KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</p> <p>The value of the product and its dividends and coupons (if any) may rise or fall. These risk factors may adversely impact the net asset value of the product and cause you to lose some or all of your investment:</p>	<p>Refer to “RISK FACTORS” of the Prospectus for further information on risks of the product.</p>
Market and Credit Risks	
<ul style="list-style-type: none"> • You may be exposed to general market risk – the Fund is exposed to various general trends and tendencies in the economic and political situation as well as securities markets and investment sentiment, which may lead to substantial and longer-lasting drops in prices affecting the entire market. • You may be exposed to currency risk – the Fund may hold assets or have a share class denominated in foreign currencies. If these foreign currency positions have not been hedged or if there is any change in the relevant exchange control regulations, the net asset value of the Fund or Class may be affected unfavourably. • You may be exposed to issuer default risk – the issuer of securities held by the Fund may become insolvent causing its inability to fulfill his payment obligations in a full and timely manner and causing such issued assets to become economically worthless. • You may be exposed to creditworthiness risk – the creditworthiness (ability to pay) of the issuer of an asset held by the Fund may fall. This usually leads to a decrease in the price of the asset greater than that caused by general market fluctuations. • You may be exposed to sovereign debt risk – the Fund’s investment in interest-bearing securities issued or guaranteed by governments may be exposed to political, social and economic risks. The sovereign issues may not be able or willing to repay the principal and/or interest or may request the Fund to participate in rescheduling such debts. 	

<ul style="list-style-type: none"> • You may be exposed to country and region risk in Asia – the Fund's investments focus on Asia may increase the concentration risk. The Fund is susceptible to the adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event or development in and risks of this region. • You may be exposed to emerging markets risk – the Fund invests in emerging markets which are subject to greater liquidity risk, currency risk, general market risk, settlement risk and custodial risk. The Fund is additionally subject to legal, taxation and regulatory risks. 	
Liquidity Risks	
<ul style="list-style-type: none"> • The Fund is not listed in Singapore and you can redeem only on Dealing Days – there is no secondary market in Singapore for the Fund. All redemption requests may only be made in the manner described in the Prospectus. <p>Your right to redemption may be deferred or suspended under certain circumstances highlighted in paragraphs 9.3 and 12 of the Prospectus.</p>	
Product-Specific Risks	
<ul style="list-style-type: none"> • You may be exposed to the risk of interest rate changes – if market interest rates rise, the value of the interest-bearing assets held by the Fund may decline substantially. This applies to an even greater degree if the Fund also holds interest-bearing securities with a longer time to maturity and a lower nominal interest rate. • You may be exposed to downgrading risk – the credit rating of interest bearing securities held by the Fund may be downgraded. The Fund may or may not be able to dispose of the securities that are being downgraded. This may lead to a fall in the net asset value of the Fund. • You may be exposed to the risk of investing in high-yield investments and convertible bonds – these risks include increased creditworthiness risk, risk of interest rate changes, general market risk, company-specific risk, risk of default, prepayment risk and liquidity risk. • You may be exposed to valuation risk – valuation of the Fund assets may involve uncertainties and judgmental determinations which may affect the net asset value calculation of the Fund. • You may be exposed to credit rating risk – Credit ratings assigned by rating agencies are subject to limitations and do not guarantee the creditworthiness of the security and/or issuer at all times. • You may be exposed to derivatives risk – (i) the derivatives may be misvalued or may have varying valuations; (ii) the use of derivatives may not completely hedge the risk intended to be hedged; (iii) derivative may become difficult to sell. In such cases, the Fund may not be able to liquidate a position at an appropriate time or price; (iv) there is also a creditworthiness risk; (v) given the leverage effect embedded in derivatives, even a small investment in derivatives could have a substantial, even negative, effect on the performance of the Fund. • You may be exposed to China investment risk – There are numerous and varied risks associated with an investment in the Debt Securities of the PRC, such as the risks of investing in securities under the FII regime, withholding tax imposed by the PRC tax authorities, and the risks of trading in RMB. The Fund may invest in the Bond Markets of the PRC, which could expose the Fund to risks associated with utilising Bond Connect, participation in the CIBM, relying on credit ratings given by PRC rating agencies and investing in RMB-denominated Debt Securities. • The net asset value of the Fund may likely have a high volatility due to the investment policies or portfolio management techniques employed in respect of the Fund.
