KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- You are investing in a unit trust constituted in Singapore that aims to provide you with capital appreciation through investment in equities or equity-related securities of Asian (excluding Japanese) companies whose businesses are likely to benefit from or are related to growth in consumer spending in Asia. This may include companies that provide goods or services in the consumer, financial, real estate, healthcare, technology, telecom, internet, airlines or other tourism – related industries. The Fund may also invest in instruments issued by Asian (excluding Japanese) companies such as American Depositary Receipts and Global Depositary Receipts.
- There is currently no distribution policy for the Fund.

Refer to Paragraphs 1, 14, 16 and 46 of the Prospectus for further information on features of the product.

Investment Strategy

- We intend to achieve the investment objective of the Fund by investing in consumer staples and consumer discretionary companies which will allow for dynamic sector allocation between growth companies (e.g. consumer discretionary stocks) to income and dividend companies (e.g. consumer staples stocks).
- Our core products are supported by a bottom-up investment process involving rigorous company research. In addition, we also employ a top down process to review asset allocation at both the regional/country and sector levels. We believe long-term investment performance can be achieved by employing a rigorous research process that enables us to identify companies that generate superior returns as well as by identifying companies that are undervalued.

Refer to Paragraphs 15, 19 and 22.4 of the Prospectus for further information on the investment focus and approach of the Fund and its exposure to FDIs.

¹ The Prospectus is available for collection at our operating office at 80 Raffles Place, 3rd Storey, UOB Plaza 2, Singapore 048624 or through our authorised agents or distributors during normal business hours, or accessible at uobam.com.sg.

<ul style="list-style-type: none"> Our bottom-up approach includes fundamental evaluation and valuation analysis. The top down assessment of the markets and asset allocation involves a detailed quarterly review of market conditions, risks and valuations to arrive at return expectations across asset classes, regions and sectors in order to establish internal target allocations for the various portfolios. <i>The Fund may use or invest in FDI's for the purposes of hedging existing positions in a portfolio, for efficient portfolio management or a combination of both purposes.</i> The Fund is actively managed with reference to its benchmark (50% MSCI AC Asia ex Japan Consumer Discretionary Index and 50% MSCI AC Asia ex Japan Consumer Staples Index), which is used for performance comparison purposes. The benchmark is neither used as a constraint on how the Fund's portfolio is to be constructed nor set as a target for the Fund's performance to beat.
