PRODUCT SUITABILITY

WHO IS THE PRODUCT SUITABLE FOR?

The Portfolio is only suitable for investors who:

- seek capital appreciation;
- seek portfolio diversification through exposure to the technology sector;
- can tolerate potentially high volatility in the value of their investment;
- have a high level of risk tolerance commensurate with an investment in equity securities; and
- have a long-term investment horizon.

You should consult your financial adviser if in doubt whether this product is suitable for you.

Further Information

Refer to "Investor Profile" of the Singapore Prospectus for further information on product suitability.

KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- You are investing in a collective investment scheme that is a sub-fund of the Luxembourg incorporated SICAV Columbia Threadneedle (Lux) I (formerly known as Threadneedle (Lux)), which seeks to achieve long term capital appreciation by investing principally in equity securities in the technology sector.
- The distribution policies of the Share Classes are as follows:

Share Classes whose denomination ends in a "P" or "C": Dividend, if declared, will be distributed. Dividends may include an element of capital which will have an impact on capital appreciation. The payment of dividends will result in an immediate decrease in the net asset value per share regardless of whether or not they are paid out of capital.

Other Share Classes: No dividend distribution. Income, if any, will be re-invested.

Refer to "The SICAV", "The Portfolios", "Investment Objective, Focus and Approach", and "Distribution Policy" of the Singapore Prospectus for further information on features of the product.

Investment Strategy

- The Portfolio will invest principally in the equity securities of companies with business operations in technology and technology-related industries globally.
- The Portfolio may invest in Transferable Securities of issuers of any size and domiciled in any country. The Portfolio will normally invest its assets in any common stock, however it may also invest in other types of equity securities, including securities convertible or exchangeable into common stock, rights and warrants to purchase common stock and depositary receipts representing ownership interest in these equity securities.
- The Portfolio may invest up to 25% of its assets in preferred stock and Investment Grade debt securities.
- For the purposes of managing liquidity, the Portfolio may hold ancillary liquid assets (i.e. bank deposits at sight), and may also hold bank deposits, Money Market Instruments or money market funds for treasury purposes. In normal market conditions, investments in these assets or instruments will not exceed 10% of the Portfolio's Net Asset Value.
- The Portfolio is actively managed in reference to the MSCI World Information Technology 10/40 Index. Deviations from the index, including guidance on the level of risk relative to the index, will be considered as part of the Sub Advisor's risk monitoring process.
- **The Portfolio may use derivatives for hedging and efficient portfolio management.**

Refer to "Investment Objective, Focus and Approach" of the Singapore Prospectus for further information on the investment strategy.

¹ The Singapore Prospectus is available for collection during normal Singapore business hours from Singapore distributors for the Portfolio or accessible at www.columbiathreadneedle.sg.

<ul style="list-style-type: none"> Hedging between the currency of the Class and the base currency of the Portfolio will be carried out for Classes whose denomination ends in a "H" or "C". These Classes will be hedged, with the objective of minimising currency risk exposure. This activity may increase or decrease the return to investors in those Classes. 					
Parties Involved					
WHO ARE YOU INVESTING WITH? <ul style="list-style-type: none"> The umbrella fund under which the Portfolio is constituted is Columbia Threadneedle (Lux) I (the "SICAV"). The Management Company of the SICAV is Threadneedle Management Luxembourg S.A.. The Sub-Advisor of the Portfolio is Columbia Management Investment Advisers, LLC. The Depositary for the SICAV is Citibank Europe plc, Luxembourg Branch. 	Refer to "The SICAV", "Management and Administration" and "Other Parties" of the Singapore Prospectus for further information on the role and responsibilities of these entities and what happens if they become insolvent.				
KEY RISKS					
WHAT ARE THE KEY RISKS OF THIS INVESTMENT The value of the product and its dividends or coupons (if any) may rise or fall. These risk factors may cause you to lose some or all of your investment:	Refer to "Risk Factors" of the Singapore Prospectus for further information on the risk of the product.				
Market and Credit Risks					
<ul style="list-style-type: none"> General market risks. The value of investments may fall as well as rise and you may not get back the sum originally invested, especially if investments are not held for the long term. Risks of investments in the technology sector. The Portfolio invests in companies with business operations in technology and technology-related industries and such sector concentration may add more volatility than a more broadly diversified portfolio. Exchange rate risks. Where investments are made by the Portfolio in assets that are denominated in currencies other than USD (the base currency of the Portfolio), changes in exchange rates may affect the value of your investments. The Portfolio and share class offered may not be denominated in SGD and you may therefore be exposed to additional exchange rate risks if your reference currency is SGD. 					
Liquidity Risks					
<ul style="list-style-type: none"> The Portfolio is not listed in Singapore and you can redeem only on Valuation Dates (subject to the opening hours of the Singapore distributors). There is no secondary market for the Portfolio in Singapore. All redemption requests should be submitted in the manner set out in the Singapore Prospectus. Your right to request for redemption may be suspended or deferred in certain circumstances. 					
Product-Specific Risks					
<ul style="list-style-type: none"> Risks of portfolio concentration. The Portfolio invests in a concentrated portfolio (holds a limited number of investments and/or has a restricted investment universe) and if one or more of these investments declines or is otherwise affected, it may have a pronounced effect on the Portfolio's value. Derivatives risks. The use of derivatives by the Portfolio may increase the volatility of the Portfolio and may involve a small investment of cash relative to the magnitude of risk assumed. In addition, these techniques could result in a loss if the counterparty of the transaction does not perform as promised. If the Management Company or the Sub-Advisor judges market conditions incorrectly or employs a strategy that does not correlate well with the Portfolio's investments, these techniques could result in a loss. Sustainability risks. The Portfolio is potentially exposed to environmental, social or governance events or conditions that, if occurring, could cause a material negative impact on the value of the Portfolio's investment. Volatility risks. The Portfolio may exhibit significant price volatility.
