Market and Credit Risks	
<ul style="list-style-type: none"> • You may be exposed to general market risk – the Fund is exposed to various general trends and tendencies in the economic and political situation as well as securities markets and investment sentiment, which may lead to substantial and longer-lasting drops in prices affecting the entire market. • You may be exposed to currency risk – the Fund may hold assets or have a share class denominated in foreign currencies other than the base currency of the Fund, and is exposed to a currency risk that if these foreign currency positions have not been hedged or if there is any change in the relevant exchange control regulations, the net asset value of the Fund or Class may be affected unfavourably. • You may be exposed to country and region risk in Europe – the Fund’s investments focus on Europe may increase the concentration risk. The Fund is susceptible to the adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event or development in and risks of this region. Economic or political instability in countries in which the Fund is invested may lead to a situation in which the Fund does not receive part or all of the monies owed to it in spite of the solvency of the issuer of the 	

<p>respective security or other assets. Currency or transfer restrictions or other legal changes, for example, may be significant in this regard.</p> <ul style="list-style-type: none"> • You may be exposed to European country risk – there is the possibility that economic and financial difficulties in Europe may continue to get worse or spread within and outside the Europe, and may lead to one or several countries exiting the Eurozone or default of a sovereign within the Eurozone. Measures taken by the governments of the European countries, central banks and other authorities to address the fiscal conditions and concerns, such as austerity measures and reforms, may not work. The impact of such events on the Fund may be significant and the increased risks (such as increased volatility, liquidity and currency risk associated with investments in Europe) may adversely affect the net asset value of the Fund. • You may be exposed to emerging markets risk – the Fund invests in emerging markets which are subject to greater liquidity risk, currency risk, general market risk, settlement risk and custodial risk. The Fund is additionally subject to legal, taxation and regulatory risks.

In such cases, the Fund may not be able to liquidate a position at an appropriate time or price; (iv) there is also a creditworthiness risk; (v) given the leverage effect embedded in derivatives, even a small investment in derivatives could have a substantial, even negative, effect on the performance of the Fund. • You may be exposed to sustainable strategy investment risk – the Fund follows a specific sustainable investment strategy which applies either minimum exclusion criteria and/or certain rating assessments, which may adversely affect the Fund’s investment performance. The Fund focuses on sustainable investments and has a limited / reduced investment universe, which results in limited risk diversification compared to broadly investing funds. The securities held by the Fund may be subject to style drift which no longer meets the Fund’s investment criteria, which may result in the Management Company disposing of such securities when it might be disadvantageous to do so. • The net asset value of the Fund may likely have a high volatility due to the investment policies or portfolio management techniques employed in respect of the Fund.
