KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- You are investing in a sub-fund of Neuberger Berman Investment Funds plc, which is an investment company incorporated under the laws of Ireland and authorised as a UCITS umbrella fund by the Central Bank of Ireland. The Portfolio seeks to maximise total return from high current income and long-term capital appreciation by opportunistically investing in a diversified mix of fixed rate and floating rate debt securities under varying market environments with a focus on downside protection.
- Dividend policy:
 - Accumulating shares: No dividends will be paid.
 - Distributing shares: Dividends in respect of (Monthly) Distributing Classes shall be declared on or prior to the last Business Day of each month (and paid within three Business Days thereafter) at the discretion of the Directors.

Refer to "THE COMPANY", "THE PORTFOLIOS" and "INVESTMENT OBJECTIVE, FOCUS AND APPROACH" of the Singapore Prospectus for further information on features of the product.

Investment Strategy

- The Portfolio will invest primarily in debt securities issued by US corporations or by the US government and its agencies. Such securities will be listed, dealt, or traded on Recognised Markets and may be rated investment grade or below investment grade or non-rated by Recognised Rating Agencies.

Refer to "INVESTMENT OBJECTIVE, FOCUS AND APPROACH" of the

<ul style="list-style-type: none"> •The Sub-Investment Manager implements a disciplined investment process that is consistently applied across all fixed income sectors with an ongoing focus on identifying the most attractive investment opportunities in the fixed income market. •In addition, although the Portfolio will concentrate its investments in the US, the Portfolio may also invest in debt securities issued by non-US governments and their agencies and corporations located globally up to one third of the Portfolio's NAV. •The Portfolio's net market exposure may vary in time and range from a maximum net long position of 150% to a maximum net short position of 0% of the NAV of the Portfolio, depending on the Sub-Investment Manager's analysis of the prevailing market conditions and considered in light of the investment objective of the Portfolio. •The maximum proportion of the Portfolio's NAV that can be subject to total return swaps is 20%. The expected proportion of the Portfolio's NAV that will be subject to total return swaps is 5%. •Repo Contracts may be used subject to the conditions and limits set out in the Irish Prospectus. •The Portfolio may opportunistically invest up to 10% of its NAV in participation interests in floating or adjustable rate senior secured loans, which are securitised and freely transferable, and which meet the regulatory criteria to be considered money market instruments. •Under normal market conditions, the Sub-Investment Manager anticipates that the Portfolio's interest rate duration will be within a range of 2 to 8 years. •The Portfolio will not utilise securities lending or margin lending. •The Portfolio will use FDIs for investment purposes, efficient portfolio management purposes and/or hedging purposes. •The Portfolio may or may be expected to have medium to high levels of volatility due to its investment policies or portfolio management techniques. 	<p>Singapore Prospectus for further information on the investment strategy.</p>
Parties Involved	
<p>WHO ARE YOU INVESTING WITH?</p> <ul style="list-style-type: none"> •You are investing in Neuberger Berman Investment Funds plc, an umbrella fund of which the Portfolio is a sub-fund. •The manager is Neuberger Berman Asset Management Ireland Limited and the sub-investment managers are Neuberger Berman Investment Advisers LLC, Neuberger Berman Singapore Pte. Limited and Neuberger Berman Europe Limited. •The depositary is Brown Brothers Harriman Trustee Services (Ireland) Limited. 	<p>Refer to "THE COMPANY", "MANAGEMENT", "OTHER PARTIES" and "INSOLVENCY OF THE PARTIES" of the Singapore Prospectus for further information on the role and responsibilities of these entities and what happens when they become insolvent.</p>
KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT? The value of the product and its dividends or coupons (if any) may rise or fall. These risk factors may cause you to lose some or all of your investment:</p>	<p>Refer to "RISK FACTORS" of the Singapore Prospectus for further information on the risk of the product.</p>
Market and Credit Risks	
<ul style="list-style-type: none"> •Fixed Income Securities and Downgrade Risk – Fixed income securities are subject to credit risk and price volatility. Fixed income securities are also exposed to the risk of being downgraded, which can cause a significant drop in the value of the Portfolio. The Sub-Investment Manager may or may not be able to dispose of the debt instruments that are being downgraded. •Lower Rated Securities Risk – The Portfolio may invest in lower rated or unrated (i.e. non-investment grade or high yield) securities, which are more likely to react to 	

<p>developments affecting market and credit risk than are more highly rated securities. The Portfolio may therefore find it more difficult to sell such securities or may be able to sell these securities only at prices lower than if such securities were widely traded. The Portfolio may experience difficulty in valuing certain securities at certain times.</p> <ul style="list-style-type: none">•Credit Risk – The Portfolio may invest in corporate fixed income securities. Corporate issuers of such fixed income securities may fail to meet their interest repayments, or repay debt, which may result in the Portfolio suffering temporary or permanent losses.•Sovereign Debt Risk – The Portfolio may invest in government/sovereign fixed income securities, and will be exposed to direct or indirect consequences of political, social and economic changes in various countries by investing in sovereign debts.•Emerging Market Economies Risk and Emerging Market Debt Securities Risk – Investing in emerging markets may involve heightened risks (some of which could be significant) such as greater social, economic and political uncertainty, and periods of extreme volatility. Debt securities of Emerging Market Countries may be subject to greater risk of loss of principal and interest and liquidity risk, and be exposed to fluctuations in yields or prices, than debt securities issued by obligors in developed countries.•Risks Associated with Collateralised and/or Securitised Products – The Portfolio may invest in collateralised and/or securitised products, which may be prone to substantial price volatility, and subject to greater credit, liquidity and interest rate risk compared to other debt securities. They are often exposed to extension and prepayment risks and risks that the payment obligations relating to the underlying assets are not met, which may adversely impact the return of the securities.•Currency Risk – The base currency value of the investment of the Portfolio designated in another currency may rise and fall due to exchange rate fluctuations in respect of the relevant currencies. The currency exchange rates of Emerging Market Countries tend to be more volatile than those of more developed countries. As the base currency of the Portfolio is not in Singapore dollars, Singapore investors may be exposed to an additional currency risk.•Currency Hedging Risk – Currency hedging instruments may involve the risk of a default by a counterparty.•Downside Protection Risk – Downside risk management may preclude the Portfolio from fully capturing the upside in rising markets. The Portfolio may therefore underperform funds that do not adopt such a downside protection strategy.								
Liquidity Risks								
<ul style="list-style-type: none">•The Portfolio is not listed in Singapore and you can redeem only on Dealing Days – There is no secondary market for the Portfolio. Your right to redeem may be suspended or deferred under certain circumstances.								
Product-Specific Risks								
<ul style="list-style-type: none">•Risks relating to the use of FDI – FDIs may be subject to various types of risks, including market risk, liquidity risk, counterparty credit risk, legal risk and operations risk. In addition, FDIs can involve significant economic leverage and may, in some cases, involve high risk of significant loss. The use of FDIs may lead to risk of loss of capital or increase the volatility of the Portfolio's NAV.•Risks relating to dividend payment – Dividends paid out of capital amount to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment which may result in an immediate decrease in the NAV of the relevant shares. An investment in high yield securities does not necessarily imply high dividend distribution for all share classes.
