KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- ▶ You are investing in a Sub-Fund of the HSBC Global Investment Funds (the “Fund”), an investment company (*Société d'Investissement à Capital Variable*) incorporated in the Grand Duchy of Luxembourg and qualifying as an Undertaking for Collective Investment in Transferable Securities (UCITS) complying with the provisions of Part I of the 2010 Law. The Fund is structured as an umbrella fund offering Shares in the Sub-Fund for investment.
- ▶ Investment Objective
The Sub-Fund seeks long term returns from capital growth and income by investing primarily in a portfolio of equities from Türkiye.
- ▶ For Distribution Share Classes of a Sub-Fund (if made available for subscription), distributions out of capital (if any) will reduce the Net Asset Value of the relevant Share Class of the Sub-Fund.

Refer to paragraphs 1 and 3.1 “Investment Objectives, Focus and Approach” of the Singapore Prospectus and section 3.2 “Sub-Funds details” of the Luxembourg Prospectus for further information on features of the product.

INVESTMENT STRATEGY

The Sub-Fund will invest primarily in equity securities and equity equivalent securities of companies that are based in and listed on a major stock exchange or other Regulated Market in Türkiye. It will also invest in companies that carry out most of their business in Türkiye.

Refer to section 3.2 “Sub-Funds details” of the Luxembourg Prospectus for details on the structure of the Sub-Fund.

¹ The Singapore Prospectus is accessible at <http://www.assetmanagement.hsbc.com/sg>.

² The expense ratios for Share Classes offered less than 1 year are computed on an annualised basis.

There are no capitalisation restrictions. It is anticipated that the Sub-Fund will seek to invest across a range of market capitalisations.

The Sub-Fund may invest up to 10% of its net assets in units or shares of UCITS and/or other Eligible UCIs (including other sub-funds of HSBC Global Investment Funds).

The Sub-Fund may also invest in bank deposits, money market instruments or money market funds for treasury purposes.

The Sub-Fund may use financial derivative instruments for hedging and cash flow management (for example, Equitisation). However, the Sub-Fund will not use financial derivative instruments extensively for investment purposes. Financial derivative instruments may also be used for efficient portfolio management purposes.

The Sub-Fund can enter into Securities Lending transactions for up to 29% of its net assets, however, it is expected that this will not exceed 25%.

The Sub-Fund is actively managed and does not track a benchmark. The reference benchmark for Sub-Fund market comparison purposes is BIST 100.

KEY RISKS

WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

- ▶ The value of the Sub-Fund’s assets may rise or fall due to normal market fluctuations and investors may not get back all of their investment.

Refer to paragraph 6 “Risks” of the Singapore Prospectus and sections 1.4 “General Risk Considerations” and 3.3 “Sub-fund specific risk considerations” of the Luxembourg Prospectus for further information on risks of the product.

MARKET AND CREDIT RISKS

- ▶ You are exposed to Market Risk
The value of investments may be affected by uncertainties such as international, political and economic developments or changes in government policies in Türkiye.
- ▶ You are exposed to Foreign Exchange Risk
The underlying assets of the Sub-Fund may be denominated in currencies other than the currency of the share class you have invested into. The value of your investment may rise or fall in line with movements in the relevant exchange rates.

LIQUIDITY RISKS

- ▶ The Sub-Fund is not listed in Singapore and there is no secondary market for its Shares. You can only redeem your investment on a Dealing Day through the Sub-Fund.

- ▶ Investment of the Sub-Fund's assets in relatively illiquid investments may restrict the ability of the Sub-Fund to dispose of its investments at a price and time that it wishes to do so. This may result in a loss to the Sub-Fund.

PRODUCT-SPECIFIC RISKS

- ▶ You are exposed to Emerging Markets Risk
Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity, market volatility (such as interest rate and price volatility) and regulatory risks.
- ▶ You are exposed to Derivative Risk
Financial derivative instruments may be leveraged and their prices can be very volatile. Investment in these instruments may result in losses in excess of the original amount invested. If the issuers of the derivative instruments default, or such securities or their underlying assets cannot be realized, or perform badly, investors may suffer substantial or, in certain cases, total loss of their investments. Governmental regulation and supervision of transactions on the OTC markets is generally lesser than of transactions on organised exchanges. Thus, investing in OTC derivatives involves higher counterparty risk and liquidity risk.
