Periodic dividends may be made available at the sole discretion of the Management Company in respect of the share class with the suffix "(dist)" at the relevant frequency described in the Prospectus.

Distribution of dividends are not guaranteed. Dividends may in certain circumstances be paid out of capital, resulting in any erosion of the capital invested.

Refer to "Fund Business Operations", " Share Classes and Costs" and "Sub-Fund Descriptions – Greater China Fund" of the Prospectus for further information on features of the product.

[1] The Prospectus is available for collection from the Singapore Representative at 88 Market Street, 30th Floor, CapitaSpring, Singapore 048948 or any appointed Singapore distributor.

The Management Company is JPMorgan Asset Management (Europe) S.à r.l..

The Investment Manager is JPMorgan Asset Management (Asia Pacific) Limited.

The Sub-Advisor is JPMorgan Asset Management (Taiwan) Limited.

KEY RISKS

WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The Sub-Fund may have a higher volatility to its NAV due to its investment policy when compared to sub-funds investing in global markets, with broader investment policies and/or are a less volatile asset class.

Refer to "Risk Descriptions" and "Sub-Fund Descriptions – Greater China Fund" of the Prospectus for further information on risks and other associated risks of the product.

Market and Credit Risks

YOU ARE EXPOSED TO MARKET RISKS

Concentration – When a Sub-Fund invests in a limited number of securities, issuers, industries, sectors or within a limited geographical area, it is likely to be more volatile and risky as its performance will be more strongly affected by political, economic, environmental or market conditions within that area or economic sector.

China risks – Investing in the domestic market of the People's Republic of China (PRC) is subject to the risks of investing in emerging markets and additionally risks that are specific to the PRC market such as risks in investing through RQFII/QFII and Stock Connect.

Emerging markets may be subject to increased political, regulatory and economic instability, less developed custody and settlement practices, poor transparency, greater financial risks, higher volatility and lower liquidity than developed markets.

Equities – The value of equity securities may go down as well as up in response to the performance of individual companies and general market conditions sometimes rapidly or unpredictably.

Participation notes are exposed not only to movements in the value of the underlying equity, but also to the risk of counterparty default, both of which could result in the loss of the full market value of the participation note.

SPACs – There is higher volatility in price post-acquisition of a target as the SPAC trades as a listed equity and is subject to Equities risk. The potential target of the SPAC acquisition may not be appropriate for the Sub-Fund or may be voted down by the SPAC shareholders which foregoes the investment opportunity presented post-acquisition.

Stocks of smaller companies may be less liquid, more volatile and tend to carry greater financial risk than stocks of larger companies.

YOU ARE EXPOSED TO CURRENCY RISKS

Currency – Movements in currency exchange rates can adversely affect the return of your investment. Investing in a share class not denominated in SGD will expose you to additional currency risks.

Hedging – Any measures taken to offset specific risks could work imperfectly. Hedging may be used to mitigate currency, duration, market or credit risk. Hedging involves costs, which reduce investment performance.

Liquidity Risks

The Sub-Fund is not listed and you can redeem only on a Singapore Dealing Day.

If the total requests for redemptions and switches out of the Sub-Fund on any Valuation Day exceeds 10% of the total value of Shares in issue of the Sub-Fund, the Management Company reserves the right to defer any requests in excess of 10% until the next Valuation Day. On the next Valuation Day(s), deferred requests will be dealt with in priority to later requests.

Product Specific Risks

YOU ARE EXPOSED TO DERIVATIVES RISKS

The Sub-Fund may, within its prescribed limits, invest in derivatives for hedging and Efficient Portfolio Management purposes.

The value of derivatives can be volatile because a small movement in the value of the underlying asset can cause a large movement in the value of the derivative, resulting in losses in excess of the amount invested by the Sub-Fund.

YOU ARE EXPOSED TO SECURITIES LENDING RISKS

The use of securities lending exposes the Sub-Fund to counterparty risk and liquidity risk.

WHAT ARE THE FEES AND CHARGES OF THIS INVESTMENT?

HOW CAN YOU EXIT FROM THIS INVESTMENT AND WHAT ARE THE RISKS AND COSTS IN DOING SO?

Redemption instructions received by the Singapore Representative before 17:00 (Singapore time) on a Singapore Dealing Day, will normally be executed at the relevant NAV per Share on that day.
