| Investment Strategy | |
| <ul style="list-style-type: none"> • The Portfolio will invest primarily in investment grade and sub-investment grade corporate hybrid bonds. • The Portfolio will seek to use fundamental bottom-up analysis principles in selecting securities for investment, meaning that the Sub-Investment Manager's analysis will focus on the strengths of individual securities as opposed to the selection of securities by reference to broader themes, such as industries. • The Portfolio will focus on securities which are listed or traded on Recognised Markets globally, and not limited by industry or sector. • The Portfolio will invest a majority of its NAV in securities denominated in Euro, GBP and/or USD. The investments will be fully hedged into its base currency through the use of forward and future contracts. • In normal market conditions, it is the intention of the Sub-Investment Manager to invest at least 50% of the Portfolio's available assets in investment grade corporate hybrid securities, although the Portfolio has the flexibility to invest in excess of 30% of its NAV in sub-investment grade securities, provided that under no circumstances will the Portfolio invest in securities which are rated below B- or equivalent by a Recognised Rating Agency. • Repo Contracts may be used subject to the conditions and limits set out in the Irish Prospectus. • The Portfolio will not utilise securities lending or margin lending. • The Portfolio will use FDIs for investment purposes, efficient portfolio management purposes and/or hedging purposes but will not use FDI extensively or primarily for investment purposes. • The Portfolio may or may be expected to have medium levels of volatility due to its investment policies or portfolio management techniques. | Refer to "INVESTMENT OBJECTIVE, FOCUS AND APPROACH" of the Singapore Prospectus for further information on the investment strategy. |
| Parties Involved | |
| <p>WHO ARE YOU INVESTING WITH?</p> <ul style="list-style-type: none"> • You are investing in Neuberger Berman Investment Funds plc, an umbrella fund of which the Portfolio is a sub-fund. • The manager is Neuberger Berman Asset Management Ireland Limited and the sub-investment managers are Neuberger Berman Investment Advisers LLC, Neuberger Berman Singapore Pte. Limited and Neuberger Berman Europe Limited. • The depositary is Brown Brothers Harriman Trustee Services (Ireland) Limited. | Refer to "THE COMPANY", "MANAGEMENT", "OTHER PARTIES" and "INSOLVENCY OF THE PARTIES" of the Singapore Prospectus for further information on the role and responsibilities of these entities and what happens if they become insolvent. |
| KEY RISKS | |
| <p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</p> <p>The value of the product and its dividends or coupons (if any) may rise or fall.</p> <p>These risk factors may cause you to lose some or all of your investment:</p> | Refer to "RISK FACTORS" of the Singapore Prospectus for further information on the risk of the product. |
| Market and Credit Risks | |
| <ul style="list-style-type: none"> • Fixed Income Securities and Downgrade Risk – Fixed income securities are subject to credit risk and price volatility. Fixed income securities are also exposed to the risk of being downgraded, which can cause a significant drop in the value | |

| | | | | | | | | | | |
|--|--|----------------------|--------------------------------|-----------------|----------------------------|-----------------|-------------------------------------|-------------------------|--|--|
| <p>of the Portfolio. The Manager or the Sub-Investment Manager may or may not be able to dispose of the debt instruments that are being downgraded.</p> <ul style="list-style-type: none">• Lower Rated Securities Risk – The Portfolio may invest in lower rated or unrated (i.e. non-investment grade or high yield) securities, which are more likely to react to developments affecting market and credit risk than are more highly rated securities. The Portfolio may therefore find it more difficult to sell such high yield securities or may be able to sell these securities only at prices lower than if such securities were widely traded. The Portfolio may experience difficulty in valuing certain securities at certain times.• Credit Risk – The Portfolio may invest in corporate fixed income securities. Corporate issuers of fixed income securities may fail to meet their interest repayments, or repay debt, which may result in the Portfolio suffering temporary or permanent losses. This risk is greater for investments with a lower credit rating.• Currency Risk – The base currency value of the investment of the Portfolio designated in another currency may rise and fall due to exchange rate fluctuations in respect of the relevant currencies. As the base currency of the Portfolio is not in Singapore dollars, Singapore investors may be exposed to an additional currency risk.• Currency Hedging Risk – Currency hedging instruments may involve the risk of a default by a counterparty. | | | | | | | | | | |
| Liquidity Risks | | | | | | | | | | |
| <ul style="list-style-type: none">• The Portfolio is not listed in Singapore and you can redeem only on Dealing Days – There is no secondary market for the Portfolio. Your right to redeem may be suspended or deferred under certain circumstances. | | | | | | | | | | |
| Product-Specific Risks | | | | | | | | | | |
| <ul style="list-style-type: none">• Risks relating to the use of FDI – FDIs may be subject to various types of risks, including market risk, liquidity risk, counterparty credit risk, legal risk and operations risk. In addition, FDIs can involve significant economic leverage and may, in some cases, involve high risk of significant loss. The use of FDIs may lead to risk of loss of capital or increase the volatility of the Portfolio's NAV.• Risks relating to corporate hybrid securities – Corporate hybrid securities are complex instruments that involve a range of special risks, including coupon deferral risk, extension risk, early redemption risk and liquidity risk. In addition, the recovery rate for such corporate hybrid securities will be significantly lower than that for senior bonds in the event of bankruptcy. Hybrid capital ranks senior only to common equity.• Risks relating to dividend payment – Dividends paid out of capital amount to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment which may result in an immediate decrease in the NAV of the relevant shares. An investment in high yield securities does not necessarily imply high dividend distribution for all share classes. | | | | | | | | | | |
