Further Information

Refer to the "Investment Objectives and Policies and Product Suitability – *Product Suitability*" section in Paragraph 5.7 of the Prospectus for further information on product suitability.

KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- You are investing in a sub-fund of the Franklin Templeton Global Funds Plc, an open-ended investment company with variable capital organised under the laws of Ireland as a public limited company pursuant to the Companies Acts and the UCITS Regulations, that aims to provide income comprised of dividends and interest whilst also achieving long-term capital growth.
- If you invest in a distributing class, you may receive distributions at the frequency indicated in the name of the distributing class.
- Distributing Plus share classes may pay distributions out of capital, which amounts to a return or withdrawal of part of an investor's original investment.
- Distributions will reduce the net asset value per share of the share class.
- Distributing Plus (e) share classes may charge certain fees and expenses to capital rather than income which will result in increased amounts for distribution. The increased dividend payout effectively amounts to a return or withdrawal of an investor's original investment and will result in a decrease in the net asset value per share of the share class.

Refer to the "The Company", "The Funds – *Share Classes*" and "Investment Objectives and Policies and Product Suitability" sections in Paragraphs 1, 2.4 and 5.1 of the Prospectus for further information on features of the product.

Investment Strategy

- The Fund will invest at least 80% of its net asset value in infrastructure companies via equity and equity-related securities listed or traded on Regulated Markets in the G7 countries of the United States, United Kingdom, Japan, Germany, France, Italy and Canada, and equity and equity-related securities listed or traded on Regulated

<p>Markets of other developed countries and Emerging Market Countries (the latter up to 20% of the Fund's net asset value).</p> <ul style="list-style-type: none"> • The Fund will invest in infrastructure assets that possess common investment features. Generally this will result in investment in the following sectors: utilities; transport; communications; and community and social infrastructure. • The Investment Manager will seek to achieve the Fund's investment objective by constructing an investable universe of approximately 175 infrastructure companies that: (1) have a long life span (generally infrastructure assets are built and expected to last 40 years or more); (2) offer predictable cash flows because of the long-term nature of their contracts and the fact that fees or rents payable to such companies are typically dictated or constrained by regulation; (3) have low earnings volatility; (4) benefit from inflation protection of cash flows or assets; and (5) operate in the infrastructure sector where competition is limited due to high barriers to entry. • The Investment Manager researches these companies and the specific business environments in which they operate. The Investment Manager uses a bottom-up approach in selecting investments and also forecasts macroeconomic development. • ESG risks and opportunities, to the extent possible, are considered in two major ways. Firstly, in the assessment of cash flows forecasted by the Investment Manager in respect of eligible investee companies as part of a fundamental security valuation. Secondly, if ESG factors cannot be captured in these forecasted cash flows, they are instead captured through an adjustment to the required return, or hurdle rate, of the investment. As a result of the integrated approach to ESG, the Investment Manager applies its ESG process to at least 90% of the portfolio of the Fund. • The Fund promotes environmental characteristics and is classified as an Article 8 fund pursuant to the Sustainable Finance Disclosure Regulation ((EU) 2019/2088). The investments underlying the Fund do not take into account the EU criteria for environmentally sustainable economic activities, however, in line with its ESG methodology, the Fund may hold investments that seek to contribute to climate change mitigation and climate change adaptation. • To pursue its investment objective and policies, the Fund invests in those companies that the Investment Manager deems to offer over a 5-year holding period the most attractive returns, comprised of regular and consistent income from dividends and interest, plus capital growth, against those companies' specific risks. As a guideline, the Fund will usually hold between 30 and 60 different investments. • The Fund's benchmark index is the OECD G7 Inflation Index +5.5% (the "Benchmark"). The Fund is actively managed. The Investment Manager uses the Benchmark as its target return for the Fund – over the long term the Investment Manager seeks to provide an average annual return of the OECD G7 Inflation Index (which return will vary over time) plus 5.5% (gross of fees). "OECD G7" refers to the following countries: Canada, France, Germany, Italy, Japan, the UK and the US. There is no guarantee that the Investment Manager will meet its target, and the target does not take into account the fees charged, which will reduce the Fund's return. The Benchmark does not constrain the Investment Manager's management of the Fund. • The Fund may invest in certain types of derivatives for efficient portfolio management purposes and/or investment purposes. The Fund may be leveraged to up to 100% of its net asset value as a result of its use of derivatives. The Fund will not hold short positions on individual securities. 	<p>of the Prospectus for further information on the investment strategy of the product.</p>

KEY RISKS	
WHAT ARE THE KEY RISKS OF THIS INVESTMENT?	Refer to the "Risk Factors" section in Paragraph 8 of the Prospectus for further information on risks of the product.
Market and Credit Risks	
<ul style="list-style-type: none"> You are exposed to equity markets risks as this is an equity fund – Investment in equity securities involve risks, including issuer, industry, market and general economic related risks, and any adverse or perceived adverse developments in one or more of these areas could cause a substantial decline in the value of equity securities owned by the Fund. You are exposed to emerging markets risks – Investments in emerging market countries poses certain risks for example risks arising from economic and political factors, limited liquidity, higher price volatility, less developed disclosure, reporting and regulatory standards and custodial and/or settlement systems. You are exposed to currency risks – An investment in the shares of the Fund (including hedged share classes) may entail exchange rate risks. If you invest in a share class that is not denominated in SGD and your reference currency is SGD, you may be exposed to additional exchange rate risks. 	
Liquidity Risks	
<ul style="list-style-type: none"> The Fund is not listed in Singapore and you can redeem your shares only on Dealing Days – There is no secondary market in Singapore for the Fund. All redemption requests may only be made in the manner described in the Prospectus. Your redemption request may be deferred to subsequent Dealing Days if total redemption requests on a Dealing Day exceed 10% of the Fund's shares in issue. You will not be able to redeem your shares during any period where redemption is suspended. 	
Product-Specific Risks	
<ul style="list-style-type: none"> You may be exposed to concentration risks – A substantial portion of the Fund's investments may consist of securities of companies doing business in one industry or product field which could increase the potential for volatility and risk of loss, especially in periods of pronounced market volatility. You are exposed to infrastructure risks – Securities and instruments of infrastructure companies are susceptible to adverse economic or regulatory occurrences affecting their industries. The operations of infrastructure projects are also exposed to unplanned interruptions caused by significant catastrophic events. You are exposed to custody and settlement risks. You are exposed to derivatives risks – Derivatives in general involve special risks and costs and may result in losses to the Fund. A liquid secondary market may not always exist for the Fund's derivatives positions at any time. In addition, over-the-counter instruments also expose the Fund to risk that a counterparty will not meet its obligations to the Fund which may cause the Fund to suffer a loss. You are exposed to sustainability risk – Integration of sustainability risks in the investment decision process may have the effect of excluding profitable investments from the investment universe of the Fund and may also cause the Fund to sell investments that will continue to perform well.
