 - have a long-term investment horizon
 - do not require regular income from their investment
 - are comfortable with a higher than average degree of volatility
 - seek capital appreciation over the long-term
- The principal of the Fund will be at risk.
- Investors should consult their financial advisers on the suitability of the Fund if they are in doubt.

Further Information
 Refer to "Important Information" section and paragraph 7.1 of the Singapore Prospectus for further information on product suitability.

KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

You are investing in an open-ended standalone unit trust fund established in Malaysia that aims to achieve maximum capital appreciation over the long-term through all types of investments.

The Fund is assessed by the SC as suitable to be a Qualifying CIS and is subject to the Standards of Qualifying CIS and any other law, regulation, rule, guidelines or directive enacted or issued pursuant to the ASEAN CIS Framework which are applicable to the Fund, as may be amended or re-enacted from time to time.

The Manager is currently offering Units of Class SGD of the Fund for investment in Singapore.

The Manager has the discretion to distribute part or all of the Class' distributable income. The distribution (if any) may vary from period to period depending on the investment objective and the performance of the Fund.

Refer to paragraphs 1, 7.1 and 20.1 of the Singapore Prospectus for further information on features of the product.

¹ The Singapore Prospectus is available for collection at Principal Asset Management (S) Pte. Ltd. (Company Registration No. 200607208K), 50 Raffles Place, #22-03A & B Singapore Land Tower, Singapore 048623 from Monday to Friday (9am to 5pm) or may be downloaded at www.principal.com.sg.

Investment Strategy	
<p>The Fund may invest at least 70% of its NAV in equities and up to 28% of the Fund's NAV in other permissible investments and at least 2% of the Fund's NAV in liquid assets. In line with its objective, the investment policy and strategy of the Fund will focus on investment in shares of companies with growth potential. Generally, the Fund will invest primarily in large capitalisation companies listed on the main market of Bursa Malaysia. The Fund may also invest in the ACE market of Bursa Malaysia to provide better returns. With effect from 14 April 2023, the Fund may invest up to 25% of its NAV in companies that are listed in any Eligible Market globally with some operations or businesses in Malaysia to capture growth opportunities.</p> <p>The asset allocation strategy for the Fund is as follows:</p> <ul style="list-style-type: none"> ▪ at least 70% of the Fund's NAV will be invested in equities; ▪ up to 28% of the Fund's NAV may be invested in other permissible investments; and ▪ at least 2% of the Fund's NAV will be invested in liquid assets. <p>The asset allocation will be reviewed periodically depending on the country's economic and stock market outlook. In a rising market, the 98% limit may be breached. However, the Manager will seek to adjust this within a time frame approved by the Trustee.</p> <p>The Fund will be managed with high tracking error by combining a top-down asset and sector allocation process with a bottom-up stock selection process. The asset allocation decision is made after a review of macroeconomic trends in Malaysia and other global economies. In particular, the Manager analyzes the direction of GDP growth, interest rates, inflation, currencies and government policies. The Manager will then assess their impact on corporate earnings and determine if there are any predictable trends. These trends form the basis for sector selection. For stock selection process, the investment strategy of the Fund will be predominantly based on bottom-up stock selection and the growth style of equity investing instead of investing mainly in the stocks represented in the benchmark. Consequently, the Fund's individual stock and sector weightage will deviate significantly from the benchmark, thus leads to high tracking error. The criteria for stock selection would include improving fundamentals and growth at reasonable valuations. Stock valuation fundamentals considered are earnings per share growth rate, return on equity, price earnings ratio and net tangible assets multiples. The strategy of the Fund also includes utilizing liquid assets dynamically in the changing market conditions.</p> <p><u>Benchmark</u></p> <p>The Fund's benchmark, the FTSE Bursa Malaysia Top 100 Index, is not a target for the Fund's performance to beat, nor used as a constraint on how the Fund's portfolio is to be constructed, nor a guaranteed return or forecast of future return and is only used as a reference for performance comparison purpose.</p>	<p>Refer to paragraph 7.2 of the Singapore Prospectus for further information on the investment focus and approach.</p>
Parties Involved	
<p>WHO ARE YOU INVESTING WITH?</p> <p>The Manager is Principal Asset Management Berhad. The Trustee is HSBC (Malaysia) Trustee Berhad. The Custodian is The Hongkong and Shanghai Banking Corporation Limited. The Singapore Representative is Principal Asset Management (S) Pte. Ltd.</p>	<p>Refer to paragraphs 2 to 5 of the Singapore Prospectus for further information on the role and responsibilities of these entities and what happens if they become insolvent.</p>
KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</p> <p>The value of the product and its dividends or coupons may rise or fall. These risk factors may cause you to lose some or all of your investment:</p>	<p>Refer to paragraphs 9.1 and 9.2 of the Singapore Prospectus for further information on risks of the product.</p>
Market and Credit Risks	
<ul style="list-style-type: none"> • You are exposed to Market Risk This risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the fund's NAV. 	

Liquidity Risks	
<ul style="list-style-type: none"> Liquidity risk refers to the ease of liquidating an asset without causing market dislocation. This depends on the supply and demand as well as the asset's volume or amount traded in the market. If the Fund holds assets that are illiquid or difficult to dispose, or due to liquidity policy applied by the underlying CIS (e.g. suspension of the CIS), the value of the Fund and consequently the value of Unit Holders' investment in the Fund may be negatively affected. The Fund is not listed and there is no secondary market for its Units. You can only redeem your investment on a Dealing Day. All redemption requests should be made to the Manager. The Manager may, with the approval of the Trustee, suspend the subscription, switching and redemption of Units during certain circumstances specified in the Singapore Prospectus and the Deed. 	
Product-Specific Risks	
<ul style="list-style-type: none"> You are exposed to Stock Specific Risk Prices of a particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such stock will adversely affect the Fund's NAV. You are exposed to Credit and Default Risk The Fund will be exposed to a certain degree of credit and default risk of issuers or counterparties when the Fund invests in debt securities, money market instruments and/or places in deposits. Credit risk relates to the creditworthiness of an issuer or counterparty and their expected ability to make timely payment of interest and/or principal. Default risk relates to the risk that an issuer or counterparty either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the investments. Risk associated with investing in CIS Since the Fund may invest into CIS, there is a risk of concentration into CIS, in which the CIS's management company has absolute discretion over the CIS's investment technique and knowledge, operational controls and management. In the event of mismanagement of the CIS and/or the management company, the NAV of the Fund, which invests into those CIS would be affected negatively. Risks associated with investment in warrants There are inherent risks associated with investment in warrants. The value of warrants is influenced by the current market price of the underlying security, the exercise price of the contract, the time to expiration of the contract and the estimate of the future volatility of the underlying security's price over the life of the contract. Generally, the erosion in the value of warrants accelerates as it approaches its expiry date. Like securities, the Manager will undertake fundamental research and analysis on these instruments with an aim to mitigate the risks. You are exposed to Currency Risk Classes may be denominated in currencies other than the base currency (MYR) and changes in the exchange rate between the base currency and the denominated currency of the Class may lead to a depreciation of the value of the investor's holding as expressed in the currency denomination of the Class. As such, investors should realise that currency risk is considered as one of the major risks due to the volatile nature of the foreign exchange market. Currently, the Manager does not seek to mitigate the currency risk. Hence, investors of the Fund should be prepared to assume the currency risk. You are exposed to Concentration Risk The Fund may invest in securities of a single or a limited number of countries. Where the Fund invests in a single or a few, select countries, it will be exposed to fluctuations in the economies of these countries, and the market, currency, political, social environment and other risks related specifically to these countries, which may affect the market price of its investments in these countries. Exposure to a single or limited number of countries also increases the potential volatility of the Fund due to the increased concentration risk as they are less diversified compared to exposure to specific regional or global markets. Risks associated with use of Financial Derivatives Instruments ("FDIs") The Fund may invest in FDIs for purposes of hedging and it may be subject to risks associated with such investments. Investments in derivatives may require the deposit of initial margin and additional deposit of margin on short notice if the market moves against the investment positions. If no provision is made for the required 	

margin within the prescribed time, the Fund's investments may be liquidated at a loss.		
FEES AND CHARGES		
WHAT ARE THE FEES AND CHARGES OF THIS INVESTMENT?		Refer to paragraph 8 of the Singapore Prospectus for further information on fees and charges.
Payable directly by you		
Application Fee	Currently up to 5%. Maximum 10%.
