**KEY RISKS**

<b>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</b>  <b>The value of the product and its dividends or coupons may rise or fall</b>  <b>These risk factors may cause you to lose some or all of your investment:</b>		Please refer to the Luxembourg Prospectus, Book I – Appendix 3 for further information on the risks of the product.
<b>Market and Credit Risks</b>		
<ul style="list-style-type: none"> <li><b>You are exposed to market risk</b> <ul style="list-style-type: none"> <li>Your investment may go up or down due to changing economic, political or market conditions that impact the prices of the bonds or other securities that the sub-fund invests in.</li> </ul> </li> <li><b>You are also exposed to credit risk.</b></li> </ul>		
<b>Liquidity Risks</b>		
<ul style="list-style-type: none"> <li><b>You are exposed to liquidity risk</b> <ul style="list-style-type: none"> <li>Liquidity risk takes two forms: asset side liquidity risk and liability side liquidity risk. Asset side liquidity risk refers to the inability of a Sub-Fund to sell a security or position at its quoted price or market value due to such factors as a sudden change in the perceived value or credit worthiness of the position, or due to adverse market conditions generally. Liability side liquidity risk refers to the inability of a Sub-Fund to meet a redemption request, due to the inability of the Fund to sell securities or positions in order to raise sufficient cash to meet the redemption request. Markets where the Sub-Fund's securities are traded could also experience such adverse conditions as to cause exchanges to suspend trading activities. Reduced liquidity due to these factors may have an adverse impact on the Net Asset Value of the Sub-Fund and on the ability of the Sub-Fund to meet redemption requests in a timely manner.</li> </ul> </li> </ul>		
<b>Product-Specific Risks</b>		
<ul style="list-style-type: none"> <li><b>You are exposed to extra-financial criteria investment risk</b> <ul style="list-style-type: none"> <li>An extra-financial approach may be implemented in a different way by management companies when setting investment management objectives for financial products, in particular in view of the absence of common or harmonized labels at European Level. This also means that it may be difficult to compare strategies integrating extra-financial criteria to the extent that the selection and weightings applied to select investments may be based on metrics that may share the same name but have different underlying meanings. In evaluating a security based on the extra-financial criteria, the Investment Manager may also use data sources provided by external extra-financial research providers. Given the evolving nature of the extra-financial field, these data sources may for the time being be incomplete, inaccurate, unavailable or updated. Applying responsible business conduct standards as well as extra-financial criteria in the investment process may lead to the exclusion of securities of certain issuers. Consequently, the sub-fund's financial performance may at times be better or worse than the performance of relatable funds that do not apply such standards. In addition, the proprietary methodologies used to take into account ESG non-financial criteria may be subject to reviews in the event of regulatory developments or updates that may lead, in accordance with the applicable regulations, to the increase or decrease of the classification of products, of the indicators used or of the minimum investment commitment levels set.</li> </ul> </li> <li><b>You are also exposed to collateral management risk, counterparty risk, currency exchange risk, derivative risk, distressed securities risk, securities and financing transaction risk, emerging markets risk, high yield bond risk, operational risk and custody risk, risks related to investments in some countries, securitised products risk and specific risks related to investments in Mainland China including changes in PRC taxation risk, risk related to direct CIBM access and risk related to Bond Connect.</b></li> </ul>		Please refer to the Luxembourg Prospectus, Book I – Appendix 3 and Book II of the Sub-fund for further information on the specific risks of the product.
