ESG global score

BNPP AM's internal ESG scoring methodology determines an issuer's ESG score by evaluating performance vs. scoring peers on a narrow set of key ESG issues related to the environment (e.g. climate change), social issues (e.g. human resources management) and governance (e.g. independence and competence of directors). BNPP AM uses numerous research inputs and data sources (e.g. Sustainalytic, ISS & Trucost) to determine issuers' ESG scores. If the issuer's commitments and practices on a pillar of assessment (E, S or G) is better than scoring peers, it will receive a positive "contribution" for this pillar. Each issuer is assigned a final score from 1 to 99 which is the result of 50 as a reference plus the sum of the contributions from each of the three pillars.

ESG Contribution

The ESG contributions are determined by BNP Paribas Asset Management's ESG analysts on the basis of detailed criteria to systematically evaluate companies' commitments and practices in the areas of environmental, social and governance. Each of the above contributions at the portfolio level, is the weighted average of the contributions of the individual portfolio holdings. Environmental Contribution (E) takes into account, among other things, climate change, environmental risk management, and the use of natural resources. Social Contribution (S) takes into account, among other things, human capital management, the quality of social dialogue, and the respect of diversity. Governance Contribution (G) takes into account, among other things, the transparency on executive compensation, the fight against corruption, and gender equality.

Carbon footprint

The portfolio or benchmark carbon footprint is the sum of companies' carbon emissions divided by companies' Enterprise Value multiplied by the weight of companies in the portfolio or the benchmark. Carbon emissions are the sum of Scope 1 emissions (direct emission from the company's facilities) & Scope 2 emissions (indirect emissions linked to the company's energy consumption). Carbon data provider is Trucost. The footprint is expressed in tons of CO2 equivalent per year and per million euros invested. Enterprise Value (EV) is the measure of a company's total value. It is calculated by adding the market capitalization and the financial debt of a company.

Portfolio Coverage

The coverage represents, within a portfolio or benchmark or ESG benchmark, the percentage of securities that have an ESG score or carbon footprint within those that are eligible to have an ESG score or carbon footprint using BNPP AM's internal methodology. Non-eligible securities include, but are not limited to cash, external funds.

DISCLAIMER

BNP Paribas Asset Management Singapore Limited, "the investment management company", is a company incorporated in Singapore with its registered office at 20 Collyer Quay, #01-01 Collyer Quay, Singapore 049319, Company Registration No. 199308471D. This material is issued and has been prepared by the investment management company and its contents have not been reviewed by the Monetary Authority of Singapore. It contains opinions and statistical data that are considered lawful and correct on the day of their publication according to the economic and financial environment at the time. This document is produced for information purposes and does not constitute: 1) an offer to buy nor a solicitation to sell, nor shall it form the basis of or be relied upon in connection with any contract or commitment whatsoever or; 2) investment advice. This document does not have any regard to the specific investment objectives, financial situation or particular needs of any person. Investors should consult their own professional advisors in respect of legal, accounting, domicile and tax advice prior to investing in the fund in order to make an independent determination of the suitability and consequences of an investment therein, if permitted. Investors considering subscribing for the fund should read

carefully the most recent prospectus, offering document or other information material and consult the fund's most recent financial reports before investing, as available from the investment management company or its authorized distributors. Given the economic and market risks, there can be no assurance that the fund will achieve its investment objectives. Investments in the fund are not deposits or other obligations of, or guaranteed, or insured by the investment management company or its authorized distributors or their affiliates and are subject to investment risks, including the possible loss of principal amount invested. Returns may be affected by, amongst other things, investment strategies or objectives of the fund and material market and economic conditions, including interest rates, market terms and general market conditions. Past performance of the fund or the managers, and any economic and market trends or forecast, are not necessarily indicative of the future or likely performance of the fund or the manager. The value of shares in the fund, and the income accruing to the shares (if any), may fall as well as rise and investors may not get back the full amount invested. Funds which are invested in emerging markets, smaller companies and derivative instruments may also involve a higher degree of risk and are usually more sensitive to price movements. Views and opinions included in this document constitute the judgment of the investment management company and its affiliates at the time specified and may be subject to change without notice.
