 emerging markets. The Fund may invest any amount of its NAV in securities issued by supranational issuers. The Fund may invest in securities denominated in any currency including currencies of emerging markets countries. The Fund may invest in securities of any maturity. The Fund may also invest up to 35% of its NAV in securities of below investment grade quality. The Fund does not impose limits on the amount of its assets invested in cash or money market instruments. Financial derivative instruments and repurchase agreements may be used for the purposes of efficient portfolio management. 	
Parties Involved	
 WHO ARE YOU INVESTING WITH? The Fund is a sub-fund of Natixis International Funds (Dublin) I public limited company (the "Company"), an investment company qualified as a UCITS. The Management Company is Natixis Investment Managers S.A. The Investment Manager is Loomis, Sayles & Company, L.P., which is part of the Natixis group of companies. The Depositary is Brown Brothers Harriman Trustee Services (Ireland) Limited. 	Refer to MANAGEMENT AND ADMINISTRATION paragraph in the Prospectus for further information on the roles and responsibilities of these entities and what happens if they become insolvent.
KEY RISKS	
 WHAT ARE THE KEY RISKS OF THIS INVESTMENT? Investors should note that the price of Shares of the Fund and the value of the investments of the Fund and any income from them may fall as well as rise and investors may not recoup the original amount invested in the Fund. Past performance of the Fund is not necessarily indicative of its future performance. There is no assurance that the investment objectives of the Fund will actually be achieved. 	Refer to PRINCIPAL RISK FACTORS paragraph in the Prospectus for further information on the risk of the product.
Market and Credit Risks	
You are exposed to Risk Relating to Changing Interest Rates - The value of any fixed income security held by the Fund will rise or fall inversely with changes in interest rates. You are exposed to Credit Risk - The issuer of any debt security acquired by the Fund may default on its financial obligations. If after acquisition the perceived risk of default increases, the value of the security held by the Fund is likely to fall. You are exposed to Risk Relating to Below Investment Grade Securities - Securities rated below investment grade may have greater price volatility and a greater risk of loss of principal and interest than investment grade debt securities. You are exposed to Risk Relating to Global Investing - International investing involves certain risks such as currency exchange rate fluctuations, political or regulatory developments, economic instability and lack of information transparency. Securities in one or more markets may also be subject to limited liquidity. You are exposed to Exchange Rate Risk for Investments in SGD - As the Fund's holdings may be denominated in currencies other than Singapore Dollars, foreign currency exchange rate movements are likely to influence the returns to investors in Singapore.	
You are exposed to Liquidity Risk - The Fund may acquire securities that	Refer to REDEMPTIONS
are traded only among a limited number of investors who may make it difficult for the Fund to dispose of those securities quickly or in adverse market conditions. Redemptions may only occur on Fund Dealing Days - Shares may be redeemed on any Dealing Day. You are exposed to Redemption Rules - You should note that if the total redemption requests received exceed 10% of the total number of Shares	paragraph in the Prospectus for further information.
