Investment Strategy	
<p>STRATEGY</p> <ul style="list-style-type: none"> The Portfolio invests in global equity portfolios that are designed as solutions for investors who seek equity returns but also want broad diversification of the related risks across styles, sectors and geographic regions. In managing the Portfolio, the Investment Manager efficiently diversifies between growth and value equity investment styles. The Investment Manager selects growth and value equity securities by drawing from a variety of its fundamental growth and value investment disciplines to produce a blended portfolio. Normally, the Investment Manager's targeted allocation for the Portfolios is an equal weighting of 50% growth stocks and 50% value stocks. The Investment Manager will allow the relative weightings of the Portfolio's growth and value components to vary in response to markets, but ordinarily only within a range of +/- 5% of the Portfolio. Beyond those ranges, the Investment Manager will generally rebalance the Portfolio toward the targeted allocation. However, under extraordinary circumstances, when the Investment Manager believes that conditions favoring one or the other investment are compelling, the range may expand to +/-10% of the Portfolio before rebalancing occurs. The Portfolio may use derivatives for EPM and hedging purposes. 	Refer to " <i>Investment Objective and Policies</i> " in the Prospectus relating to the Portfolio for further information on the investment strategy.
Parties Involved	
<p>WHO ARE YOU INVESTING WITH?</p> <ul style="list-style-type: none"> The Investment Manager for the Portfolio is AllianceBernstein L.P., a Delaware limited partnership. Brown Brothers Harriman (Luxembourg) S.C.A. has been appointed to act as Administrator and Depositary. Refer to "<i>Other Important Information</i>" of the Singapore Prospectus for information on what happens if these entities become insolvent. 	Refer to " <i>Management and Administration</i> " of the Prospectus for further information on their roles and responsibilities.
KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</p> <p>The value of investments and the income from them, and therefore the value of and income from Shares of the Portfolio, can go down as well as up and you may not get back the amount you invest.</p> <p>These risk factors, among others, may cause you to lose some or all of your investment:</p>	Refer to " <i>Risks</i> " of the Singapore Prospectus for further information on the risks of investing in the Portfolio.
Market and Credit Risks	
<p>You are exposed to global Country Risks. Investments in issuers located in a particular country or geographic region may have more market, political and economic risks because of particular factors affecting that country or region.</p> <p>You are exposed to Currency Risks. Currency movements in the underlying investments of a portfolio that is denominated in a currency different from that of the portfolio itself may significantly affect the NAV of that portfolio.</p>	
Liquidity Risks	
<p>You are exposed to liquidity risks of the underlying fund's investments. Investments in illiquid assets or assets which become illiquid could prevent the Portfolio from promptly liquidating unfavourable positions and, therefore, result in losses to the Portfolio and corresponding decreases in the NAV of the Shares.</p> <p>The Shares are not listed and can only be realised on Business Days. There is no secondary market for the Shares. All realisation requests should be submitted in the manner set out in the Singapore Prospectus.</p>	

<p>You may not be able to redeem when a redemption limit is imposed or when redemption is suspended. A redemption limit may be imposed if requests are received to redeem more than 10% of the Shares of the Portfolio outstanding. Further, your right to redeem may be temporarily suspended under certain circumstances.</p>	
<p>Product-Specific Risks</p>	
<p>You are exposed to Derivatives Risks. The Portfolio is entitled to use derivative instruments for hedging and EPM purposes which may involve additional risks different from, and, in certain cases, greater than, the risks presented by more traditional investments. Some of the risks associated with derivatives are market risk, management risk, credit risk, liquidity risk and leverage risk. In adverse situations, the Portfolio's use of derivative instruments may become ineffective in hedging or EPM and the Portfolio may suffer significant losses. The failure of a counterparty to a derivative contract to comply with the terms of that contract could cause the Portfolio to suffer a loss.</p> <p>You are exposed to Equity Securities Risks. The value of underlying equity investments of the Portfolio may fluctuate in response to the activities and results of individual companies, or because of general market and economic conditions and changes in currency exchange rates.</p> <p>You are exposed to Turnover Risk. The Portfolio is an actively managed investment fund - a higher rate of portfolio turnover increases brokerage and other expenses, which must be borne by the Portfolio and its investors.</p>	
<p>FEES AND CHARGES</p>	
<p>WHAT ARE THE FEES AND CHARGES OF THIS INVESTMENT? <u>Payable directly by you*,#</u> Initial Sales Charge (as a percentage of the purchase price): Class A Shares: Up to 5.00%. Class I: Up to 1.50%.
