Fund Manager's Report

The Fund was down 1.76% in USD terms in January, underperforming the benchmark by 241 bps. YTD, the Fund is down 1.76%, underperforming the benchmark by 241 bps.

The MSCI AC Asia Pacific ex Japan Index slumped 4.8% in USD terms in January. The best performing markets were India and the Philippines, but China and Korea lagged. The USD appreciated by 1.9% and the US 10 year bond yields rose by a marginal 3 bps to 3.91% in January. US headline inflation rose 3.4% YoY, which is higher than expected in December and non farm payrolls also increased by more than expected. These suggested the employment market is still tight and it may be too early to expect US Fed to cut rates by March 24. Nevertheless, the prospects of a rate cut this year still look possible and the market has priced in about 100bps cut in interest rates in 2024. China continued to struggle with depressed confidence among households and businesses, exacerbated by the weak property market. Deflationary pressure persisted as December CPI printed -0.3%YoY. Despite the measures announced by the Chinese government in the last few months to support the economy, it seemed that they are not enough to address the economic weakness. China GDP growth in 2024 could decelerate from +5.2% in 2023 to ~4-4.5% in 2024 if the present momentum continues, so the outlook hinges critically on government policies. Concerns about weak China growth should gradually recede if we see more policy action. In Asia, there are growth drivers that will drive the earnings for 2024 and valuation does not look excessive. We will continue to diversify and position the portfolio in areas where they are likely to print strong earnings growth such as the semiconductor industry, beneficiaries of AI spend, lower interest rate, or rising capex as well as India. Other risks would be (1) Inflation may prove more sticky than expected, (2) continued weak business and consumer sentiment in China, (3) rising geopolitical risks.

^Based on the fund's portfolio returns as at 15 January 2024, the Volatility Factor (VF) for this fund is 9.82 and is classified as "Moderate" (source: FIMM). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by FIMM based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. The Manager of the Principal Asia Pacific Dynamic Income Fund (formerly known as CIMB-Principal Asia Pacific Dynamic Income Fund) is Principal Asset Management Berhad. The Manager has appointed Principal Asset Management (S) Pte. Ltd. (formerly known as CIMB-Principal Asset Management (S) Pte. Ltd.)
