## Fund overview

**Objective:** To achieve a 5% per annum gross return above the European Central Bank base rate (or equivalent) over a 3-year rolling period, regardless of market conditions (absolute return). In seeking to target this level of return the Fund also aims to manage volatility to a target of less than half the volatility of global equities measured over the same 3-year rolling period.

**Investments:** The Fund invests in equities, bonds, money market instruments and bank deposits from anywhere in the world. The Fund may also invest in regulated funds.

The Investment Manager actively makes the investment selection decisions for the Fund.

\* Ian Pizer used to manage this fund from 01/07/2014 to 01/09/2018 and again he is an active fund manager from 06/05/2021 to present.

Please note that this is a hedged share class, and due to interest rate differential and costs associated with performing the hedging activity, this share class will have a different outcome to the equivalent share class in the base currency. For further information on Sustainability Risk please refer to the Sustainable Finance Disclosure section

## Risk measurement (As at 11th Feb 2022)

The indicator is based on historical data and may not be a reliable indication of the future risk profile. The category shown may change over time. The lowest category does not mean 'risk free'.

## Cumulative performance (%) (last 5 years, if applicable)

## Rolling annual net performance (%)

## Past performance is not a guide to future performance.

Performance basis: Measured on a NAV-NAV and NAV-NAV (net of charges) basis. NAV-NAV is calculated on a single pricing basis gross of tax payable by the Fund, with income reinvested taking into account all charges which would have been payable upon re-investment. NAV-NAV (net of charges) additionally take into account any initial charges (using max. 5% as an illustration) and redemption fees (0%).

### Past performance is not a guide to future performance.

\*The Fund is expected to operate with a volatility no greater than 50% of that of global equities. The index used to represent global equities is the MSCI All Country World Index (local currency) (the "Index"). The Fund's volatility is compared against the Index's daily volatility, annualised, over 3-year rolling periods.

The Fund's performance is measured against the European Central Bank ("ECB") rate which banks receive for depositing cash with the ECB, this is known as the "deposit facility rate".

Basis of performance is described on page 1.

## Sustainable Finance Disclosure

Sustainability Risk indicators are considered alongside a range of financial and non-financial research, with no specific limits imposed, therefore the Investment Manager retains discretion over which investments are selected. This product does not have a sustainable investment objective and the investment manager will consider the adverse impacts of an investment to the extent they are financially material. *For further information please refer to the prospectus and our website.*

## Fund risks

### Investment risk & Currency risk

The value of an investment and any income from it can go down as well as up and can fluctuate in response to changes in currency and exchange rates. Investors may not get back the original amount invested.

### Derivatives Risk

Investments can be made in derivatives, which can be complex and highly volatile. Derivatives may not perform as expected, meaning significant losses may be incurred.

### Illiquid Securities Risk

Some investments could be hard to value or to sell at a desired time, or at a price considered to be fair (especially in large quantities). As a result their prices can be volatile.

### Sustainability Risk

The level of sustainability risk may fluctuate depending on which investment opportunities the Investment Manager identifies. This means that the fund is exposed to Sustainability Risk which may impact the value of investments over the long term.

Full information on risks applicable to the Fund are in the Prospectus and the Product Highlight Sheet (PHS).

## Glossary

### Annualised performance

An annualised total return is the geometric average amount of money earned by an investment each year over a given time period.

### Volatility (%)

A measure of the fund's dispersion of returns. A higher volatility implies that a fund's return is spread over a larger range of values whilst a lower volatility implies that a fund's return is spread over a smaller range of values.

### Entry fee

A one-off charge may be taken from your money before it is invested. The charge is usually a percentage of the amount invested and is additional to the price paid for the units/shares. The entry charge is deducted from the investment before units/shares are bought and is also known as the "initial charge".

### Exit charge

A one-off charge levied on redemption of units/shares before the proceeds of your investment are paid out. This is also known as a "redemption charge".

### Ongoing charge

The ongoing charge figure represents the costs you can expect to pay annually based on last year's expenses. The ongoing charges figure is made up of various elements such as the fund management fee, professional fees, audit fees

and custody fees. Performance fees (if payable) are not included in this figure.

### Performance fee

The percentage of any outperformance of the hurdle rate and/or benchmark that will be taken as a performance fee.

### NAV

NAV is typically an End Of Day valuation using close of market prices to value the individual securities with the portfolio or fund, rolling up to a total portfolio or fund level.

### Management Fee

The management fee is fixed rate charge to cover the costs of managing the investments of the fund. It accrues daily based on a percentage of the fund's net asset value and deducted from the fund's assets.
