## KEY RISKS

### WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

- ▶ The value of the Sub-Fund's assets may rise or fall due to normal market fluctuations and investors may not get back all of their investment.

*Refer to paragraph 6 "Risks" of the Singapore Prospectus and sections 1.4 "General Risk Considerations" and 3.3 "Sub-fund specific risk considerations" of the Luxembourg Prospectus for further information on risks of the product.*

**MARKET AND CREDIT RISKS**▶ You are exposed to Market Risk

The value of investments may be affected by uncertainties such as international, political and economic developments or changes in government policies in the BRIC countries (Brazil, Russia, India and China including Hong Kong SAR).

▶ You are exposed to Foreign Exchange Risk

The underlying assets of the Sub-Fund may be denominated in currencies other than the currency of the share class you have invested into. The value of your investment may rise or fall in line with movements in the relevant exchange rates.

**LIQUIDITY RISKS**

▶ The Sub-Fund is not listed in Singapore and there is no secondary market for its Shares. You can only redeem your investment on a Dealing Day through the Sub-Fund.

▶ Investment of the Sub-Fund's assets in relatively illiquid investments may restrict the ability of the Sub-Fund to dispose of its investments at a price and time that it wishes to do so. This may result in a loss to the Sub-Fund.

**PRODUCT-SPECIFIC RISKS**▶ You are exposed to Emerging Markets Risk

Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity, market volatility (such as interest rate and price volatility) and regulatory risks.

▶ You are exposed to risk of investing in China A-Shares through Shanghai-Hong Kong Stock Connect and/or Shenzhen-Hong Kong Stock Connect

Investments through the Stock Connects are subject to additional risks, namely, quota limitations, suspension risk, operational risk, restrictions on selling imposed by front-end monitoring, recalling of eligible stocks, clearing and settlement risks, nominee arrangements in holding China A-shares and regulatory risk.

▶ You are exposed to the risks of investing in China A-Shares Access Product ("CAAP")

Investing in CAAP linked to China A-shares in the People's Republic of China involves risks that include but limited to, the terms and conditions imposed by the CAAP issuer, liquidity of CAAPs, and credit risk of the CAAP issuer.

▶ You are exposed to Sector Risk

The investments of the Sub-Fund may be limited to a relatively narrow segment of the economy. Hence, the Sub-Fund may not be as diversified as most mutual funds and may tend to be more volatile.
