Investment Strategy	
<ul style="list-style-type: none"> <li>The Sub-Fund invests principally in Malaysian equity securities. Malaysia is considered to be an emerging market.</li> <li>The Sub-Fund is actively managed. The Investment Manager will, when selecting investments for the Sub-Fund and for the purposes of monitoring risk, consider the MSCI Malaysia IMI Custom Capped Index (the "Index") as the Index constituents are representative of the type of companies the Sub-Fund invests in. When monitoring risk, the Investment Manager references the Index for the purpose of setting internal guidelines. These guidelines represent overall levels of exposure relative to the Index and do not imply that the Sub-Fund will invest in the Index constituents although a substantial portion of the Sub-Fund's investments is likely to be part of the Index. Where the Sub-Fund invests in securities that are included in the Index, its allocation to those securities is likely to differ from the Index allocation. However, given that the market in which the Sub-Fund invests is highly concentrated, the overlap between the Sub-Fund's portfolio and the Index is expected to be high. The Sub-Fund's performance can be assessed against its Index as the Index constituents are representative of the type of companies the Sub-Fund invests in.</li> <li><b>FDIs may be used to reduce risks or costs or to generate additional capital or income in order to meet the Sub-Fund's investment objective.</b></li> </ul>	<p>Refer to "Investment Objectives" section of the Prospectus for further information on the investment strategy.</p>
