

This Products Highlights Sheet is an important document.

- It highlights the key terms and risks of the Low Volatility Equity Portfolio (the "Portfolio"), a portfolio of AB¹ (the "Fund"), and complements the prospectus for the Fund (the "Prospectus") and the Singapore prospectus (the "Singapore Prospectus", together with the Prospectus, the "Singapore Offering Documents").²
- It is important to read the Singapore Offering Documents before deciding whether to purchase shares in the Portfolio ("Shares"). If you do not have a copy, please contact us to ask for one.
- You should not invest in the Portfolio if you do not understand it or are not comfortable with the accompanying risks.
- If you wish to purchase Shares³, you will need to make an application in the manner set out in the Singapore Prospectus.

LOW VOLATILITY EQUITY PORTFOLIO a portfolio of AB¹

KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN? <ul style="list-style-type: none"> • You are investing in a portfolio of an open-ended investment company with variable capital domiciled in Luxembourg, that is regulated by the <i>Commission de Surveillance du Secteur Financier</i> and qualifies as a UCITS under European Union directives. • The investment objective of the Portfolio is to increase the value of your 	Refer to "Investment Objective, Focus and Approach" in the relevant appendix of the Singapore Prospectus and "Additional Share
---	--

¹ AB SICAV I (referred to as "AB" or the "Fund" in this document) is an open-ended investment company with variable capital (*société d'investissement à capital variable*) under the laws of the Grand Duchy of Luxembourg.

² The Singapore Offering Documents are available at the office of the Singapore Representative during its normal business hours or are accessible at www.alliancebernstein.com.

³ Effective 15 December 2016, Class B Shares will no longer be offered but may be made available for exchange to Singapore shareholders holding Class B Shares (or a variation thereof) in another portfolio or other AB fund that is available for offer in Singapore.

<p>investment over time through capital growth.</p> <ul style="list-style-type: none"> For Class AD Shares (and corresponding H Shares), the Board intends to declare and pay distributions monthly and may pay out of capital. All other Share Classes do not make distributions. 	<p><i>Class Details</i>" of the Prospectus relating to the Portfolio for further information on the key product features.</p>
Investment Strategy	
<p>STRATEGY</p> <ul style="list-style-type: none"> In actively managing the Portfolio, the Investment Manager uses fundamental research and a proprietary quantitative risk/return model to select securities that appear to be high quality, to have low volatility and reasonable valuations and to offer attractive Shareholder returns (bottom-up approach). Under normal market conditions, the Portfolio typically invests in equity securities of companies that are organised, have substantial business activities in developed countries as well as Emerging Markets, that the Investment Manager believes have lower volatility. These companies may be of any market capitalisation and industry. The Portfolio's equity investments may include convertible securities, depositary receipts and ETFs. The Portfolio may be exposed to any currency. The Portfolio uses derivatives for hedging (reducing risks), efficient portfolio management and other investment purposes. 	<p>Refer to "<i>Investment Objective, Focus and Approach</i>" and "<i>Derivatives and Techniques</i>" in the relevant appendix of the Singapore Prospectus for further information on the investment strategy.</p>
Parties Involved	
<p>WHO ARE YOU INVESTING WITH?</p> <ul style="list-style-type: none"> The Investment Manager for the Portfolio is AllianceBernstein L.P., a Delaware limited partnership. Brown Brothers Harriman (Luxembourg) S.C.A. has been appointed to act as Administrator and Depositary. Refer to "<i>Other Important Information</i>" of the Singapore Prospectus for information on what happens if these entities become insolvent. 	<p>Refer to "<i>Fund Service Providers and Additional Resources</i>" of the Prospectus for information on roles and responsibilities.</p>
KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</p> <p>The value of investments and the income from them, and therefore the value of, and income from, Shares relating to the Portfolio can go down as well as up and you may not get back the amount you invest.</p> <p>These risk factors, among others, may cause you to lose some or all of your investment:</p>	<p>Refer to "<i>Main Risks</i>" of the Singapore Prospectus for further information on the risks of investing in the Portfolio.</p>
Market and Credit Risks	
<p>You are exposed to Concentration/Focus Risk. To the extent that the Portfolio invests a large portion of its assets in a limited number of industries, sectors or issuers, or within a limited geographical area, it can be riskier and subject to greater volatility than a Portfolio that invests more broadly.</p> <p>You are exposed to Currency Risk. To the extent that the Portfolio holds assets that are denominated in currencies other than its Base Currency, any changes in currency exchange rates could reduce investment gains or income, or increase investment losses, in some cases significantly. Hedging may reduce but not eliminate currency risk.</p>	
Liquidity Risks	
<p>The Shares are not listed and can only be realised on Business Days. There is no secondary market for the Shares. All realisation requests should be submitted in the manner set out in the Singapore Prospectus.</p> <p>You may not be able to redeem when a redemption limit is imposed or when redemption is suspended. A redemption limit may be imposed if requests are received to redeem more than 10% of the Shares of the Portfolio outstanding. Further, your right to redeem may be temporarily suspended under certain circumstances as set out in the Singapore Prospectus.</p>	

Product-Specific Risks									
<p>You are exposed to Derivatives Risk. Derivatives are financial contracts whose value is derived from that of an underlying asset, rate or eligible index. Small movements in the value of an underlying asset, reference rate or eligible index can create large changes in the value of a derivative, making derivatives highly volatile in general and exposing the Portfolio to potential losses significantly greater than the cost of the derivative. The Portfolio may use derivatives for various reasons, such as hedging, EPM and investment purposes. Derivatives are specialised instruments that require investment techniques and risk analyses different from those associated with traditional securities. Derivatives are subject to the risks of the underlying asset(s), typically in modified and greatly amplified form, as well as carrying their own risks.</p> <p>You are exposed to Equity Securities Risk. Equities can lose value rapidly, in response to such factors as activities of individual companies, general market or economic conditions, or changes in currency exchange rates. Equities typically involve higher (often significantly higher) market risks than bonds, money market instruments, or other debt securities.</p>									
FEES AND CHARGES									
<p>WHAT ARE THE FEES AND CHARGES OF THIS INVESTMENT?</p> <p><u>Payable directly by you*</u></p> <p>Initial Sales Charge (as a percentage of the purchase price): Class A and AD Shares (and corresponding H Shares): Up to 5.00%.
