<p>assets), or (iv) mortgage- and asset-backed securities (including collateralised debt obligations and mortgage dollar roll transactions).</p> <ul style="list-style-type: none"> • The Fund can use derivatives for hedging, efficient portfolio management and investment purposes which may be uncorrelated to the underlying assets of the Fund. • In addition, the Fund may also purchase or sell mortgage-backed securities (issued by Government National Mortgage Association (GNMA), Federal Home Loan Mortgage Corporation (Freddie Mac) and the Federal National Mortgage Association (FNMA)) on a delayed delivery or forward commitment basis through the "to-be-announced" (TBA) market. With TBA transactions, the particular securities to be delivered are not identified at the trade date but the delivered securities must meet specified terms and standards (such as yield, duration, and credit quality) and comply with the Fund's Investment Objectives and Policy. KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT? The value of the product and its dividends or coupons may rise or fall. These risk factors may cause you to lose some or all of your investment.</p>	<p>Refer to the "Risk Factors" section of the Singapore Prospectus and "Risk Considerations" section of the Luxembourg Prospectus.</p>
Market and Credit Risks	
<ul style="list-style-type: none"> • Your investments are exposed to debt securities risk – Debt securities are sensitive to changes in interest rates, widening of credit spreads and defaults risk of issuers. A fixed income security's value will generally increase in value when interest rates fall and decrease in value when interest rates rise. • Your investments are exposed to currency risks – The Fund is exposed to the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations. 	
Liquidity Risks	
<ul style="list-style-type: none"> • Your investments are exposed to liquidity risks of the underlying investments – Under exceptional market conditions the manager may be forced to sell assets of the fund at a discount in order to meet continued redemption requests. • The Fund is not listed, and you can realize your Shares only on Dealing Days – There is no secondary market for the Fund. All redemption requests should be submitted in the manner set out in the Prospectus. • Your realization request may be deferred or suspended – Redemptions of Shares may be deferred when more than 10% of the value of the Fund's Shares are redeemed or exchanged on any one Dealing Day. Your right to realize Shares may also be temporarily suspended under certain circumstances as described in the Prospectus. 	<p>Refer to the sections "Sale of Shares" and "Suspension of Valuation, Issue, Sale and Switching of Shares" of the Singapore Prospectus.</p>
Product-Specific Risks	
<ul style="list-style-type: none"> • You are exposed to derivatives risk – The Fund may invest in financial derivative instruments which may be purchased on regulated markets or over-the-counter and may have less liquidity and more volatility than 	

conventional assets, exposing the Fund to higher risks and potential losses. When financial derivatives contracts are traded over the counter, the Fund may find itself exposed to risks arising from the solvency of its counterparties and from their ability to respect the conditions of these contracts.

- **Your investments are subject to prepayment and extension risk** – With mortgage- and asset-backed securities, principal is paid back over the life of the security rather than at maturity. Such securities are subject to prepayment risk, when interest rates fall, resulting in a shortening of maturities and foregone future interest payments, as well as to extension risk when interest rates rise, resulting in longer maturities and greater sensitivity to changes in interest rates.
- **You are exposed to collateralized debt obligations risk** – Collateralized debt obligations (CDO) are securities backed by a pool of assets where there is the risk that the underlying securities may not make interest or principal payment, may decline in value, or may be subordinate to other classes of securities that have priority as to payment, causing the value of the CDOs to decline.

- Your exit price is determined as follows:
 - If the Singapore representative receives and accepts the sale request on or before 4 p.m. on a Dealing Day, you will be paid a price based on the net asset value of the Shares applicable on that day.
 - If the Singapore representative receives and accepts the sale request after 4 p.m. on a Dealing Day, you will be paid a price based on the net asset value of the Shares at the close of the next Dealing Day.
- The sales proceeds that you will receive will be the exit price multiplied by the number of shares sold, less any charges. The following illustrates the sales proceeds on a sale of 1,000 Class A SGD share class shares at an exit price of S\$12.50 and assuming no Contingent Deferred Sales Charge:

Exit price x Number of shares sold	= Gross Sales Proceeds
S\$12.50 x 1,000	= S\$12,500
