KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

You are investing in a unit trust constituted in Singapore that aims to invest substantially (i.e. up to 100% of its assets) into the Schroder International Selection Fund China Opportunities (the “Underlying Fund”), whose investment objective is to aim to provide capital growth in excess of the MSCI China (Net TR) index after fees have been deducted over a three to five year period by investing in equity and equity related securities of Chinese companies.

The Underlying Fund is one of the sub-funds in the Schroder International Selection Fund, an open-ended investment company incorporated in Luxembourg.

Refer to the “Basic Information” and “Structure of the Trust” sections of the Prospectus and the “Investment objective, focus and approach” section of Appendix 3 of the Prospectus for further information on features of the product.

Investment Strategy

The Underlying Fund is actively managed and invests at least two-thirds of its assets in equity and equity related securities of Chinese companies.

The Underlying Fund may invest directly in China B-Shares and China H-Shares and may invest less than 50% of its assets (on a net basis) directly or indirectly (for example via participatory notes) in China A-Shares through:

- the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect;
- the Qualified Foreign Investor (QFI) Scheme;
- shares listed on the STAR Board and the ChiNext; and
- Regulated Markets.

Refer to the “Important Information” section of the Prospectus and the “Investment objective, focus and approach” section of Appendix 3 of the Prospectus for

¹ The Prospectus is available for collection from Schroder Investment Management (Singapore) Ltd or any of its appointed distributors during usual office hours or accessible at <http://www.schroders.com.sg>.

The Underlying Fund may use derivatives with the aim of reducing risk or managing the Underlying Fund more efficiently. The Underlying Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I of the Underlying Fund’s Luxembourg prospectus).

Further information on the investment strategy of the Fund.

The net asset value (“NAV”) of the Underlying Fund (and accordingly that of the Fund) is likely to have high volatility due to its investment policies or portfolio management techniques.

- The Manager is Schroder Investment Management (Singapore) Ltd.
- The Trustee is HSBC Institutional Trust Services (Singapore) Limited.

KEY RISKS

WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

The value of the product and its dividends or coupons may rise or fall. These risk factors may cause you to lose some or all of your investment and your principal may be at risk:

Refer to the “Risks, Financial Derivative Instruments, Risk Management Process and Supplementary Information” section of the Prospectus for further information on risks of the product.

Market and Credit Risks

You are exposed to market risk in China.

- The value of investments by the Fund or the Underlying Fund may go up and down due to changing economic, political or market conditions, or due to an issuer’s individual situation.

There is no secondary market for the Fund. All redemption requests should be submitted to the Manager or its appointed agents.

You are exposed to liquidity risk.

- In difficult market conditions, the Underlying Fund may not be able to sell a security for full value or at all. This could affect performance and cause the Fund or Underlying Fund to defer or suspend redemptions of its Units or shares (as the case may be).

Product-Specific Risks

You are exposed to emerging markets and frontier risk.

- Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty and operational risk.

You are exposed to counterparty risk.

- The counterparty to a financial derivative or other contractual agreement or synthetic financial product could become unable to honour its commitments to the Underlying Fund, potentially creating a partial or total loss for the Underlying Fund.

You are exposed to currency risk.

- The assets and liabilities of the Fund may be denominated in currencies other than the Fund’s base currency and the Fund may be affected by exchange control regulations or changes in the exchange rates between its base

currency and such other currencies. There is the prospect of additional loss (or additional gain) to you which is greater than the usual risks of investment.

You are exposed to financial derivatives risk.

- **The Fund and the Underlying Fund may use financial derivatives.** The use of futures, options, warrants, forwards, swaps or swap options involves increased risk. The Fund's or Underlying Fund's ability to use such instruments successfully depends on the Manager's or Investment Manager's ability to accurately predict movements in stock prices, interest rates, currency exchange rates or other economic factors and the availability of liquid markets. If the Manager's or Investment Manager's predictions are wrong, or if the financial derivatives do not work as anticipated, the Fund or Underlying Fund could suffer greater losses than if the Fund or Underlying Fund had not used the financial derivatives.

You are exposed to equity risk.

- The Underlying Fund may invest in stocks and other equity securities and their derivatives which are subject to market risks that historically have resulted in greater price volatility than that experienced by bonds and other fixed income securities. The Underlying Fund may also invest in convertible instruments which may be converted into equity. When the price of the underlying equity exceeds the conversion price, the convertible instrument generally behaves more like an equity and will be more sensitive to changes in equity securities. When the price of the underlying equity is lower than the conversion price, the convertible instrument generally behaves more like a bond and will be more sensitive to changes in interest rates and in credit spreads.

You are exposed to onshore renminbi currency risk.

- Currency control decisions made by the Chinese government could affect the value of the Underlying Fund's investments and could cause the Underlying Fund to defer or suspend redemptions of its shares.

You are exposed to risks associated with investing through the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect.

- The Underlying Fund may invest in China A-Shares directly via the Shanghai-Hong Kong Stock Connect and/or the Shenzhen-Hong Kong Stock Connect (as further described in section (A) of the Annex to the Prospectus).

VALUATIONS AND EXITING FROM THIS INVESTMENT

HOW OFTEN ARE VALUATIONS AVAILABLE?

The NAV per Unit of the Fund is published on the Manager’s website at <http://www.schroders.com.sg> one (1) Business Day after the relevant Dealing Day and is also available directly from the Manager.

Refer to the “Subscription/ Cancellation of Units”, “Realisation of Units” and “Obtaining Prices of Units” sections of the Prospectus for further information on valuation and exiting from the product.

HOW CAN YOU EXIT FROM THIS INVESTMENT AND WHAT ARE THE RISKS AND COSTS IN DOING SO?

You may at any time during the life of the Fund request in writing (a “Realisation Request”) to realise all or any Units held by you, subject to the minimum holding and the minimum realisation amount requirements as mentioned in the Prospectus. The Realisation Request must specify the Units in the Fund to be realised.

The realisation proceeds are paid to you within seven (7) Business Days (or such other period as may be prescribed or permitted by the Monetary Authority of Singapore from time to time) following the receipt of the Realisation Request.

Your realisation price is determined as follows:

- If you submit the Realisation Request on or before 5 pm on a Dealing Day, you will be paid a price based on the NAV of the Fund at the close of that Dealing Day.
- If you submit the Realisation Request after 5 pm on a Dealing Day, you will be paid a price based on the NAV of the Fund at the close of the next Dealing Day.

The sale proceeds that you will receive will be the realisation price multiplied by the number of Units realised, less any applicable Duties and Charges. An example is as follows:

1,000 Units	x	S\$1.100	=	S\$1,100
Number of Units realised		Notional realisation price (NAV per Unit)		Realisation proceeds

This example is on the assumption that there are no Duties and Charges payable. If applicable to you as provided in the trust deed of the Fund, you may cancel your subscription for Units by giving written notice or by submitting the cancellation form to the Manager or its distributors within 7 calendar days from the date of your subscription. However, you will have to take the risk for any price changes in the NAV of the Fund since the time of your subscription.
