#### WHO IS THE PRODUCT SUITABLE FOR?

- The Sub-Fund is only suitable for investors who:
  - seek long-term capital appreciation and regular income; and
  - are comfortable with the greater volatility and risks of a fund exposed to fixed income or debt securities denominated in US\$ and Asian currencies (which may include non-investment grade securities) and to Asian equities with high dividend yields primarily via CIS and other investment funds (including ETFs), and emerging markets.

Further information  
Refer to Annex 6 (A and N) of the Prospectus for further information on product suitability.

### KEY PRODUCT FEATURES

#### WHAT ARE YOU INVESTING IN?

- You are investing in a sub-fund of an umbrella unit trust constituted in Singapore. The Sub-Fund aims to generate regular income and long-term capital appreciation for investors by investing in equities, fixed income, cash and other permissible investments.
- There will be no distribution for accumulating classes. For distributing classes<sup>4</sup>, we intend to declare monthly or quarterly distributions (up to 6.88% p.a.) out of income and/or capital of the Sub-Fund. This is not guaranteed (but in our absolute discretion) and may reduce the Sub-Fund's NAV.

Refer to the "Basic Information" section and Annex 6 (A and G) of the Prospectus for further information on features of the product.

### Investment Strategy

- The Sub-Fund may invest up to 30% or more of its NAV into any of the Underlying Funds or any other CIS as notified by us from time to time. The amount invested may vary from time to time at our sole discretion.
- The Sub-Fund may also invest in CIS and other investment funds (including ETFs), securities and/or hold cash, in accordance with its investment objective and asset allocation strategy, as we deem appropriate. It may also invest in other Authorised Investments.
- We may use FDIs for hedging, EPM, optimising returns or a combination of all 3 objectives.
- The Underlying Funds provide the following exposure:
  - LHCAE: competitive risk adjusted returns on a relative basis by investing primarily in equities, index futures, cash and cash equivalents.

Refer to Annex 6 (B) of the Prospectus for further information on the investment strategy of the product.
