

Infinity European Stock Index Fund

The **Infinity European Stock Index Fund** (the “Fund”) aims for medium to long-term capital appreciation by following the performance of the European stock markets through investment as a feeder fund in the **Vanguard® European Stock Index Fund**, a Sub-Fund of the Vanguard® Investment Series PLC. The Vanguard® European Stock Index Fund employs a “passive management” - or indexing – investment strategy designed to track the performance of the MSCI Europe Index by investing in all, or a representative sample, of the securities that make up the MSCI Europe Index, holding each stock in approximate proportion to its weighting in the MSCI Europe Index.

An index fund such as this Fund has operating expenses, and, therefore, while expected to follow its target index as closely as possible, will not be able to match the performance of the MSCI Europe Index exactly.
