Investment Strategy	
<ul style="list-style-type: none"> • The Sub-Fund aims to achieve its objective through a diversified portfolio of permissible investments (as defined by the Code) focusing in Singapore which may include (but are not limited to) equities, equity-related securities, real estate investment trusts, debt securities, collective investment schemes managed by the Managers, other local or offshore collective investment schemes, and exchange-traded funds. • Typically, the Sub-Fund will invest primarily in Singapore, and will generally allocate in investments or companies which are incorporated in, headquartered in, listed in, or derive a significant proportion of their revenue or profits from or have a significant proportion of business operation or assets in Singapore. Nevertheless, the Sub-Fund may also allocate its investments outside of Singapore if there are suitable investment opportunities. • The Managers' approach is to select investments which they believe offer the potential for sustainable dividend yields at the required level and provide capital appreciation. • In addition, the Sub-Fund's portfolio is supported by combining the output from the Managers' proprietary Artificial Intelligence Machine Learning (AIML) model with a rigorous due diligence process by their regional analysts. • FDIs may be used for the purposes of hedging existing positions, EPM, or a combination of such purposes. 	Refer to paragraph 2 of Appendix 2 of the Prospectus for information on the investment strategy of the product.

¹ The Prospectus is available from the Managers (whose operating address is at 80 Raffles Place, 3rd Storey, UOB Plaza 2, Singapore 048624) or through their authorised agents or distributors during their respective business hours, or through the Managers' website at uobam.com.sg.

Accordingly, the Sub-Fund will not invest in any product or engage in any transaction which may cause the Units not to be regarded as Excluded Investment Products. • The Sub-Fund is actively managed without reference to its benchmark (as set out in the Prospectus), which is used as a reference for performance comparison purposes and to provide market context. The benchmark is neither used as a constraint on how the Sub-Fund's portfolio is to be constructed nor set as a target for the Sub-Fund's performance to beat. 	
Parties Involved	
WHO ARE YOU INVESTING WITH? <ul style="list-style-type: none"> • The Managers are UOB Asset Management Ltd. • The Trustee is State Street Trust (SG) Limited. • The Custodian is State Street Bank and Trust Company, Singapore Branch. 	Refer to <u>paragraphs 2, 3, 4 and 20.4</u> of the Prospectus for information on these entities and what happens if they become insolvent.
KEY RISKS	
WHAT ARE THE KEY RISKS OF THIS INVESTMENT? The value of the Sub-Fund and its distributions (if any) may rise or fall. These risk factors may cause you to lose some or all of your investment:	Refer to <u>paragraph 8</u> of the Prospectus and <u>paragraph 5 of Appendix 2</u> of the Prospectus for information on risks of the product.
Market and Credit Risks	
<ul style="list-style-type: none"> • You are exposed to market risks, including those in emerging markets. <ul style="list-style-type: none"> o Prices of the securities that the Sub-Fund invests in may be affected by changes in economic conditions, interest rates and the market's perception of the securities, which in turn may affect the value of your investment. • You are exposed to equity risks. <ul style="list-style-type: none"> o The Sub-Fund invests in stocks and other equity securities that historically have greater price volatility than bonds and other fixed income securities. This in turn may affect the value or volatility of the Sub-Fund. • You are exposed to debt securities risks. <ul style="list-style-type: none"> o Adverse changes in the financial condition of the issuer of bonds invested in, or in general economic conditions, or both, or an unanticipated rise in interest rates, may increase the potential for default by the issuers of these securities. Interest rate fluctuations may affect the price of a bond. A change in the credit rating of a bond as a result of any of the above factors can affect that bond's liquidity and therefore have an impact on the value of your investment. 	
Liquidity Risks	
<ul style="list-style-type: none"> • The Sub-Fund is not listed and you can redeem only on Dealing Days. <ul style="list-style-type: none"> o There is no secondary market for the Sub-Fund. All realisation forms should be submitted to the Managers' authorised agents or distributors. • You are exposed to liquidity risks in the Sub-Fund's investments. <ul style="list-style-type: none"> o Investments in some Asian and/or emerging markets often involve a greater degree of risk due to the nature of such markets which do not have fully developed services such as custodian and settlement services. There may be a greater degree of volatility in such markets because of the speculative element, significant retail participation and lack of liquidity. 	
Product-Specific Risks	
<ul style="list-style-type: none"> • You are exposed to single country, sector and regional risk. <ul style="list-style-type: none"> o Where the Sub-Fund's exposure is focused in a single country, sector or region, while such concentrated exposure may present greater opportunities and potential for capital appreciation, it may be subject to higher risks as there may be less diversification than a global portfolio. • You are exposed to foreign exchange / currency risk. <ul style="list-style-type: none"> o Where investments are not denominated in the currency of the Sub-Fund or relevant Class, exchange rate fluctuations of the investment currency against the Sub-Fund or Class currency may affect the value of Units. 	

- o Where a Class is not denominated in SGD, changes in the exchange rate between SGD and the Class currency may adversely affect the value of Units of such Class, as expressed in the Class currency.
- **You are exposed to derivatives risks.**
 - o Investments in FDIs are subject to risks associated with FDIs. An investment in a FDI (including foreign exchange forward contracts and equity index future contracts) may require the deposit of an initial margin and additional deposit of margin on short notice if the market moves against the investment position. If the required margin is not provided in time, the investment may be liquidated at a loss. Therefore, it is essential that investments in FDIs are monitored closely. The Managers have controls for investments in FDIs and have in place systems to monitor the FDI positions of the Sub-Fund.
- **You are exposed to concentration of investments in underlying entities.**
 - o The Sub-Fund may from time to time have a large concentration of investments in Underlying Entities and could consequently be subject to significant losses where such Underlying Entities decline in value or are otherwise adversely affected.
- **You are exposed to risks relating to distributions.**
 - o Dividend/interest income may be adversely affected by e.g. investee entities suffering unexpected losses and/or paying lower than expected dividends, and currency fluctuations. Distributions from capital may reduce part of your original investment and result in reduced future returns. Distributions (out of capital or otherwise) may have the effect of lowering the Sub-Fund's NAV.
- **You are exposed to risks associated with the use of the AIML model.**
 - o Models are built upon various assumptions and rely heavily on historical data. They may be affected by changes in market conditions, incomplete or inaccurate data, data manipulation or biases, failure to update model parameters in a timely and accurate manner, unexpected market events and execution and operational errors.

You should be aware that the Sub-Fund may be exposed to other risks of an exceptional nature from time to time.
