#### KEY PRODUCT FEATURES

<b>WHAT ARE YOU INVESTING IN?</b> You are investing in a unit trust constituted in Singapore that aims to provide you with long term capital appreciation by investing primarily in the equities markets of the Asia Pacific (ex-Japan) region. Distributions of income and/or net capital gains (to the extent permitted under the Deed) will be at our sole discretion. Any distributions made will reduce the Net Asset Value of the Fund.	Refer to “Fund Structure” and “Investment Objective, Focus and Approach” (Sections 6 and 7) of the Prospectus for further information on features of the product.

#### Investment Strategy

The Fund will be investing in emerging and developed markets. There are no target industry and/or sector. We believe that Asian equity markets are structurally inefficient and this inefficiency provides the opportunity for us to add value through a disciplined investment process. We believe that consistent long term returns can be achieved through in-depth fundamental research, a disciplined focus on valuations, understanding what is “priced in” by the market and what the key stock catalysts are. Our investment process comprises research and portfolio construction. We construct the portfolio in a manner consistent with the Fund’s objective as well as taking into account the prevailing macro directions and sector/thematic considerations.	Refer to “Investment Objective, Focus and Approach” (Section 7) of the Prospectus for further information on features of the product.
