- **You are exposed to foreign exchange / currency risk.**
  - Where investments are denominated in foreign currency, fluctuations of the exchange rates of such currencies against the Fund's base currency (Singapore dollar) may affect the value of Units. The Managers may hedge the foreign currency exposure of the Fund and may adopt an active currency management approach. Foreign currency exposure may not be fully hedged depending on the circumstances of each case, including the outlook, hedging costs and market liquidity of the relevant currency.
  - Where a Class is not denominated in Singapore dollar, changes in the exchange rate between the Singapore dollar and class currency may adversely affect the value of the Units of such class, as expressed in the class currency.
  - *Hedged Classes:* In the case of Hedged Classes, the Managers currently adopt a passive hedging policy. Notwithstanding the above, the Managers retain the discretion to adopt any other hedging policy as they may determine from time to time. There can be no guarantee that the hedging strategy applied in a Hedged Class will entirely eliminate the adverse effects of changes in exchange rates.
- **You are exposed to political risk.**
  - Investments by the Fund may be adversely affected by political instability as well as exchange controls, changes in taxation, foreign investment policies, restrictions on repatriation of investments and other restrictions and controls which may be imposed by the relevant authorities in the relevant countries.
- **You are exposed to derivatives risk.**
  - The Fund may use or invest in FDIs. An investment in a FDI may require the deposit of an initial margin and additional deposit of margin on short notice if the market moves against the investment position. If the required margin is not provided in time, the investment may be liquidated at a loss. Therefore, it is essential that investments in FDIs are monitored closely. The Managers have controls for investments in FDIs and have in place systems to monitor the FDI positions of the Fund.

**You should be aware that the Fund may be exposed to other risks of an exceptional nature from time to time.**
