

Neuberger Berman European High Yield Bond Fund

N | B

30 September 2022

Important Notes

1. The Fund invests primarily in corporate high yield fixed income securities, which are (i) denominated in a European currency or (ii) issued or guaranteed by companies of any industrial sector that are domiciled in, or exercise the main part of their economic activity in a European country that are listed, dealt or traded on recognised markets.
2. The Fund may invest in debt securities that are below investment grade and collateralized/securitized products, and therefore may be subject to higher liquidity, credit, default and interest rate risks. The Fund may also invest in sovereign fixed income securities and may be posed to the risks derived from political, social and economic changes of the sovereign.
3. The Fund is therefore exposed to currency, currency hedging and Euro, Eurozone and European Union Stability risk.
4. The Fund may use financial derivative instruments ("FDIs") for efficient portfolio management and hedging purposes. FDIs, however, will not be extensively used for investment purposes. The Fund may be subject to higher counterparty, liquidity, valuation, volatility and over-the-counter transaction risks. This may result in a significant loss of the Fund.
5. In respect of the distributing shares, the Fund aims to pay dividend on a monthly basis. However, the distribution rate is not guaranteed. The Fund may at its discretion pay dividends out of the capital of the Fund. Dividends paid out of capital amount to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Such dividends may result in an immediate decrease in the net asset value of the relevant shares.
6. Investors should not solely rely on this document to make any investment decision. Please refer to the Prospectus for details including the risk factors before making any investment decision.

INVESTMENT OBJECTIVE

The investment objective of the Fund is to maximise current income whilst preserving capital by investing in the European high yield fixed income market. The Fund will aim to achieve its objective by investing primarily in corporate high yield fixed income securities, which are (i) denominated in a European currency or (ii) issued or guaranteed by companies of any industrial sector that are domiciled in, or exercise the main part of their economic activity in a European country that are listed, dealt or traded on Recognised Markets. The Fund will invest a majority of its Net Asset Value in securities denominated in Euro and / or GBP. The Fund's investments will be fully hedged into its Base Currency through the use of forward and future contracts as set out below in the "Instruments / Asset Classes" section. The Fund may also invest, on an ancillary basis, in unlisted money market instruments and equity securities issued by companies which have their head office or exercise an overriding part of their economic activity in Europe, and which may be denominated in a European currency.

Credit quality ratings are based on the ICE Bank of America ("ICE BofA") Master High Yield Index composite ratings. The ICE BofA composite ratings are updated once a month on the last calendar day of the month based on information available up to and including the third business day prior to the last business day of the month. The ICE BofA composite rating algorithm is based on an average of the ratings of three agencies (to the extent rated). Generally the composite is based on an average of Moody's, S&P and Fitch. For holdings that are unrated by the ICE BofA Index composite, credit quality ratings are based on S&P's rating. Holdings that are unrated by S&P may be assigned an equivalent rating by the investment manager. No NRSO has been involved with the calculation of credit quality and the ratings of underlying portfolio holdings should not be viewed as a rating of the portfolio itself. Portfolio holdings, underlying ratings of holdings and credit quality composition may change materially over time.

**Annualised Yield = (Dividend per Share ÷ Number of Days in the Month) x 365 ÷ Month-end NAV x 100%. The Number of Days in the 1st month is calculated from the inception date of the share class.

Please note dividend yield is for information only, it is not indicative of return of the Fund and does not imply perspective yields of the Fund. A positive distribution yield does not imply a positive return.

The Fund aims to pay dividend on a regular basis. However, dividend amount or dividend rate is not guaranteed. In respect of Distributing Shares, the Directors of the Company may at its discretion pay dividends out of the capital of the Fund. Dividends paid out of capital amount to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Such dividends may result in an immediate decrease in the net asset value of the relevant shares. The Directors of the Company may determine if and to what extent distributions paid include realized capital gains and/or paid out of capital attributable to the relevant share class. (Pay attention to Important Notes 5)

[#] Hedged Class. Hedged Classes which are designated in a currency other than EUR are hedged into the Base Currency of the Portfolios (i.e. EUR). Further details are set out in the Hong Kong Prospectus under the section "Share Class Hedging".

***The ongoing charges figure is based on the annual expenses for the period ending 31 December 2021.

¹ Benchmark: ICE BofA European Currency Non-Financial High Yield 3% Constrained Index (Total Return, EUR). Investors should note that the Portfolio does not intend to track this index, which is included here for performance comparison purposes only.

² As a percentage of the Portfolio's Net Asset Value.
