		UCT FEATURES		
 WHAT ARE YOU INVESTING IN? You are investing in a sub-fund of the Fund, a SICAV incorporated in Luxembourg and a UCITS. The Sub-Fund aims to earn income and increase the value of the Shareholder's investment over the long term (5 years or more). The Share Classes offered in Singapore are set out in the Fees and Charges section below. No dividends will be distributed for the Share Classes A and I. Dividends may be distributed for Share Classes Aa and Ia within the limits under Luxembourg Iaw. Distributions will reduce the net assets attributable to that Share Class. If distributions are made out of capital, it may amount to a partial return of your original investment and reduced future returns. 			Refer to the " <i>The</i> <i>Fund</i> ", " <i>The Sub-</i> <i>Funds and Share</i> <i>Classes</i> " and " <i>Dividend Policy</i> " sections of the Singapore Prospectus for further information on features of the product	
Investment Strategy				
 The Sub-Fund invests mainly in the currencies of emerging market countries and in bonds issued by corporations and governments in these countries. It invests at least two-thirds of total net assets (excluding ancillary liquid assets, eligible deposits, money markets instruments and money market 			Refer to the " <i>Investment</i> <i>Objectives and</i> <i>Policies</i> " section of

KEY RISKS	
	Defende the "D'-1
WHAT ARE THE KEY RISKS OF THIS INVESTMENT? The value of the Sub-Fund and its dividends (if any) may rise or fall. The following <u>key</u> risk factors may cause you to lose some or all of your investment (including the principal invested).	Refer to the " <i>Risk</i> <i>Factors</i> " section of the Singapore Prospectus for further information on risks of the product.
Market and Credit Risks	
 You are exposed to market risk. Prices of securities change daily, and can fall based on a wide variety of factors. The effects of market risk can be immediate or gradual, short-term or long-term, narrow or broad. You are exposed to emerging markets risk. Emerging markets involve higher risks than developed markets, including risks of political, economic, or social instability, regulatory uncertainty, excessive costs or taxation, or outright seizure of assets, discriminatory rules or practices, incomplete or inaccurate information about securities issuers, lack of reliable custody arrangements, lack of uniform accounting, auditing and financial reporting standards, manipulation of market prices by large investors, arbitrary delays and unscheduled market closures, and fraud and corruption You are exposed to counterparty risk. The Sub-Fund suffers loss if a counterparty defaults. The Sub-Fund can try to recover loss by using any associated collateral, but the collateral may be worth less than the cash or securities owed to it. The Sub-Fund's ability to meet its own obligations to other counterparties may be affected. This could delay the processing of redemptions. Securities lending transactions can carry counterparty risk. You are exposed to credit risk.
