- Currently, no distributions are made in respect of the Fund.

Investment Strategy

- The Fund is focused on investing in infrastructure-related business in the Asia-Pacific region. "Infrastructure" generally refers to physical structures and/or networks which are used to provide essential services to a country, economy or society. Such structures and networks are necessary for a country, economy or society to be efficient and productive. Infrastructure-related sectors include transportation, utilities, capital goods, materials, engineering and construction, property development, social infrastructure, mining, technology and energy.
- Potential investments go through a rigorous research exercise prior to any investment. The combination of both bottom-up and top-down investment approaches ultimately drives the process. The Managers believe medium to long-term investment performance can be achieved by employing a rigorous research process that enables the Managers to identify undervalued companies that generate superior returns.

- The Fund may temporarily invest in debt securities and/or deposits held as cash when there are no suitable investment opportunities.

Market and Credit Risks	
<ul style="list-style-type: none"> • You are exposed to market risks in the Asia-Pacific markets. <ul style="list-style-type: none"> o Prices of the securities that the Fund invests in may be affected by changes in economic conditions, interest rates and the market's perception of the securities, which in turn may affect the value of your investment. • You are exposed to equity risks. <ul style="list-style-type: none"> o The Fund invests in stocks and other equity securities that historically have greater price volatility than bonds and other fixed income securities. This in turn may affect the value or volatility of the Fund. 	
Liquidity Risks	
<ul style="list-style-type: none"> • The Fund is not listed and you can redeem only on Dealing Days. <ul style="list-style-type: none"> o There is no secondary market for the Fund. All realisation forms should be submitted to the Managers' authorised agents or distributors. • You are exposed to liquidity risks in the Fund's investments. <ul style="list-style-type: none"> o Investments by the Fund in some Asian and/or emerging markets often involve a greater degree of risk due to the nature of such markets which do not have fully developed services such as custodian and settlement services. Product-Specific Risks	
<ul style="list-style-type: none"> • You are exposed to non-diversification risk and risks of investing in a single sector and region. <ul style="list-style-type: none"> o Investments of the Fund are concentrated within a specific economic sector and geographical region and are subject to greater risks and market volatility than a more diversified or global portfolio. • You are exposed to political risk. <ul style="list-style-type: none"> o Political situations in certain countries may have an effect on the value of the securities invested into by the Fund, which may in turn have an impact on the value of the Units. Investments by the Fund may be adversely affected by political instability as well as exchange controls, changes in taxation, foreign investment policies, restrictions on repatriation of investments and other restrictions and controls which may be imposed by the relevant authorities in the relevant countries. • You are exposed to derivatives risk. <ul style="list-style-type: none"> o An investment in a FDI (including foreign exchange forward contracts and equity index future contracts) may require the deposit of an initial margin and additional deposit of margin on short notice if the market moves against the investment position. If the required margin is not provided in time, the investment may be liquidated at a loss. Therefore, it is essential that investments in FDIs are monitored closely. The Managers have controls for investments in FDIs and have in place systems to monitor the FDI positions of the Fund. • You are exposed to foreign exchange / currency risk. <ul style="list-style-type: none"> o The Fund is denominated in Singapore dollars. Where the Fund makes investments which are denominated in foreign currencies, fluctuations of the exchange rates of such currencies against the Singapore dollar may affect the value of the Units. The Managers may hedge the Fund's foreign currency exposure and may adopt an active currency management approach. However, foreign currency exposure may not be fully hedged depending on the circumstances of each case, including the outlook, hedging costs and market liquidity of the relevant currency. <p>You should be aware that the Fund may be exposed to other risks of an exceptional nature from time to time.</p>
