Fund objectives and investment policy

The fund aims to deliver an income of 7% per year by investing in equities of Asia-Pacific companies (excluding Japan). This is not guaranteed and could change depending on market conditions.

This fund may use financial derivative instruments as a part of the investment process. Derivatives carry a high degree of risk and should only be considered by sophisticated investors.

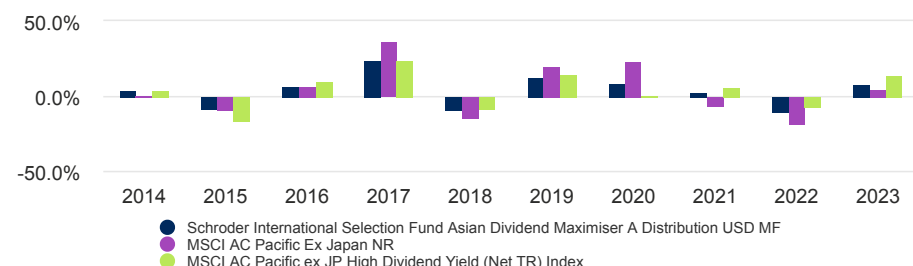

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). **Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of investments to fall as well as rise. Performance data does not take into account any commissions and costs, if any, charged when units or shares of any fund, as applicable, are issued and redeemed.**

Past performance and any forecasts are not necessarily a guide to the future or likely performance.

The value of investments and income from them can go down as well as up and is not guaranteed. The distributions are not guaranteed. Ordinarily, they will be reviewed annually. In the event of the Fund's income and realised gains being less than indicated distribution amount per unit per annum, distributions will be made from capital. Investors should be aware that the distributions may exceed the income and realised gains of the Fund at times and lead to a reduction of the amount originally invested, depending on the date of initial investment. Some performance differences between the fund and the benchmark may arise as the benchmark returns are not adjusted for non-dealing days of the fund. Where 'since inception' performance figures are stated, please note that the inception date is the same as the share class launch date under 'Fund Facts'.
