

## HSBC Portfolios

# World Selection 1

Monthly report 29 February 2024 | Share class AMHSGD

### Investment objective

The Fund aims to provide long-term capital growth and income by investing in a portfolio of bonds and shares. The Fund seeks to apply a low risk investment strategy.

### Investment strategy

The Fund is actively managed and is not constrained by a benchmark. In normal market conditions, at least 90% of the Fund's exposure is to bonds, shares and alternative investment strategies. The Fund gains exposure to bonds that are investment grade, non-investment grade and unrated issued by the government, government-related entities, supranational entities and companies based in developed markets and emerging markets. The bonds can be denominated either in US dollar (USD), other developed markets currencies hedged into USD, or in emerging markets currencies. The Fund gains exposure to shares issued by companies of any size. The Fund may invest up to 100% in other funds although this investment will normally be between 25% and 75%. The Fund can have an exposure to bonds (or other similar securities) of up to 100% of its assets. The exposure to shares (or securities similar to shares) can be up to 25% of assets. The Fund may invest up to 20% in non-investment grade and unrated bonds, and up to 25% in alternative investment strategies. The Fund's primary currency exposure is to USD. See the Prospectus for a full description of the investment objectives and derivative usage.

### Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The Fund invests in bonds whose value generally falls when interest rates rise. This risk is generally greater the longer the maturity of a bond investment and the higher its credit quality. The issuers of certain bonds, could become unwilling or unable to make payments on their bonds and default. Bonds that are in default may become hard to sell or worthless. The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.
- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.

## Monthly performance commentary

### Market Commentary

Global equities were up in February, driven by strong earnings reports and a rebound in Chinese equities. Fixed income markets fell over the month, with yields rising, following strong labour market and inflation data.

Across equities, emerging markets outperformed developed markets. This was driven by strong returns from China, following a number of supportive steps taken by the CCP to maintain market stability and another cut to mortgage policy rates. Other Asian markets associated with the Technology sector such as Taiwan and South Korea also rallied. Within developed markets, the US outperformed, driven by strong earnings reports from some of the "Magnificent 7" companies. The UK and Europe-ex UK equities underperformed the broader developed markets. In Japan, Yen weakness benefitted equity returns given the export-driven nature of the stock market. Within fixed income, US Treasuries prices fell over the month as inflation numbers came in stronger than anticipated while job numbers were also robust. This led to an increase in yields, as investors re-assessed the pace and timing of rate cuts. In the UK, Gilts sold off on continuing wage growth pressures despite data showing the economy fell into a technical recession during the second half of 2023. The US dollar gained modestly over the period, boosted by the higher yields and the broadly resilient economic data. The Euro and the Sterling fell against the US dollar given the relative strength of the US economy in comparison. In the commodity markets, Brent Oil pushed higher, on elevated geopolitical risk. Gold ended the month lower, facing downward pressure from hawkish economic data and the pushback on timing of policy rate cuts.

### Portfolio performance

Equities rallied in February, government bonds fell modestly, and higher risk areas of the fixed income markets were positive. This resulted in positive returns across most of the World Selection range, with higher risk profiles outperforming lower risk profile solutions. The World Selection portfolios are actively positioned against a long-term strategic asset allocation. During February, our active positioning detracted. The biggest negative contribution came from our tilt away from equity. In addition, our tilts towards Brazil, Spanish and UK equity detracted. Conversely, our allocation to Trend Following Hedge Funds added value over the month, together with our preference for quality companies in the US and our reduced exposure to Property.

### Investment Team Views and Portfolio Positioning

There are three key themes in markets that we are positioned to capture within the World Selection portfolios.

**Recession concerns easing** - The likelihood of a recession in the West has fallen, with the US economy looking particularly strong; providing support for equity markets. However, economic growth is still slowing, and as such we remain selective in our equity holdings. During February we increased our equity allocation, with a focus on the US and Japan. We have a preference for higher quality companies, where profits are likely to remain resilient in the face of slowing growth and persistent inflation. We are tilted towards Technology companies within the US, on the expectation that increased demand for Artificial Intelligence will support revenues for these companies. Finally, we prefer Spanish equity markets within Europe. Spain looks cheap, while the economy is strong in comparison to the rest of Europe and Germany in particular. Spain's larger pool of renewable energy also insulates its industry from elevated oil and gas prices. We are still tilted away from High Yield bonds and Property, as we believe the full impact of higher borrowing costs has yet to be priced in for these asset classes.

**The rate cuts are coming** – In our view, the major central banks are likely to start cutting interest rates in the second half of 2024 as inflation continues to ease and economic growth slows. This encourages us back into government bonds, which are (for the first time in almost a decade) delivering an appealing stream of income for investors. We like US government bonds in particular given attractive yields and our view that the Fed will be a first mover in cutting interest rates. In February, we sold our UK Gilts position, following strong performance from the trade, and a narrowing of the interest differential. We maintain a holding in Gold, which has historically benefitted as interest rates fall, while gold is a useful hedge against geopolitical risk. During February we closed our position in European healthcare and opened a position in European Banks. The banking sector is looks cheap, has strong profitability - benefiting from higher interest rates – and credit loss provisions are likely to be revised down on improving economic outlook. We are holding increased exposure to the Norwegian Krona and Polish Zloty as inflation remains elevated in these markets, and we expect to continue receiving high interest payments on these currencies as their respective central banks delay cutting interest rates.

**Outperformance in Eastern and Emerging Markets** - The economic backdrop in markets such as India, Japan and Brazil is very strong, monetary policy settings are accommodative and there is room for fiscal support. We maintain a number of positions to gain access to the specific opportunities we see in these markets: Japan versus developed market equity, given appealing valuations, strong flows from foreign investors, improved corporate governance, and weakening Yen supporting exports; Indian equity and government bonds: India remains one of the fastest growing economies globally, is making steady productivity improvements, has high foreign direct investments, and favourable demographics; Brazil versus emerging market equity given the country's positive momentum, strong macroeconomic backdrop, and attractive fundamentals. We trimmed this position in February. Mexican peso currency positioning, given the currency is benefitting from the strong growth story in Mexico and is attractively valued against developed markets currencies Japanese Yen against Swiss Franc, given Japan's stronger inflationary pressure and potential for interest rate policy shift

## Risk Disclosure

- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Investment involves risk. Past performance figures shown are not indicative of future performance. Investors should read the prospectus (including the risk warnings) and the product highlights sheets, before investing. Daily price change percentage is based on bid-bid price.

### Glossary

## Important Information

Performance is annualised when calculation period is over one year. Net of relevant prevailing sales charge on a single pricing (NAV) basis, calculated on the basis that dividends are reinvested.

This document does not constitute an offering document and should not be construed as a recommendation, an offer to sell or the solicitation of an offer to purchase or subscribe to any investment.

This document is for information only and is not an advertisement, investment recommendation, research, or advice. Any views and opinions expressed are subject to change without notice. It does not have regard to the specific investment objectives, financial situation, or needs of any specific person. Investors and potential investors should not invest in the Fund solely based on the information provided in this document and should read the prospectus (including the risk warnings) and the product highlights sheets, which are available upon request at HSBC Global Asset Management (Singapore) Limited ("AMSG") or our authorised distributors, before investing. You should seek advice from a financial adviser. Investment involves risk. Past performance of the managers and the funds, and any forecasts on the economy, stock or bond market, or economic trends that are targeted by the funds, are not indicative of future performance. The value of the units of the funds and income accruing to them, if any, may fall or rise and investor may not get back the original sum invested. Changes in rates of currency exchange may affect significantly the value of the investment. AMSG has based this document on information obtained from sources it reasonably believes to be reliable. However, AMSG does not warrant, guarantee or represent, expressly or by implication, the accuracy, validity or completeness of such information.

This document and any other document or material issued in connection with the offer or sale is not a prospectus as defined in the Securities and Futures Act, Chapter 289 of Singapore ("SFA") and has not been registered as a prospectus with the Monetary Authority of Singapore (the "MAS"). Accordingly, statutory liability under the SFA in relation to the content of prospectuses does not apply. You should consider carefully whether the investment is suitable for you. The offer or invitation of the Units, which is the subject of this document, does not relate to a collective investment scheme which is authorised by the MAS under Section 286 of the SFA or recognised by the MAS under Section 287 of the SFA and the Units are not allowed to be offered to the retail public.

No document or material in connection with the offer or sale of the Units may be circulated or distributed, nor may the Units be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore other than (i) to an institutional investor pursuant to Section 304 of the SFA, in accordance with the conditions specified in that section, (ii) to a relevant person pursuant to Section 305(1), or any person pursuant to Section 305(2), and in accordance with the conditions specified in Section 305 of the SFA, or (iii) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA.

Where the Units are subscribed or purchased under Section 305 of the SFA by a relevant person which is (a) a corporation (which is not an accredited investor (as defined in Section 4A of the SFA)) the sole business of which is to hold investments and the entire share capital of which is owned by one or more individuals, each of whom is an accredited investor; or (b) a trust (where the trustee is not an accredited investor) whose sole purpose is to hold investments and each beneficiary of the trust is an individual who is an accredited investor, the securities (as defined in Section 239(1) of the SFA) of that corporation or the beneficiaries' rights and interest (howsoever described) in that trust shall not be transferable within 6 months after that corporation or that trust has acquired the Units pursuant to an offer made under Section 305 of the SFA except (1) to an institutional investor or to a relevant person as defined in Section 305(5) of the SFA, or to any person arising from an offer referred to in Section 275(1A) or Section 305A(3)(i)(B) of the SFA; (2) where no consideration is or will be given for the transfer; (3) where the transfer is by operation of law; or (4) as specified in Section 305A(5) of the SFA; (5) The sub-fund uses financial derivative instruments significantly and a significant portion of the sub-fund's payout income are generated from financial derivative strategies, investors should take note of expected risks associated with such strategies and higher volatility in payout income profile.

**Different classes may have different performances, dividend yields and expense ratios. For hedged classes, the effects of hedging will be reflected in the net asset values of such classes. Expenses arising from hedging transactions may be significant and will be borne by the relevant hedged classes. Hedged class performs the required hedging on a best efforts basis.**

The above table cites the last dividend paid within the last 12 months only.

Dividend is not guaranteed and may be paid out of capital, which will result in capital erosion and reduction in net asset value. A positive distribution yield does not imply a positive return. Past distribution yields and payments do not represent future distribution yields and payments. Historical payments may comprise of distributed income, capital, or both.

The calculation method of annualised yield prior to August 2019 is the simple yield calculation: (dividend amount / NAV per share or units as of ex-dividend date) x n; The calculation method of annualised yield from August 2019 is the compound yield calculation:  $((1 + (\text{dividend amount} / \text{ex-dividend NAV}))^n) - 1$ , n depends on the distributing frequency. Annually distribution is 1; semi-annually distribution is 2; quarterly distribution is 4; monthly distribution is 12.

The annualised dividend yield is calculated based on the dividend distribution on the relevant date with dividend reinvested, and may be higher or lower than the actual annual dividend yield.

Investors and potential investors should refer to the details on dividend distributions of the Fund, which are available on HSBC Asset Management (Singapore) Limited website.
