Investment Strategy	
<p>STRATEGY</p> <ul style="list-style-type: none"> In actively managing the Portfolio, the Investment Manager uses fundamental and quantitative research to select securities that it believes offer superior long-term growth characteristics (bottom-up approach). Under normal market conditions, the Portfolio typically invests at least 80%, and not less than two thirds, of its assets in equity securities of companies in health care and health care-related industries. These companies may be located anywhere in the world, including Emerging Markets. The Portfolio may be exposed to any currency. The Portfolio uses derivatives for hedging (reducing risks) and efficient portfolio management ("EPM"). 	<p>Refer to "Investment Objective, Focus and Approach" and "Derivatives and Techniques" in the relevant appendix of the Singapore Prospectus for further information on the investment strategy.</p>
Parties Involved	
<p>WHO ARE YOU INVESTING WITH?</p> <ul style="list-style-type: none"> The Investment Manager for the Portfolio is AllianceBernstein L.P., a Delaware limited partnership. Brown Brothers Harriman (Luxembourg) S.C.A. has been appointed to act as Administrator and Depositary. Refer to "Other Important Information" of the Singapore Prospectus for information on what happens if these entities become insolvent. 	<p>Refer to "Fund Service Providers and Additional Resources" of the Prospectus for information on roles and responsibilities.</p>
KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</p> <p>The value of investments and the income from them, and therefore the value of, and income from, Shares relating to the Portfolio can go down as well as up and you may not get back the amount you invest.</p> <p>These risk factors, among others, may cause you to lose some or all of your investment:</p>	<p>Refer to "Main Risks" of the Singapore Prospectus for further information on the risks of investing in the Portfolio.</p>
Market and Credit Risks	
<p>You are exposed to Concentration/Focus Risk. To the extent that the Portfolio invests a large portion of its assets in a limited number of industries, sectors or issuers, or within a limited geographical area, it can be riskier and subject to greater volatility than a Portfolio that invests more broadly.</p> <p>You are exposed to Currency Risk. To the extent that the Portfolio holds assets that are denominated in currencies other than its Base Currency, any changes in currency exchange rates could reduce investment gains or income, or increase investment losses, in some cases significantly. Hedging may reduce but not eliminate currency risk.</p>	
Liquidity Risks	
<p>The Shares are not listed and can only be realised on Business Days. There is no secondary market for the Shares. All realisation requests should be submitted in the manner set out in the Singapore Prospectus.</p> <p>Your may not be able to redeem when a redemption limit is imposed or when redemption is suspended. A redemption limit may be imposed if requests are received to redeem more than 10% of the Shares of the Portfolio</p>	

outstanding. Further, your right to redeem may be temporarily suspended under certain circumstances as set out in the Singapore Prospectus.	
Product-Specific Risks	
<p>You are exposed to Derivatives Risk. Derivatives are financial contracts whose value is derived from that of an underlying asset, rate or eligible index. Small movements in the value of an underlying asset, reference rate or eligible index can create large changes in the value of a derivative, making derivatives highly volatile in general and exposing the Portfolio to potential losses significantly greater than the cost of the derivative. The Portfolio may use derivatives for various reasons, such as hedging, EPM and investment purposes. Derivatives are specialised instruments that require investment techniques and risk analyses different from those associated with traditional securities. Derivatives are subject to the risks of the underlying asset(s), typically in modified and greatly amplified form, as well as carrying their own risks.</p>
