PRODUCT SUITABILITY	
WHO IS THE PRODUCT SUITABLE FOR? • The Portfolio is <u>only</u> suitable for investors who are prepared to accept: o the risks of a diversified portfolio, mainly invested in US equities by taking long and synthetic short positions (including investing in global equity and bond markets, with the potential to allocate to the securities of Emerging Market Countries and/or below investment grade securities); and o medium to high levels of volatility due to the Portfolio's investment policies or portfolio management techniques. **You should consult your financial adviser if in doubt whether this product is suitable for you.**	<u>Further Information</u> Refer to "INVESTOR PROFILE" of the Singapore Prospectus for further information on product suitability.
KEY PRODUCT FEATURES	
WHAT ARE YOU INVESTING IN? • You are investing in a sub-fund of Neuberger Berman Investment Funds plc, which is an investment company incorporated under the laws of Ireland and authorised as a UCITS umbrella fund by the Central Bank of Ireland. The Portfolio seeks long term capital appreciation with a secondary objective of principal preservation. • Dividend policy: o Accumulating shares: No dividends will be paid. o Distributing shares: None available in Singapore.	Refer to "THE COMPANY", "THE PORTFOLIOS" and "INVESTMENT OBJECTIVE, FOCUS AND APPROACH" of the Singapore Prospectus for further information on features of the product.
Investment Strategy	
• The Portfolio will seek to achieve its objective by taking long and synthetic short positions in equity and equity-linked securities listed or traded in US equity markets and in ETFs, which are exposed to such securities.	Refer to "INVESTMENT OBJECTIVE, FOCUS AND

PRODUCT HIGHLIGHTS SHEET

• The Portfolio may also, but to a lesser extent take long and synthetic short positions in equity, equity-linked securities and ETFs which are listed or traded on Recognised Markets located in the countries comprising the MSCI ACWI (All Country World Index) (which may include Emerging Market Countries). • Equity securities in which the Portfolio invests generally include those of companies across all industrial sectors with a market capitalization of at least USD250 million, measured at the time the Portfolio first invests in them. The Portfolio may continue to hold or add to an existing position in a stock after the company's market value has fallen below USD250 million. • The net market exposure (sum of long and synthetic short positions) of the Portfolio will typically be positive, meaning that long positions will generally be in greater proportion than synthetic short positions. However, the Portfolio's net market exposure may vary in time and range from a maximum net long position of 150% to a maximum net short position of 20% of the NAV of the Portfolio, depending on the Sub-Investment Manager's analysis of the prevailing market conditions and considered in light of the investment objective of the Portfolio. • The Portfolio may also, but generally to a lesser extent, take long positions in fixed income securities of US and non-US companies, including below investment grade securities (sometimes referred to as "junk bonds"), without any particular focus on any one industrial sector. • The maximum proportion of the Portfolio's NAV that can be subject to total return swaps is 90%. The expected proportion of the Portfolio's NAV that will be subject to total return swaps is 45%. • Repo Contracts may be used subject to the conditions and limits set out in the Irish Prospectus. • The Portfolio will not utilise securities lending or margin lending. • **The Portfolio may use FDIs for investment purposes, efficient portfolio management purposes and/or hedging purposes.** • **The Portfolio may or may be expected to have medium to high levels of volatility due to its investment policies or portfolio management techniques.**	APPROACH" of the Singapore Prospectus for further information on the investment strategy.
Parties Involved	
WHO ARE YOU INVESTING WITH? • You are investing in Neuberger Berman Investment Funds plc, an umbrella fund of which the Portfolio is a sub-fund. • The manager is Neuberger Berman Asset Management Ireland Limited and the sub-investment managers are Neuberger Berman Investment Advisers LLC and Neuberger Berman Europe Limited. • The depositary is Brown Brothers Harriman Trustee Services (Ireland) Limited.	Refer to "THE COMPANY", "MANAGEMENT", "OTHER PARTIES" and "INSOLVENCY OF THE PARTIES" of the Singapore Prospectus for further information on the role and responsibilities of these entities and what happens when they become insolvent.
KEY RISKS	
WHAT ARE THE KEY RISKS OF THIS INVESTMENT? **The value of the product and its dividends or coupons (if any) may rise or fall.** **These risk factors may cause you to lose some or all of your investment:**	Refer to "RISK FACTORS" of the Singapore Prospectus for further information on the risk of the product.
Market and Credit Risks	
• **Equity Securities Risk –** Investment in equity securities in general are subject to market risks that may cause their prices to fluctuate over time due to various factors, such as changes in investment sentiment, political and economic conditions and issuer-specific factors. The value of convertible equity securities is also affected by prevailing interest rates,	

the credit quality of the issuer and any call provisions. These would cause the NAV of the Portfolio to fluctuate.

- **Fixed Income Securities and Downgrade Risk –** Fixed income securities are subject credit risk and may also be subject to price volatility, and are also exposed to the risk of being downgraded, which can cause a significant drop in the value of the Portfolio. The Manager or the Sub-Investment Manager may or may not be able to dispose of the debt instruments that are being downgraded.
- **Lower Rated Securities Risk –** The Portfolio may invest in lower rated or unrated (i.e. non-investment grade or high yield) securities, which are more likely to react to developments affecting market and credit risk than are more highly rated securities. The Portfolio may therefore find it more difficult to sell such high yield securities or may be able to sell these securities only at prices lower than if such securities were widely traded. The Portfolio may experience difficulty in valuing certain securities.
- **Credit Risk –** The Portfolio may invest in corporate fixed income securities. Corporate issuers of such securities may fail to repay debt, or meet their interest repayments. The Portfolio may suffer temporary or permanent losses as a result.
- **Country Concentration Risk –** The Portfolio's investments are concentrated in the United States and will have greater exposure to market, political, legal, economic and social risks of the United States than a fund which diversifies country risk across a number of countries, thus leading to more volatility.
- **Currency Risk –** The base currency value of the investment of the Portfolio designated in another currency may rise and fall due to exchange rate fluctuations in respect of the relevant currencies. The currency exchange rates of Emerging Market Countries tend to be more volatile than those of more developed countries. In addition, as the base currency of the Portfolio is not in Singapore dollars, Singapore investors may be exposed to an additional currency risk.
- **Currency Hedging Risk –** Currency hedging instruments may involve the risk of a default by a counterparty.
- **Emerging Market Economies Risk –** Investing in emerging markets may involve heightened risks (some of which could be significant) such as greater social, economic and political uncertainty, and periods of extreme volatility. Separately, bid and offer spreads of the price of securities may be significant and accordingly, the Portfolio may incur significant trading costs.
- **Repurchase / Reverse Repurchase Risks –** The value of the collateral of Repo Contracts will be maintained to at least equal to the value of the assets transferred by the Portfolio, in the event of a sudden market movement there is a risk that the value of such collateral may fall below the value of the securities transferred. The use of repurchase transactions may also lead to counterparty credit risk, liquidity risk, and other risks similar to those associated with the use of FDI.

Liquidity Risks

- **The Portfolio is not listed in Singapore and you can redeem only on Dealing Days –** There is no secondary market for the Portfolio. Your right to redeem may be suspended or deferred under certain circumstances.

Product-Specific Risks

- **Risks relating to the use of FDI –** FDIs may be subject to various types of risks, including market risk, liquidity risk, counterparty credit risk, legal risk and operations risk. In addition, FDIs can involve significant economic leverage and may, in some cases, involve high risk of significant loss. The use of FDIs may lead to risk of loss of capital or increase the volatility of the Portfolio's NAV.

VALUATIONS AND EXITING FROM THIS INVESTMENT

HOW OFTEN ARE VALUATIONS AVAILABLE?

The NAV per share in respect of each Dealing Day is normally available on www.nb.com on the following Business Day.

HOW CAN YOU EXIT FROM THIS INVESTMENT AND WHAT ARE THE RISKS AND COST IN DOING SO?

- The Company does not offer a right to cancel subscriptions into the Portfolio, but you should check if your Singapore distributor will allow you to do so. You can exit the Portfolio by submitting your redemption form to the Singapore distributor from whom you had originally purchased your shares.
- Shares may be redeemed on any Dealing Day.
- Redemption proceeds will normally be made to Singapore distributors within 10 Business Days and you should check with your Singapore distributor when you can expect to receive your redemption proceeds.
- The redemption price of your shares is determined as follows:
  - If your redemption form is received by the Administrator before 3 p.m. (Irish time) on a Dealing Day, your Shares will normally be redeemed at their NAV as of that Dealing Day.
  - If your redemption form is received by the Administrator after 3 p.m. (Irish time) on a Dealing Day, your Shares will normally be redeemed at their NAV as of the next Dealing Day.

  (Please confirm with your Singapore distributor the applicable Singapore cut-off time for receiving your redemption form in order for your Shares to be redeemed at their NAV as of a particular Dealing Day)
- The redemption proceeds that you will receive will be the redemption price per share multiplied by the number of shares redeemed, less any charges. An example is as follows:

1,000 shares	x	$1.10	=	$1,100	-	$0	=	$1,100
Redemption request		*Redemption Price*		*Gross Redemption Proceeds*		*Redemption Charge**		*Net Redemption Proceeds*

*There is currently no redemption charge payable however, you may be subject to duties and charges on your redemption.

Refer to "SUBSCRIPTION FOR SHARES - Cancellation of Subscription", "REDEMPTION OF SHARES" and "OBTAINING PRICE INFORMATION IN SINGAPORE" of the Singapore Prospectus for further information on valuation and exiting from the product.
