manager and the Sub-Investment Manager used third-party data to identify issuers in breach of the ESG exclusions listed above. Where possible, the Manager and the Sub-Investment Manager sought to overlay this third-party data with qualitative expertise from their research analysts to establish a current and holistic picture of the issuer. The Manager and the Sub-Investment Manager discussed and debated the differences between the violators identified by the third-party data and those identified as a result of their research, which drew upon data from the NB ESG Quotient and direct engagements with the issuer.

...and compared to previous periods?

For the 2022 reference period, the quantitative data disclosed (for the sustainability indicators) was calculated as at 31 December 2022, being the only quarter end in the reference period that followed the entry into force of the SFDR RTS (which included the publication of the Portfolio's SFDR pre-contractual disclosure template).

The below sustainability indicators' quantitative data for the Reference Period was calculated by averaging the four calendar quarter ends.

1. NB ESG Quotient

	NB ESG Quotient Rating	Third-Party Data Rating	Combined Coverage
Range	1-100	0-10	0%-100%
2022 reference period	54	4.8	96%
2023 reference period	55	4.8	97%

Year-on-year, the NB ESG Quotient rating has improved. This is due to improvements in individual issuers held in the Portfolio and due to trading activity.

Year-on-year the third-party data rating has remained unchanged.

2. Exclusions

Consistent with the previous calendar year, there were no breaches (of the above listed ESG exclusions) during the Reference Period.

	Total number of breaches
2022 reference period	0
2023 reference period	0

- *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

N/A - the Portfolio did not commit to holding sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A - the Portfolio did not commit to holding sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A - the Portfolio did not commit to holding sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio did not commit to holding sustainable investments, however the Manager and the Sub-Investment Manager did not invest in issuers whose activities had been identified as breaching, or were not consistent with, the OECD Guidelines, UNGC Principles, ILO Standards and UNGPs, captured through the Neuberger Berman Global Standards Policy.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

N/A – the Portfolio did not commit to holding Taxonomy-aligned investments.

How did this financial product consider principal adverse impacts on sustainability factors?

A selection of the principal adverse impact indicators were considered directly (e.g. through the ESG exclusion policies listed above) and/or indirectly (e.g. as part of the Manager's and the Sub-Investment Manager's assessment of issuers) throughout the Reference Period.

The Manager and the Sub-Investment Manager considered the principal adverse impacts outlined in Part 1 of the below table for corporate issuers (the "Corporate Issuer PAIs") and considered the principal adverse impacts outlined in Part 2 of the below table for sovereign issuers (the "Sovereign PAIs") on sustainability factors (together the "Product Level PAIs"):

Part 1 – Corporate Issuer PAIs	
Theme	Adverse sustainability indicator
<i>Greenhouse gas emissions</i>	PAI 1- GHG emissions PAI 2 - Carbon footprint PAI 3 - GHG intensity of investee companies PAI 4 - Exposure to companies active in the fossil fuel sector
<i>Social and employee matters</i>	PAI 10 - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises PAI 13 - Board gender diversity PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
Part 2 – Sovereign PAIs	
<i>Environmental</i>	PAI 15 - GHG intensity
<i>Social</i>	PAI 16 - Investee countries subject to social violations

Consideration of the Product Level PAIs was limited by the availability (in the Manager's and the Sub-Investment Manager's subjective view) of adequate, reliable and verifiable data coverage. The Manager and the Sub-Investment Manager utilised third-party data and proxy data along with internal research to consider the Product Level PAIs.

Consideration of the Product Level PAIs by the Manager and the Sub-Investment Manager was through a combination of:

- Monitoring the Portfolio, in particular where it fell below the quantitative and qualitative tolerance thresholds set for each Product Level PAI by the Manager and the Sub-Investment Manager;
- Stewardship and/or setting engagement objectives where the Portfolio fell below the quantitative and qualitative tolerance thresholds set for a Product Level PAI; and
- Application of the ESG exclusion policies referenced above, which included consideration of several of the Product Level PAIs.

What were the top investments of this financial product?

The Manager and the Sub-Investment Manager have used the EU statistical classification of economic activities ("NACE") economic sector breakdown to identify the economic sectors of the Portfolio's top 15 investments.

As the list below is based on an average calculated across the four calendar quarter ends of the Reference Period, this may differ from the top investments of the Portfolio calculated as at 31 December 2023 in the "Schedule of Investments" section of the financial statements.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2023 - 31 December 2023

Largest investments	Sector	% Assets	Country
SOUTH AFRICA (REPUBLIC OF)	O - Public administration and defence; compulsory social security*	2.5%	South Africa
MEX BONOS DE DESARROLLO	O - Public administration and defence; compulsory social security*	2.2%	Mexico
MEXICO (UNITED MEXICAN STATES) (GO	O - Public administration and defence; compulsory social security*	2.2%	Mexico
SOUTH AFRICA (REPUBLIC OF)	O - Public administration and defence; compulsory social security*	2.1%	South Africa

CZECH REPUBLIC RegS	O - Public administration and defence; compulsory social security*	1.2%	Czech Republic

*O - Public administration and defence; compulsory social security is classified by Barclays Industry as either: Sovereign, Treasury, Foreign Local Government, Supranational, Foreign Agencies.

What was the proportion of sustainability-related investments?

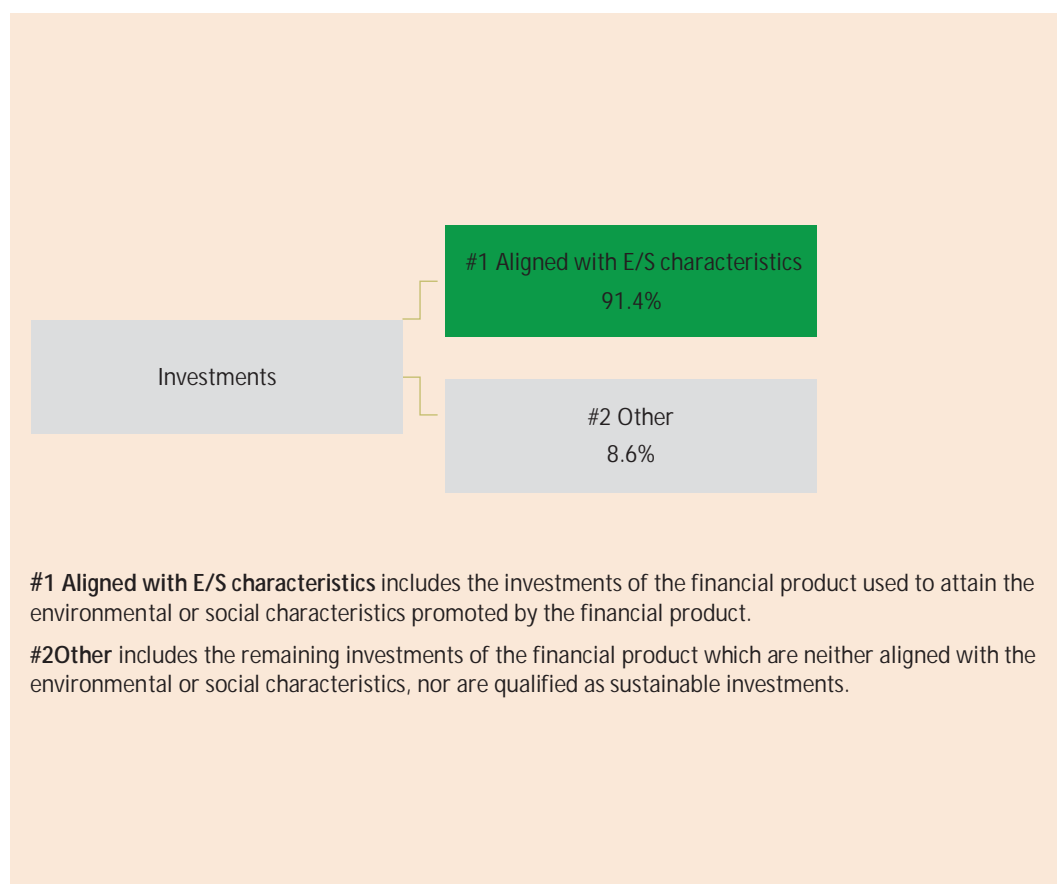

What was the asset allocation?

- The Portfolio aims to hold a minimum of 80% investments that are aligned with the environmental or social characteristics promoted by the Portfolio. During the Reference Period, the Portfolio held 91.4% investments that were aligned with the environmental or social characteristics promoted by the Portfolio.
- The Portfolio aims to hold a maximum of 20% investments that are not aligned with the environmental or social characteristics promoted by the Portfolio and are not sustainable

Asset allocation describes the share of investments in specific assets.

investments, and which fall into the “Other” section of the Portfolio. During the Reference Period, the Portfolio held 8.6% “Other” investments.

The Manager and the Sub-Investment Manager calculated the proportion of investments aligned with the environmental and/or social characteristics promoted by the Portfolio by reference to the proportion of issuers in the Portfolio: i) that held either an NB ESG Quotient rating or a third-party equivalent ESG rating that was used as part of the portfolio construction and investment management process of the Portfolio; and/or ii) with whom the Manager and the Sub-Investment Manager had engaged directly. This calculation was based on a mark-to-market assessment of the Portfolio and may be based on incomplete or inaccurate issuer or third-party data. The Reference Period data is an average of the four calendar quarter ends.

● *In which economic sectors were the investments made?*

The Reference Period for the below data is an average of the four calendar quarter ends.

Economic Sector – NACE	% Assets
C - Manufacturing	0.2%
D - Electricity, gas, steam and air conditioning supply	2.1%
F - Construction	0.1%

G - Wholesale and retail trade; repair of motor vehicles and motorcycles	0.1%
H - Transporting and storage	0.1%
I - Accommodation and food service activities	0.0%
J - Information and communication	0.0%
K - Financial and insurance activities	3.7%
N - Administrative and support service activities	0.1%
O - Public administration and defence; compulsory social security*	92.4%
R - Arts, entertainment and recreation	0.0%
U - Activities of extraterritorial organisations and bodies	0.4%
None	1.0%

**O - Public administration and defence; compulsory social security is classified by Barclays Industry as either: Sovereign, Treasury, Foreign Local Government, Supranational, Foreign Agencies.*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

- **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The analysis and disclosure requirements introduced by the EU Taxonomy are very detailed and compliance with them requires the availability of multiple, specific data points in respect of each investment which the Portfolio made. The Manager and the Sub-Investment Manager cannot confirm that the Portfolio invested in any investments that qualified as environmentally sustainable for the purposes of the EU Taxonomy. Disclosures and reporting on Taxonomy alignment will develop as the EU framework evolves and data is made available by issuers. The Manager and the Sub-Investment Manager will keep the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy under active review as data availability and quality improves.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A – the Portfolio did not commit to holding Taxonomy-aligned investments.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A – the Portfolio did not commit to holding Taxonomy-aligned investments in this or the previous reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A – the Portfolio did not commit to holding sustainable investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A – the Portfolio did not commit to holding sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” included the remaining investments of the Portfolio (including but not limited to any derivatives or any security collateralized by a pool of similar assets or receivables listed in the Supplement for the Portfolio) which were neither aligned with the environmental or social characteristics, nor qualified as sustainable investments.

The “Other” section in the Portfolio was held for a number of reasons that the Manager and the Sub-Investment Manager felt was beneficial to the Portfolio, such as, but not limited to, achieving risk management, and/or to ensure adequate liquidity, hedging and collateral cover.

As noted above, the Portfolio was invested in compliance with ESG exclusion policies, on a continuous basis. This ensured that investments made by the Portfolio sought to align with international environmental and social safeguards such as the UNGC Principles, the UNGPs, the OECD Guidelines and the ILO Standards.

The Manager and the Sub-Investment Manager believe that these policies prevented investment in issuers that most egregiously violated environmental and/or social minimum standards and ensured that the Portfolio could successfully promote its environmental and social characteristics.

The above steps ensured that robust environmental and social safeguards were in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio was managed in-line with the investment objective and the following actions were taken:

I. Integrating proprietary ESG analysis:

The Manager and the Sub-Investment Manager applied a high standard of due diligence in the selection and ongoing monitoring of investments made by the Portfolio to ensure the integration of Sustainability Risks (as defined in the SFDR) and ESG. The Manager and the Sub-Investment Manager view ESG integration as the practice of incorporating material ESG risks and considerations (as a binding element) into the investment decision-making process. ESG integration sits alongside other financial considerations and should enrich the Manager and the Sub-Investment Manager's investment teams' analysis of issuers by providing a toolkit for identifying material ESG risks and opportunities that inform investment decisions. The Manager and the Sub-Investment Manager believe that material ESG factors are an important driver of long-term investment returns from both an opportunity and a risk-mitigation perspective. Hence, the Manager and the Sub-Investment Manager's ESG integration approach considers ESG opportunities as well as Sustainability Risks.

Before making investments, the investment team conducted due diligence that it deemed reasonable and appropriate based on the facts and circumstances applicable to each investment. The investment team assessed the investment's alignment with the environmental and social characteristics promoted by the Portfolio using (as appropriate) the NB ESG Quotient and exclusionary screens (to identify potential non-compliance with the above listed ESG exclusions). The due diligence was supported by third-party data sources.

The NB ESG Quotient rating for issuers was utilised to help to better identify risks and opportunities in the overall credit and value assessment. The NB ESG Quotient was a key component of the internal credit ratings and helped to identify business risks (including ESG risks), which would cause deterioration in an issuer's credit profile. Internal credit ratings can be notched up or down based on the NB ESG Quotient rating, and this was monitored by the Manager and the Sub-Investment Manager as an important component of the investment process for the Portfolio. By integrating the investment team's proprietary ESG analysis (the NB ESG Quotient) into their internal credit ratings, there was a direct link between their analysis of the Portfolio's environmental and social characteristics and portfolio construction activities.

II. Engagement:

The Manager and the Sub-Investment Manager engaged with issuers through a robust ESG engagement program. They sought to prioritise constructive engagements and sought to engage on topics (including ESG topics) they determined to be financially material for the relevant issuer. The Manager and the Sub-Investment Manager viewed this engagement with issuers, as an important part of its investment process. Progress on engagement was tracked centrally in the Manager and the Sub-Investment Manager's engagement tracker.

III. ESG sectoral exclusion policies:

To ensure that the environmental and social characteristics promoted by the Portfolio were attained, the Portfolio applied the ESG exclusion policies referenced above, which placed limitations on the investable universe.

How did this financial product perform compared to the reference benchmark?

N/A – The Portfolio has not designated a reference benchmark.

- *How does the reference benchmark differ from a broad market index?*
N/A
- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*
N/A
- *How did this financial product perform compared with the reference benchmark?*
N/A
- *How did this financial product perform compared with the broad market index?*
N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Neuberger Berman Emerging Market Debt Blend Fund (the “Portfolio”)

Legal entity identifier: 549300JASQ1JIDYO8X22

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

It made sustainable investments with an environmental objective: ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: ____%

No

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

The most recent SFDR Pre-Contractual Template of the Portfolio can be found [here](#).

This SFDR Periodic Report template reports on the 2023 calendar year (the “**Reference Period**”). Unless otherwise stated in the relevant disclosure, all Reference Period data has been calculated based on the average of the four calendar quarter ends.

This SFDR Periodic Report template reports on several quantitative ESG data metrics. To assist the reader in their review and assessment of such ESG data metrics, we have disclosed the Portfolio’s data coverage for these ESG data metrics. The intention is that disclosure of the data coverage (of the ESG metrics during the Reference Period) will allow the reader to interpret the ESG data metrics’ ability to represent the Portfolio with any limitations to such data coverage in mind.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and social characteristics were promoted by the Portfolio for sovereign issuers:

- **Environmental Characteristics:** sovereign energy efficiency; climate change adaptation; deforestation; greenhouse gas (“GHG”) emissions; air and household pollution; and unsafe sanitation.
- **Social Characteristics:** progress towards UN Sustainable Development Goals (“SDGs”); health and education levels; regulatory quality; political stability and freedoms; gender equality; and research and development.

The following environmental and social characteristics were promoted by the Portfolio for corporate issuers:

- **Environmental Characteristics:** biodiversity and land usage; carbon emissions; opportunities in clean technologies; water stress; toxic emissions & waste; financing environmental impact; product carbon footprint; environmental policy; environmental management system; GHG reduction programme; green procurement policy; and non-GHG air emissions programmes.
- **Social Characteristics:** health & safety; human capital development; labour management; privacy & data security; product safety & quality; financial products safety; discrimination policy; community involvement programmes; diversity programmes; and human rights policy.

Performance in relation to these environmental and social characteristics was measured through the NB ESG Quotient, and is reported, in aggregate, below.

How did the sustainability indicators perform?

As part of the investment process, the Manager and the Sub-Investment Manager considered a variety of sustainability indicators to measure the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators are listed below:

1. The NB ESG Quotient:

The proprietary Neuberger Berman ESG rating system (the “NB ESG Quotient”), is built around the concept of sector specific ESG risk and opportunity, and produced an overall ESG rating for issuers by assessing them against certain ESG metrics.

The NB ESG Quotient assigned weightings to environmental, social and governance characteristics for each sector to derive the NB ESG Quotient rating for issuers. While the NB ESG Quotient rating of issuers was considered as part of the investment process, there was no minimum NB ESG Quotient rating to be attained by an issuer prior to investment. The Manager and the Sub-Investment Manager used the NB ESG Quotient to promote the environmental and social characteristics listed by prioritising investment in securities issued by issuers with a relatively favourable and/or an improving NB ESG Quotient rating. Pursuant to this, the Manager and the Sub-Investment Manager limited exposure to issuers with the poorest NB ESG Quotient rating unless there was a reasonable expectation that the NB ESG Quotient rating would improve over time.

The Reference Period data was calculated by averaging the data of the four calendar quarter ends.

Reference Period	Rating	Combined Coverage
NB ESG Quotient	55	97%
Third-Party Data	4.7	

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

With regards to the NB ESG Quotient rating, a rating between 1 – 100 is used where 1 is the lowest rating and 100 is the highest rating. This Portfolio does not have a minimum NB ESG Quotient rating to be attained by an issuer prior to investment.

The average NB ESG Quotient rating is a weighted average that reflects the ESG characteristics that were considered to be the most material drivers of ESG risk and opportunity for each issuer held in the Portfolio. It is not an ESG assessment or rating of the overall Portfolio and its promotion of environmental and social characteristics, but rather an assessment of the material ESG risks and opportunities the Portfolio had exposure to.

Third-party data was also used to measure the resilience of the Portfolio's aggregate holdings to long-term, financially material, ESG risks. The third-party data ratings range from 0-10, with 0 being the lowest rating and 10 being the highest rating.

Assessment and management of material ESG risks and opportunities is an essential element of the Portfolio's promotion of environmental and social characteristics.

2. ESG exclusion policies:

To ensure that the environmental or social characteristics promoted by the Portfolio were attained, the Portfolio did not invest in securities issued by issuers whose activities had been identified as breaching, or were not consistent with, the Neuberger Berman Controversial Weapons Policy and the Neuberger Berman Thermal Coal Involvement Policy. The Portfolio is phasing out its exposure to thermal coal and prohibited investment in securities issued by issuers that derived more than 10% of revenue from thermal coal mining or were expanding new thermal coal power generation, as determined by internal screens. The Portfolio also prohibited investments in issuers in the power generation industry that used thermal coal as an energy source for more than 95% of their installed power generation capacity, were expanding into new thermal coal power generation, or whose expansionary capital expenditure budgets did not include a minimum threshold for non-coal investments, as determined by internal screens. From 6 December 2023, the Portfolio excluded companies from the investment universe that manufactured incendiary weapons using white phosphorus or that had an industry tie to nuclear weapons. The Portfolio excluded securities issued by companies that derived 5% or more of revenue from the production of adult entertainment materials or the production of conventional weapons. The investments held by the Portfolio did not invest in securities issued by issuers whose activities had been identified as breaching, or were not consistent with, the Neuberger Berman Global Standards Policy which excluded identified violators of (i) the United Nations Global Compact Principles on Responsible Business Conduct ("**UNGC Principles**"), (ii) the OECD Guidelines for Multinational Enterprises ("**OECD Guidelines**"), (iii) the United Nations Guiding Principles on Business and Human Rights ("**UNGPs**") and (iv) the International Labour Standards ("**ILO Standards**"). In addition, the Portfolio excluded securities issued by issuers which derived 5% or more of revenues from the manufacture of tobacco products. Issuers which were involved in direct child labour and issuers that derived more than 10% of revenue from oil sands extraction were also excluded.

When applying ESG exclusions to the Portfolio, the Manager and the Sub-Investment Manager used third-party data to identify issuers in breach of the ESG exclusions listed above. Where possible, the Manager and the Sub-Investment Manager sought to overlay this third-party data with qualitative expertise from their research analysts to establish a current and holistic picture of the issuer. The Manager and the Sub-Investment Manager discussed and debated the differences between the violators identified by the third-party data and those identified as a result of their research, which drew upon data from the NB ESG Quotient and direct engagements with the issuer.

...and compared to previous periods?

For the 2022 reference period, the quantitative data disclosed (for the sustainability indicators) was calculated as at 31 December 2022, being the only quarter end in the reference period that followed the entry into force of the SFDR RTS (which included the publication of the Portfolio's SFDR pre-contractual disclosure template).

The below sustainability indicators' quantitative data for the Reference Period was calculated by averaging the four calendar quarter ends.

1. NB ESG Quotient

	NB ESG Quotient Rating	Third-Party Data Rating	Combined Coverage
Range	1-100	0-10	0-100%
2022 reference period	54	4.6	95%
2023 reference period	55	4.7	97%

Year-on-year, the NB ESG Quotient rating has improved. This is due to improvements in individual issuers held in the Portfolio and due to trading activity.

Year-on-year, the third-party data rating has improved. This is due to improvements in individual issuers held in the Portfolio and due to trading activity as well as potential changes to, or differences in, the issuer's third-party rating by the provider.

2. Exclusions

Consistent with the previous calendar year, there were no breaches (of the above listed ESG exclusions) during the Reference Period.

	Total number of breaches
2022 reference period	0
2023 reference period	0

● *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

N/A - the Portfolio did not commit to holding sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A - the Portfolio did not commit to holding sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A - the Portfolio did not commit to holding sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio did not commit to holding sustainable investments, however the Manager and the Sub-Investment Manager did not invest in issuers whose activities had been identified as breaching, or were not consistent with, the OECD Guidelines, UNGC Principles, ILO Standards and UNGPs, captured through the Neuberger Berman Global Standards Policy.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

N/A – the Portfolio did not commit to holding Taxonomy-aligned investments

How did this financial product consider principal adverse impacts on sustainability factors?

A selection of the principal adverse impact indicators were considered directly (e.g. through the ESG exclusion policies listed above) and/or indirectly (e.g. as part of the Manager's and the Sub-Investment Manager's assessment of issuers) throughout the Reference Period.

The Manager and the Sub-Investment Manager considered the principal adverse impacts outlined in Part 1 of the below table for corporate issuers (the “**Corporate Issuer PAIs**”) and considered the principal adverse impacts outlined in Part 2 of the below table for sovereign issuers (the “**Sovereign PAIs**”) on sustainability factors (together the “**Product Level PAIs**”):

Part 1 – Corporate Issuer PAIs	
Theme	Adverse sustainability indicator
<i>Greenhouse gas emissions</i>	PAI 1- GHG emissions PAI 2 - Carbon footprint PAI 3 - GHG intensity of investee companies PAI 4 - Exposure to companies active in the fossil fuel sector
<i>Social and employee matters</i>	PAI 10 - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises PAI 13 - Board gender diversity PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
Part 2 – Sovereign PAIs	
<i>Environmental</i>	PAI 15 - GHG intensity
<i>Social</i>	PAI 16 - Investee countries subject to social violations

Consideration of the Product Level PAIs was limited by the availability (in the Manager's and the Sub-Investment Manager's subjective view) of adequate, reliable and verifiable data coverage. The Manager and the Sub-Investment Manager utilised third-party data and proxy data along with internal research to consider the Product Level PAIs.

Consideration of the Product Level PAIs by the Manager and the Sub-Investment Manager was through a combination of:

- Monitoring the Portfolio, in particular where it fell below the quantitative and qualitative tolerance thresholds set for each Product Level PAI by the Manager and the Sub-Investment Manager;
- Stewardship and/or setting engagement objectives where the Portfolio fell below the quantitative and qualitative tolerance thresholds set for a Product Level PAI; and
- Application of the ESG exclusion policies referenced above, which included consideration of several of the Product Level PAIs.

What were the top investments of this financial product?

The Manager and the Sub-Investment Manager have used the EU statistical classification of economic activities ("NACE") economic sector breakdown to identify the economic sectors of the Portfolio's top 15 investments.

As the list below is based on an average calculated across the four calendar quarter ends of the Reference Period, this may differ from the top investments of the Portfolio calculated as at 31 December 2023 in the "Schedule of Investments" section of the financial statements.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2023 - 31 December 2023

Largest investments	Sector	% Assets	Country
SOUTH AFRICA (REPUBLIC OF)	O - Public administration and defence; compulsory social security*	1.5%	South Africa

*O – Public administration and defence; compulsory social security is classified by Barclays Industry as either: Sovereign, Treasury, Foreign Local Government, Supranational, Foreign Agencies

What was the proportion of sustainability-related investments?

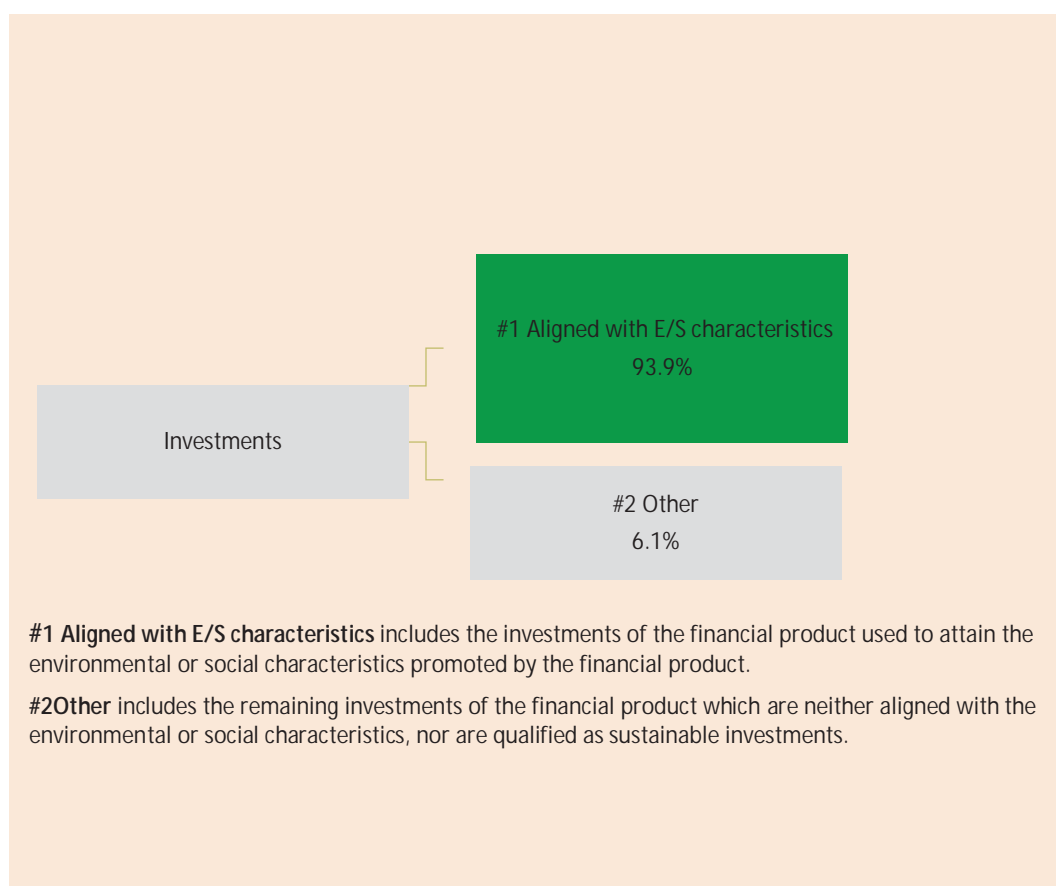

What was the asset allocation?

- The Portfolio aims to hold a minimum of 80% investments that are aligned with the environmental or social characteristics promoted by the Portfolio. During the Reference Period, the Portfolio held 93.9% investments that were aligned with the environmental or social characteristics promoted by the Portfolio.
- The Portfolio aims to hold a maximum of 20% investments that are not aligned with the environmental or social characteristics promoted by the Portfolio and are not sustainable investments, and which fall into the "Other" section of the Portfolio. During the Reference Period, the Portfolio held 6.1% "Other" investments.

The Manager and the Sub-Investment Manager calculated the proportion of investments aligned with the environmental and/or social characteristics promoted by the Portfolio by reference to the proportion of issuers in the Portfolio: i) that held either an NB ESG Quotient rating or a third-party equivalent ESG rating that was used as part of the portfolio construction and investment management process of the Portfolio; and/or ii) with whom the Manager and the Sub-Investment Manager had engaged directly. This calculation was based on a mark-to-market assessment of the Portfolio and may be based on incomplete or inaccurate issuer or

Asset allocation describes the share of investments in specific assets.

third-party data. The Reference Period data was calculated by averaging the data of the four calendar quarter ends.

● *In which economic sectors were the investments made?*

The Reference Period data was calculated by averaging the data of the four calendar quarter ends.

Economic Sector – NACE	% Assets
B – Mining and quarrying	4.9%
C – Manufacturing	3.7%
D – Electricity, gas, steam and air conditioning supply	4.2%
F – Construction	0.4%
G – Wholesale and retail trade; repair of motor vehicles and motorcycles	0.8%
H – Transporting and storage	1.5%
I – Accommodation and food service activities	0.3%

J – Information and communication	1.3%
K – Financial and insurance activities	15.4%
L – Real estate activities	0.2%
M – Professional, scientific and technical activities	0.1%
N – Administrative and support service activities	0.5%
O – Public administration and defence; compulsory social security*	64.6%
R - Arts, entertainment and recreation	0.6%
U - Activities of extraterritorial organisations and bodies	0.5%
None	1.0%

**O - Public administration and defence; compulsory social security is classified by Barclays Industry as either: Sovereign, Treasury, Foreign Local Government, Supranational, Foreign Agencies*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

- **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The analysis and disclosure requirements introduced by the EU Taxonomy are very detailed and compliance with them requires the availability of multiple, specific data points in respect of each investment which the Portfolio made. The Manager and the Sub-Investment Manager cannot confirm that the Portfolio invested in any investments that qualified as environmentally sustainable for the purposes of the EU Taxonomy. Disclosures and reporting on Taxonomy alignment will develop as the EU framework evolves and data is made available by issuers. The Manager and the Sub-Investment Manager will keep the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy under active review as data availability and quality improves.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- ☐ Yes:
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A – the Portfolio did not commit to holding Taxonomy-aligned investments.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A – the Portfolio did not commit to holding Taxonomy-aligned investments in this or the previous reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A – the Portfolio did not commit to holding sustainable investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A – the Portfolio did not commit to holding sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” included the remaining investments of the Portfolio (including but not limited to any derivatives or any security collateralized by a pool of similar assets or receivables listed in the Supplement for the Portfolio) which were neither aligned with the environmental or social characteristics, nor qualified as sustainable investments.

The “Other” section in the Portfolio was held for a number of reasons that the Manager and the Sub-Investment Manager felt was beneficial to the Portfolio, such as, but not limited to, achieving risk management, and/or to ensure adequate liquidity, hedging and collateral cover.

As noted above, the Portfolio was invested in compliance with ESG exclusion policies, on a continuous basis. This ensured that investments made by the Portfolio sought to align with international environmental and social safeguards such as the UNGC Principles, the UNGPs, the OECD Guidelines and the ILO Standards.

The Manager and the Sub-Investment Manager believe that these policies prevented investment in issuers that most egregiously violated environmental and/or social minimum standards and ensured that the Portfolio could successfully promote its environmental and social characteristics.

The above steps ensured that robust environmental and social safeguards were in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio was managed in-line with the investment objective and the following actions were taken:

I. Integrating proprietary ESG analysis:

The Manager and the Sub-Investment Manager applied a high standard of due diligence in the selection and ongoing monitoring of investments made by the Portfolio to ensure the integration of Sustainability Risks (as defined in the SFDR) and ESG. The Manager and the Sub-Investment Manager view ESG integration as the practice of incorporating material ESG risks and considerations (as a binding element) into the investment decision-making process. ESG integration sits alongside other financial considerations and should enrich the Manager and the Sub-Investment Manager's investment teams' analysis of issuers by providing a toolkit for identifying material ESG risks and opportunities that inform investment decisions. The Manager and the Sub-Investment Manager believe that material ESG factors are an important driver of long-term investment returns from both an opportunity and a risk-mitigation perspective. Hence, the Manager and the Sub-Investment Manager's ESG integration approach considers ESG opportunities as well as Sustainability Risks.

Before making investments, the investment team conducted due diligence that it deemed reasonable and appropriate based on the facts and circumstances applicable to each investment. The investment team assessed the investment's alignment with the environmental and social characteristics promoted by the Portfolio using (as appropriate) the NB ESG Quotient and exclusionary screens (to identify potential non-compliance with the above listed ESG exclusions). The due diligence was supported by third-party data sources.

The NB ESG Quotient rating for issuers was utilised to help to better identify risks and opportunities in the overall credit and value assessment. The NB ESG Quotient was a key component of the internal credit ratings and helped to identify business risks (including ESG risks), which would cause deterioration in an issuer's credit profile. Internal credit ratings can be notched up or down based on the NB ESG Quotient rating, and this was monitored by the Manager and the Sub-Investment Manager as an important component of the investment process for the Portfolio. By integrating the investment team's proprietary ESG analysis (the NB ESG Quotient) into their internal credit ratings, there was a direct link between their analysis of the Portfolio's environmental and social characteristics and the Portfolio's portfolio construction activities.

II. Engagement:

The Manager and the Sub-Investment Manager engaged with issuers through a robust ESG engagement program. They sought to prioritise constructive engagements and sought to engage on topics (including ESG topics) they determined to be financially material for the relevant issuer. The Manager and the Sub-Investment Manager viewed this engagement with issuers, as an important part of its investment process. Progress on engagement was tracked centrally in the Manager and the Sub-Investment Manager's engagement tracker.

III. ESG sectoral exclusion policies:

To ensure that the environmental and social characteristics promoted by the Portfolio were attained, the Portfolio applied the ESG exclusion policies referenced above, which placed limitations on the investable universe.

How did this financial product perform compared to the reference benchmark?

N/A – The Portfolio has not designated a reference benchmark.

- *How does the reference benchmark differ from a broad market index?*
N/A
- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*
N/A
- *How did this financial product perform compared with the reference benchmark?*
N/A
- *How did this financial product perform compared with the broad market index?*
N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Neuberger Berman Emerging Market Debt Sustainable Investment Grade Blend (the “Portfolio”)

Legal entity identifier: 549300IFJK0FPOE1X496

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

It made sustainable investments with an environmental objective: ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: ____%

No

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 58.6%* of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

*Please refer to the "What was the proportion of sustainability-related investments?" question below for further detail in respect of the minimum proportion of sustainable investments which promoted the environmental or social characteristics.

The most recent SFDR Pre-Contractual Template of the Portfolio can be found [here](#).

This SFDR Periodic Report template reports on the 2023 calendar year (the “Reference Period”). Unless otherwise stated in the relevant disclosure, all Reference Period data has been calculated based on the average of the four calendar quarter ends.

This SFDR Periodic Report template reports on several quantitative ESG data metrics. To assist the reader in their review and assessment of such ESG data metrics, we also have disclosed the Portfolio's data coverage for these ESG data metrics. The intention is that disclosure of the data coverage (of the ESG metrics during the Reference Period) will allow the reader to interpret the ESG data metrics' ability to represent the Portfolio with any limitations to such data coverage in mind.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and social characteristics were promoted by the Portfolio, for sovereign issuers:

- **Environmental Characteristics:** sovereign energy efficiency; climate change adaptation; deforestation; greenhouse gas (“GHG”) emissions; air and household pollution; and unsafe sanitation.
- **Social Characteristics:** progress towards UN Sustainable Development Goals (“SDGs”); health and education levels; regulatory quality; political stability and freedoms; gender equality; and research & development.

The following environmental and social characteristics were promoted by the Portfolio for corporate issuers:

- **Environmental Characteristics:** biodiversity and land usage; carbon emissions; opportunities in clean technologies; water stress; toxic emissions & waste; financing environmental impact; product carbon footprint; environmental policy; environmental management system; GHG reduction programme; green procurement policy; and non-GHG air emissions programmes.
- **Social Characteristics:** health & safety; human capital development; labour management; privacy & data security; product safety & quality; financial products safety; discrimination policy; community involvement programmes; diversity programmes; and human rights policy.

In aiming to align the Portfolio with a net zero goal, the Manager and the Sub-Investment Manager promoted and will continue to promote the reduction of the Portfolio’s carbon footprint across scope 1, 2, and material scope 3 GHG emissions¹. There is no annual reduction target, instead the reduction target focuses on the 2030 interim target and 2050 net zero goal.

Performance in relation to these environmental and social characteristics was measured through the NB ESG Quotient, and is reported, in aggregate, below.

While the sustainable investments held by the Portfolio had either a social or an environmental objective, such sustainable investments do not qualify as environmentally sustainable investments (or Taxonomy aligned investments) as defined under the EU Taxonomy.

¹ Scope 1 emissions are direct emissions from an issuer’s owned or controlled sources (such as emissions created directly by the issuer’s business processes or from vehicles owned by the issuer). Scope 2 emissions are indirect emissions from the generation of electricity, steam, heating and cooling consumed by the issuer. Scope 3 emissions are all other indirect emissions that occur in an issuer’s value chain (such as emissions from products or services consumed by the issuer, disposal of its waste, employee commuting, distribution and transport of its products or its investments).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

As part of the investment process, the Manager and the Sub-Investment Manager considered a variety of sustainability indicators to measure the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators are listed below:

1. The NB ESG Quotient:

The proprietary Neuberger Berman ESG rating system (the “**NB ESG Quotient**”), is built around the concept of sector specific ESG risk and opportunity, and produced an overall ESG rating for issuers by assessing them against certain ESG metrics.

The NB ESG Quotient assigned weightings to environmental, social and governance characteristics for each sector to derive the NB ESG Quotient rating. While the NB ESG Quotient rating of issuers was considered as part of the investment process, there is no minimum NB ESG Quotient rating to be attained by an issuer prior to investment. The Manager and the Sub-Investment Manager used the NB ESG Quotient to promote the environmental and social characteristics listed by prioritising investment in securities issued by issuers with a relatively favourable and/or an improving NB ESG Quotient rating. The Portfolio did not invest in issuers which rank in the bottom decile in terms of their NB ESG Quotient, with no near term improvement prospects.

The Reference Period data was calculated by averaging the data of the four calendar quarter ends.

Reference Period	Rating	Range	Combined Coverage
NB ESG Quotient	57	1-100	99%
Third-Party Data	4.8	0-10	

With regards to the NB ESG Quotient rating, a rating between 1 – 100 is used where 1 is the lowest rating and 100 is the highest rating. This Portfolio does not have a minimum NB ESG Quotient rating to be attained by a company prior to investment.

The average NB ESG Quotient rating is a weighted average that reflects the ESG characteristics that were considered to be the most material drivers of ESG risk and opportunity for each issuer held in the Portfolio. It is not an ESG assessment or rating of the overall Portfolio and its promotion of environmental and social characteristics but rather an assessment of the material ESG risks and opportunities the Portfolio had exposure to.

Third-party data was also used to measure the resilience of the Portfolio's aggregate holdings to long-term, financially material, ESG risks. The third-party data ratings range from 0-10, with 0 being the lowest rating and 10 being the highest rating.

Assessment and management of material ESG risks and opportunities is an essential element of the Portfolio's promotion of environmental and social characteristics.

2. ESG exclusion policies:

To ensure that the environmental or social characteristics promoted by the Portfolio were attained, the Portfolio did not invest in issuers whose activities had been identified as breaching, or were not consistent with, the Neuberger Berman Controversial Weapons Policy; the Neuberger Berman Thermal Coal Involvement Policy; the Neuberger Berman Sustainable Exclusion Policy; and the Neuberger Berman the Enhanced Sustainable Exclusion Policy. From 6 December 2023, the Portfolio excluded companies from the investment universe that manufacture

incendiary weapons using white phosphorus or that had an industry tie to nuclear weapons. The Portfolio excluded securities issued by companies that derived 5% or more of revenue from the production of adult entertainment materials or the production of conventional weapons. Furthermore, investments held by the Portfolio did not invest in issuers whose activities had been identified as breaching, or were not consistent with, the Neuberger Berman Global Standards Policy which excluded identified violators of (i) the United Nations Global Compact Principles (“**UNGC Principles**”), (ii) the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct (“**OECD Guidelines**”), (iii) the United Nations Guiding Principles on Business and Human Rights (“**UNGPs**”) and (iv) the International Labour Standards (“**ILO Standards**”). The Portfolio also excluded issuers from the investment universe that were involved in the manufacturing of fur, gambling or nuclear power. From 2 August 2023, the Manager and the Sub-Investment Manager did not invest in debt securities and money market instruments issued by sovereign issuers which were identified by the Manager and the Sub-Investment Manager as having weak ESG practices. Such exclusions were based on a number of ESG criteria, including the following:

- Sovereign issuers which were ranked in the bottom decile based on the NB ESG Quotient, with no near term improvement prospects; or
- Sovereign issuers which have been excluded from the J.P. Morgan ESG EMBI Global Diversified Index (Total Return, USD) based on ESG considerations; or
- Sovereign issuers where top officials have been sanctioned by the UN Security Council based on human rights violations; or
- Sovereign issuers which were assessed as having high and increasing GHG intensity levels; or
- Sovereign issuers which were assessed as having poor and deteriorating human rights and rule of law metrics; or
- Sovereign issuers which were non-compliant with the standard put forth by the OECD’s Global Forum on Transparency and Exchange of Information for Tax Purposes, or sovereign issuers that were classified as a high risk jurisdiction subject to a call for action by the Financial Action Task Force (“**FATF**”).

When applying ESG exclusions to the Portfolio, the Manager and the Sub-Investment Manager used third-party data to identify issuers in breach of the ESG exclusions listed above. Where possible, the Manager and the Sub-Investment Manager sought to overlay this third-party data with qualitative expertise from their research analysts to establish a current and holistic picture of the issuer. The Manager and the Sub-Investment Manager discussed and debated the differences between the violators identified by the third-party data and those identified as a result of their research, which drew upon data from the NB ESG Quotient and direct engagements with the issuer.

● ...and compared to previous periods?

For the 2022 reference period, the quantitative data disclosed (for the sustainability indicators) was calculated as at 31 December 2022, being the only quarter end in the reference period that followed the entry into force of the SFDR RTS (which included the publication of the SFDR pre-contractual disclosures templates).

The below sustainability indicators’ quantitative data for the Reference Period was calculated by averaging the four calendar quarter ends.

1. The NB ESG Quotient

	NB ESG Quotient Rating	Third-Party Data Rating	Combined Coverage
Range	1-100	0-10	0-100%
2022 reference period	56	4.8	97%
2023 reference period	57	4.8	99%

Year-on-year, the NB ESG Quotient rating has improved and the third-party data rating has remained unchanged. This is due to changes associated with issuers held and trading activity, as well as due to differences in the issuer's third-party rating by the provider.

2. Exclusions

Consistent with the previous calendar year, there were no breaches (of the above listed ESG exclusions) during the Reference Period.

	Total number of breaches
2022 reference period	0
2023 reference period	0

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the Portfolio promoted environmental and social characteristics, this Portfolio did not have a sustainable investment objective. However, the Portfolio held sustainable investments which promoted the environmental & social characteristics listed above.

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to NB's sustainable investment framework. This framework included an assessment as to (i) whether the investment contributes to an environmental and/or social objective; (ii) whether the investment causes significant harm to those objectives as described below; and (iii) an assessment of an issuers' overall governance rating to determine whether the issuer passes a good governance assessment.

Under this sustainable investment framework, the Manager and the Sub-Investment Manager utilised multiple datapoints that measured the alignment of an issuer's economic activity with environmental or social characteristics.

The Manager and the Sub-Investment Manager screened issuers for controversies, significant harm and violations of minimum safeguards. If the issuers passed this screen, the Manager and the Sub-Investment Manager then proceeded to measure the issuers' environmental or social economic contribution.

For corporate issuers, the Manager and the Sub-Investment Manager measured this in two ways:

- Revenue alignment to the EU taxonomy (if any); and
- Revenue alignment to the UN Sustainable Development Goals ("SDGs").

Consideration of revenue alignment with the SDGs, in the Manager's and the Sub-Investment Manager's subjective view, was limited by the availability of adequate, reliable and verifiable data coverage. To mitigate instances of poor data coverage, the Manager and the Sub-

Investment Manager utilised third-party data and proxy data along with internal research and qualitative analysis as part of NB's sustainable investment framework.

For sovereign issuers, the Manager and the Sub-Investment Manager measured this in the following ways:

- Advancement in climate change adaptation and mitigation; and
- Advancement in achieving the SDGs, with emphasis on life expectancy and education.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Manager and the Sub-Investment Manager applied its sustainable investment framework, which aims to identify and exclude investments that cause significant harm to environmental or social objectives. To determine whether an investment caused significant harm, the Manager and the Sub-Investment Manager considered significant harm with reference to certain principal adverse impact indicators and violations of minimum safeguards.

The Manager and the Sub-Investment Manager took into account the principal adverse impacts indicators outlined in the below table (the “**PAIs**”) and the principal adverse impacts for sovereign issuers (as outlined in Part 2 of the table set out in the “*How did this financial product consider principal adverse impacts on sustainability factors?*” section below) (the “**Sovereign PAIs**”) when determining whether the sustainable investments that the Portfolio made, did not cause significant harm to any environmental or social sustainable investment objective:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAIs	
Theme	Adverse sustainability indicator
<i>Greenhouse gas emissions</i>	PAI 1 - GHG emissions PAI 2 - Carbon footprint PAI 3 - GHG intensity of investee companies PAI 4 - Exposure to companies active in the fossil fuel sector PAI 5 - Share of non-renewable energy consumption and production PAI 6 - Energy consumption intensity per high impact climate sector
<i>Biodiversity</i>	PAI 7 - Activities negatively affecting biodiversity-sensitive areas
<i>Water</i>	PAI 8 - Emissions to water
<i>Waste</i>	PAI 9 - Hazardous waste and radioactive waste ratio
<i>Social and employee matters</i>	PAI 10 - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

	<p>PAI 11 - Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises</p> <p>PAI 12 - Unadjusted gender pay gap</p> <p>PAI 13 - Board gender diversity</p> <p>PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)</p>
--	---

Consideration of the PAIs was limited by the availability (in the Manager's and the Sub-Investment Manager's subjective view) of adequate, reliable and verifiable data coverage. The Manager and the Sub-Investment Manager utilised third-party data and proxy data along with internal research to consider the PAIs.

The Manager and the Sub-Investment Manager also considered violations of minimum safeguards. The Manager and the Sub-Investment Manager did not invest in issuers whose activities had been identified as breaching, or were not consistent with, the OECD Guidelines, UNGC Principles, ILO Standards and UNGPs, captured through the Neuberger Berman Global Standards Policy.

The combination of all of these factors generated a quantitative validation for "sustainability" which was used to ensure the sustainable investments that the Portfolio made, did not cause significant harm to any environmental or social sustainable objective.

— — —

How were the indicators for adverse impacts on sustainability factors taken into account?

Consideration of the PAIs by the Manager and the Sub-Investment Manager, when determining whether the sustainable investments that the Portfolio made did not cause significant harm to any environmental or social sustainable investment objective of the Portfolio's sustainable investments, was through a combination of:

- Monitoring issuers which fell below the quantitative and qualitative tolerance thresholds set for each PAI by the Manager and the Sub-Investment Manager;
- Stewardship and/or setting engagement objectives with issuers which fell below the quantitative and qualitative tolerance thresholds set for a PAI by the Manager and the Sub-Investment Manager; and
- Application of the ESG exclusion policies referenced above, which included consideration of several of the PAIs.

— — —

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Manager and the Sub-Investment Manager did not invest in issuers whose activities had been identified as breaching, or were not consistent with, the OECD Guidelines, UNGC Principles, ILO Standards and UNGPs, captured through the Neuberger Berman Global Standards Policy.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

N/A - The Portfolio did not commit to holding Taxonomy-aligned investments.

How did this financial product consider principal adverse impacts on sustainability factors?

A selection of the principal adverse impact indicators were considered directly (e.g. through the ESG exclusion policies listed above) and/or indirectly (e.g. as part of the Manager's and the Sub-Investment Manager's assessment of issuers) throughout the Reference Period.

The Manager and the Sub-Investment Manager considered PAIs with respect to the Portfolio in two ways:

- I. All PAIs and Sovereign PAIs were taken into account when determining whether sustainable investments that the Portfolio made did not cause significant harm to any environmental or social sustainable investment objective as explained in “*How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*” above.
- II. The Manager and the Sub-Investment Manager considered the principal adverse impacts outlined in the Part 1 of the below table for corporate issuers (the “**Corporate Issuer PAIs**”) and considered the Sovereign PAIs as outlined below in Part 2 for sovereign issuers when considering the principal adverse impacts on sustainability factors (together the “**Product Level PAIs**”):

Part 1 – Corporate Issuer PAIs	
Theme	Adverse sustainability indicator
Greenhouse gas emissions	PAI 1 - GHG emissions PAI 2 - Carbon footprint PAI 3 - GHG intensity of investee companies PAI 4 - Exposure to companies active in the fossil fuel sector

<i>Social and employee matters</i>	PAI 10 - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises PAI 13 - Board gender diversity PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
Part 2 – Sovereign PAIs	
<i>Environmental</i>	PAI 15 - GHG intensity
<i>Social</i>	PAI 16 - Investee countries subject to social violations

Consideration of the Product Level PAIs was limited by the availability (in the Manager's and the Sub-Investment Manager's subjective view) of adequate, reliable and verifiable data coverage,. The Manager and the Sub-Investment Manager utilised third-party data and proxy data along with internal research to consider the Product Level PAIs.

Consideration of the Product Level PAIs by the Manager and the Sub-Investment Manager was through a combination of:

- Monitoring the Portfolio, in particular where it fell below the quantitative and qualitative tolerance thresholds set for each Product Level PAI by the Manager and the Sub-Investment Manager;
- Stewardship and/or setting engagement objectives where the Portfolio fell below the quantitative and qualitative tolerance thresholds set for a Product Level PAI by the Manager and the Sub-Investment Manager; and
- Application of the ESG exclusion policies referenced above, which included consideration of several of the Product Level PAIs.

What were the top investments of this financial product?

The Manager and the Sub-Investment Manager have used the EU statistical classification of economic activities ("**NACE**") economic sector breakdown to identify the economic sectors of the Portfolio's top 15 investments.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2023 - 31 December 2023

As the list below is based on an average calculated across the four calendar quarter ends of the Reference Period, this may differ from the top investments of the Portfolio calculated as at 31 December 2023 in the "Schedule of Investments" section of the financial statements.

Largest investments	Sector	% Assets	Country
THAILAND KINGDOM OF (GOVERNMENT)	O - Public administration and defence; compulsory social security*	1.1%	Thailand
CHINA PEOPLES REPUBLIC OF (GOVERNMENT)	O - Public administration and defence; compulsory social security*	1.1%	China
CHINA PEOPLES REPUBLIC OF (GOVERNMENT)	O - Public administration and defence; compulsory social security*	0.9%	China
MEXICO (UNITED MEXICAN STATES) (GOVERNMENT)	O - Public administration and defence; compulsory social security*	0.8%	Mexico
INDONESIA REPUBLIC OF	O - Public administration and defence; compulsory social security*	0.8%	Indonesia

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

- The Portfolio aims to hold a minimum of 80% investments that are aligned with the environmental or social characteristics promoted by the Portfolio. During the Reference Period, the Portfolio held 92.2% investments that were aligned with the environmental or social characteristics promoted by the Portfolio.
- The Portfolio committed to holding at least 50% sustainable investments. During the 2023 Reference Period, the Portfolio held 58.6% sustainable investments.
- The Portfolio aims to hold a maximum of 20% investments that are not aligned with the environmental or social characteristics promoted by the Portfolio and are not sustainable investments, and which fall into the “Other” section of the Portfolio. During the Reference Period, the Portfolio held 7.8% “Other” investments.

The Manager and the Sub-Investment Manager calculated the proportion of investments aligned with the environmental and/or social characteristics promoted by the Portfolio by reference to the proportion of issuers in the Portfolio: i) that held either an NB ESG Quotient rating or a third-party equivalent ESG rating that was used as part of the portfolio construction and investment management process of the Portfolio; and/or ii) with whom the Manager and the Sub-Investment Manager had engaged directly. This calculation was based on a mark-to-market assessment of the Portfolio and may be based on incomplete or inaccurate issuer or third-party data. The Reference Period data was calculated by averaging the data of the four calendar quarter ends.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The Reference Period data was calculated by averaging the data of the four calendar quarter ends.

Economic Sector – NACE	% Assets
B - Mining and quarrying	1.5%
C - Manufacturing	2.3%
D - Electricity, gas, steam and air conditioning supply	0.4%
G - Wholesale and retail trade; repair of motor vehicles and motorcycles	0.7%
H - Transporting and storage	1.2%
J - Information and communication	1.1%
K - Financial and insurance activities	8.3%
O - Public administration and defence; compulsory social security*	82.1%
U - Activities of extraterritorial organisations and bodies	2.0%
None	0.4%

**O - Public administration and defence; compulsory social security is classified by Barclays Industry as either: Sovereign, Treasury, Foreign Local Government, Supranational, Foreign Agencies*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

- **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The analysis and disclosure requirements introduced by the EU Taxonomy are very detailed and compliance with them requires the availability of multiple, specific data points in respect of each investment which the Portfolio made. The Manager and the Sub-Investment Manager cannot confirm that the Portfolio invested in any investments that qualified as environmentally sustainable for the purposes of the EU Taxonomy. Disclosures and reporting on Taxonomy alignment will develop as the EU framework evolves and data is made available by issuers. The Manager and the Sub-Investment Manager will keep the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy under active review as data availability and quality improves.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy²?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

² Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A – the Portfolio did not commit to holding Taxonomy-aligned investments.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A – the Portfolio did not commit to holding Taxonomy-aligned investments in this or the previous reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Portfolio held 25.6% sustainable investments with an environmental objective not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The Portfolio held 33.0% socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” included the remaining investments of the Portfolio (including but not limited to any derivatives or any security collateralized by a pool of similar assets or receivables listed in the Supplement for the Portfolio) which were neither aligned with the environmental or social characteristics, nor qualified as sustainable investments.

The “Other” section in the Portfolio was held for a number of reasons that the Manager and the Sub-Investment Manager felt was beneficial to the Portfolio, such as, but not limited to, achieving risk management, and/or to ensure adequate liquidity, hedging and collateral cover.

As noted above, the Portfolio was invested in compliance with ESG exclusion policies, on a continuous basis. This ensured that investments made by the Portfolio sought to align with international environmental and social safeguards such as the UNGC Principles, the UNGPs, the OECD Guidelines and the ILO Standards.

The Manager and the Sub-Investment Manager believe that these policies prevented investment in issuers that most egregiously violated environmental and/or social minimum standards and ensured that the Portfolio could successfully promote its environmental and social characteristics.

The above steps ensured that robust environmental and social safeguards were in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio was managed in-line with the investment objective and the following actions were taken:

I. Integrating proprietary ESG analysis:

The Manager and the Sub-Investment Manager applied a high standard of due diligence in the selection and ongoing monitoring of investments made by the Portfolio to ensure the integration of Sustainability Risks (as defined in the SFDR) and ESG. The Manager and the Sub-Investment Manager view ESG integration as the practice of incorporating material ESG risks and considerations (as a binding element) into the investment decision-making process. ESG integration sits alongside other financial considerations and should enrich the Manager and the Sub-Investment Manager's investment teams' analysis of issuers by providing a toolkit for identifying material ESG risks and opportunities that inform investment decisions. The Manager and the Sub-Investment Manager believe that material ESG factors are an important driver of long-term investment returns from both an opportunity and a risk-mitigation perspective. Hence, the Manager and the Sub-Investment Manager's ESG integration approach considers ESG opportunities as well as Sustainability Risks.

Before making investments, the investment team conducted due diligence that it deemed reasonable and appropriate based on the facts and circumstances applicable to each investment. The investment team assessed the investment's alignment with the environmental and social characteristics promoted by the Portfolio using (as appropriate) the NB ESG Quotient and exclusionary screens (to identify potential non-compliance with the above listed ESG exclusions). The due diligence was supported by third-party data sources.

The NB ESG Quotient rating for issuers was utilised to help to better identify risks and opportunities in the overall credit and value assessment. The NB ESG Quotient was a key component of the internal credit ratings and helped to identify business risks (including ESG risks), which would cause deterioration in an issuer's credit profile. Internal credit ratings can be notched up or down based on the NB ESG Quotient rating, and this was monitored by the Manager and the Sub-Investment Manager as an important component of the investment process for the Portfolio. By integrating the investment team's proprietary ESG analysis (the NB ESG Quotient) into their internal credit ratings, there was a direct link between their analysis of the Portfolio's environmental and social characteristics and the portfolio construction activities.

II. Engagement:

The Manager and the Sub-Investment Manager engaged with issuers through a robust ESG engagement program. They sought to prioritise constructive engagements and sought to engage on topics (including ESG topics) they determined to be financially material for the relevant issuer. The Manager and the Sub-Investment Manager viewed this engagement with issuers, as an important part of its investment process. Progress on engagement was tracked centrally in the Manager's and the Sub-Investment Manager's engagement tracker.

III. ESG sectoral exclusion policies:

To ensure that the environmental and social characteristics promoted by the Portfolio were attained, the Portfolio applied the ESG exclusion policies referenced above, which placed limitations on the investable universe.

How did this financial product perform compared to the reference benchmark?

N/A – The Portfolio has not designated a reference benchmark.

- *How does the reference benchmark differ from a broad market index?*
N/A
- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*
N/A
- *How did this financial product perform compared with the reference benchmark?*
N/A
- *How did this financial product perform compared with the broad market index?*
N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Neuberger Berman Emerging Markets Equity Fund (the “Portfolio”)

Legal entity identifier: 549300XPW2SIPQYGFT52

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<div><div><div></div><div></div><div></div></div> Yes</div>	<div><div><div></div><div></div><div></div></div> No</div>

The most recent SFDR Pre-Contractual Template of the Portfolio can be found [here](#).

This SFDR Periodic Report template reports on the 2023 calendar year (the “Reference Period”). Unless otherwise stated in the relevant disclosure, all Reference Period data has been calculated based on the average of the four calendar quarter ends.

This SFDR Periodic Report template reports on several quantitative ESG data metrics. To assist the reader in their review and assessment of such ESG data metrics, we have disclosed the Portfolio’s data coverage for these ESG data metrics. The intention is that disclosure of the data coverage (of the ESG metrics during the Reference Period) will allow the reader to interpret the ESG data metrics’ ability to represent the Portfolio with any limitations to such data coverage in mind.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and social characteristics were promoted by the Portfolio:

- **Environmental Characteristics:** air quality; energy management; environmental risk exposure; fuel economy; greenhouse gas (“GHG”) emissions; opportunities in clean technologies; toxic emissions & waste; water management; packaging lifecycle management; materials sourcing; and product lifecycle management.
- **Social Characteristics:** access to finance; access to healthcare; data privacy & security; health & safety; human capital development; labour management; product safety & integrity; supply chain labour standards.

Performance in relation to these environmental and social characteristics was measured through the NB ESG Quotient, and is reported, in aggregate, below.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

As part of the investment process, the Sub-Investment Manager considered a variety of sustainability indicators to measure the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators are listed below:

1. The NB ESG Quotient:

The proprietary Neuberger Berman ESG rating system (the “NB ESG Quotient”), is built around the concept of sector specific ESG risk and opportunity, and produced an overall ESG rating for companies by assessing them against certain ESG metrics.

Foundational to the NB ESG Quotient is the proprietary Neuberger Berman (“NB”) materiality matrix, which focuses on the ESG characteristics that were considered to be the most likely to be the material drivers of ESG risk and opportunity for each sector in Emerging Markets. Each sector criteria is constructed using third-party and internally derived ESG data and supplemented with internal qualitative analysis, leveraging the Portfolio's analyst team's significant sector expertise. The NB materiality matrix enabled the Sub-Investment Manager to derive the NB ESG Quotient rating, to compare sectors and companies in Emerging Markets relative to their environmental and social characteristics.

By embedding local insight into the global NB materiality matrix, the Sub-Investment Manager leveraged the global NB materiality matrix and customized material ESG characteristics to ensure that they were bespoke for Emerging Markets. The NB materiality matrix fully considered the long-term ESG characteristics that affected the development of Emerging Markets' industries and companies and sought out companies that were value drivers in the Emerging Markets.

The NB ESG Quotient assigned weightings to environmental, social and governance characteristics for each sector to derive the NB ESG Quotient rating for companies. While the NB ESG Quotient rating of companies was considered as part of the investment process, there is no minimum NB ESG Quotient rating to be attained by a company prior to investment. Companies with a favourable and/or an improving NB ESG Quotient rating had a higher chance of being included in the Portfolio. Companies with a poor NB ESG Quotient rating, especially where a poor NB ESG Quotient rating was not being addressed by a company, were more likely to be removed from the investment universe or were divested from the Portfolio.

The Reference Period data was calculated by averaging the data of the four calendar quarter ends.

Reference Period	Rating	Range	Combined Coverage
NB ESG Quotient	ES: B G: 2.7	ES: A-D G: 1-4	90%
Third-Party Data	5.9	0-10	

With regards to the NB ESG Quotient rating, for environmental and social (“**ES**”) ratings, A – D quartiles are used, where A is the highest rating (top quartile), and D is the lowest rating (bottom quartile). For governance (“**G**”) ratings, 1 – 4 quartiles are used where 1 is the highest rating, and 4 is the lowest rating. This Portfolio does not have a minimum NB ESG Quotient rating to be attained by a company prior to investment. .

The average NB ESG Quotient rating is a weighted average that reflects the ESG characteristics that were considered to be the most material drivers of ESG risk and opportunity for each company held in the Portfolio. It is not an ESG assessment or rating of the overall Portfolio and its promotion of environmental and social characteristics but rather an assessment of the material ESG risks and opportunities the Portfolio had exposure to.

Third-party data was also used to measure the resilience of the Portfolio's aggregate holdings to long-term, financially material, ESG risks. The third-party data ratings range from 0-10, with 0 being the lowest rating and 10 being the highest rating.

Assessment and management of material ESG risks and opportunities is an essential element of the Portfolio's promotion of environmental and social characteristics.

2. Climate Value-at-Risk:

Over the Reference Period, Climate Value-at-Risk (“**CVaR**”) measured the exposure to transition and physical climate risks and opportunities for companies. CvaR is a scenario analysis tool evaluating economic risks and opportunities under various degree scenarios (i.e., the amount of warming targeted) and potential regulatory environments in varying countries.

CvaR is a type of scenario analysis which is defined as the present value of aggregated future policy risk costs, technology opportunity profits, and extreme weather event costs and profits, expressed as a percentage of a security's or portfolio's market value (i.e. potential gain or loss) according to the warming scenario targeted.

By calculating the financial risks and opportunities from climate change per security and per scenario, CVaR provides a framework that helps quantify and understand these risks and opportunities. The CVaR metric provides insight into the climate-stressed valuation of assets based on specific degree scenarios, providing an assessment on how much a security may stand to lose or gain from the impact of climate change.

For the Reference Period, CVaR projected that a warming climate scenario could result in a loss of 29.6% in the valuation of assets under assessment. The Reference Period data has been calculated based on the average of the four calendar quarter ends.

This analysis is intended as a broad overview of the investment team's style and investment process.

On a holistic basis, the results were evaluated by the Sub-Investment Manager's portfolio managers and analysts. The scenario analysis served as a starting point for further bottom-up analysis and identifying potential climate-related risks to address through company engagement.

Due to data limitations, CVaR was not applied across all companies held by the Portfolio and was instead limited to the companies for which the Sub-Investment Manager had sufficient and reliable data. The Portfolio had a CVaR coverage of 90% and this is an average of the CVaR coverage across the four calendar quarter ends.

The analysis from CVaR is reviewed at least once a year.

3. ESG exclusion policies:

To ensure that the environmental or social characteristics promoted by the Portfolio were attained, the Portfolio did not invest in companies whose activities had been identified as breaching, or were not consistent with, the Neuberger Berman Controversial Weapons Policy and the Neuberger Berman Thermal Coal Involvement Policy. In addition to the application of the Neuberger Berman Thermal Coal Involvement Policy, the Sub-Investment Manager prohibited the initiation of new investment positions in companies that (i) derived more than 25% of their revenue from thermal coal mining; or (ii) were expanding new thermal coal power generation. Furthermore, investments held by the Portfolio did not invest in companies whose activities had been identified as breaching, or were not consistent with, the Neuberger Berman Global Standards Policy which excluded identified violators of (i) the United Nations Global Compact Principles ("**UNGC Principles**"), (ii) the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct ("**OECD Guidelines**"), (iii) the United Nations Guiding Principles on Business and Human Rights ("**UNGPs**") and (iv) the International Labour Standards ("**ILO Standards**").

When applying ESG exclusions to the Portfolio, the Sub-Investment Manager used third-party data to identify companies in breach of the ESG exclusions listed above. Where possible, the Sub-Investment Manager sought to overlay this third-party data with qualitative expertise from their research analysts to establish a current and holistic picture of the company. The Sub-Investment Manager discussed and debated the differences between the violators identified by the third-party data and those identified as a result of their research, which drew upon data from the NB ESG Quotient and direct engagements with the company.

● *...and compared to previous periods?*

For the 2022 reference period, the quantitative data disclosed (for the sustainability indicators) was calculated as at 31 December 2022, being the only quarter end in the reference period that followed the entry into force of the SFDR RTS (which included the publication of the SFDR pre-contractual disclosures templates).

The below sustainability indicators' quantitative data for the Reference Period was calculated by averaging the four calendar quarter ends.

1. NB ESG Quotient

	NB ESG Quotient Rating	Third-Party Data Rating	Combined Coverage
Range	ES: A-D G: 1-4	0-10	0-100%
2022 reference period	ES: B G: 2.0	5.6	95%
2023 reference period	ES: B G: 2.7	5.9	90%

Year-on-year, the NB ESG Quotient ES rating has remained unchanged, the NB ESG Quotient G rating has declined and the third-party data rating has improved. This may be due to an improvement in individual companies according to the third-party data provider, or due to differences in the company's third-party rating by the provider.

Year-on-year, the combined coverage of the NB ESG Quotient and the third-party rating has moved due to changes associated with companies held and trading activity within the Portfolio.

2. CVaR

	CVaR	Coverage
2022 reference period	-28.8%	91%
2023 reference period	-29.6%	90%

Year-on-year, the CVaR projection has moved due to changes associated with companies held and trading activity within the Portfolio.

3. Exclusions

	Total number of breaches
2022 reference period	0
2023 reference period	0

Consistent with the previous calendar year, there were no breaches (of the above listed ESG exclusions) during the Reference Period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A – the Portfolio did not commit to holding sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A – the Portfolio did not commit to holding sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio did not commit to holding sustainable investments, however, the Sub-Investment Manager did not invest in companies whose activities had been identified as breaching, or were not consistent with, the OECD Guidelines, UNGC Principles, ILO Standards and UNGPs, captured through the Neuberger Berman Global Standards Policy.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

N/A – The Portfolio did not commit to holding Taxonomy-aligned investments.

How did this financial product consider principal adverse impacts on sustainability factors?

A selection of the principal adverse impact indicators were considered directly (e.g. through the ESG exclusion policies listed above) and/or indirectly (e.g. as part of the Sub-Investment Manager's assessment of companies) throughout the Reference Period.

The Sub-Investment Manager considered the principal adverse impacts outlined in the below table on sustainability factors (the “**Product Level PAIs**”):

Product Level PAIs	
Theme	Adverse sustainability indicator
<i>Greenhouse gas emissions</i>	PAI 1 - GHG emissions PAI 2 - Carbon footprint PAI 3 - GHG intensity of investee companies PAI 4 - Exposure to companies active in the fossil fuel sector
<i>Social and employee matters</i>	PAI 10 - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises PAI 13 - Board gender diversity PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Consideration of the Product Level PAIs was limited by the availability (in the Sub-Investment Manager's subjective view) of adequate, reliable and verifiable data coverage. The Sub-Investment Manager utilised third-party data and proxy data along with internal research to consider the Product Level PAIs.

Consideration of the Product Level PAIs by the Sub-Investment Manager was through a combination of:

- Monitoring the Portfolio, in particular where it fell below the quantitative and qualitative tolerance thresholds set for each Product Level PAI by the Sub-Investment Manager;
- Stewardship and/or setting engagement objectives where the Portfolio fell below the quantitative and qualitative tolerance thresholds set for a Product Level PAI by the Sub-Investment Manager; and
- Application of the ESG exclusion policies referenced above, which included consideration of several of the Product Level PAIs.

What were the top investments of this financial product?

The Sub-Investment Manager has used the EU statistical classification of economic activities ("**NACE**") economic sector breakdown to identify the economic sectors of the Portfolio's top 15 investments.

As the list below is based on an average calculated across the four calendar quarter ends of the Reference Period, this may differ from the top investments of the Portfolio calculated as at 31 December 2023 in the "Schedule of Investments" section of the financial statements.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2023 - 31 December 2023

Largest investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING	C - Manufacturing	8.1%	Taiwan (Republic of China)
SAMSUNG ELECTRONICS LTD	C - Manufacturing	5.8%	Korea (South), Republic of
TENCENT HOLDINGS LTD	J - Information and Communication	5.0%	China
ALIBABA GROUP HOLDING LTD	G - Wholesale and Retail trade; Repair of Motor Vehicles and Motorcycles	3.5%	China
ICICI BANK LTD	K - Financial and insurance activities	2.2%	India
SK HYNIX INC	C - Manufacturing	2.1%	Korea (South), Republic of
RELIANCE INDUSTRIES LTD	C - Manufacturing	1.5%	India
INDUSIND BANK LTD	K - Financial and insurance activities	1.5%	India
HDFC BANK LTD	K - Financial and insurance activities	1.4%	India
UNI-PRESIDENT ENTERPRISES CORP	G - Wholesale and Retail trade; Repair of Motor Vehicles and Motorcycles	1.3%	Taiwan (Republic of China)
APOLLO HOSPITALS ENTERPRISE LTD	Q - Human health and social work activities	1.2%	India
LG CHEM LTD	C - Manufacturing	1.2%	Korea (South), Republic of
BID CORPORATION LTD	I - Accommodation and food service activities	1.2%	South Africa
RIO TINTO PLC	B - Mining and Quarrying	1.2%	Australia
PETROLEO BRASILEIRO PREF SA	C - Manufacturing	1.1%	Brazil

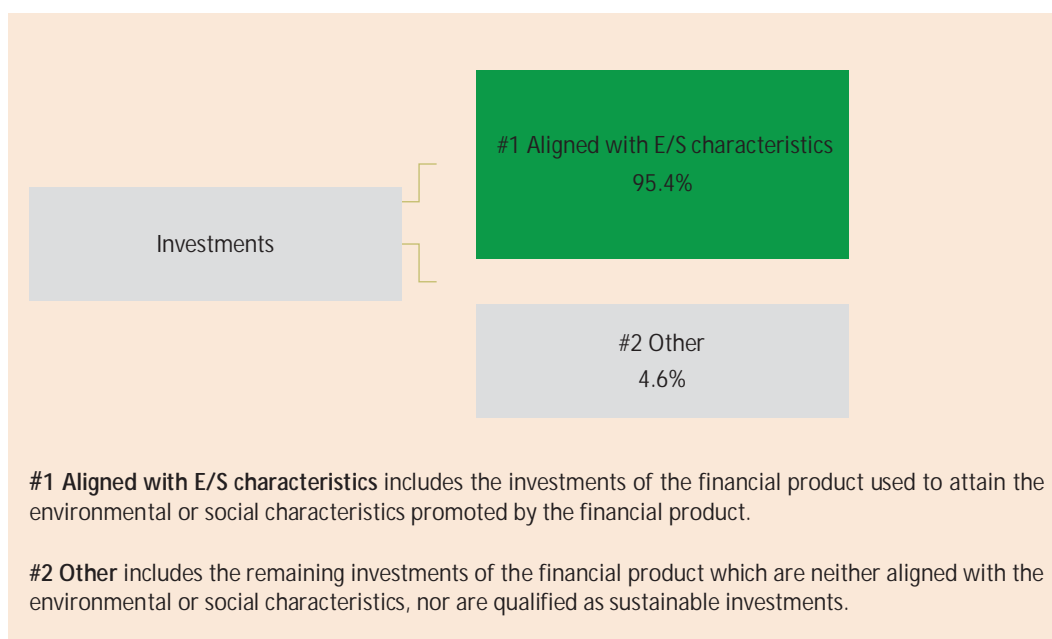

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

- The Portfolio aims to hold a minimum of 80% investments that are aligned with the environmental or social characteristics promoted by the Portfolio. During the Reference Period, the Portfolio held 95.4% investments that were aligned with the environmental or social characteristics promoted by the Portfolio.
- The Portfolio aims to hold a maximum of 20% investments that are not aligned with the environmental or social characteristics promoted by the Portfolio and are not sustainable investments, and which fall into the “Other” section of the Portfolio. During the Reference Period, the Portfolio held 4.6% “Other” investments.

The Sub-Investment Manager calculated the proportion of investments aligned with the environmental and/or social characteristics promoted by the Portfolio by reference to the proportion of companies in the Portfolio: i) that held either an NB ESG Quotient rating or a third-party equivalent ESG rating that was used as part of the portfolio construction and investment management process of the Portfolio; and/or ii) with whom the Sub-Investment Manager had engaged directly. This calculation was based on a mark-to-market assessment of the Portfolio and may be based on incomplete or inaccurate company or third-party data. The Reference Period data was calculated by averaging the data of the four calendar quarter ends.

In which economic sectors were the investments made?

The Reference Period data was calculated by averaging the data of the four calendar quarter ends.

Economic Sector – NACE	% Assets
B - Mining and quarrying	4.7%

C - Manufacturing	42.2%
D - Electricity, gas, steam and air conditioning supply	0.4%
F - Construction	1.4%
G - Wholesale and retail trade; repair of motor vehicles and motorcycles	10.1%
H - Transporting and storage	0.8%
I - Accommodation and food service activities	2.6%
J - Information and communication	9.4%
K - Financial and insurance activities	22.9%
L - Real estate activities	0.3%
M - Professional, scientific and technical activities	0.9%
N - Administrative and support service activities	1.1%
Q - Human health and social work activities	1.8%
R - Arts, entertainment and recreation	0.4%
None	0.9%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

- **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The analysis and disclosure requirements introduced by the EU Taxonomy are very detailed and compliance with them requires the availability of multiple, specific data points in respect of each investment which the Portfolio made. The Sub-Investment Manager cannot confirm that the Portfolio invested in any investments that qualified as environmentally sustainable for the purposes of the EU Taxonomy. Disclosures and reporting on Taxonomy alignment will develop as the EU framework evolves and data is made available by companies. The Sub-Investment Manager will keep the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy under active review as data availability and quality improves.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A – the Portfolio did not commit to holding Taxonomy-aligned investments.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A – the Portfolio did not commit to holding Taxonomy-aligned investments in this or the previous reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A – the Portfolio did not commit to holding sustainable investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A – the Portfolio did not commit to holding sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” included the remaining investments of the Portfolio (including but not limited to any derivatives or any security collateralized by a pool of similar assets or receivables listed in the Supplement for the Portfolio) which were neither aligned with the environmental or social characteristics, nor qualified as sustainable investments.

The “Other” section in the Portfolio was held for a number of reasons that the Sub-Investment Manager felt was beneficial to the Portfolio, such as, but not limited to, achieving risk management, and/or to ensure adequate liquidity, hedging and collateral cover.

As noted above, the Portfolio was invested in compliance with ESG exclusion policies, on a continuous basis. This ensured that investments made by the Portfolio sought to align with international environmental and social safeguards such as the UNGC Principles, the UNGPs, the OECD Guidelines and the ILO Standards.

The Sub-Investment Manager believes that these policies prevented investment in companies that most egregiously violated environmental and/or social minimum standards and ensured that the Portfolio could successfully promote its environmental and social characteristics.

The above steps ensured that robust environmental and social safeguards were in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio was managed in-line with the investment objective and the following actions were taken:

I. Integrating proprietary ESG analysis:

The Sub-Investment Manager applied a high standard of due diligence in the selection and ongoing monitoring of investments made by the Portfolio to ensure the integration of Sustainability Risks (as defined in the SFDR) and ESG. The Sub-Investment Manager views ESG integration as the practice of incorporating material ESG risks and considerations (as a binding element) into the investment decision-making process. ESG integration sits alongside other financial considerations and should enrich the Sub-Investment Manager's investment teams' analysis of companies by providing a toolkit for identifying material ESG risks and opportunities that inform investment decisions. The Sub-Investment Manager believes that material ESG factors are an important driver of long-term investment returns from both an opportunity and a risk-mitigation perspective. Hence, the Sub-Investment Manager's ESG integration approach considers ESG opportunities as well as Sustainability Risks.

Before making investments, the investment team conducted due diligence that it deemed reasonable and appropriate based on the facts and circumstances applicable to each investment. The investment team assessed the investment's alignment with the environmental and social characteristics promoted by the Portfolio using (as appropriate) the NB ESG Quotient and exclusionary screens (to identify potential non-compliance with the above listed ESG exclusions). The due diligence was supported by third-party data sources.

The NB ESG Quotient rating for companies was utilised to help to better identify risks and opportunities in the overall assessment. By integrating the investment team's proprietary ESG analysis (the NB ESG Quotient) into the overall company view, there was a direct link between their analysis of the Portfolio's environmental and social characteristics and the portfolio construction activities.

II. Engagement:

The Sub-Investment Manager engaged with companies through a robust ESG engagement program. They sought to prioritise constructive engagements and sought to engage on topics (including ESG topics) they determined to be financially material for the relevant company. The Sub-Investment Manager viewed this engagement with companies, as an important part of its investment process.

In order to maintain and enhance company relationships, and to ensure companies followed their ESG trajectory, the Sub-Investment Manager kept an active dialogue with companies, regardless of whether or not they had high impact controversies or a poor NB ESG Quotient rating. Progress on engagement was tracked centrally in the Sub-Investment Manager's engagement tracker.

III. ESG sectoral exclusion policies:

To ensure that the environmental and social characteristics promoted by the Portfolio

were attained, the Portfolio applied the ESG exclusion policies referenced above, which placed limitations on the investable universe.

How did this financial product perform compared to the reference benchmark?

N/A – The Portfolio has not designated a reference benchmark.

- *How does the reference benchmark differ from a broad market index?*
N/A
- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*
N/A
- *How did this financial product perform compared with the reference benchmark?*
N/A
- *How did this financial product perform compared with the broad market index?*
N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Neuberger Berman Euro Bond Fund (the “Portfolio”)*

Legal entity identifier: 549300TQ5M6FBE2H8T74

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

*Effective 6 December 2023, the Neuberger Berman Euro Opportunistic Bond Fund changed name to the Neuberger Berman Euro Bond Fund.

The most recent SFDR Pre-Contractual Template of the Portfolio can be found [here](#).

This SFDR Periodic Report template reports on the 2023 calendar year (the “Reference Period”). Unless otherwise stated in the relevant disclosure, all Reference Period data has been calculated based on the average of the four calendar quarter ends.

This SFDR Periodic Report template reports on several quantitative ESG data metrics. To assist the reader in their review and assessment of such ESG data metrics, we have disclosed the Portfolio’s data coverage for these ESG data metrics. The intention is that disclosure of the data coverage (of the ESG metrics during the Reference Period) will allow the reader to interpret the ESG data metrics’ ability to represent the Portfolio with any limitations to such data coverage in mind.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and social characteristics were promoted by the Portfolio:

- **Environmental Characteristics:** biodiversity & responsible land usage; carbon footprint reduction; environmental management; greenhouse gas (“GHG”) emissions; opportunities in clean technologies; opportunities in green building; opportunities in renewable energy; responsible raw material sourcing; responsible & transparent underwriting; toxic emissions & waste; waste management and water management.
- **Social Characteristics:** access to finance; access to medicines; affordability & fair pricing; business ethics & transparency of government relations; chemical safety; community relations; controversial sourcing; corporate behaviour; drug safety & side effects management; ethical marketing & practices; health & nutrition; health & safety; human capital development; labour management; data privacy & security; product safety & quality; and litigation & related controversy.

Performance in relation to these environmental and social characteristics was measured through the NB ESG Quotient, and is reported, in aggregate, below.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

As part of the investment process, the Manager considered a variety of sustainability indicators to measure the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators are listed below:

1. The NB ESG Quotient:

The proprietary Neuberger Berman ESG rating system (the “**NB ESG Quotient**”), is built around the concept of sector specific ESG risk and opportunity, and produced an overall ESG rating for issuers by assessing them against certain ESG metrics.

Foundational to the NB ESG Quotient is the proprietary Neuberger Berman (“**NB**”) materiality matrix, which focuses on the ESG characteristics that were considered to be the most likely to be the material drivers of ESG risk and opportunity for each sector. Each sector criteria is constructed using third-party and internally derived ESG data and supplemented with internal qualitative analysis, leveraging the Portfolio’s analyst team’s significant sector expertise. The NB materiality matrix enabled the Manager to derive the NB ESG Quotient rating, to compare sectors and issuers relative to their environmental and social characteristics.

The NB ESG Quotient assigned weightings to environmental, social and governance characteristics for each sector to derive the NB ESG Quotient rating for issuers. While the NB ESG Quotient rating of issuers was considered as part of the investment process, there was no minimum NB ESG Quotient rating to be attained by an issuer prior to investment. Issuers with a favourable and/or an improving NB ESG Quotient rating had a higher chance of being included in the Portfolio. Issuers with a poor NB ESG Quotient rating, especially where a poor NB ESG Quotient rating was not being addressed by an issuer, were more likely to be removed from the investment universe or divested from the Portfolio. In addition, the Manager sought to prioritise constructive engagements with issuers that had a poor NB ESG Quotient rating, in order to assess whether concerns were being addressed adequately.

Reference Period	Rating	Range	Combined Coverage
NB ESG Quotient	65	1-100	95%
Third-Party Data	6.3	0-10	

The Reference Period data was calculated by averaging the data of the four calendar quarter ends. With regards to the NB ESG Quotient rating, a rating between 1 – 100 is used where 1 is the lowest rating and 100 is the highest rating. This Portfolio does not have a minimum NB ESG Quotient rating to be attained by an issuer prior to investment.

The average NB ESG Quotient rating is a weighted average that reflects the ESG characteristics that were considered to be the most material drivers of ESG risk and opportunity for each issuer held in the Portfolio. It is not an ESG assessment or rating of the overall Portfolio and its promotion of environmental and social characteristics, but rather an assessment of the material ESG risks and opportunities the Portfolio had exposure to.

Third-party data was also used to measure the resilience of the Portfolio's aggregate holdings to long-term, financially material, ESG risks. The third-party data ratings range from 0-10, with 0 being the lowest rating and 10 being the highest rating.

Assessment and management of material ESG risks and opportunities is an essential element of the Portfolio's promotion of environmental and social characteristics.

2. Climate Value-at-Risk:

Over the Reference Period, Climate Value-at-Risk (“**CVaR**”) measured the exposure to transition and physical climate risks and opportunities for corporate issuers. CVaR is a scenario analysis tool evaluating economic risks and opportunities under various degree scenarios (i.e., the amount of warming targeted) and potential regulatory environments in varying countries.

CVaR is a type of scenario analysis which is defined as the present value of aggregated future policy risk costs, technology opportunity profits, and extreme weather event costs and profits, expressed as a percentage of an issue's or portfolio's market value (i.e. potential gain or loss) according to the warming scenario targeted.

By calculating the financial risks and opportunities from climate change per issue and per scenario, CVaR provides a framework that helps quantify and understand these risks and opportunities. The CVaR metric provides insight into the climate-stressed valuation of assets based on specific degree scenarios, providing an assessment on how much an issue may stand to lose or gain from the impact of climate change.

For the Reference Period, CVaR projected that a warming climate scenario could result in a loss of 3.1% in the valuation of assets under assessment. The Reference Period data has been calculated based on the average of the four calendar quarter ends.

This analysis is intended as a broad overview of the investment team's style and investment process.

On a holistic basis, the results were evaluated by the Manager's portfolio managers and analysts. The scenario analysis served as a starting point for further bottom-up analysis and identifying potential climate-related risks to address through issuer engagement.

Due to data limitations, CVaR was not applied across all issuers held by the Portfolio and was instead limited to the issuers for which the Manager had sufficient and reliable data. The Portfolio had a CVaR coverage of 16% and this coverage is an average of the four calendar quarter ends.

The analysis from CVaR is reviewed at least once a year.

3. ESG exclusion policies:

To ensure that the environmental or social characteristics promoted by the Portfolio were attained, the Portfolio did not invest in securities issued by issuers whose activities had been identified as breaching, or were not consistent with, the Neuberger Berman Controversial Weapons Policy and the Neuberger Berman Thermal Coal Involvement Policy. In addition to the application of the Neuberger Berman Thermal Coal Involvement Policy, the Manager prohibited the initiation of new investment positions in securities issued by issuers that (i) derived more than 25% of their revenue from thermal coal mining; or (ii) were expanding new thermal coal power generation. Furthermore, investments held by the Portfolio did not invest in securities issued by issuers whose activities had been identified as breaching, or were not consistent with, the Neuberger Berman Global Standards Policy which excluded identified violators of (i) the United Nations Global Compact Principles ("**UNGC Principles**"), (ii) the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct ("**OECD Guidelines**"), (iii) the United Nations Guiding Principles on Business and Human Rights ("**UNGPs**") and (iv) the International Labour Standards ("**ILO Standards**"). Additionally, the Portfolio was prohibited from purchasing the securities of issuers that were involved in tobacco production such as cigars, cigarettes, e-cigarettes, smokeless tobacco, dissolvable and chewing tobacco. This also included issuers that grow or process raw tobacco leaves.

When applying ESG exclusions to the Portfolio, the Manager used third-party data to identify issuers in breach of the ESG exclusions listed above. Where possible, the Manager sought to overlay this third-party data with qualitative expertise from their research analysts to establish a current and holistic picture of the issuer. The Manager discussed and debated the differences between the violators identified by the third-party data and those identified as a result of their research, which drew upon data from the NB ESG Quotient and direct engagements with the issuer.

● ...and compared to previous periods?

For the 2022 reference period, the quantitative data disclosed (for the sustainability indicators) was calculated as at 31 December 2022, being the only quarter end in the reference period that followed the entry into force of the SFDR RTS (which included the publication of the Portfolio's SFDR pre-contractual disclosure template).

The below sustainability indicators' quantitative data for the Reference Period was calculated by averaging the four calendar quarter ends.

1. NB ESG Quotient

	NB ESG Quotient Rating	Third-Party Rating	Data	Combined Coverage
Range	1-100	0-10		0-100%
2022 reference period	66	6.0		90%
2023 reference period	65	6.3		95%

Year-on-year, the NB ESG Quotient rating has declined and the third-party data rating has improved. This may be due to an improvement in individual issuers according to the third-party data provider, or due to differences in the issuer's third-party rating by the provider.

2. CVaR

	CVaR	Coverage
2022 reference period	-5.4%	12%
2023 reference period	-3.1%	16%

Year-on-year, the CVaR projected loss has improved. This is due to improvements in individual corporate issuers held in the Portfolio and due to trading activity.

3. Exclusions

Consistent with the previous calendar year, there were no breaches (of the above listed ESG exclusions) during the Reference Period.

	Total number of breaches
2022 reference period	0
2023 reference period	0

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A – the Portfolio did not commit to holding sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A – the Portfolio did not commit to holding sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A – the Portfolio did not commit to holding sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio did not commit to holding sustainable investments, however, the Manager did not invest in issuers whose activities had been identified as breaching, or were not consistent with, the OECD Guidelines, UNGC Principles, ILO Standards and UNGPs, captured through the Neuberger Berman Global Standards Policy.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

N/A - The Portfolio did not commit to holding Taxonomy-aligned investments.

How did this financial product consider principal adverse impacts on sustainability factors?

A selection of the principal adverse impact indicators were considered directly (e.g. through the ESG exclusion policies listed above) and/or indirectly (e.g. as part of the Manager’s assessment of issuers) throughout the Reference Period.

The Manager considered the principal adverse impacts outlined in Part 1 of the below table for corporate issuers (the “**Corporate Issuer PAIs**”) and considered the principal adverse impacts outlined in Part 2

of the below table for sovereign issuers (the "**Sovereign PAIs**") on sustainability factors (together the "**Product Level PAIs**"):

Part 1 – Corporate Issuer PAIs	
Theme	Adverse sustainability indicator
<i>Greenhouse gas emissions</i>	PAI 1- GHG emissions PAI 2 - Carbon footprint PAI 3 - GHG intensity of investee companies PAI 4 - Exposure to companies active in the fossil fuel sector
<i>Social and employee matters</i>	PAI 10 - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises PAI 13 - Board gender diversity PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
Part 2 – Sovereign PAIs	
<i>Environmental</i>	PAI 15 - GHG intensity
<i>Social</i>	PAI 16 - Investee countries subject to social violations

Consideration of the Product Level PAIs was limited by the availability (in the Manager's subjective view) of adequate, reliable and verifiable data coverage. The Manager utilised third-party data and proxy data along with internal research to consider the Product Level PAIs.

Consideration of the Product Level PAIs by the Manager was through a combination of:

- Monitoring the Portfolio, in particular where it fell below the quantitative and qualitative tolerance thresholds set for each Product Level PAI by the Manager;
- Stewardship and/or setting engagement objectives where the Portfolio fell below the quantitative and qualitative tolerance thresholds set for a Product Level PAI by the Manager; and
- Application of the ESG exclusion policies referenced above, which included consideration of several of the Product Level PAIs.

What were the top investments of this financial product?

The Manager has used the EU statistical classification of economic activities ("**NACE**") economic sector breakdown to identify the economic sectors of the Portfolio's top 15 investments.

As the list below is based on an average calculated across the four calendar quarter ends of the Reference Period, this may differ from the top investments of the Portfolio calculated as at 31 December 2023 in the "Schedule of Investments" section of the financial statements.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2023 - 31 December 2023

Largest investments	Sector	% Assets	Country
PORTUGAL (REPUBLIC OF)	O - Public administration and defence; compulsory social security*	2.59%	Portugal
NETHERLANDS (KINGDOM OF)	O - Public administration and defence; compulsory social security*	1.83%	Netherlands
ITALY (REPUBLIC OF) RegS	O - Public administration and defence; compulsory social security*	1.69%	Italy
GERMANY (FEDERAL REPUBLIC OF) RegS	O - Public administration and defence; compulsory social security*	1.66%	Germany
FRANCE (REPUBLIC OF) RegS	O - Public administration and defence; compulsory social security*	1.42%	France
ITALY (REPUBLIC OF) RegS	O - Public administration and defence; compulsory social security*	1.31%	Italy
ITALY (REPUBLIC OF) RegS	O - Public administration and defence; compulsory social security*	1.23%	Italy
ITALY (REPUBLIC OF) RegS	O - Public administration and defence; compulsory social security*	1.22%	Italy
AMCO ASSET MANAGEMENT COMPANY SPA RegS	K - Financial and insurance activities	1.14%	Italy
EUROPEAN UNION RegS	U - Activities of extraterritorial organisations and bodies	1.09%	Supranational
SOUTHERN ELECTRIC GENERATING CO	D - Electricity, gas, steam, and air conditioning supply	1.07%	United States
TEVA PHARMACEUTICAL FINANCE NETHER	K - Financial and insurance activities	1.06%	Israel
GLOBAL PAYMENTS INC	K - Financial and insurance activities	1.03%	United States
EUROPEAN UNION RegS	U - Activities of extraterritorial organisations and bodies	1.02%	Supranational
BANK GOSPODARSTWA KRAJOWEGO MTN RegS	K - Financial and insurance activities	1.02%	Poland

*O - Public administration and defence; compulsory social security is classified by Barclays Industry as either: Sovereign, Treasury, Foreign Local Government, Supranational, Foreign Agencies

What was the proportion of sustainability-related investments?

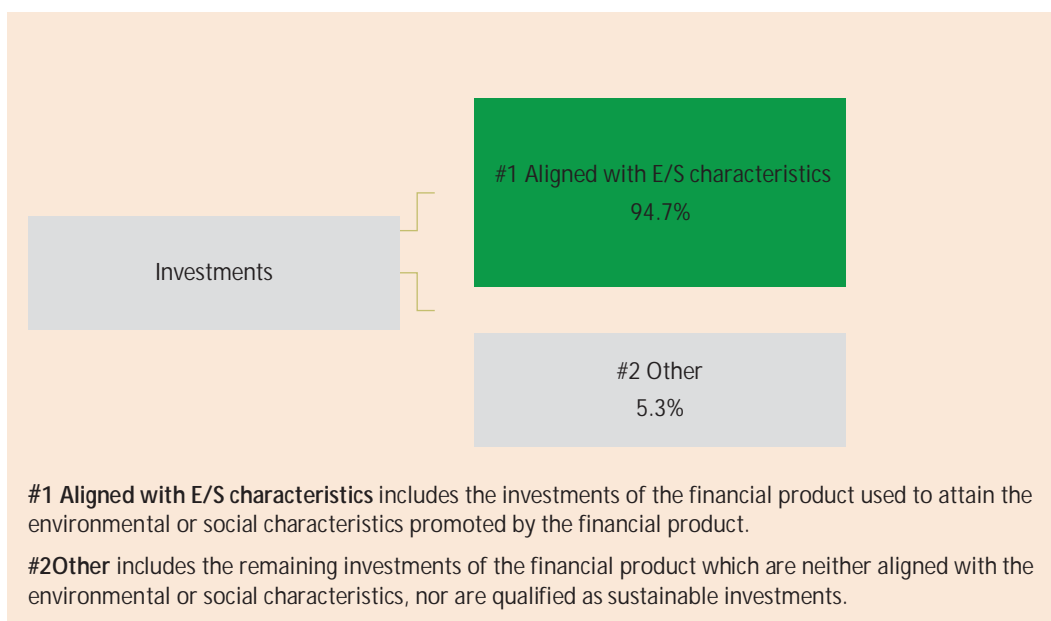

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

- The Portfolio aims to hold a minimum of 80% investments that are aligned with the environmental or social characteristics promoted by the Portfolio. During the Reference Period, the Portfolio held 94.7% investments that were aligned with the environmental or social characteristics promoted by the Portfolio.
- The Portfolio aims to hold a maximum of 20% investments that are not aligned with the environmental or social characteristics promoted by the Portfolio and are not sustainable

investments, and which fall into the “Other” section of the Portfolio. During the Reference Period, the Portfolio held 5.3% “Other” investments.

The Manager calculated the proportion of investments aligned with the environmental and/or social characteristics promoted by the Portfolio by reference to the proportion of issuers in the Portfolio: i) that held either an NB ESG Quotient rating or a third-party equivalent ESG rating that was used as part of the portfolio construction and investment management process of the Portfolio; and/or ii) with whom the Manager had engaged directly. This calculation was based on a mark-to-market assessment of the Portfolio and may be based on incomplete or inaccurate issuer or third-party data. The Reference Period data was calculated by averaging the data of the four calendar quarter ends.

● In which economic sectors were the investments made?

The Reference Period data was calculated by averaging the data of the four calendar quarter ends.

Economic Sector – NACE	% Assets
B - Mining and quarrying	0.2%
C - Manufacturing	1.8%
D - Electricity, gas, steam and air conditioning supply	4.5%
G - Wholesale and retail trade; repair of motor vehicles and motorcycles	0.8%
J - Information and communication	1.6%
K - Financial and insurance activities	33.7%
L - Real estate activities	5.3%
M - Professional, scientific and technical activities	0.3%
N - Administrative and support service activities	1.0%
O - Public administration and defence; compulsory social security*	41.8%
R - Arts, entertainment and recreation	1.3%
U - Activities of extraterritorial organisations and bodies	6.8%
None	0.9%

*O - Public administration and defence; compulsory social security is classified by Barclays Industry as either: Sovereign, Treasury, Foreign Local Government, Supranational, Foreign Agencies

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The analysis and disclosure requirements introduced by the EU Taxonomy are very detailed and compliance with them requires the availability of multiple, specific data points in respect of each investment which the Portfolio made. The Manager cannot confirm that the Portfolio invested in any investments that qualified as environmentally sustainable for the purposes of the EU Taxonomy. Disclosures and reporting on Taxonomy alignment will develop as the EU framework evolves and data is made available by issuers. The Manager will keep the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy under active review as data availability and quality improves.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

- **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

N/A – the Portfolio did not commit to holding Taxonomy-aligned investments.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

N/A – the Portfolio did not commit to holding Taxonomy-aligned investments in this or the previous reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A – the Portfolio did not commit to holding sustainable investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A – the Portfolio did not commit to holding sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” included the remaining investments of the Portfolio (including but not limited to any derivatives or any security collateralized by a pool of similar assets or receivables listed in the Supplement for the Portfolio) which were neither aligned with the environmental or social characteristics, nor qualified as sustainable investments.

The “Other” section in the Portfolio was held for a number of reasons that the Manager felt was beneficial to the Portfolio, such as, but not limited to, achieving risk management, and/or to ensure adequate liquidity, hedging and collateral cover.

As noted above, the Portfolio was invested in compliance with ESG exclusion policies, on a continuous basis. This ensured that investments made by the Portfolio sought to align with international environmental and social safeguards such as the UNGC Principles, the UNGPs, the OECD Guidelines and the ILO Standards.

The Manager believes that these policies prevented investment in issuers that most egregiously violated environmental and/or social minimum standards and ensured that the Portfolio could successfully promote its environmental and social characteristics.

The above steps ensured that robust environmental and social safeguards were in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio was managed in-line with the investment objective and the following actions were taken:

I. Integrating proprietary ESG analysis:

The Manager applied a high standard of due diligence in the selection and ongoing monitoring of investments made by the Portfolio to ensure the integration of Sustainability Risks (as defined in the SFDR) and ESG. The Manager views ESG integration as the practice of incorporating material ESG risks and considerations (as a binding element) into the investment decision-making process. ESG integration sits alongside other financial considerations and should enrich the Manager's investment teams' analysis of issuers by providing a toolkit for identifying material ESG risks and opportunities that inform investment decisions. The Manager believes that material ESG factors are an important driver of long-term investment returns from both an opportunity and a risk-mitigation perspective. Hence, the Manager's ESG integration approach considers ESG opportunities as well as Sustainability Risks.

Before making investments, the investment team conducted due diligence that it deemed reasonable and appropriate based on the facts and circumstances applicable to each investment. The investment team assessed the investment's alignment with the environmental and social characteristics promoted by the Portfolio using (as appropriate) the NB ESG Quotient and exclusionary screens (to identify potential non-compliance with the above listed ESG exclusions). The due diligence was supported by third-party data sources.

The NB ESG Quotient rating for issuers was utilised to help to better identify risks and opportunities in the overall credit and value assessment. The NB ESG Quotient was a key component of the internal credit ratings and helped to identify business risks (including ESG risks), which would cause deterioration in an issuer's credit profile. Internal credit ratings can be notched up or down based on the NB ESG Quotient rating, and this was monitored by the Manager as an important component of the investment process for the Portfolio.

By integrating the investment team's proprietary ESG analysis (the NB ESG Quotient) into their internal credit ratings, there was a direct link between their analysis of the Portfolio's environmental and social characteristics and the Portfolio's portfolio construction activities.

II. Engagement:

The Manager engaged with issuers through a robust ESG engagement program. They sought to prioritise constructive engagements and sought to engage on topics (including ESG topics) they determined to be financially material for the relevant issuer. The Manager viewed this engagement with issuers, as an important part of its investment process. Progress on engagement was tracked centrally in the Manager's engagement tracker.

III. ESG sectoral exclusion policies:

To ensure that the environmental and social characteristics promoted by the Portfolio were attained, the Portfolio applied the ESG exclusion policies referenced above, which placed limitations on the investable universe.

How did this financial product perform compared to the reference benchmark?

N/A – The Portfolio has not designated a reference benchmark.

- *How does the reference benchmark differ from a broad market index?*
N/A
- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*
N/A
- *How did this financial product perform compared with the reference benchmark?*
N/A
- *How did this financial product perform compared with the broad market index?*
N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Neuberger Berman Euro Bond Absolute Return Fund (the “Portfolio”)

Legal entity identifier: 549300ZPJNN43P39QR29

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<div><div><div></div><div></div><div></div></div><div>Yes</div></div>	<div><div><div></div><div></div><div></div></div><div>No</div></div>

The most recent SFDR Pre-Contractual Template of the Portfolio can be found [here](#).

This SFDR Periodic Report template reports on the 2023 calendar year (the “**Reference Period**”). Unless otherwise stated in the relevant disclosure, all Reference Period data has been calculated based on the average of the four calendar quarter ends.

This SFDR Periodic Report template reports on several quantitative ESG data metrics. To assist the reader in their review and assessment of such ESG data metrics, we have disclosed the Portfolio’s data coverage for these ESG data metrics. The intention is that disclosure of the data coverage (of the ESG metrics during the Reference Period) will allow the reader to interpret the ESG data metrics’ ability to represent the Portfolio with any limitations to such data coverage in mind.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and social characteristics were promoted by the Portfolio:

- **Environmental Characteristics:** biodiversity & responsible land usage; carbon footprint reduction; environmental management; greenhouse gas (“**GHG**”) emissions; opportunities in clean technologies; opportunities in green building; opportunities in renewable energy; responsible raw material sourcing; responsible & transparent underwriting; toxic emissions & waste; waste management and water management.
- **Social Characteristics:** access to finance; access to medicines; affordability & fair pricing; business ethics & transparency of government relations; chemical safety; community relations; controversial sourcing; corporate behaviour; drug safety & side effects management; ethical marketing & practices; health & nutrition; health & safety; human capital development; labour management; data privacy & security; product safety & quality; and litigation & related controversy.

Performance in relation to these environmental and social characteristics was measured through the NB ESG Quotient, and is reported, in aggregate, below.

Sustainability

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

As part of the investment process, the Manager considered a variety of sustainability indicators to measure the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators are listed below:

1. The NB ESG Quotient:

The proprietary Neuberger Berman ESG rating system (the “**NB ESG Quotient**”), is built around the concept of sector specific ESG risk and opportunity, and produced an overall ESG rating for issuers by assessing them against certain ESG metrics.

Foundational to the NB ESG Quotient is the proprietary Neuberger Berman (“**NB**”) materiality matrix, which focuses on the ESG characteristics that were considered to be the most likely to be the material drivers of ESG risk and opportunity for each sector. Each sector criteria is constructed using third-party and internally derived ESG data and supplemented with internal qualitative analysis, leveraging the Portfolio’s analyst team’s significant sector expertise. The NB materiality matrix enabled the Manager to derive the NB ESG Quotient rating, to compare sectors and issuers relative to their environmental and social characteristics.

The NB ESG Quotient assigned weightings to environmental, social and governance characteristics for each sector to derive the NB ESG Quotient rating for issuers. While the NB ESG Quotient rating of issuers was considered as part of the investment process, there was no minimum NB ESG Quotient rating to be attained by an issuer prior to investment. Issuers with a favourable and/or an improving NB ESG Quotient rating had a higher chance of being included in the Portfolio. Issuers with a poor NB ESG Quotient rating, especially where a poor NB ESG Quotient rating was not being addressed by an issuer, were more likely to be removed from the investment universe or divested from the Portfolio. In addition, the Manager sought to prioritise constructive engagements with issuers that had a poor NB ESG Quotient rating, in order to assess whether concerns were being addressed adequately.

Reference Period	Rating	Combined Coverage
NB ESG Quotient	65	97%
Third-Party Data	6.8	

The Reference Period is an average of the four calendar quarter ends.

With regards to the NB ESG Quotient rating, a rating between 1 – 100 is used where 1 is the lowest rating and 100 is the highest rating. This Portfolio does not have a minimum NB ESG Quotient rating to be attained by an issuer prior to investment.

The average NB ESG Quotient rating is a weighted average that reflects the ESG characteristics that were considered to be the most material drivers of ESG risk and opportunity for each issuer held in the Portfolio. It is not an ESG assessment or rating of the overall Portfolio and its promotion of environmental and social characteristics, but rather an assessment of the material ESG risks and opportunities the Portfolio had exposure to.

Third-party data was also used to measure the resilience of the Portfolio's aggregate holdings to long-term, financially material, ESG risks. The third-party data ratings range from 0-10, with 0 being the lowest rating and 10 being the highest rating.

Assessment and management of material ESG risks and opportunities is an essential element of the Portfolio's promotion of environmental and social characteristics.

2. Climate Value-at-Risk:

Over the Reference Period, Climate Value-at-Risk ("**CVaR**") measured the exposure to transition and physical climate risks and opportunities for corporate issuers. CVaR is a scenario analysis tool evaluating economic risks and opportunities under various degree scenarios (i.e., the amount of warming targeted) and potential regulatory environments in varying countries.

CVaR is a type of scenario analysis which is defined as the present value of aggregated future policy risk costs, technology opportunity profits, and extreme weather event costs and profits, expressed as a percentage of an issue's or portfolio's market value (i.e. potential gain or loss) according to the warming scenario targeted.

By calculating the financial risks and opportunities from climate change per issue and per scenario, CVaR provides a framework that helps quantify and understand these risks and opportunities. The CVaR metric provides insight into the climate-stressed valuation of assets based on specific degree scenarios, providing an assessment on how much an issue may stand to lose or gain from the impact of climate change.

For the Reference Period, CVaR projected that a warming climate scenario could result in a loss of 5.4% in the valuation of assets under assessment. The Reference Period data has been calculated based on the average of the four calendar quarter ends.

This analysis is intended as a broad overview of the investment team's style and investment process.

On a holistic basis, the results were evaluated by the Manager's portfolio managers and analysts. The scenario analysis served as a starting point for further bottom-up analysis and identifying potential climate-related risks to address through issuer engagement.

Due to data limitations, CVaR was not applied across all issuers held by the Portfolio and was instead limited to the issuers for which the Manager had sufficient and reliable data. The Portfolio had a CVaR coverage of 21% and this coverage is an average of the four calendar quarter ends.

The analysis from CVaR is reviewed at least once a year.

3. ESG exclusion policies:

To ensure that the environmental or social characteristics promoted by the Portfolio were attained, the Portfolio did not invest in securities issued by issuers whose activities had been identified as breaching, or were not consistent with, the Neuberger Berman Controversial Weapons Policy and the Neuberger Berman Thermal Coal Involvement Policy. In addition to the application of the Neuberger Berman Thermal Coal Involvement Policy, the Manager prohibited the initiation of new investment positions in securities issued by issuers that (i) derived more than 25% of their revenue from thermal coal mining; or (ii) were expanding new thermal coal power generation. Furthermore, investments held by the Portfolio did not invest in securities issued by issuers whose activities had been identified as breaching, or were not consistent with, the Neuberger Berman Global Standards Policy which excluded identified violators of (i) the United Nations Global Compact Principles ("**UNGC Principles**"), (ii) the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct ("**OECD Guidelines**"), (iii) the United Nations Guiding Principles on Business and Human Rights ("**UNGPs**") and (iv) the International Labour Standards ("**ILO Standards**"). Additionally, the Portfolio was prohibited from purchasing the securities of issuers that were involved in tobacco production such as cigars, cigarettes, e-cigarettes, smokeless tobacco, dissolvable and chewing tobacco. This also included issuers that grow or process raw tobacco leaves.

When applying ESG exclusions to the Portfolio, the Manager used third-party data to identify issuers in breach of the ESG exclusions listed above. Where possible, the Manager sought to overlay this third-party data with qualitative expertise from their research analysts to establish a current and holistic picture of the issuer. The Manager discussed and debated the differences between the violators identified by the third-party data and those identified as a result of their research, which drew upon data from the NB ESG Quotient and direct engagements with the issuer.

● ...and compared to previous periods?

For the 2022 reference period, the quantitative data disclosed (for the sustainability indicators) was calculated as at 31 December 2022, being the only quarter end in the reference period that followed the entry into force of the SFDR RTS (which included the publication of the Portfolio's SFDR pre-contractual disclosure template).

The below sustainability indicators' quantitative data for the Reference Period was calculated by averaging the four calendar quarter ends.

1. NB ESG Quotient

	NB ESG Quotient Rating	Third-Party Data Rating	Combined Coverage
Range	1-100	0-10	0-100%
2022 reference period	66	6.5	94%
2023 reference period	65	6.8	97%

Year-on-year, the NB ESG Quotient rating has declined and the third-party data rating has improved. This may be due to an improvement in individual issuers according to the third-party data provider, or due to differences in the issuer's third-party rating by the provider.

2. CVaR

	CVaR	Coverage
2022 reference period	-5.0%	17%
2023 reference period	-5.4%	21%

Year-on-year, the CVaR projection has moved due to improvements in data coverage for individual corporate issuers held in the Portfolio, and changes associated with corporate issuers held and trading activity within the Portfolio.

3. Exclusions

Consistent with the previous calendar year, there were no breaches during the Reference Period.

	Total number of breaches
2022 reference period	0
2023 reference period	0

- *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

N/A – the Portfolio did not commit to holding sustainable investments.

- *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

N/A – the Portfolio did not commit to holding sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A – the Portfolio did not commit to holding sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio did not commit to holding sustainable investments, however, the Manager did not invest in issuers whose activities had been identified as breaching, or were not consistent with, the OECD Guidelines, UNGC Principles, ILO Standards and UNGPs, captured through the Neuberger Berman Global Standards Policy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

N/A - The Portfolio did not commit to holding Taxonomy-aligned investments.

How did this financial product consider principal adverse impacts on sustainability factors?

A selection of the principal adverse impact indicators were considered directly (e.g. through the ESG exclusion policies listed above) and/or indirectly (e.g. as part of the Manager's assessment of issuers) throughout the Reference Period.

The Manager considered the principal adverse impacts outlined in Part 1 of the below table for corporate issuers (the “**Corporate Issuer PAIs**”) and considered the principal adverse impacts outlined in Part 2 of the below table for sovereign issuers (the “**Sovereign PAIs**”) on sustainability factors (together the “**Product Level PAIs**”):

Part 1 – Corporate Issuer PAIs	
Theme	Adverse sustainability indicator
Greenhouse gas emissions	PAI 1- GHG emissions PAI 2 - Carbon footprint PAI 3 - GHG intensity of investee companies PAI 4 - Exposure to companies active in the fossil fuel sector
Social and employee matters	PAI 10 - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises PAI 13 - Board gender diversity

	PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
Part 2 – Sovereign PAIs	
<i>Environmental</i>	PAI 15 - GHG intensity
<i>Social</i>	PAI 16 - Investee countries subject to social violations

Consideration of the Product Level PAIs was limited by the availability (in the Manager's subjective view) of adequate, reliable and verifiable data coverage. The Manager utilised third party data and proxy data along with internal research to consider the Product Level PAIs.

Consideration of the Product Level PAIs by the Manager was through a combination of:

- Monitoring the Portfolio, in particular where it fell below the quantitative and qualitative tolerance thresholds set for each Product Level PAI by the Manager;
- Stewardship and/or setting engagement objectives where the Portfolio fell below the quantitative and qualitative tolerance thresholds set for a Product Level PAI by the Manager; and
- Application of the ESG exclusion policies referenced above, which included consideration of several of the Product Level PAIs.

What were the top investments of this financial product?

The Manager has used the EU statistical classification of economic activities ("NACE") economic sector breakdown to identify the economic sectors of the Portfolio's top 15 investments.

As the list below is based on an average calculated across the four calendar quarter ends of the Reference Period, this may differ from the top investments of the Portfolio calculated as at 31 December 2023 in the "Schedule of Investments" section of the financial statements.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2023 - 31 December 2023

Largest investments	Sector	% Assets	Country
NYKREDIT REALKREDIT A/S RegS	K - Financial and insurance activities	2.5%	Denmark
PORTUGAL (REPUBLIC OF)	O - Public administration and defence; compulsory social security*	2.0%	Portugal
BANK GOSPODARSTWA KRAJOWEGO MTN RegS	K - Financial and insurance activities	2.0%	Poland
ITALY (REPUBLIC OF) RegS	O - Public administration and defence; compulsory social security*	1.6%	Italy
NYKREDIT REALKREDIT A/S RegS	K - Financial and insurance activities	1.5%	Denmark
EUROPEAN UNION RegS	U - Activities of extraterritorial organisations and bodies	1.5%	Supranational
POLAND (REPUBLIC OF)	O - Public administration and defence; compulsory social security*	1.5%	Poland
SPAIN (KINGDOM OF)	O - Public administration and defence; compulsory social security*	1.4%	Spain
ITALY (REPUBLIC OF) RegS	O - Public administration and defence; compulsory social security*	1.3%	Italy
ITALY (REPUBLIC OF) RegS	O - Public administration and defence; compulsory social security*	1.3%	Italy

ITALY REPUBLIC OF	O - Public administration and defence; compulsory social security*	1.3%	Italy
CANADIAN IMPERIAL BANK OF COMMERCE RegS	K - Financial and insurance activities	1.2%	Canada
CROATIA (REPUBLIC OF) RegS	O - Public administration and defence; compulsory social security*	1.2%	Croatia
KFW MTN RegS	K - Financial and insurance activities	1.2%	Germany
NATIONAL AUSTRALIA BANK LTD RegS	K - Financial and insurance activities	1.2%	Australia

*O - Public administration and defence; compulsory social security is classified by Barclays Industry as either: Sovereign, Treasury, Foreign Local Government, Supranational, Foreign Agencies

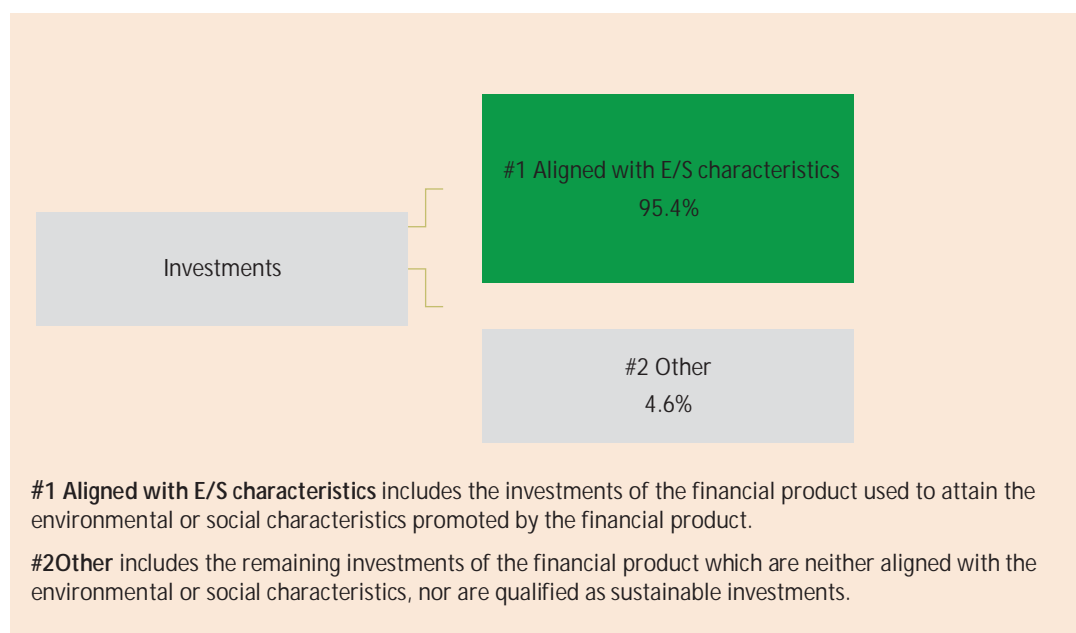

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

- The Portfolio aims to hold a minimum of 80% investments that are aligned with the environmental or social characteristics promoted by the Portfolio. During the Reference Period, the Portfolio held 95.4% investments that were aligned with the environmental or social characteristics promoted by the Portfolio.
- The Portfolio aims to hold a maximum of 20% investments that are not aligned with the environmental or social characteristics promoted by the Portfolio and are not sustainable investments, and which fall into the “Other” section of the Portfolio. During the Reference Period, the Portfolio held 4.6% “Other” investments.

The Manager calculated the proportion of investments aligned with the environmental and/or social characteristics promoted by the Portfolio by reference to the proportion of issuers in the Portfolio: i) that held either an NB ESG Quotient rating or a third-party equivalent ESG rating that was used as part of the portfolio construction and investment management process of the Portfolio; and/or ii) with whom the Manager had engaged directly. This calculation was based on a mark-to-market assessment of the Portfolio and may be based on incomplete or inaccurate issuer or third-party data. The Reference Period data was calculated by averaging the data of the four calendar quarter ends.

● *In which economic sectors were the investments made?*

The Reference Period data was calculated by averaging the data of the four calendar quarter ends.

Economic Sector – NACE	% Assets
B - Mining and quarrying	0.2%
C - Manufacturing	3.7%
D - Electricity, gas, steam and air conditioning supply	4.1%
E - Water supply; sewerage; waste management and remediation activities	0.9%
G - Wholesale and retail trade; repair of motor vehicles and motorcycles	0.4%
H - Transporting and storage	0.5%
J - Information and communication	2.6%
K - Financial and insurance activities	38.2%
L - Real estate activities	5.9%
M - Professional, scientific and technical activities	0.1%
N - Administrative and support service activities	0.4%
O - Public administration and defence; compulsory social security*	37.0%
R - Arts, entertainment and recreation	0.8%
U - Activities of extraterritorial organisations and bodies	4.9%
None	0.3%

*O - Public administration and defence; compulsory social security is classified by Barclays Industry as either: Sovereign, Treasury, Foreign Local Government, Supranational, Foreign Agencies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The analysis and disclosure requirements introduced by the EU Taxonomy are very detailed and compliance with them requires the availability of multiple, specific data points in respect of each investment which the Portfolio made. The Manager cannot confirm that the Portfolio invested in any investments that qualified as environmentally sustainable for the purposes of the EU Taxonomy. Disclosures and reporting on Taxonomy alignment will develop as the EU framework evolves and data is made available by issuers. The Manager will keep the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy under active review as data availability and quality improves.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

- **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A – the Portfolio did not commit to holding Taxonomy-aligned investments.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A – the Portfolio did not commit to holding Taxonomy-aligned investments in this or the previous reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A – the Portfolio did not commit to holding sustainable investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A – the Portfolio did not commit to holding sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” included the remaining investments of the Portfolio (including but not limited to any derivatives or any security collateralized by a pool of similar assets or receivables listed in the Supplement for the Portfolio) which were neither aligned with the environmental or social characteristics, nor qualified as sustainable investments.

The “Other” section in the Portfolio was held for a number of reasons that the Manager felt was beneficial to the Portfolio, such as, but not limited to, achieving risk management, and/or to ensure adequate liquidity, hedging and collateral cover.

As noted above, the Portfolio was invested in compliance with ESG exclusion policies, on a continuous basis. This ensured that investments made by the Portfolio sought to align with international environmental and social safeguards such as the UNGC Principles, the UNGPs, the OECD Guidelines and the ILO Standards.

The Manager believes that these policies prevented investment in issuers that most egregiously violated environmental and/or social minimum standards and ensured that the Portfolio could successfully promote its environmental and social characteristics.

The above steps ensured that robust environmental and social safeguards were in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio was managed in-line with the investment objective and the following actions were taken:

I. Integrating proprietary ESG analysis:

The Manager applied a high standard of due diligence in the selection and ongoing monitoring of investments made by the Portfolio to ensure the integration of Sustainability Risks (as defined in the SFDR) and ESG. The Manager views ESG integration as the practice of incorporating material ESG risks and considerations (as a binding element) into the investment decision-making process. ESG integration sits alongside other financial considerations and should enrich the Manager's investment teams' analysis of issuers by providing a toolkit for identifying material ESG risks and opportunities that inform investment decisions. The Manager believes that material ESG factors are an important driver of long-term investment returns from both an opportunity and a risk-mitigation perspective. Hence, the Manager's ESG integration approach considers ESG opportunities as well as Sustainability Risks.

Before making investments, the investment team conducted due diligence that it deemed reasonable and appropriate based on the facts and circumstances applicable to each investment. The investment team assessed the investment's alignment with the environmental and social characteristics promoted by the Portfolio using (as appropriate) the NB ESG Quotient and exclusionary screens (to identify potential non-compliance with the above listed ESG exclusions). The due diligence was supported by third-party data sources.

The NB ESG Quotient rating for issuers was utilised to help to better identify risks and opportunities in the overall credit and value assessment. The NB ESG Quotient was a key component of the internal credit ratings and helped to identify business risks (including ESG risks), which would cause deterioration in an issuer's credit profile. Internal credit ratings can be notched up or down based on the NB ESG Quotient rating, and this was monitored by the Manager as an important component of the investment process for the Portfolio.

By integrating the investment team's proprietary ESG analysis (the NB ESG Quotient) into their internal credit ratings, there was a direct link between their analysis of the Portfolio's environmental and social characteristics and the Portfolio's portfolio construction activities.

II. Engagement:

The Manager engaged with issuers through a robust ESG engagement program. They sought to prioritise constructive engagements and sought to engage on topics (including ESG topics) they determined to be financially material for the relevant issuer. The Manager viewed this engagement with issuers, as an important part of its investment process. Progress on engagement was tracked centrally in the Manager's engagement tracker.

III. ESG sectoral exclusion policies:

To ensure that the environmental and social characteristics promoted by the Portfolio were attained, the Portfolio applied the ESG exclusion policies referenced above, which placed limitations on the investable universe.

How did this financial product perform compared to the reference benchmark?

N/A – The Portfolio has not designated a reference benchmark.

- *How does the reference benchmark differ from a broad market index?*
N/A
- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*
N/A
- *How did this financial product perform compared with the reference benchmark?*
N/A
- *How did this financial product perform compared with the broad market index?*
N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Neuberger Berman European High Yield Bond Fund (the “Portfolio”)

Legal entity identifier: 549300Z7RL5FC5H5DB41

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☐ It made **sustainable investments with an environmental objective**: ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: ____%

☒ ☐ ☒ No

☐ It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promoted E/S characteristics, but **did not** make any sustainable investments

The most recent SFDR Pre-Contractual Template of the Portfolio can be found [here](#).

This SFDR Periodic Report template reports on the 2023 calendar year (the “**Reference Period**”). Unless otherwise stated in the relevant disclosure, all Reference Period data has been calculated based on the average of the four calendar quarter ends.

This SFDR Periodic Report template reports on several quantitative ESG data metrics. To assist the reader in their review and assessment of such ESG data metrics, we have disclosed the Portfolio’s data coverage for these ESG data metrics. The intention is that disclosure of the data coverage (of the ESG metrics during the Reference Period) will allow the reader to interpret the ESG data metrics’ ability to represent the Portfolio with any limitations to such data coverage in mind.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and social characteristics were promoted by the Portfolio:

- **Environmental Characteristics:** biodiversity & responsible land usage; carbon footprint reduction; greenhouse gas (“GHG”) emissions; opportunities in clean technologies; opportunities in green building; responsible raw material sourcing; recycling practices & trends; toxic emissions & waste; waste management; and water management.
- **Social Characteristics:** access to finance; access to healthcare; access to medicines; business ethics & transparency of government relations; chemical safety; community relations; controversial sourcing; corporate behaviour; drug safety & side effects management; health & nutrition; health & safety; human capital development; labour management; data privacy & security; product safety & quality; and quality of care & patient satisfaction.

Performance in relation to these environmental and social characteristics was measured through the NB ESG Quotient, and is reported, in aggregate, below.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

As part of the investment process, the Sub-Investment Manager considered a variety of sustainability indicators to measure the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators are listed below:

1. The NB ESG Quotient:

The proprietary Neuberger Berman ESG rating system (the “**NB ESG Quotient**”), is built around the concept of sector specific ESG risk and opportunity, and produced an overall ESG rating for issuers by assessing them against certain ESG metrics.

Foundational to the NB ESG Quotient is the proprietary Neuberger Berman (“**NB**”) materiality matrix, which focused on the ESG characteristics that were considered to be the most likely to be the material drivers of ESG risk and opportunity for each sector. The NB materiality matrix enabled the Sub-Investment Manager to derive the NB ESG Quotient rating, to compare sectors and issuers relative to their environmental and social characteristics. Each sector criteria was constructed using third-party and internally derived ESG data and supplemented with internal qualitative analysis, leveraging the Portfolio’s analyst team’s significant sector expertise.

The NB ESG Quotient assigned weightings to environmental, social and governance characteristics for each sector to derive the NB ESG Quotient rating for issuers. While the NB ESG Quotient rating of issuers was considered as part of the investment process, there was no minimum NB ESG Quotient rating to be attained by an issuer prior to investment. Issuers with a favourable and/or an improving NB ESG Quotient rating had a higher chance of being included in the Portfolio. Issuers with a poor NB ESG Quotient rating, especially where a poor NB ESG Quotient rating was not being addressed by an issuer, were more likely to be removed from the investment universe or divested from the Portfolio. In addition, the Sub-Investment Manager sought to prioritise constructive engagements with corporate issuers.

The Reference Period data was calculated by averaging the data of the four calendar quarter ends.

Reference Period	Rating	Range	Combined Coverage
NB ESG Quotient	60	1-100	99%

Third-Party Data	6.1	0-10	
------------------	-----	------	--

With regards to the NB ESG Quotient rating, a rating between 1-100 is used where 1 is the lowest rating and 100 is the highest rating. This Portfolio does not have a minimum NB ESG Quotient rating to be attained by an issuer prior to investment.

The average NB ESG Quotient rating is a weighted average that reflects the ESG characteristics that were considered to be the most material drivers of ESG risk and opportunity for each issuer held in the Portfolio. It is not an ESG assessment or rating of the overall Portfolio and its promotion of environmental and social characteristics, but rather an assessment of the material ESG risks and opportunities the Portfolio had exposure to.

Third-party data was also used to measure the resilience of the Portfolio's aggregate holdings to long-term, financially material, ESG risks. The third-party data ratings range from 0-10, with 0 being the lowest rating and 10 being the highest rating.

Assessment and management of material ESG risks and opportunities is an essential element of the Portfolio's promotion of environmental and social characteristics.

2. Climate Value-at-Risk:

Over the Reference Period, Climate Value-at-Risk ("CVaR") measured the exposure to transition and physical climate risks and opportunities for corporate issuers. CVaR is a scenario analysis tool evaluating economic risks and opportunities under various degree scenarios (i.e., the amount of warming targeted) and potential regulatory environments in varying countries.

CVaR is a type of scenario analysis which is defined as the present value of aggregated future policy risk costs, technology opportunity profits, and extreme weather event costs and profits, expressed as a percentage of an issue's or portfolio's market value (i.e. potential gain or loss) according to the warming scenario targeted.

By calculating the financial risks and opportunities from climate change per issue and per scenario, CVaR provides a framework that helps quantify and understand these risks and opportunities. The CVaR metric provides insight into the climate-stressed valuation of assets based on specific degree scenarios, providing an assessment on how much an issue may stand to lose or gain from the impact of climate change.

For the Reference Period, CVaR projected that a warming climate scenario could result in a loss of 10.1% in the valuation of assets under assessment. The Reference Period data has been calculated based on the average of the four calendar quarter ends.

This analysis is intended as a broad overview of the investment team's style and investment process.

On a holistic basis, the results were evaluated by the Sub-Investment Manager's portfolio managers and analysts. The scenario analysis served as a starting point for further bottom-up analysis and identifying potential climate-related risks to address through issuer engagement.

Due to data limitations, CVaR was not applied across all issuers held by the Portfolio and was instead limited to the issuers for which the Sub-Investment Manager had sufficient and reliable data. The Portfolio had a CVaR coverage of 36% and this coverage has been calculated based on the average of the four calendar quarter ends.

The analysis from CVaR is reviewed at least once a year.

3. ESG exclusion policies:

To ensure that the environmental or social characteristics promoted by the Portfolio were attained, the Portfolio did not invest in securities issued by issuers whose activities had been identified as breaching or were not consistent with the Neuberger Berman Controversial Weapons Policy and the Neuberger Berman Thermal Coal Involvement Policy. From 2 August 2023 onwards, the Portfolio applied the Neuberger Berman Sustainable Exclusion Policy. In addition to the application of the Neuberger Berman Thermal Coal Involvement Policy, the Sub-Investment Manager prohibited the initiation of new investment positions in securities issued by issuers that (i) derived more than 25% of their revenue from thermal coal mining; or (ii) were expanding new thermal coal power generation. Furthermore, investments held by the Portfolio did not invest in securities issued by issuers whose activities had been identified as breaching, or were not consistent with, the Neuberger Berman Global Standards Policy which excluded identified violators of (i) the United Nations Global Compact Principles ("**UNGC Principles**"), (ii) the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct ("**OECD Guidelines**"), (iii) the United Nations Guiding Principles on Business and Human Rights ("**UNGPs**") and (iv) the International Labour Standards ("**ILO Standards**").

When applying ESG exclusions to the Portfolio, the Sub-Investment Manager used third-party data to identify issuers in breach of the ESG exclusions listed above. Where possible, the Sub-Investment Manager sought to overlay this third-party data with qualitative expertise from their research analysts to establish a current and holistic picture of the issuer. The Sub-Investment Manager discussed and debated the differences between the violators identified by the third-party data and those identified as a result of their research, which drew upon data from the NB ESG Quotient and direct engagements with the issuer.

● ...and compared to previous periods?

For the 2022 reference period, the quantitative data disclosed (for the sustainability indicators) was calculated as at 31 December 2022, being the only quarter end in the reference period that followed the entry into force of the SFDR RTS (which included the publication of the Portfolio's SFDR pre-contractual disclosure template).

The below sustainability indicators' quantitative data for the Reference Period was calculated by averaging the four calendar quarter ends.

1. NB ESG Quotient

	NB ESG Quotient Rating	Third-Party Data Rating	Combined Coverage
Range	1-100	0-10	0-100%
2022 reference period	59	5.5	98%
2023 reference period	60	6.1	99%

Year-on-year, the NB ESG Quotient rating has improved. This is due to improvements in individual issuers held in the Portfolio and due to trading activity.

Year-on-year, the third-party data rating has improved. This is due to improvements in individual issuers held in the Portfolio and due to trading activity as well as potential changes to, or differences in, the issuer's third-party rating by the provider.

2. CVaR

	CVaR	Coverage
2022 reference period	-8.7%	34%
2023 reference period	-10.1%	36%

Year-on-year, the CVaR projection has moved due to changes associated with corporate issuers held and trading activity within the Portfolio.

3. Exclusions

Consistent with the previous calendar year, there were no breaches (of the above listed ESG exclusions) during the Reference Period.

	Total number of breaches
2022 reference period	0
2023 reference period	0

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A – the Portfolio did not commit to holding sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A – the Portfolio did not commit to holding sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio did not commit to holding sustainable investments, however the Sub-Investment Manager did not invest in issuers whose activities had been identified as breaching, or were not consistent with, the OECD Guidelines, UNGC Principles, ILO Standards and UNGPs, captured through the Neuberger Berman Global Standards Policy.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

N/A – the Portfolio did not commit to holding Taxonomy-aligned investments.

How did this financial product consider principal adverse impacts on sustainability factors?

A selection of the principal adverse impact indicators were considered directly (e.g. through the ESG exclusion policies listed above) and/or indirectly (e.g. as part of the Sub-Investment Manager's assessment of issuers) throughout the Reference Period.

The Sub-Investment Manager considered the principal adverse impacts outlined in the below table on sustainability factors (the “**Product Level PAIs**”):

Product Level PAIs	
Theme	Adverse sustainability indicator
<i>Greenhouse gas emissions</i>	PAI 1 - GHG emissions PAI 2 - Carbon footprint PAI 3 - GHG intensity of investee companies PAI 4 - Exposure to companies active in the fossil fuel sector
<i>Social and employee matters</i>	PAI 10 - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises PAI 13 - Board gender diversity PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Consideration of the Product Level PAIs was limited by the availability (in the Sub-Investment Manager's subjective view) of adequate, reliable and verifiable data coverage. The Sub-Investment Manager utilised third- party data and proxy data along with internal research to consider the Product Level PAIs.

Consideration of the Product Level PAIs by the Sub-Investment Manager was through a combination of:

- Monitoring the Portfolio, in particular where it fell below the quantitative and qualitative tolerance thresholds set for each Product Level PAI by the Sub-Investment Manager;
- Stewardship and/or setting engagement objectives where the Portfolio fell below the quantitative and qualitative tolerance thresholds set for a Product Level PAI by the Sub-Investment Manager; and
- Application of the ESG exclusion policies referenced above, which included consideration of several of the Product Level PAIs.

What were the top investments of this financial product?

The Sub-Investment Manager has used the EU statistical classification of economic activities ("**NACE**") economic sector breakdown to identify the economic sectors of the Portfolio's top 15 investments.

As the list below is based on an average calculated across the four calendar quarter ends of the Reference Period, this may differ from the top investments of the Portfolio calculated as at 31 December 2023 in the "Schedule of Investments" section of the financial statements.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2023 - 31 December 2023

Largest investments	Sector	% Assets	Country
LORCA TELECOM BONDCO SAU RegS	J - Information and Communication	1.5%	Spain
EDP - ENERGIAS DE PORTUGAL SA MTN RegS	D - Electricity, gas, steam, and air conditioning supply	1.3%	Portugal
CELLNEX TELECOM SA MTN RegS	J - Information and Communication	1.2%	Spain
ABERTIS INFRAESTRUCTURAS FINANCE B RegS	K - Financial and insurance activities	1.1%	Spain
DOUGLAS GMBH RegS	G - Wholesale and Retail trade; Repair of Motor Vehicles and Motorcycles	1.1%	Germany
BELLIS ACQUISITION COMPANY PLC RegS	K - Financial and insurance activities	1.1%	United Kingdom
VALEO SE MTN RegS	C - Manufacturing	1.0%	France
TELECOM ITALIA SPA MTN RegS	J - Information and Communication	1.0%	Italy
TECHEM VERWALTUNGSGESELLSCHAFT 675 RegS	K - Financial and insurance activities	1.0%	Germany
BAYER AKTIENGESELLSCHAFT RegS	C - Manufacturing	0.9%	Germany
NGG FINANCE PLC RegS	K - Financial and insurance activities	0.9%	United Kingdom
CECONOMY AG RegS	G - Wholesale and Retail trade; Repair of Motor Vehicles and Motorcycles	0.9%	Germany
IHO VERWALTUNGS GMBH RegS	C - Manufacturing	0.8%	Germany
NIDDA HEALTHCARE HOLDING GMBH RegS	C - Manufacturing	0.8%	Germany
VERISURE HOLDING AB RegS	C - Manufacturing	0.8%	Sweden

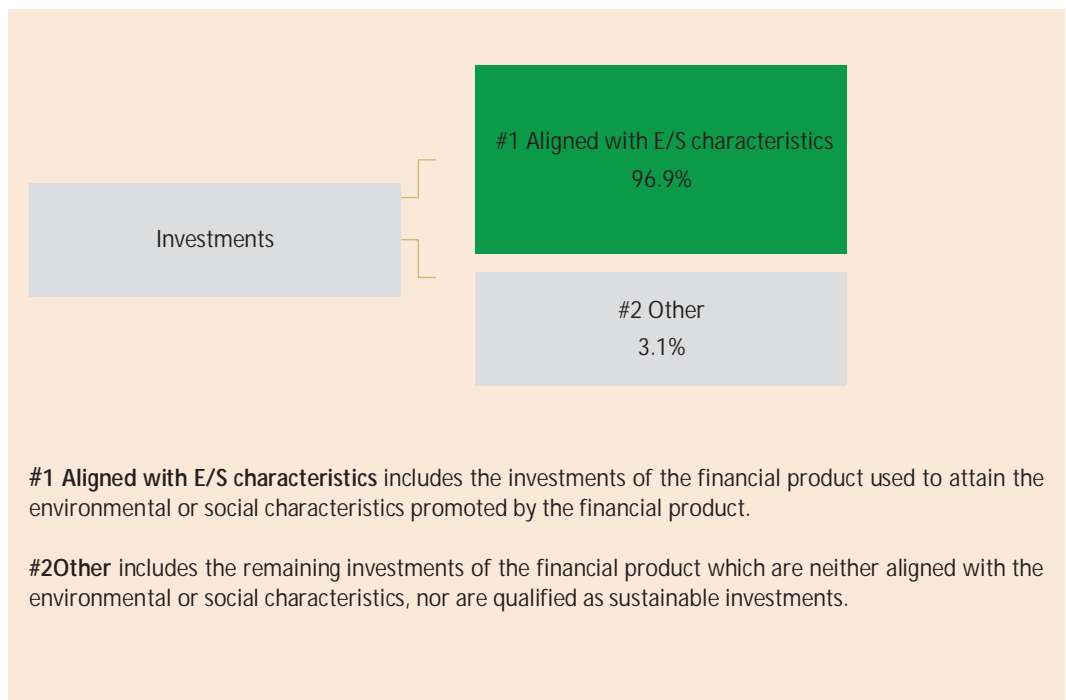

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

- The Portfolio aims to hold a minimum of 80% investments that are aligned with the environmental or social characteristics promoted by the Portfolio. During the Reference Period, the Portfolio held 96.9% investments that were aligned with the environmental or social characteristics promoted by the Portfolio.
- The Portfolio aims to hold a maximum of 20% investments that are not aligned with the environmental or social characteristics promoted by the Portfolio and are not sustainable investments, and which fall into the “Other” section of the Portfolio. During the Reference Period, the Portfolio held 3.1% “Other” investments.

The Sub-Investment Manager calculated the proportion of investments aligned with the environmental and/or social characteristics promoted by the Portfolio by reference to the proportion of issuers in the Portfolio: i) that held either an NB ESG Quotient rating or where a third-party equivalent ESG rating that was used as part of the portfolio construction and investment management process of the Portfolio; and/or ii) with whom the Sub-Investment Manager had engaged directly. This calculation was based on a mark-to-market assessment of the Portfolio and may be based on incomplete or inaccurate issuer or third-party data. The Reference Period is an average of the four calendar quarter ends.

In which economic sectors were the investments made?

The Reference Period for the below data is an average of the four calendar quarter ends.

Economic Sector – NACE	% Assets
C - Manufacturing	25.2%
D - Electricity, gas, steam, and air conditioning supply	1.4%

E - Water supply; sewerage; waste management and remediation activities	0.4%
G - Wholesale and retail trade; repair of motor vehicles and motorcycles	5.9%
H - Transporting and storage	3.5%
I - Accommodation and food service activities	0.8%
J - Information and communication	17.0%
K - Financial and insurance activities	35.8%
L - Real estate activities	2.9%
M - Professional, scientific, and technical activities	0.7%
N - Administrative and support service activities	4.7%
P - Education	0.7%
R - Arts, entertainment, and recreation	0.9%
None	0.3%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

- **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

N/A - The analysis and disclosure requirements introduced by the EU Taxonomy are very detailed and compliance with them requires the availability of multiple, specific data points in respect of each investment which the Portfolio made. The Sub-Investment Manager cannot confirm that the Portfolio invested in any investments that qualified as environmentally sustainable for the purposes of the EU Taxonomy. Disclosures and reporting on Taxonomy alignment will develop as the EU framework evolves and data is made available by issuers. The Sub-Investment Manager will keep the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy under active review as data availability and quality improves.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A – the Portfolio did not commit to holding Taxonomy-aligned investments.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A – the Portfolio did not commit to holding Taxonomy-aligned investments in this or the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A – the Portfolio did not commit to holding sustainable investments.

What was the share of socially sustainable investments?

N/A – the Portfolio did not commit to holding sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” included the remaining investments of the Portfolio (including but not limited to any derivatives or any security collateralized by a pool of similar assets or receivables listed in the Supplement for the Portfolio) which were neither aligned with the environmental or social characteristics, nor qualified as sustainable investments.

The “Other” section in the Portfolio was held for a number of reasons that the Sub-Investment Manager felt was beneficial to the Portfolio, such as, but not limited to, achieving risk management, and/or to ensure adequate liquidity, hedging and collateral cover.

As noted above, the Portfolio was invested in compliance with ESG exclusion policies, on a continuous basis. This ensured that investments made by the Portfolio sought to align with international environmental and social safeguards such as the UNGC Principles, the UNGPs, the OECD Guidelines and the ILO Standards.

The Sub-Investment Manager believes that these policies prevented investment in issuers that most egregiously violated environmental and/or social minimum standards and ensured that the Portfolio could successfully promote its environmental and social characteristics.

The above steps ensured that robust environmental and social safeguards were in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio was managed in-line with the investment objective and the following actions were taken:

I. Integrating proprietary ESG analysis:

The Sub-Investment Manager applied a high standard of due diligence in the selection and ongoing monitoring of investments made by the Portfolio to ensure the integration of Sustainability Risks (as defined in the SFDR) and ESG. The Sub-Investment Manager views ESG integration as the practice of incorporating material ESG risks and considerations (as a binding element) into the investment decision-making process. ESG integration sits alongside other financial considerations and should enrich the Sub-Investment Manager's investment teams' analysis of issuers by providing a toolkit for identifying material ESG risks and opportunities that inform investment decisions. The Sub-Investment Manager believes that material ESG factors are an important driver of long-term investment returns from both an opportunity and a risk-mitigation perspective. Hence, the Sub-Investment Manager's ESG integration approach considers ESG opportunities as well as Sustainability Risks.

Before making investments, the investment team conducted due diligence that it deemed reasonable and appropriate based on the facts and circumstances applicable to each investment. The investment team assessed the investment's alignment with the environmental and social characteristics promoted by the Portfolio using (as appropriate) the NB ESG Quotient and exclusionary screens (to identify potential non-compliance with the above listed ESG exclusions). The due diligence was supported by third-party data sources.

The NB ESG Quotient rating for issuers was utilised to help to better identify risks and opportunities in the overall credit and value assessment. The NB ESG Quotient was a key component of the internal credit ratings and helped to identify business risks (including ESG risks), which would cause deterioration in an issuer's credit profile. Internal credit ratings can be notched up or down based on the NB ESG Quotient rating, and this was monitored by the Sub-Investment Manager as an important component of the investment process for the Portfolio. By integrating the investment team's proprietary ESG analysis (the NB ESG Quotient) into their internal credit ratings, there was a direct link between their analysis of the Portfolio's environmental and social characteristics and portfolio construction activities.

II. Engagement:

The Sub-Investment Manager engaged with issuers through a robust ESG engagement program. They sought to prioritise constructive engagements and sought to engage on topics (including ESG topics) they determined to be financially material for the relevant issuer. The Sub-Investment Manager viewed this engagement with issuers, as an important part of its investment process. Progress on engagement was tracked centrally in the Sub-Investment Manager's engagement tracker.

III. ESG sectoral exclusion policies:

To ensure that the environmental and social characteristics promoted by the Portfolio

were attained, the Portfolio applied the ESG exclusion policies referenced above, which placed limitations on the investable universe.

How did this financial product perform compared to the reference benchmark?

N/A – The Portfolio has not designated a reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*
N/A
- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*
N/A
- *How did this financial product perform compared with the reference benchmark?*
N/A
- *How did this financial product perform compared with the broad market index?*
N/A

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Neuberger Berman European Sustainable Equity Fund (the “Portfolio”)

*Please refer to the "What was the proportion of sustainability-related investments?" question below for further detail in respect of the Portfolio's asset allocation (including its exposure to sustainable investments).

The most recent SFDR Pre-Contractual Template of the Portfolio can be found [here](#).

This SFDR Periodic Report template reports on the 2023 calendar year (the “**Reference Period**”). Unless otherwise stated in the relevant disclosure, all Reference Period data has been calculated based on the average of the four calendar quarter ends.

This SFDR Periodic Report template reports on several quantitative ESG data metrics. To assist the reader in their review and assessment of such ESG data metrics, we have disclosed the Portfolio's data coverage for these ESG data metrics. The intention is that disclosure of the data coverage (of the ESG metrics during the Reference Period) will allow the reader to interpret the ESG data metrics' ability to represent the Portfolio with any limitations to such data coverage in mind.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and social characteristics were promoted by the Portfolio:

- **Environmental Characteristics:** air quality; biodiversity & land use; energy management; environmental risk exposure; fuel economy; greenhouse gas (“GHG”) emissions; opportunities in clean technologies; toxic emissions & waste; water management; packaging lifecycle management; materials sourcing; and product lifecycle management.
