

# abrdn SICAV I - China A Share Sustainable Equity Fund

A Acc USD

## Performance data and analytics to 31 March 2024

### Objective

The Fund aims to achieve a combination of growth and income by investing in companies listed on Chinese stock exchanges, which adhere to the abrdn China A Share Sustainable Equity Investment Approach (the "Investment Approach"). The Fund aims to outperform the MSCI China A Onshore Index (USD) benchmark before charges.

### Portfolio securities

- The Fund invests directly or indirectly (including through QFI, the Shanghai-Hong Kong Stock Connect programme, participatory notes, equity linked notes and any other eligible means) at least 90% in shares of companies whose securities are listed on Chinese Stock Exchanges, including, without limitation, China A-Shares and B-Shares of companies listed on the Chinese Stock Exchanges and corresponding H-Shares or other equivalent securities authorised by the CSRC for purchase by non-Chinese investors.
- All equity and equity-related securities will follow the Investment Approach.
- This approach utilises abrdn's equity investment process, which enables portfolio managers to qualitatively identify and focus investment in sustainable leaders and improvers. To complement this research, the abrdn ESG House Score is used to quantitatively identify and exclude those companies exposed to the highest ESG risks. Additionally, abrdn apply a set of company exclusions which are related to the UN Global Compact, Norges Bank Investment Management (NBIM), Weapons, Tobacco, Gambling, Thermal Coal, Oil & Gas and Electricity Generation. More detail on this overall process is captured within the Investment Approach, which is published at [www.abrdn.com](http://www.abrdn.com) under "Fund Centre".
- The Investment Approach reduces the benchmark investable universe by a minimum of 20%.
- Financial derivative instruments, money-market instruments and cash may not adhere to this approach.

### Risk and reward profile

This indicator reflects the volatility of the fund's share price over the last five years. See the relevant UCITS Key Investor Information Document (KIID) or PRIIP Key Information Document for details.

### Key risks

- (a) The value of investments and the income from them can fall and investors may get back less than the amount invested.

## Management process

- The Fund is actively managed.
- Through the application of the Investment Approach, the Fund has an expected minimum of 20% in Sustainable Investments. It also targets an ESG rating that is equal to or better, and a meaningfully lower carbon intensity, than the benchmark.
- Sustainable leaders are viewed as companies with the best in class ESG credentials or products and services which address global environmental and societal challenges, whilst improvers are typically companies with average governance, ESG management practices and disclosure with potential for improvement.
- Engagement with external company management teams is used to evaluate the ownership structures, governance and management quality of those companies in order to inform portfolio construction.
- The benchmark is also used as a reference point for portfolio construction and as a basis for setting risk constraints, but does not incorporate any sustainable criteria.
- In order to achieve its objective, the Fund will take positions whose weightings diverge from the benchmark and may invest in securities which are not included in the benchmark. The investments of the Fund may deviate significantly from the components of and their respective weightings in the benchmark.
- Due to the active and sustainable nature of the management process, the Fund's performance profile may deviate significantly from that of the benchmark.

- (b) The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- (c) A concentrated portfolio may be more volatile and less liquid than a more broadly diversified one. The fund's investments are concentrated in a particular country or sector, or closely related group of industries or sectors.
- (d) The fund invests in Chinese equities. Investing in China involves a greater risk of loss than investing in more developed markets due to, among other factors, greater government intervention, tax, economic, foreign exchange, liquidity and regulatory risks.
- (e) Investing in China A shares involves special considerations and risks, including greater price volatility, a less developed regulatory and legal framework, exchange rate risk/controls, settlement, tax, quota, liquidity and regulatory risks.
- (f) The fund may invest in companies with Variable Interest Entity (VIE) structures in order to gain exposure to industries with foreign ownership restrictions. There is a risk that investments in these structures may be adversely affected by changes in the legal and regulatory framework.
- (g) Applying ESG and sustainability criteria in the investment process may result in the exclusion of securities within the fund's benchmark or universe of potential investments. The interpretation of ESG and sustainability criteria is subjective meaning that the fund may invest in companies which similar funds do not (and thus perform differently) and which do not align with the personal views of any individual investor.

(h) The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

#### Derivative usage

- The Fund may utilise financial derivative instruments for hedging and/or investment purposes, or to manage foreign exchange risks. The use of derivatives for hedging and/or investment purposes is expected to be very limited, mainly in those cases where there are significant inflows into the Fund so that cash can be invested while the Fund's investments in equity and equity related securities is maintained.

This Fund concerns the acquisition of units or shares in a fund, and not in a given underlying asset such as a building or shares of a company.

<sup>1</sup>These are the maximum charges that we might take out of your money before it is invested. In some cases, the charges may be less and you should speak to your financial advisor about this.

<sup>2</sup>The Ongoing Charge Figure (OCF) is the overall cost shown as a percentage of the value of the assets of the fund. It is made up of the Annual Management Charge (AMC) of 1.75% and other charges. It does not include any initial charges or the cost of buying and selling stocks for the fund. The Ongoing Charges figure can help you compare the annual operating expenses of different funds. There are other applicable costs. The other operating charges figure (OOC) is the total expenses paid by each share class, against its average net asset value. This includes the annual management charge, the other operating expenses and any synthetic element to incorporate the ongoing charges of any underlying qualifying investments. The OOC can fluctuate as underlying costs change. Where underlying costs have changed, the OOC disclosed in the Fund offering Documents will be updated to reflect current changes.
